## Results Summary

- Healthy growth across business verticals
- Omnichannel strategy including online, rural, modern trade and enterprise business penetration playing out well, adding new customers and broad basing demand channels
- There has been increased conversion in projects and B2B
- Increase in commodity cost remains unabated with severe escalation in a rather short period
- Price increase have been staggered creating a lag affect on margins
- However, we maintain a positive outlook on demand growth which could support margin as well
