An aerial photograph of a large industrial complex. The foreground is dominated by a massive white warehouse with a corrugated metal roof. To the right of the warehouse, there are several large white cylindrical storage tanks. In the background, there is a large power substation with numerous high-voltage power lines and towers. The surrounding area is a mix of green fields, roads, and other industrial buildings under a cloudy sky.

Company Overview

About Us

Incorporated in 1990, Filatex India Ltd. has emerged as one of the top five manufacturers of Polyester Filament Yarn.

Starting with chips to yarn, Filatex has moved to latest technology Melt to Yarns. We are a customer focused organization with state of art technology and stringent quality measures. We strongly believe that polyester will be the fibre of the future.

Our mission

-  To attain highest level of trust, integrity and honesty in business
-  To encourage people's ownership, empowerment and working under team structure
-  To manufacture at an affordable cost that provides our customers a competitive advantage
-  Strive to maintain an edge over its competitors due to consistent product quality and low operating cost

Our vision

To be one of the leading polyester yarns manufacturer producing products to international standards, to be customer focused through stringent quality assurance and continuous innovation.

Our values

Integrity and Honesty in Business

Customer Satisfaction & Delight

Encourage Creativity & Innovation to drive people, product & processes

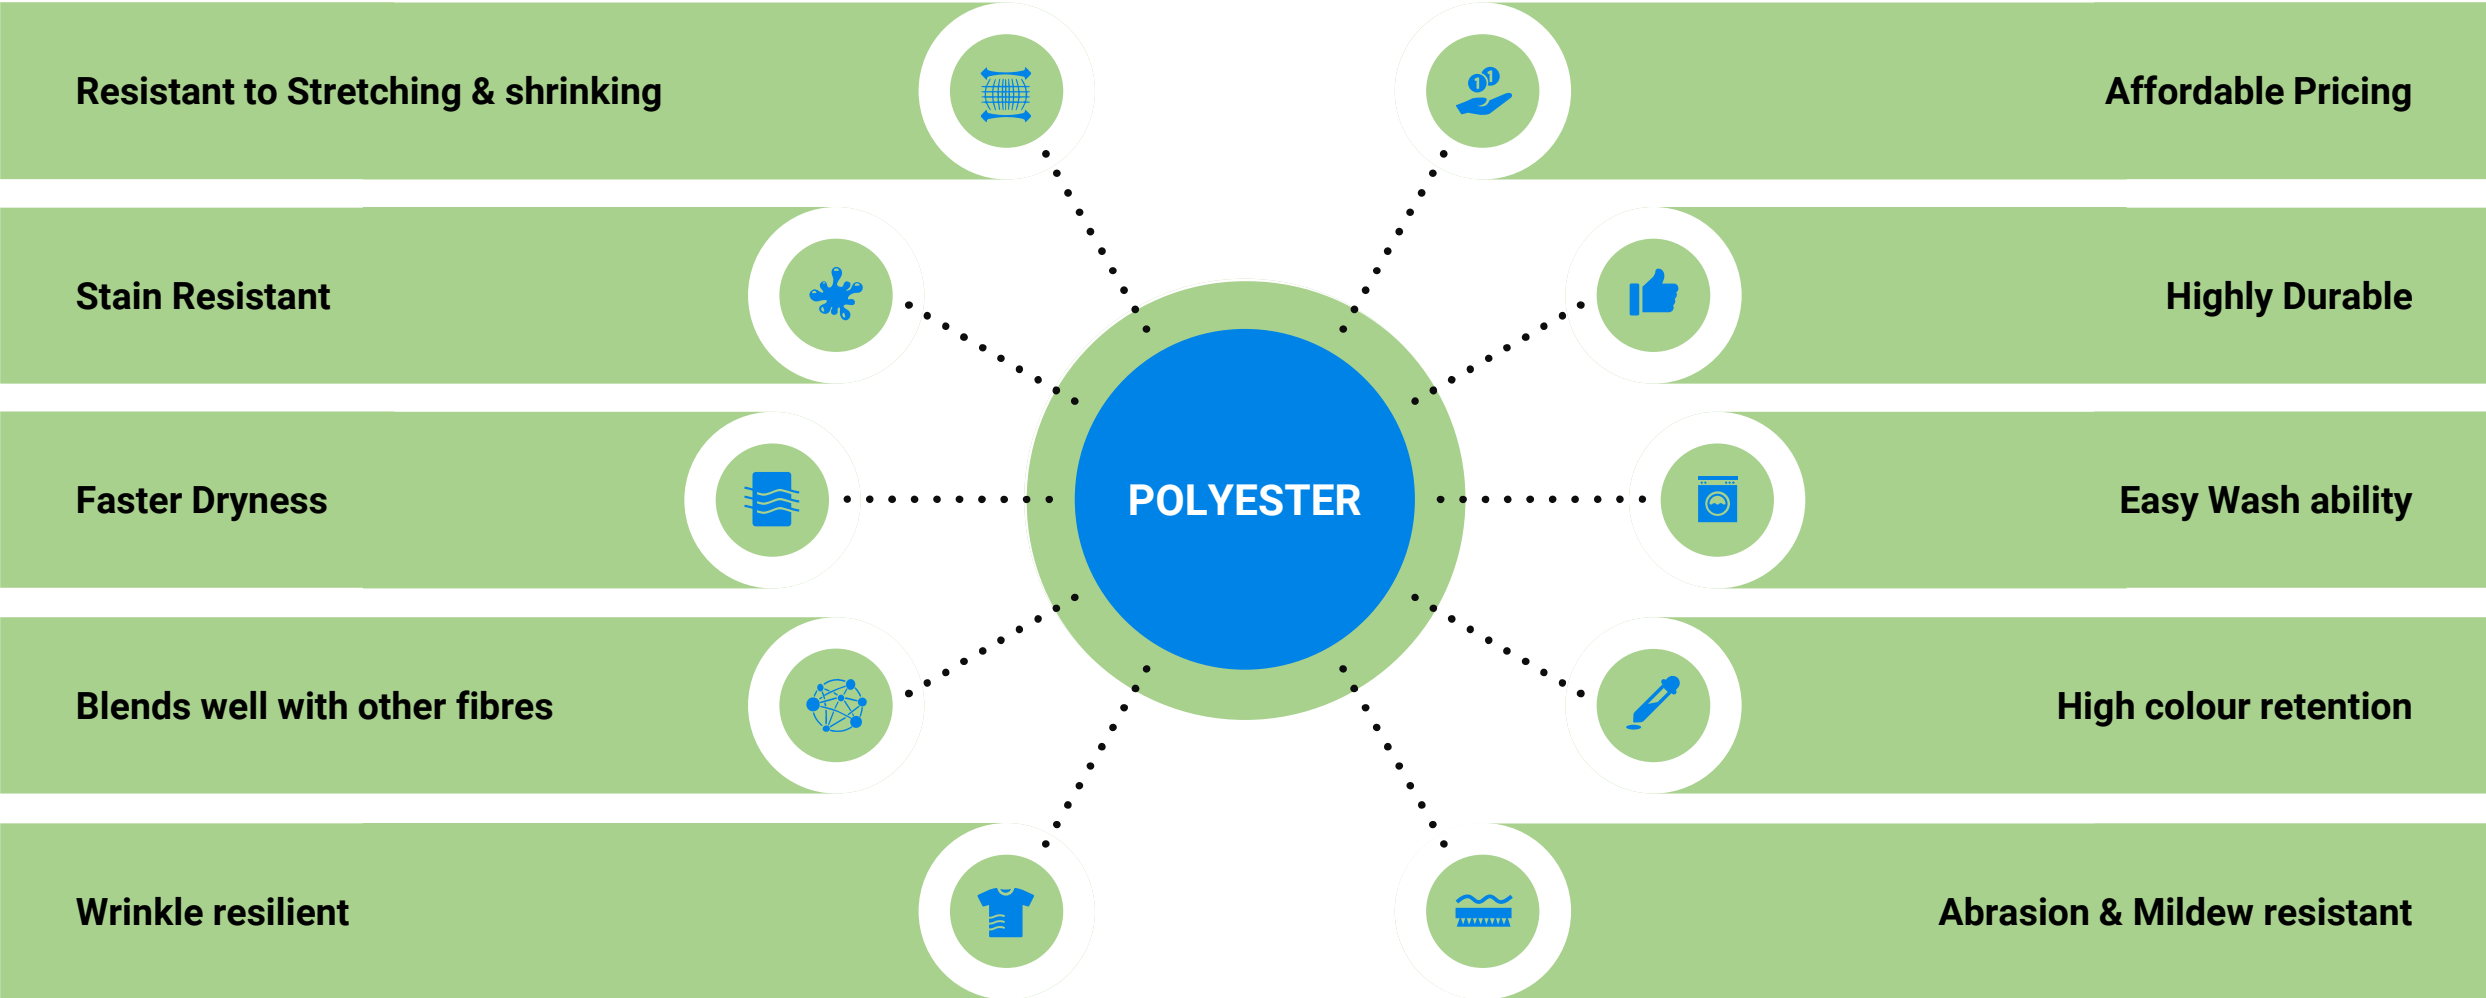

To promote safe work practices

To protect the environment & community

We believe that Polyester will be fibre of the future. Filatex has focused its future growth plans on Polyester Filament Yarns.

Exporting to **34** countries across the Globe

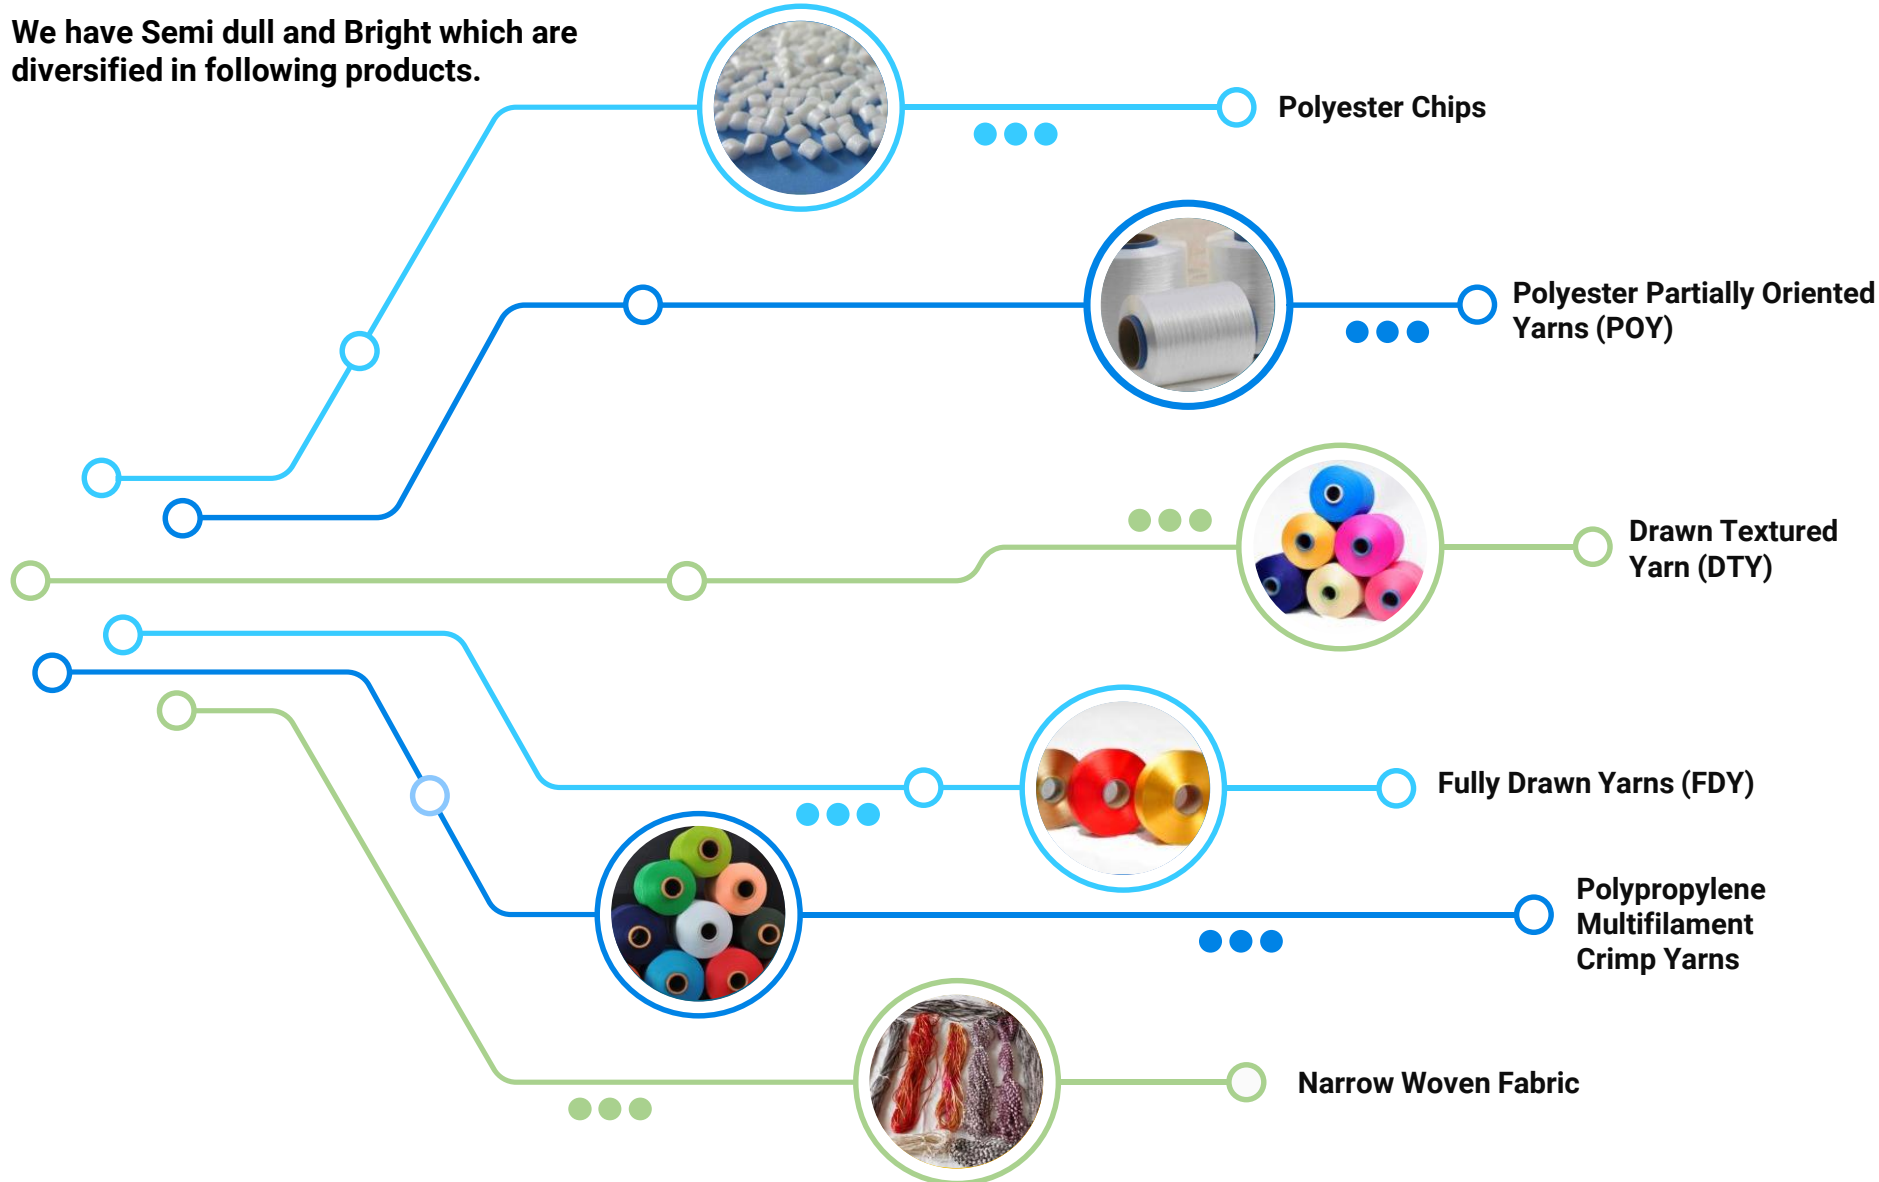

Over **50%** of DTY production is exported

Exports contributed **~20%** of overall Revenues in FY18

Capacity increased over the years
From **500** MTPA
To **328,300** MTPA

We have Semi dull and Bright which are diversified in following products.

- 1 Industrial intermediate product used to manufacture Polyester yarns.
- 2 Intermediate product, post Texturizing used for knitting & weaving different kinds of Fabrics.
- 3 Produced by drawing & heating POY through a texturing process. It is used for manufacturing Fabrics.
- 4 Fully drawn polyester filament yarn is directly used for producing all kinds of Fabrics specially for children and ladies.
- 5 Different shades and deniers, the range being used for Socks, Under Garments and Sports Wear.
- 6 Used in manufacture of Carpets, Rugs, Tapes, Ribbons and Zippers

Apparel

Polyester Filament Yarns are extensively used in apparels – Trousers, Shirts, Suitings & Sarees. PFY is a strong filament that can withstand strong & repetitive movements. Colour Fastness of Polyester Fiber is excellent. Its wear resistant, water resistant, wrinkle resistant and hydrophobic properties make it ideal for all kinds of apparels.

In these garments, seam softness is critical. The Textured Micro Denier have met the expected requirements and are being used in Lingerie, Performance garments - Active wear, Yoga wear, low shrinkage to ensure no seam distortion after washing & soft feel make these yarns ideal choice.

Women Wear & Under Garments

Home Textiles & Furnishings

Fully Drawn Yarn of Polyester are being used for Home Furnishings, Fashion Fabrics, Terry Towels, Bed Sheets, Curtains & Carpets. Other growing applications are Upholstery Fabrics. Stain resistance makes it ideal for carpets.

The preferred material for sportswear is Polyester Yarn. Sports leisure clothings require a fabric that's not only strong & durable but also abrasion resistant. Ease of washing & corrosion resistance make them easy to maintain with longer usage life.

- Narrow Woven Fabrics

Key Strengths and Growth Drivers

Increasing Per Capita Income

- India's per capita income at current prices during 2017-18 is estimated to have attained a level of Rs. 1,12,835 as compared to the estimates for the year 2016-17 of Rs. 1,03,870 showing a rise of 8.6 percent.
- Increased disposable income simulated the demand for value-added products. The demand for premium apparel is likely to increase adding to the 'feel good' factor, catalyzing polyester demand.
- If India's GDP growth rate is 7%, the textile sector will grow at 10.5%. The employment and GDP growth would result in increasing per capita income. When per capita income crosses the threshold value of around 2.5-3 lacs, the growth in domestic demand would be explosive.

Rapid Urbanization

- According to projections, an estimated 140 million Indians could move to cities by 2020 and 700 million by 2050.
- Besides, the number of cities with population above one million could nearly double with increase in the number of mega-cities (above five million) to 10 by 2021 and 36 by 2051.
- Urbanization is expected to result in a growing demand for daily wear, casual wear, sportswear & other lifestyle products which are durable in nature meeting aesthetic requirements as well.

Government Policies

- The new indirect tax regime is expected to enhance compliance, uniform tax rates and structure with the removal of cascading taxes resulting in lower transaction costs.
- The polyester yarn industry is likely to benefit. Major yarn producers are likely to cater the fabric and garment sector after rationalization of GST.
- Now, Fabric and Garment sector is likely to see a good investment from organized sector.

Rationalized Tax Structure

- To encourage domestic manufacturers of man-made fibres, there is an increase in import duty on many textile and apparel items from 10% to 20% or Rs.38 per sq. mt., whichever is higher, on all polyester items in the value chain.
- This will ultimately encourage the domestic synthetic yarn sector by restricting the imports and providing price parity in the domestic market.

Increasing Exports

- Capacity built over years has led to low cost of production per unit in India's textile industry; this has lent a strong competitive advantage to the country's textile exporters relative to key global peers.
- The sector has also witnessed increasing outsourcing over the years as Indian players moved up the value chain from being mere converters to supply chain partners of global retail giants.
- Textile exports witnessed a growth (CAGR) of 6.89 per cent over the period of FY06 to FY17. In the coming decades, Africa and Latin America could very well turn out to be key markets for Indian textiles.

Home Textile Industry

- India's home textile industry is expected to expand at a CAGR of 8.3 per cent during 2014–21 to US\$ 8.2 billion in 2021 from US\$ 4.7 billion in 2014.
- India accounts for 7 per cent of global home textiles trade. Superior quality makes companies in India a leader in the US and the UK, contributing two-third to their exports.
- The growth in the home textiles would be supported by growing household income, increasing population and growth of end use sectors like housing, hospitality, healthcare, etc.
