India Industry Dynamics and Capex Strategy

- ❑ Global BOPP demand is estimated to be approx 8 million(+) MT per annum
- ❑ The global demand and supply are broadly balanced

- ❑ Currently India BOPP production capability is estimated at approx. 700k MT per annum.
- ❑ India domestic BOPP consumption is approx. 550k MT per annum and remaining is broadly exported.
- ❑ Indian BOPP Industry has been growing at almost double of the India's GDP growth rate over long term

Strong domestic and global demand is helping efficient capacity utilisation.

India BOPP Demand & Supply Dynamics:

- ❑ Considering low packaged food penetration in India and rising personal disposable income, the Industry is estimated to grow fast.
- ❑ Investment in organized retail industry and change in pack format from rigid to flexible is going to further add to increasing demand.
- ❑ Based on capacity addition announced in India, new capacity expected in the Industry may not be able to address growing India demand. On current India BOPP Industry demand base, one new line each year may not be sufficient to address India's growing demand.

- ❑ Company's future capex strategy is aligned with target to increase speciality to 80% by 2023 and launch of specialized BOPET Line during FY23. These will majorly de-commoditized business model
- ❑ Further expanding BOPP and CPP capacity by putting largest lines by FY25
