# O1 About Suyog Telematics

## **Company Overview**

Suyog Telematics Limited is a dynamic player in the telecommunications industry, specializing in cutting-edge telecom tower infrastructure solutions. The company is committed to driving connectivity in both urban and rural areas. Known for its strategic approach, Suyog Telematics focuses on high-power small cell infrastructure, fiber connectivity, and environmentally friendly solutions. With a diverse portfolio and a client base that includes major telecom operators, the company plays a key role in transforming cities into 5G-ready hubs and powering rural villages with advanced network capabilities.

Experience of 25+ years

**Key Telecom Circles** 

- ✓ Built 10,000+ Roof Top Towers for BSNL(EPC)
- ✓ Only IP company to have maximum Govt. sites (in % terms) o Pole Erection
- ✓ Presence in all crucial circles in Small Cell Segment (essential for 5G deployment)

#### Services Offered:

- o Tower Erection
- o Fiber Optics Network Solution

4300+

#### **Product Portfolio:**

- Ground Based Tower
- o Roof Top Tower
- o Cow Tower
- o GBM Tower
- o Camouflage Tower

# 02 Business Overview

## **Business Overview** (1/2)

With a robust foundation spanning over **two decades**, the company has honed its **expertise in providing innovative**, **reliable**, **and cost-effective solutions** to meet the evolving demands of the telecommunications sector.

As a key player in the telecom tower infrastructure landscape, Suyog Telematics is committed to pioneering advancements that drive connectivity and technological progress.

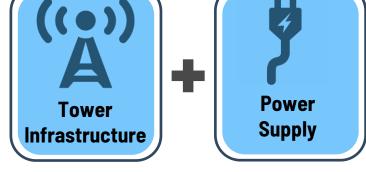

## **Business Overview** (2/2)

Supported with **FIBERIZATION** 

Providing the Telecom Service Providers with ready infrastructure on long term lease to deploy their active communication related equipment like Antenna & BTS.

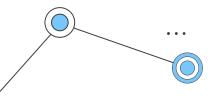

The lease arrangement is backed by Master Service Agreements which includes Service Level Agreement for ensuring site uptime for Telecom companies.

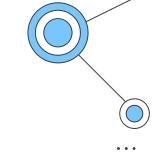

Enabling Telecom companies to proactively grow on a faster pace and speedy 5G roll out across India in all telecom circles.

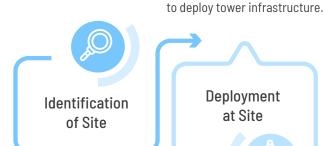

## **Business Model**

Company secures co-locations with tenures extending beyond seven years, accompanied by exit penalties, contributing to the establishment of robust recurring revenue streams.

Deployment at Site

After identifying a location,

company secures a lease for the

land from the owner and proceed

発 Infrastructure Sharing

Sustainable Revenue Model

Margin Accretive

In response to customer requests, company meticulously identify optimal locations. The site identification process, managed by it's acquisition team, is a critical step to ensure the

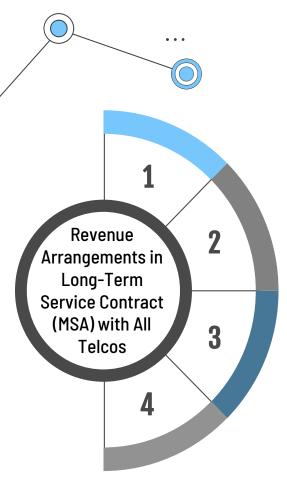

ongoing expansion of their asset

portfolio for long-term sustainability.

Company leases out the erected tower infrastructure to wireless tenants through long-term agreements, to as Master Service referred Agreements (MSA), at a predetermined fee. Tenants are responsible for owning and operating the active equipment, such as antennas and BTS, at the site.

Incorporating new tenants at their sites involves minimal additional operating costs compared to the onetime fixed cost. This contributes positively to the bottom line, fostering higher profitability margins and creating wealth for stakeholders.

## **Master Service Agreement**

(Long Term Service Contracts)

#### IP (Infrastructure Provider) Fees

IP Fees is based on:

- Location type (GBT, RTT, Pole Sites, etc.)
- City Premium
- No. of Operators on the location

#### Site Rentals

Rentals are billed under one of the following models:

- Based on actuals
- Inbuilt as a fixed cost with IP Fees

#### **Loading Charges**

Loading charges are determined either through agreed fixed charges or based on the equipment installed by telcos at the sites.

#### **Utilities Allocation**

Actual fuel costs passed to telcos; electricity charges equally shared among operators; diesel costs shared based on actual usage among operators

10+ years with annual escalation of 2.5%

#### **Service Level Agreement**

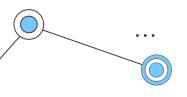

The MSA incorporates SLA specifying the company's commitment to ensuring site uptime for Telcos.

#### **Payment Terms**

Advance monthly payment terms

## **Government Sites Agreements**

#### Tie-up with Government Agencies

MMRDA Wards, MMRDA, NHAI, BEST, Monorail, JNPT, SEEPZ, Gujarat Govt.

#### **Allotment Process**

Tender/Government Policies

#### Sites on Government Establishments

Flyovers, Skywalks, Foot over bridge, Highways, Monorail, Bus Depot, CCTV, Pole Sites

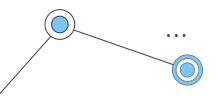

#### Average Contract Tenure

10 Years

#### **Advantages of Government Sites**

- Low Capex Requirement
- Low Rentals
- Permission for laying Fiber Optic network is also available which is utmost critical for mobile operators
- All Prime & Critical Locations
- No threats of termination
- High demand sites by all telcos
- Contract easily extendable through tenders or Government policies

(Linked by Fiber Connectivity)

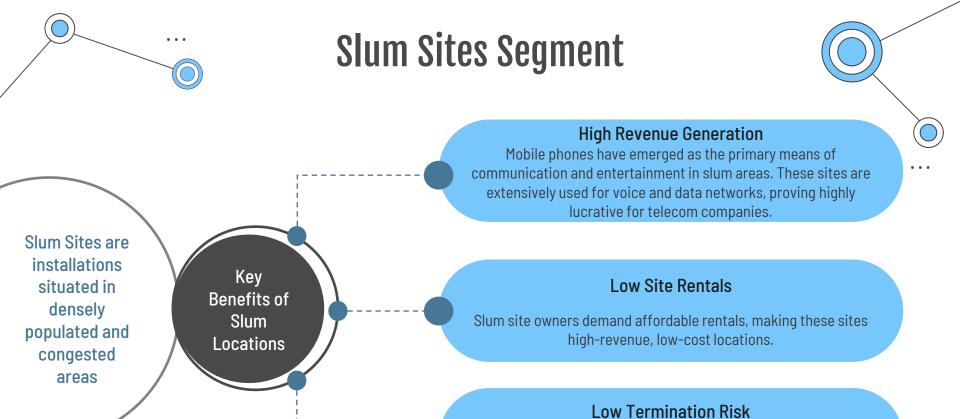

- The CCTV Sites in the Mumbai Circle have proven highly successful, characterized by their substantial data generation and minimal operating costs.
- Operating in critical and densely populated areas, many of these sites handle loads exceeding 50 amps.
- The risk of site termination is minimal, given approval from local corporations and support from nearby police stations.
- Most of our CCTV Sites are linked with Aerial Fiber, equipped with SMPS and 100AH BB.
- Additionally, we adhere to Telecom Companies' requirement of providing an AGL of 12 meters.

As mobile networks have become a necessity, providing additional revenue to slum site owners, the likelihood of site terminations is minimal.

## **Small Cell Towers**

(Essential 5G Backbone)

Seamless deployment for any technology is facilitated by the easy connection of small cells with aerial fiber.

Savings in the consumption of electricity.

Simplified deployment in compact spaces without the need for significant infrastructure.

Low Rentals

Reduced rental costs enable the formulation of more ambitious deployment plans.

Less Capex Minimal Capex needs allowing for more extensive rollout planning by telecom companies.

#### 3800+

"Operational Small Cell Tenancies" as on 31st December 2023

- ))) Latest Advancement in the telecom sector
- Prospective Growth Driver for the Indian Telecom Tower Industry
- SUYOG is strategically positioned in every crucial telecom circle throughout India in the Small Cell segment.

## **Key Competitive Strengths**

#### **IP-1 License Holder**

Niche Telecom Infrastructure Providing Organisation

#### **Tenancies**

Operations across 15 key telecom circles (26 states & UTs) with a **PAN INDIA VISION** 

#### **Government Locations**

Highest Number of Government Sites – MMRDA, NHAI, BEST, Monorail, JNPT, MCGM, and more.

#### **Diverse Telecom Operators**

Engaged with major telecom operators, including Bharti Airtel, Reliance Jio, Vodafone Idea, Tata, and BSNL.

#### **Geographical Footprint**

Over 5100+ tenancies encompassing Slum Sites, Flyovers, Sky Walks, Foot over Bridges, BEST, Monorail, CCTV, Small Cell, and ULS Sites in the portfolio.

#### **Expertise**

25 years of expertise in constructing telecom towers, specializing in costeffective and swiftly deployed infrastructure.

69.7%

## Telecom Industry Overview (2/2)

From

#### **Traditional Approach**

Telecom operators have invested heavily in building and maintaining their own networks by investing in physical infrastructure

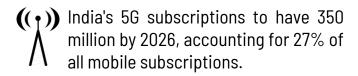

SHIFT

To

#### NaaS Approach

Network-as-a-Service enabled operators to lease network resources from third-party providers, reducing the need for extensive physical infrastructure.

This shift has allowed Telecom operators to scale their operations rapidly, adapt to changing market demands, and allocate resources efficiently, being more flexible and cost-effective.

The Government of India has introduced Digital India programme where sectors such as healthcare, retail, etc. will be connected through Internet.

## Passive Infrastructure Industry Overview

(IP -1: Infrastructure Providers)

### Before 2000

Telecom <u>service providers were installing towers</u> on their own and <u>no sharing of infrastructure</u>.

#### In 2000

Telecom Infrastructure <u>Industry came into existence</u> with DoT inviting applications for IP-1 registrations.

## Up To 2005

Telecom Towers were operated under <u>integrated</u> <u>model without sharing of infrastructure</u>.

The robust and state of the art TELECOM INFRASTUCTURE

has been the fundamental backbone for the growth of telecom services and the unprecedented success of India's Telecom Sector.

Indian Telecom Infrastructure Industry

Laid a strong foundation of growth for the telecom sector.

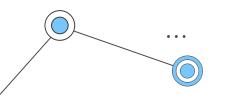

Supported the telecom sector in keeping pace with fast-paced technology advancements

#### After 2005

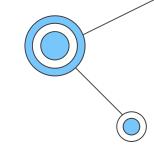

<u>Telecom Towers industry evolved</u> with **independent tower companies installing and maintaining towers** and related Infrastructure & <u>leasing it to Telcos</u> and <u>sharing of infrastructure</u> by these tower infrastructure companies.

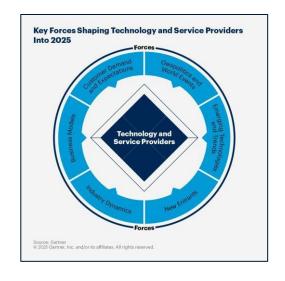

Source: IBEF, TRAI, ET Telecom & Others

## **Gartner Forecast for IoT**

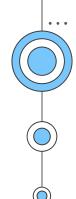

Spendon the Internet of Things (IoT) across key industries reached over \$268 billion in 2022, and IoT devices are forecast to grow at a compound annual growth rate (CAGR) of 15% from 2021 through 2025.

5G will ensure continuous growth of wireless connections in next 5 years due to many upcoming USE CASES across all sectors like Healthcare, Automotive, Industry, Mining, etc.

Source: Gartner Report dated 8<sup>th</sup> June, 2023

Offering a comprehensive range of telecom services, including wireline and wireless local loop (WLL) telephone services, mobile services, broadband, internet, leased circuits, and long-distance telecom services.

## **BSNL** (The Growth Perspective)

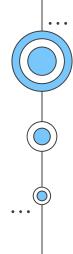

#### Government's Objective

- Reposition BSNL as a resilient telecom service provider with a particular emphasis on bridging connectivity gaps in remote regions of India.
- The Union cabinet has granted approval for a comprehensive revival package amounting to Rs. 89,047 crore (\$10.79 billion) for BSNL, encompasses the allocation of 4G/5G spectrum through equity infusion.
- The approved package extends budgetary support for various spectrum bands, laying the foundation for BSNL's technological advancement and enhanced service offerings.

#### BSNL's Strategic Plan

- Nationwide deployment of 4G and 5G coverage, along with the provision of high-speed internet through Fixed Wireless Access (FWA) services.
- o Start its 5G services in 2024 (as stated in January 2023 by the telecom minister).

# 04 Way Forward

Suyog telematics

## **Way Forward**

## 5G-Ready Urban Infrastructure

Our high-power small cell infrastructure is preparing urban cities for the advent of 5G technology.

Bringing 5G Connectivity to Rural Villages through Our RLS Sites

#### Revolutionary FTTH

Empowering Homes with Unprecedented 5G Speed through Our FTTH Solution

Fiberizing Mobile Towers for accelerated 5G Deployment

## Our Growth Drivers (1/2)

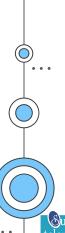

## BSNL's 4G/5G Rollout (Nationwide)

- BSNL targets nationwide 4G rollout by June 2024, followed by transition to 5G services.
- A prominent company secures large telecom equipment order for 100,000 sites, aiding BSNL's transition to 4G with potential for 5G upgrade.
- BSNL partnered with multiple tower infrastructure companies to provide crucial tower infrastructure for widespread 4G network expansion.

#### Small Cell Towers

- Small cells are fundamental for nationwide 5G deployment.
- Mr. T. R. Dua of DIPA estimates a need for ~12,00,000 towers for PAN India 5G rollout, with ~7,50,000 towers already in place, set to be upgraded to 5G via fiberization.
- Suyog is expanding its small cell tower infrastructure to support the 5G rollout for various operators.

## Our Growth Drivers (1/2)

## Optical Fiber Cable (OFC) Network

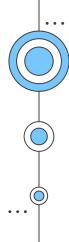

Ŋţ

## Fiber-to-the-Home (FTTH) Network

- Fiberization links mobile towers with optical fiber cables, crucial for 5G deployment.
- It's essential for upgrading existing telecom tower infrastructure.
- Suyog is actively transitioning towers from microwave to optical fiber technology.

- The rise in IoT devices emphasizes the necessity for strong network infrastructure.
- 5G integration in FTTH facilitates seamless IoT device integration, promoting smart homes, cities, and interconnected systems.
- Suyog is involved in projects aimed at deploying FTTH networks.
