CP issuances jump 60% as desirability rises in rates

SACHIN KUMAR Mumbai, December 4

CP is a debt instrument issued by companies to meet their short-term financing requirements from the primary market. Among major issuances, Tata Power Com-

'Corp bond market to grow to ₹100 trillion by 2030'

THE CORPORATE BOND market growth is expected to gather pace in coming years, and its overall size is likely to be more than double to over ₹100 trillion by March 2030, a report said on Monday.

Domestic credit rating agency Crisil said push to capital expenditure, attractiveness of the infrastructure sector and the general financialisation of savings will be the key drivers for this growth.

Corporate sector balances

Corporate sector balances and strong economic outlook, the agency said, adding that the period till FY27 alone will see investments of over ₹110 trillion. The corporate bond market is expected to finance a sixth of the estimated capex, which is likely to double to over ₹100-120 trillion by March 2030.

The agency's senior director, Somasekar Venuri, said regulatory interventions are also likely to be minimal. The growth in capex will be driven by the very high capacity utilisation, healthy

quarter is usually better for the credit growth in sync with corporate activities, therefore working capital requirement is also expected to be high. And with elevated input cost owing to higher inflation, overall requirement for CPs will be high," said Soomeyaji Nyogi, director, co-managing director, India Ratings & Research.

Overnight rates in the money market were hovering in the 6.75%-6.85% range in November, compared with 6.55%-6.75% in October. But rates have been inching upwards in the past few months due to tighter liquidity. The Reserve Bank of India has made clear that it is not comfortable with surplus liquidity in the system. Higher liquidity pressures bank to lend generously, which, in turn, fuels inflation.

CP issuances are likely to remain high in coming months as the central bank is expected to have kept rates tighter and the credit demand usually remains high in the second half of the financial year. Total CP issuances by NBFCs, housing finance companies and corporates were around ₹6,25,000 crore in November, according to India Ratings & Research.

Natural gas consumption, import rise as prices ease

ARUNIMA BHARADWAJ New Delhi, December 4

INDIA'S CONSUMPTION OF Liquefied Natural Gas (LNG) is expected to rise further in the coming months due to growing demand from the fertilizer and power industries, analysts said. Anticipated lower spot LNG prices will further add to this growth.

"Our current forecast for December, January, and February averages at 76 MMcfd, with an upside risk of 4 MMcfd to this forecast, as spot prices are now expected to average around \$16/MMBtu for the next three months, incentivizing spot buying for the industrial sector," S&P Global said in a note.

AT A GLANCE

India imported 2,337 MMSCM of LNG in October, up by 18.2% from October 2022

During April-October, India imported 17,753 MMSCM a 13.4% increase compared with the year ago period

Generation in the power sector was driven by higher peak thermal demand amid low hydro power generation

MMcM/d, 4 MMcM/d lower than in 2022.

The rise in imports will likely be driven by the anticipated increase in available LNG supply during the last quarter of 2024, putting downward pressure on spot LNG prices. "If spot prices in Q4 2024 average around \$15/MMBtu, it may encourage an additional 5-6 MMcM/d of spot imports," S&P Global noted. "Consequently, there is an overall potential upside of roughly 3-4 MMcM/d for our 2024 forecast, currently set at 87 MMcM/d. This adjusted forecast could

and power sectors. Higher gas generation in the power sector was driven by higher peak thermal demand amid reduced hydro power generation.

India generated 101,969.4 GWh of hydro power during April to October, a decline of 15% from 119,432.4 GWh in the same period a year ago.

"Lower spot LNG prices and the resurgence of 9 MMcM/d of term supplies from SEFE played pivotal roles in driving this increased gas demand in the power sector," analysts at S&P Global said.

Power sector consumed an average of around 23 MMcM/d in Q3 of FY23, an increase of roughly 8 MMcM/d from the previous year.

Power sector consumed an average of around 23 MMcM/d in the third quarter of FY23, reflecting an increase of roughly 8 MMcM/d from the previous year.

Moreover, Indian Oil Corporation and Bharat Petroleum have been keen on purchasing spot LNG cargoes even as prices remain elevated at \$16 per MMBtu, reflecting their appetite to consume LNG at a higher rate. Indian Oil has awarded tenders for three cargoes for November and December delivery at around \$15.5/MMBtu, whereas BPCL has awarded a spot cargo for November delivery in mid-\$16/MMBtu, analysts said.

Over 50% of bank loan write-offs linked to large industries in FY23

ENS ECONOMIC BUREAU New Delhi, December 4

OVER HALF OF the total loans written off by Scheduled Commercial Banks in the financial year 2022-23 belonged to large industries and services sector, data presented by the Ministry of Finance in Parliament on Monday showed.

A total of ₹2.09 trillion worth of loans were written off by banks in FY23, out of which 52.3% was linked to large industries and services, minister of state for finance Bhagwat Karad said in response to a question in Lok Sabha.

Brent prices extend fall

ALEX LAWLER London, December 4

OIL PRICES EXTENDED declines on Friday, pressured by investor scepticism over the latest OPEC+ decision on supply cuts and uncertainty surrounding global fuel demand, though the risk of supply disruptions from the Middle East conflict limited losses. Monday's fall adds to a 2% decline last week after Thursday's announcement by the Organisation of the Petroleum Exporting Countries (OPEC) and allies, including Russia, together known as OPEC+.

Continued pressure from the OPEC+ decision," said Vanda Anil, founder of oil market analysis provider Vanda Insights.

The OPEC+ cuts were voluntary in nature, raising doubts about whether or not producers would fully implement them. Investors were also unsure about how the cuts would be measured.

"The OPEC+'s deal last week was unconvincing to say the least," said Craig Eriani, analyst at brokerage OANDA. "And with markets seeing anticipat-
