Renewables cheapest option to recover from Covid-19: IRENA

New Delhi: Renewable power is increasingly cheaper than any new electricity capacity based on fossil fuels, a new report by the International Renewable Energy Agency (IRENA).
Competitive power generation costs make investment in renewables highly attractive as countries target economic recovery from Covid-19.
The report, 'Renewable Power Generation Costs in 2019', shows that more than half of the renewable capacity added in 2019 achieved

lower power costs than the cheapest new coal plants. The report highlights that new renewable power generation projects now increasingly undercut existing coal-fired plants. On an average, new solar photovoltaic (PV) and onshore wind power cost less than keeping many existing coal plants in operation, and auction results show this trend accelerating -- reinforcing the case to phase out coal entirely.
Next year, up to 1,200 gigawatts (GW) of existing

coal capacity could cost more to operate than the cost of new utility-scale solar PV, the report shows. Replacing the costliest 500 GW of coal with solar PV and onshore wind next year would cut power system costs by up to \$23 billion every year and reduce annual emissions by around 1.8 gigatons (GT) of carbon dioxide (CO2), equivalent to five per cent of total global CO2 emissions in 2019.
It would also yield an investment stimulus of \$940 billion, which is equal

to around one per cent of global GDP.
We have reached an important turning point in the energy transition. The case for new and much of the existing coal power generation is both environmentally and economically unjustifiable, said Francesco La Camera, Director-General of IRENA.
Renewable energy is increasingly the cheapest source of new electricity, offering tremendous potential to stimulate the global economy and get people back to work.

Enhancement of turnover limit of MSME sector to help exporters

New Delhi: The Government's decision to increase the turnover limit for medium units from Rs 100 crore to Rs 250 crore will help infuse technology and promote automation in certain sectors and boost outbound shipments, according to exporters.
Federation of Indian Export Organisations President Sharad Kumar Saraf said that exclusion of exports turnover from total turnover will help in internationalisation of MSMEs and will bring their focus on exports. This will also benefit a lot of gems and jewellery companies, who would have breached the MSME criteria due to sheer cost of their inputs, he said in a statement. The cabinet approved further increasing the limit for medium manufacturing and service units to Rs 50 crore of investment and Rs 250 crore of turnover. The turnover with respect to exports will not be counted in the limits of turnover for any category of MSME units whether micro, small or medium. The move is most pragmatic and will also infuse technology as in certain sectors margins are so low.

Govt approves Rs 50K crore equity infusion for MSMEs

New Delhi: The Union Cabinet approved Rs 50,000 crore equity infusion for MSMEs to strengthen their growth potential.
The government also approved Rs 20,000 crore subordinate debt for stressed MSMEs.
Union Minister Prakash Javadekar said the decision on equity infusion will also enable micro, small and medium enterprises (MSMEs) to get listed on stock exchanges.
A fund of funds with corpus of Rs 10,000 will be set up. The fund of funds will be operated through mother fund and few daughter funds. The fund structure will help leverage Rs 50,000 crore of funds at daughter funds level.
The subordinate debt for stressed MSMEs is likely to benefit 2 lakh stressed MSMEs.
Meanwhile, the government further amended the definition of MSME. Turnover limit for medium enterprises has been revised upward to Rs 250 crore from Rs 100 crore as announced earlier.

Non-subsidised LPG rate hiked, aviation fuel ups by Rs 11,000/kl

New Delhi: Oil marketing companies have hiked the prices of non-subsidised cooking gas and aviation turbine fuel. The price of the 14.2 kilogram cylinder of non-subsidised LPG gas in Delhi has been raised by Rs 11.50 of India Chairman Rajnish Kumar said. So far, the rupee h0 from May to Rs 593 per cylinder.

Jio platforms accounted for 85% of all PE/VC investments in May

New Delhi: The month of May recorded investments worth \$5.4 billion across 58 deals, with \$4.6 billion invested in Jio Platforms, according to the IVC-A-EY monthly PE roundup.
Private equity and venture capital investments almost doubled in May 2020 on year on year basis. Jio Platforms received \$4.6 billion in PE/VC investments in May 2020, accounting for 85 per cent of all PE/VC investments during the month.
The Financial services sector accounts for over 60 per cent of all PE/VC exits by value and volume in May. Fundraises in the first five months of 2020 are a third of the funds raised during the same period last year.
Exits recorded \$286 million across 11 deals, with financial services sector accounting for over 60 per cent of all exits by value and volume.
Vivek Soni, Partner and National Leader - Private Equity Services, EY India said, The fundraising spree by Jio Platforms has pushed Indian PE/VC investment in May 2020 above \$5 billion. Adjusting for these mar-

quee deals, Indian PE/VC investment activity is on a downward trajectory. Nonetheless, these deals help highlight investor confidence in the India story.
The defensive sectors are witnessing renewed interest from investors. In May 2020, life sciences sector received the second highest amount of PE/VC investments of \$354 million after telecom.
On the exits front, financial services sector recorded the highest value of exits as investors looked to book some profits in listed securities after the recent recovery in the equity indices.
Given that the curve of COVID cases is yet to flatten decisively in some zones that account for a large part of the country's economic activity, the virus will continue to remain a major headwind that both the government and private enterprises will need to tackle in the near future till such time a definitive cure is found, Soni said.
If not for Jio Platforms, PE/VC investments would have recorded a fourth straight month of decline, recording just \$791 million in investments, a 72 per cent y-o-y decline and 15% lower than April 2020. In terms of vol-

ume, deals in May 2020 declined 28 per cent y-o-y and 23 per cent sequentially (58 deals in May 2020 vs. 80 deals in May 2019 vs. 75 deals in April 2020).

Only 5% Asia Pacific infra firms highly exposed to Covid-19 disruptions: Moody's

New Delhi: Barely 5 per cent of the rated project and infrastructure companies in Asia Pacific have high exposure to coronavirus disruptions, Moody's Investor Service said.
Pressure has eased for Chinese toll roads, while a small number of utilities face moderate exposure, it said. A high proportion (67 per cent) of rated project and infrastructure companies in Asia Pacific continue to have low exposure to the coronavirus-related disruptions, supported by their essential nature and predictable cashflows, Moody's Investors Service said in a statement.
The number of companies with high exposure has reduced in recent months, particularly the Chinese toll road sector following the end of the toll-free period and with recovering traffic volumes, said Arnon Musiker, senior vice presi-

dent and manager at Moody's. Airports now make up most of the high exposure category, he said.
Whereas Moody's in April estimated 9 per cent of project and infrastructure companies had high exposure to coronavirus disruptions, this number has now declined to 5 per cent.
On the other hand, a small number of power utilities now have moderate exposure to coronavirus disruption, given rising pressure from falling power prices and lower demand, which is only partly offset by lower fuel costs.
