## Nod to BrahMos, 3 other def deals worth ₹35k crore

Cabinet committee on security has approved four defence deals worth ₹35,000 crore. These include a ₹19,500 crore contract for over 220 BrahMos with 450km strike range to arm frontline warships — the largest-ever contract for these supersonic cruise missiles. Another deal is for new engines for existing MiG-29 fighters. **P 23**

## CCS nod for defence deals worth ₹35k-cr

**New Delhi:** The cabinet committee on security has given the final nod to four major defence deals worth around Rs 35,000 crore to bolster combat capabilities of the armed forces, including the largest-ever contract for the BrahMos supersonic cruise missiles. The CCS on Wednesday evening cleared the almost Rs 19,500 crore contract for over 220 extended-range BrahMos missiles, with a strike range of 450-km, to arm frontline warships of the Navy, sources told TOI. The contract will be inked in early-March.

New advanced engines for the existing MiG-29 fighters in IAF fleet, which will be manufactured by Hindustan Aeronautics with Russian collaboration for about Rs 5,300 crore, was another deal to get the green-light.

The two other projects are for high-powered radars and new versions of the L-70 air

defence guns, both of which will be manufactured by L&T with some foreign technology for almost Rs 5,000 crore each, the sources added.

The BrahMos missiles, which are jointly manufactured with Russia in India, fly almost three times the speed of sound at Mach 2.8, have become the "prime conventional (non-nuclear) precision-strike weapon" for the armed forces, with contracts worth over Rs 38,000 crore already inked over the years.

"The new Rs 19,500 crore contract, which is the first consolidated order for the extended-range BrahMos missiles, will add to this. Till now, upgrades of the existing 290-km range missiles were being done only when the warships came in for refits or maintenance," a source said.

"The new missiles will be delivered over five to six years," he added. A 800-km variant of BrahMos is also under development, as was earlier reported by TOI.
