Quarterly Performance

Volumes (MT)

- Impacted due to slowdown in Auto Industry
- In Q3 - Aggressively participated in the volume off-take in order to maintain wallet share

Revenue from Operation (Rs. In crores)

- Prolonged slowdown resulted into temporary oversupply scenario leading to price suppression
- Full impact of ADD in this quarter

Total Conversion cost* (% to Revenue)

- Lower capacity utilisation resulted into operating deleverage
- Price suppression to some extent was net off through internal efficiency

Operating EBITDA (%)

- Depressed market leading to Price Suppression
- Full ADD impact
- Operating leverage did not play out

Industry Scenario:

- Volume de-growth seems to have bottomed out. Pick up in sales volume expected
- Price depression seems to be more of temporary nature, in the worst case for few months

Our Strategy:

- Focus on gaining Market share
- Focus on optimisation of resources
- Q4FY20 volumes expected to be highest in FY20
- Depending on the relationship coupled with higher volume off-take price aggression strategy will be selectively rolled out

Maintain Guidance of Marginal de-growth in volume for FY20 in the range of 0% to 5%
