OCTOBER 2023

INSIDE THE PRESENTATION

KEY MESSAGE

"The continuous and increasing influx of Chinese imports was unabated in this quarter. In order to retain their market share, Indian manufacturers were forced to cut their prices to align with import rates, which are lower by INR 4-5/kg. The industry has been grappling with an erosion of margin. This has had an adverse impact on profit margins despite a higher volume of sales.

To further increase the share of renewable energy, the company has signed PPA and SHA with Onevolt Energy Pvt Ltd, a 100% subsidiary of Amplus Energy Solutions Pte Ltd, to procure solar power as a captive consumer under the Inter-State Transmission System (ISTS) for both its plants in Dahej and Dadra."

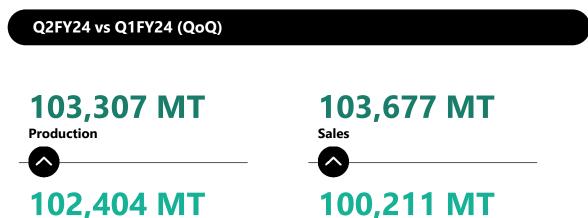

MADHU SUDHAN BHAGERIA

Chairman & Managing Director

QUARTERLY PROFIT AND LOSS STATEMENT

OPERATIONAL GROWTH

[#] Due to national lockdown and COVID-19 restrictions, the plants were shut for almost 8 weeks and upon resumption, were permitted to operate at an initial capacity of 30%. With a gradual increase in production, the company has finally achieved yarn capacity utilization exceeding 90% in September 2020.

^{*} Includes Job Work of 6,530MT (in FY16) and 10,487MT (in FY17)

Polyester is the most widely used fibre worldwide. With an annual production of around 61 million tonnes, polyester's market share was approximately 54% of the global fibre production in 2021.

Rapidly changing fashion trends and modern living standards will drive the growth of high-end polyester fibres with high durability, quick-drying, and easy-toclean properties. Polyester fibres are also exclusively used for sports and athleleisure clothing due to their lightweight and moisture-wicking properties, further accelerating market growth.

93%

Growth in World Fibre Production in the last 13 years has come from Synthetic Fibres

GROWTH DRIVERS FOR INDIAN MMF INDUSTRY

SHIFT IN DEMAND **TOWARDS MMF**

The global textiles business is transitioning from cotton to man- made fibres (MMF) and technical textiles. To encourage this transformation, the Indian government has enacted a number of schemes and regulations, including the PLI scheme, the National **Technical Textiles Mission** (NTTM), and MITRA.

INCREASING ONLINE TREND

Low ticket sizes, deep discounts, the availability of a more comprehensive product range, and shopping festivals have all contributed to significant online sales in recent years. Moving forward, changing lifestyles combined with increased internet access among the general population would pave the way for a convenient and hassle-free online shopping experience, boosting demand in the textile sector.

LOWER THAN WORLD AVERAGE PER CAPITA FIBRE CONSUMPTION

India's per-capita fibre consumption is 5.5 kg, which is less than half the global average of 11 kg. The consumption of MMF in the the global average (69%) and that of developed countries, indicating a huge potential for MMF in the country.

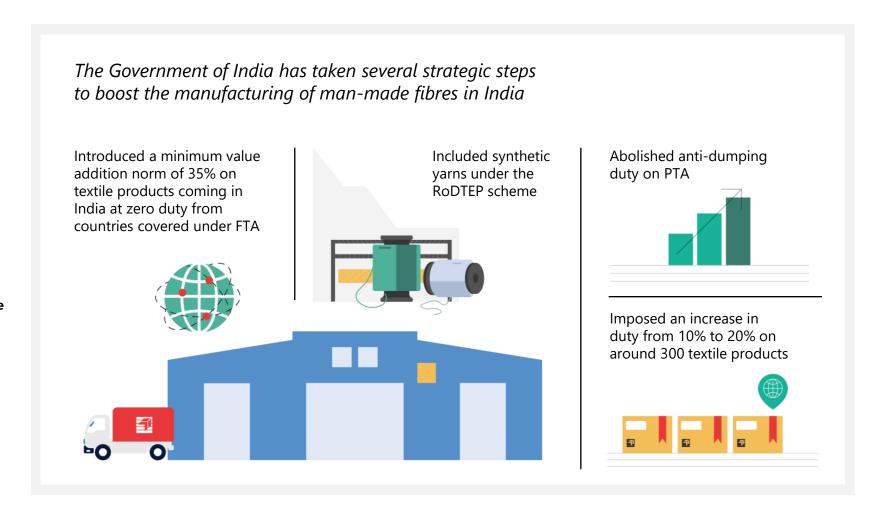

POLICY INITIATIVES

7 Mega Textile Parks

The government has approved setting up seven mega textile parks under the PM-MITRA scheme at a total outlay of INR4,445 crore, with an intension to generate about one lakh direct and two lakh indirect jobs per park.

₹10,683 Cr - PLI

The Union Cabinet in September approved the production linked incentive (PLI) scheme of INR10,683 crores for the textile sector to promote the production of high value Man-Made Fibre (MMF) fabrics, garments, and technical textiles.

BEING A RESPONSIBLE CORPORATE CITIZEN

Prioritising Recycling

After undertaking research activities and successful lab trials to develop a scalable way to recycle polyester waste including textile waste, we set up a pilot plant with a capacity of 1.5 tonnes/ day. This pilot plant helped us optimise the process parameters for scaling operations and now, we are planning to set up facilities for manufacturing recycling chips with a capacity of 20,000 MTPA.

Focus on Renewable Energy

We currently source power from rooftop solar power plants at both its plants, with 1 MW at Dahej and 0.91 MW at Dadra as well as 0.9 MW from a 3rd party hybrid wind solar plant. Committed to further reducing our carbon emissions, we are also procuring renewable energy from a hybrid wind and solar power plant with a capacity of 10.8 MW in Gujarat. In order to take advantage of the recently developed inter-state transmission system, we have entered into an agreement to procure power from a solar power plant of 19.5 MW in Rajasthan.

Environment Conservation

We recycle our packaging materials, paper tubes and wooden pallets. In addition, to do our bit towards environment conservation, we use a composite food waste machine that produces fertilizer from the canteen food waste. This is then used to maintain the green cover outside and inside our premises. We also treat our effluent water in the plant and reuse it for non-drinking purposes, thus following a zero liquid discharge policy.

GROWING WITH OUR COMMUNITIES

We have always prioritized sustainability and social responsibility as much as the business. We continue to fulfil our role as a responsible corporate citizen by investing in a range of initiatives that target the current needs of the local communities as well as their future development.

COMPANY OVERVIEW

COMPANY OVERVIEW

Filatex India Limited is among the country's leading manufacturers of Polyester Filament Yarn focused on capitalising synergies created through its integrated business model.

Driven by capable leadership, the Company remains focused on increasing capacities, widening its reach, maximizing efficiency, allocating capital effectively, and ensuring sustainability.

OUR PRODUCTS

POLYESTER CHIPS: Industrial intermediate product used to manufacture Polyester yarns.

FULLY DRAWN YARNS /FDY: Fully drawn polyester filament yarn is directly used for producing all kinds of fabrics specially for children and ladies.

POLYPROPYLENE MULTIFILAMENT CRIMP YARNS: In different shades and deniers, PP yarns are being used for Socks, Under Garments and Sports Wear.

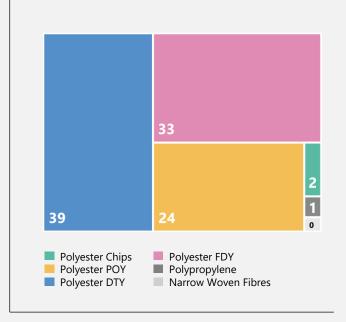

POLYESTER PARTIALLY ORIENTED YARNS /POY: Intermediate product which post texturizing is used for knitting & weaving different kinds of fabrics.

DRAWN TEXTURED YARNS/ DTY: Produced by drawing & heating POY through a texturing process. It is used for manufacturing fabrics for multiple applications.

NARROW WOVEN FABRICS: Used in manufacture of Carpets, Rugs, Tapes, Ribbons and Zippers
