# Strategy Focused on Consistent Profitability

# Global Tailwinds

## International Market

- Global finished steel prices had witnessed a significant drop of almost 15%-20% in the initial 6 months of FY20, have now started to recover. The positive development on US-China trade war, production cuts in China due to winter season pollution control, and restocking pre-Chinese New Year being the key drivers.
- Global iron ore prices have returned to the US\$80-90/t range after jumping up to US\$130/t due to supply disruptions in Brazil and Australia. It is expected to remain range bound in near term.

## Domestic Market

- **Major domestic supply shortfall of iron ore from March 2020 onwards:** 288 Mining leases are set to lapse which translates to a production loss of c.85 mtpa – 40% of India's Iron Ore Production. The GoI has started now the mine auction process but expectation of loss of 6months of production is very much a possibility.
- Industry experts are witnessing a drop in inventory at both the mill & market level as the de-stocking process seems to have ended. Demand is expected to gradually pick-up across the steel value chain

# Increased Captive Consumption Provides Significant Margin Expansion

Significant captive mining capacity & multiple long-term linkages aid in lowering costs & improving margins

Iron Ore Production (MT)

## Coal

- Significant scope for margin expansion – The company has long term linkage of coal with Coal India for 75% of its total requirement. However only ~60% of its total requirement is being met from Coal India due to lack of availability. Full benefit of Coal Linkages is yet to be obtained.

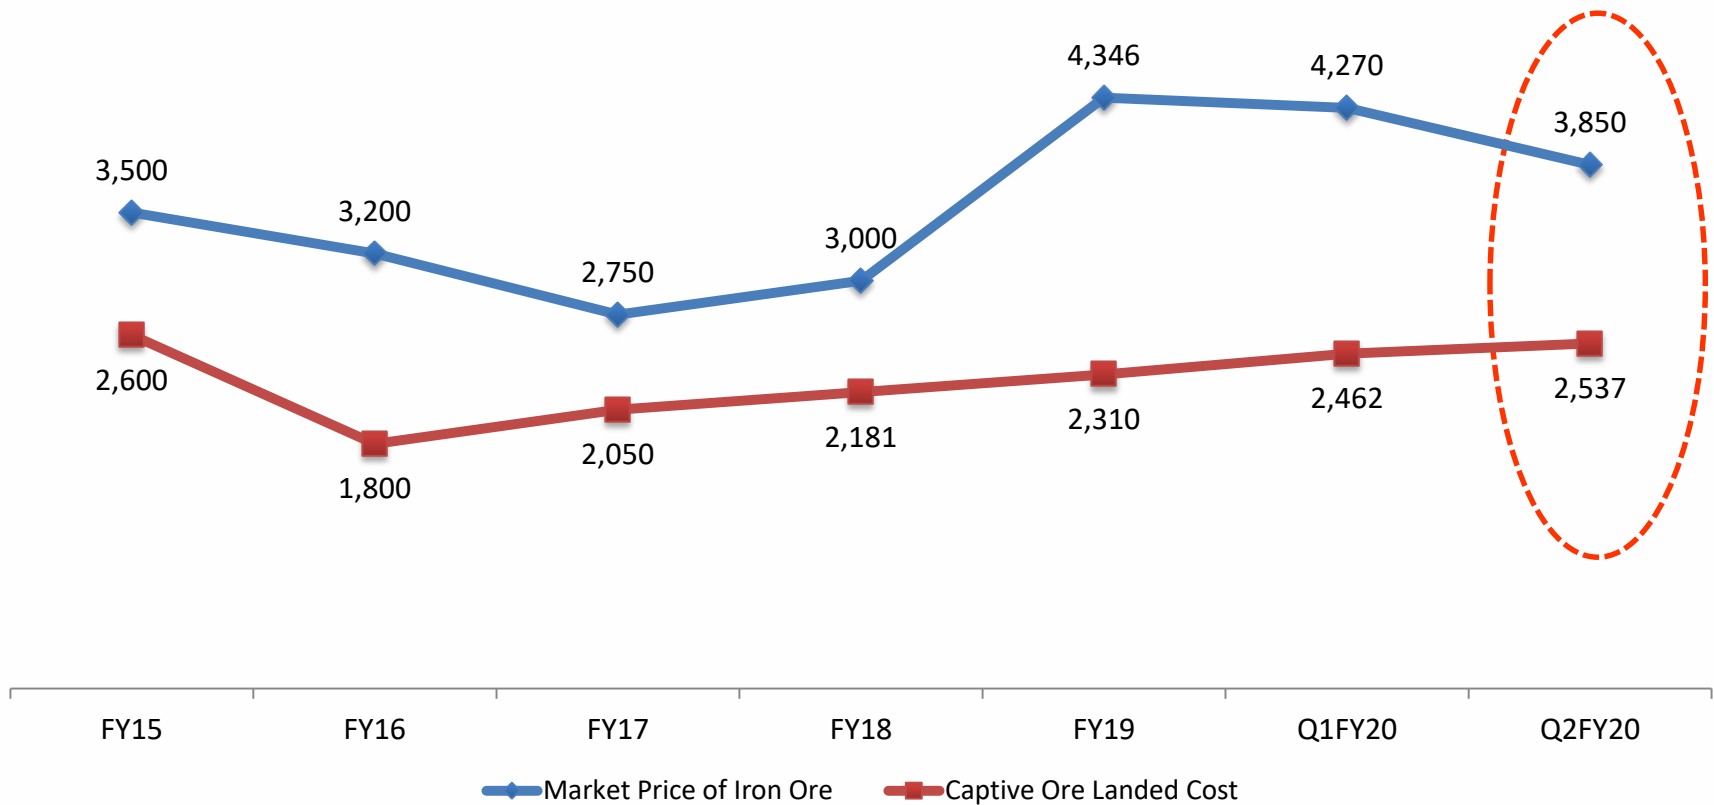

## Power

- In-plant power generation capacity of 73 MW
- 42 MW captive energy from waste heat recovery + 11 MW from coal thermal plant + 20 MW biomass power capacity
- Additional 25 MW from Jagdamba Power PPA

## Water

- Agreement with Chhattisgarh Ispat Bhoomi Ltd to draw 10,000 KL of water/day

# Captive Mining Leading To Huge Raw Material Costs Saving

## How we improved Sustainable EBITDA

	Production (MT)	Cost Savings at Mid Cycle (Rs/Tonne)	EBITDA (Rs Mn)
FY16 “Bottom of Cycle” EBITDA			2,086
Increase Captive Iron Ore Production	0.90	1,000	900
Increase in Pellet/Sponge Iron Production	0.88	1,500	1,320
Increase in Steel Production	0.13	5,000	640
Sustainable Standalone EBITDA			4,946

# FY20: Three Pronged Strategy to Drive Growth

## Asset Optimisation

- Increasing capacity utilisation across value chain to over 90%

## Focus on Value Addition

- Billet capacity utilisation to improve to 90%+
- Commissioning of additional wire rod capacity
- Focus on manufacturing of high grade pellets

## De-leveraging

- Incremental free cash flows to be used for debt reduction
- Gross Debt to be reduced by INR 2,200-2,500 mn in FY20; Have repaid equivalent to full year scheduled repayment of 1,032 Mn in H1
- Capex of ~INR 1 bn including maintenance capex

# Business Strategy Going Forward

## Efforts Towards Greater Operational Efficiencies

- Billet production increased through long term supply of power under PPA with Jagdamba.
- Aiming towards 100% captive utilisation of sponge iron for increased production of steel billet
- Further value addition on steel billet through manufacture of rolled product by commissioning the new rolling mill of 200,000 MT. Rolling mill has been constructed, consent to operate is awaited from state pollution control board which is expected to receive by Q4FY20. Expected savings of INR 1,000/MT on incremental production of rolled products.
- New product addition for manufacture of fabricated galvanized which lead to further improve in operating profitability
- Free cash flow from operation to be utilized towards deleveraging, aiming to become a long term debt free company.

# Incremental Cash Flows to be Utilised for De-Leveraging

All figures in INR MN

## Debt Repayment Schedule

*FY20 Repayment Guidance: INR 2.2 – 2.5 Billion*

# Group Structure

 Non-core businesses

 No change in structure; will remain as they are

 To be wound down; operations discontinued

# The Winning Combination

Improving competitive advantage  
through greater integration and higher  
value addition

Restoring balance  
sheet strength  
through significant  
dele

Disposal of non  
core assets to  
become a focussed  
steel company

***Target to become a debt free dividend paying company***

# Outlook on Global Steel Demand

Crude Steel Production (in MT)

\*Data until September 2019

- In 2019 World Steel forecasts that steel demand in China will grow by 7.8% to reach 900.1 Mt and the rest of the world is expected to record 0.2% growth to 874.9 Mt.
- In 2020, Chinese steel demand is expected to grow by 1.0%, whereas steel demand in the rest of the world will grow by 2.5%, driven by 4.1% growth in the emerging and developing economies excluding China.
- Global steel demand will grow by 3.9% to 1,775.0 Mt in 2019 and will grow by another 1.7% in 2020, reaching 1,805.7 Mt.

Source : World Steel Association

# Domestic Demand Outlook

Source : IBEF

- Steel manufacturing output of India is expected to increase to 128.6 MT by 2021, accelerating the country's share of global steel production from 5.9% in 2018 to 7.7% by 2021
- Government's initiatives to ease NBFC liquidity crisis should revive the growth in the economy
- Capacity has increased to 137.98 MT in 2017-18 while in the coming ten years the figure is expected to touch to 300 MT steel.
- Affordable housing and infrastructure projects to propel demand
- India surpassed Japan to become the world's second largest steel produced in 2018, with crude steel production of 106.5 million tonnes.

## Subsidiary | Godawari Green Energy

- Facility located in village Naukh, Jaisalmer, Rajasthan
- GGEL has been set up to implement project awarded under Jawaharlal Nehru National Solar Mission, Phase I of Govt. of India
- The first plant to be commissioned in India & is operational since FY14
- Take-off arrangement under fixed price PPA with NTPC Vidyut Vyapar Nigam (NVVN) for 25 years at 12.20 per unit of power supplied
- Project debt structured under 5-25 scheme for infrastructure project thereby giving a repayment tenor of 15 years, beginning from September 2016
- Operating cash-flow of solar plant is self sufficient to meet its debt obligation, without resorting to GPIL standalone cash-flow.
