Management Commentary

- Commissioning of several new production lines in India within a short span coupled with subdued order flow from overseas customers (geo-political crisis, supply chain corrections, and currency fluctuations) led to disruption of overall demand supply scenario as well as the margins. Impact on Cosmo was minimal as our strong and growing portfolio of speciality films is least prone to competitive pressures.
- Margins were also under pressure in the overseas subsidiaries due to increase in raw material costs, weakening of foreign currencies against US dollar particularly in Japan and Korea.
- The near-term outlook for non-specialty films could be challenging however the Company will continue to expand on specialty films growth.
- BOPET line was commissioned two days before the end of Q2. Our focus shall be to rapidly develop value add and speciality products.
- Despite drop in Q2,FY23 earnings, our financials remain strong with annualized ROCE and ROE at 25% and 32% respectively.

Speciality & Semi Speciality Growth and Margins

- Expanding Speciality & Semi-Speciality films portfolio (high margin category) (FY22 64% volume; 19% CAGR over last 3 years).
- Target 80%+ volume from Speciality & Semi Speciality segment by 2024.

Note: Margins denote per/kg contribution for respective films categories.

STRATEGIC PERSPECTIVE

BUSINESS OVERVIEW

“FILMS BUSINESS”

Films Business-India Industry Dynamics & Capex Strategy

- Global BOPP demand is estimated to be approx 9 million(+) MT per annum
- The global demand and supply are broadly balanced

- Currently India BOPP production capability is estimated at approx. 800k MT per annum.
- India domestic BOPP consumption is approx. 600k MT per annum and remaining is broadly exported.
- Indian BOPP Industry has been growing at almost double of the India's GDP growth rate over long term

- Strong domestic and global demand is helping efficient capacity utilisation.

India BOPP Demand & Supply Dynamics:

- Considering low packaged food penetration in India and rising personal disposable income, the Industry is estimated to grow fast.
- Investment in organized retail industry and change in pack format from rigid to flexible is going to further add to increasing demand.
- Based on capacity addition announced in India, new capacity expected in the Industry may not be able to address growing India demand.

- Company's future capex strategy is aligned with target to increase speciality to 80% by 2024 and launch of specialized BOPET Line during H2FY23.
- Further expanding BOPP and CPP capacity by putting World's largest lines.
