### Gold falls as investors evaluate US rate cut

Gold prices fell as investors assessed the prospects of monetary policy easing in the US this year, as the Fed hinted that interest rates would stav higher for longer. Spot gold fell 0.7 per cent at \$2,301.15 per ounce by 0943 GMT. US gold futures were steady at \$2,310.30. REUTERS

### Copper retreats on weak China demand

London: Copper prices extended losses as physical demand remains weak in China. Three-month copper on the LME shed 0.8 per cent to \$9.812 a tonne. Aluminium dropped 1.3 per cent to \$2,544.50; zinc gained 1.1 per cent to \$2,912.50. Lead gained 0.6 per cent to \$2,192.50 and tin climbed 1.8 per cnet to \$31,150. Nickel eased 1 per cent to \$18,685. REUTERS

### Cocoa extends losses, coffee also falls

London: Cocoa futures on ICE fell sharply extending the market's slide from a recent record high, while coffee prices also traded lower. July London cocoa fell 3.8 per cent to £6,974 a tonne. July New York cocoa fell 2.1 per cent to \$8,108/tonne. July robusta coffee was 4.7 per cent lower at \$3,790 a tonne, while July arabica coffee fell 3.45 per cent to \$2.0855 per lb. REUTERS

rabi and zaid seasons.

ation in Andhra Pradesh continued to worsen with the level continuing at a low 7 per cent of the capacity and in the reservoirs that jointly provide water to Telangana and Andhra, the storage was 8 per cent. Overall, Andhra water

situation was 80 per cent below normal. While the Yeluru reservoir has gone dry, the level in Somasila was one per cent of the capacity. Nagarajuna Sagar, which is common for Telangana and Andhra, has also gone dry. In Telangana, where

rainfall was better compared to other southern States, Privadarshini Jurala and Kaddam (KNR) have In Tamil Nadu, the stor-

filled to 16 per cent of the capacity. While Thattihalla went dry a couple of months ago, the level in Krishnaraja Sagara, which irrigates the Cauvery delta, was 7 per cent of the capacity and in Tungabhadra, which provides water to Andhra and Telangana, the level was 3 per cent of the capacity.

The situation will likely continue to be grim given the India Meteorological Department prediction of a higher than normal temperature in most parts of the country in May.

Among other States, the level in Punjab was 24 per cent below normal, while it was 22 per cent lower than usual in West Bengal. The storage in Maharashtra and Uttar Pradesh were 18 per cent and 24 per cent lower than normal, and 26 below usual in Chhattisgarh.

## India's palm oil imports up 41% in April; prices rise

### Reuters Jakarta/Kuala Lumpur

Malaysian palm oil futures closed higher on Thursday following news of a jump in India's imports, while traders awaited fresh cues.

The benchmark palm oil contract for July delivery on the BMD rose 26 ringgit to 3,844 ringgit (\$808.92).

Palm oil imports in India, the world's No 1 importer of vegoils, jumped 41 per cent in April from the previous month to the highest level in three months as easing prices prompted refiners to increase purchases, five dealers told Reuters.

"Bursa Malaysia crude palm oil contract is awaiting new leads in May, anticipating higher production and lower exports," a Kuala Lumpur-based trader said. Malaysian palm oil exports

fell between 9 per cent and

11.5 per cent in April from a month earlier, cargo surveyors Intertek Testing Services and Amspec Agri said.

Meanwhile, Indonesia, the world's biggest palm oil exporter, maintained its palm oil export tax and levy unchanged for May at \$52 per tonne and \$90 per tonne, respectively.

Soya oil prices on the Chicago Board of Trade were up 0.62 per cent. The Dalian Commodity Exchange is closed until May 5 for International Labour day holidays.

# run dry

Amidst soaring temperatures across the country, the demand for pulses has slowed down, traders have said.

"The demand is slow. Offtake is very low due to the rising temperatures," said Bimal Kothari, Chairman, India Pulses and Grains Association, the apex trade body.

Stating that the slowdown in demand during the summer months was not a new phenomenon, Kothari said demand could come back going ahead.

The slowdown in demand has led to sparse buying of pulses such as chana, which has led to easing of prices. Chana prices in the major producing state of Madhya

in select markets, IPGA said in its market update.

### **IMPORT WINDOW**

Kothari said except for tur, prices of all other pulses have eased or stable. "The only concern is tur and that remain

concern will through the year as the new domestic crop will hit the markets around December. Prices of tur is high. Everybody knows that tur production in the past couple of years has been short. There are alternative pulses, which are available at much cheaper rates,"

Kothari said. The mandi prices of tur are ruling in the range of ₹8,000-12,233 per quintal in States such as Karnataka

Return 12.2%

and Maharashtra depending on the variety and quality. While masur (lentils) is ruling below the MSP at around ₹6,000, chana is selling about 10-15 per cent higher than the MSP in the range of ₹6,000-6,500, Kothari said.

Prices of yellow peas are hovering between ₹4,000 and ₹4,100 per quintal, while urad is stable at ₹9,000-9,500, around

year. Kothari said about 1.5 million tonnes (mt) of yellow peas has been imported so far. By June-end the imports

of yellow peas are likely to be in the range of 1.7-1.8 mt, Kothari said. On the kharif acreage ex-

pectations for pulses, Kothari said it is too early to comment. "If the rains are good and farmers have seen the good prices, we can expect a good crop. It is too early to talk about all these things now," he said.

The Indian Meteorological Department has forecast an above-normal monsoon for the year ahead raising expectations of a good kharif cropping season.

India launches World Castor Sustainability

lion in a pre-series A round, with participation from Inflection Point Ventures. Spearheading this investment, is Ashish Kacholia, an investor in the public markets.

A media statement said the allocated funds will be utilised for team expansion, tech enhancement and new product lines.

Quoting Rohit Nagdewani, Founder of Fresh From Farm, the statement said: "While currently delivering at over 300plus locations every day, our key focus at wastage reduction and efficient demand consolidation have allowed for our retailer partners to earn an average of 29 per cent more. On the growth front, we are aiming to touch ₹100 crore annual recurring revenue by the end of this calendar vear.'
