**Q3 FY24 PERFORMANCE** 

## Management's Message

"The end market demand environment continues to witness elements of softness further accentuated by inventory destocking. We believe that inventory destocking is largely behind now. End market demand is being monitored closely.

We at Uniparts continue to focus on our operational endeavors, leverage our competitive strengths and strong financial profile to optimize the opportunities emerging in the rapidly changing and evolving operating environment.

Uniparts has built a resilient business model and is confident to withstand the short-term challenges and emerge stronger and better positioned for future growth. We are focusing on utilizing current short lean patch by investing for growth and ensuring readiness of our facilities and resources. Our focus and efforts are aligned with the medium-term business plan for achieving the targeted growth in coming years. Company's business continues to generate healthy cashflows lending further strength to the balance sheet and growth ambitions."

Mr. Gurdeep Soni

Mr. Paramjit Singh Soni

## **Operating Environment Update**

North America: Ag equipment market demand is soft in the short term especially for smaller equipment. Construction machines market is steady with infrastructure driven demand.

Europe: Demand from OEM customers is stable to marginally down.

Aftermarket segment: As guided previously, inventory destocking at customer's end continued through Q3. Destocking impact has largely bottomed out now. Q4 is expected to have very minimal adverse impact on this account. Aftermarket segment is witnessing early signs of demand stabilization and revival.

Demand in Indian Domestic Tractor market has been witnessing some softness in the current fiscal year. Export models are more impacted due to small-ag softness in export geographies.

UTV 3PL project is progressing well for pilot batch sales by Q4 end. Q4 will also witness first sales to the new after market customer which is the second largest retail stores group in USA

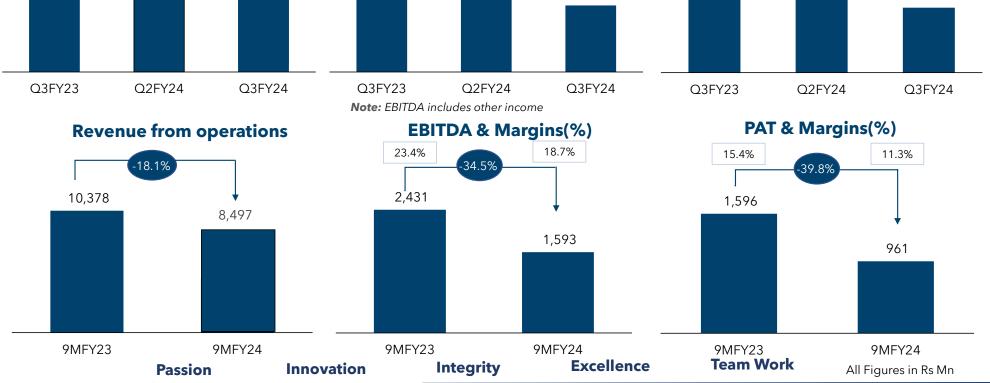

The new enquiries, engagements, conversions owing to the China+1 theme continue to show good traction.

Focusing on utilizing current short lean patch by investing for growth and ensuring readiness of our facilities and resources.

Business continues to generate higher than guided cashflow thereby strengthening the balance sheet further.
