Researchers have long studied LockBit＇s hacking tools，determ－ ining that the group regularly up－ dates its malicious software in or－ der to avoid detection from cybersecurity products．One strain of malware，dubbed Lock－ Bit Black，showed that the gang had experimented with a kind of self－spreading malware that would make it easier for hackers to infiltrate victim organizations without the technical expertise typically required to do so， Sophos Group Ltd．researchers wrote in a blog post．
Exactly how many people are involved in LockBit and where they are based is unknown，but the gang has said on its website that it doesn＇t attack post－Soviet Union countries because most of its developers and partners were born and grewup there．
Because the Chinese govern－ ment banned trading in crypto－ currency－hackers＇preferred method of payment－gangs don＇t often target the region，ac－ cording to Wåhlén．China has also traditionally been considered an ally to Russia，he said，making it a lessertarget of those with Russian ties．
