Strategies changed to tackle Export Duty

Particulars	Current Status
Focus on Domestic Sales	Company was mainly exporting iron ore pellets & wire rods prior to imposition of export duty. Company has a competitive advantage as it produces High-Grade Iron Ore Pellets. Sales of pellets and wire rods have been diverted to the local market and company is confident of achieving the targeted volumes.
Ongoing Capex	Company is committed to move forward with the stated capex of Rs.5000Mn for the current year for setting up captive solar power plant, capex in the mining and replacement of old turbines with new turbines to improve the plant efficiency.
Greenfield Steel Project Capex	The project is still under the evaluation process and the final project size will be depending upon the evolving market conditions and the future cash flows of the company.

International & Domestic Tailwinds

International Market

- From \$158/t on 1st April, iron ore prices have fallen to \$80/t, as recession worries take hold. The demand and consumption of steel and other commodities is subdued in China due to covid and real estate crisis and in rest of the world due to interest rate hikes. Expectation is that by H2FY23, things will improve due to China's stimulus to support economic growth, however uncertainty remains due to its zero Covid policy.
- Iron Ore prices post correction are expected to stay in the range of \$80-\$120/t for rest of the year. Also, imports of Iron Ore Pellets of China reduced by 33% in Jan-Sep'22 compared to same period last year because of the sustained crude steel production cuts and weak domestic demand. This trend is expected to remain the same.

Domestic Market

- Government levied export duty on Iron Ore (from 0%/30% to 50%), Pellets (from NIL to 45%) and Steel (from NIL to 15%) in May'2022. This has led to sharp drop in domestic iron ore price. NMDC has cut iron ore prices by approx Rs2000/t. Also, iron ore production for FY23 is estimated to be lower. Pellet prices decreased from Rs.14,000/t in April'22 to Rs.7,450/t and is presently trading at Rs.8,000/t.
- Domestic iron ore prices have likely bottomed out, at much higher level than historical levels. The support has come from the cost curve which has moved up by Rs1000-1500/t post the auction of iron ore mines. At current iron ore prices many domestic mines have become unviable. Some support has also come from improvement in domestic demand of steel due to increased off take from Infra projects.
- Going forward, improvement in prices of iron ore and pellets will depend on the impact of export duties. However, downside remains largely protected due to cost curve.
