Management Comments:

In a statement, **Mr. Vayu Garware, CMD, Garware Technical Fibres Ltd.** said, “ We continued to move ahead on our growth trajectory in the quarter led by robust demand in International business and uptick in the International sports sector. Year on year growth is not comparable due to a spillover effect in Q2 last year from significant pending international orders that were delivered in Q2 due to the first extended March 20 lockdown. On an H1 basis, we are able to see growth in PBT of 17.3% compared to H1 FY21 and growth in PBT of 21.4% from Q2 FY20.

Q2 F22 has seen many challenges. Significant inflation in raw materials and commodities have taken place. We have been able to pass on a majority of these albeit with some months lag. However, another major hurdle has been the global supply chain disruption, which has led to an unprecedented increase in freight costs, which has affected our margins in export. In addition, the cycle time to dispatch goods to customers in many parts of the world has significantly increased due to non-availability of containers despite having the materials ready. This has resulted in an increase in inventory and corresponding reduction in sales and cash flows in Q2. The challenges of high input costs, global supply chain disruption and delays in international deliveries are continuing, however we are able to see that the situation is improving now. We confident that we would be able to deliver strong results in the later part of FY22. We have also seen a strong order in-flow during this quarter to support this expectation.

In these challenging Covid-19 pandemic times, the safety of our work force and support to our communities continue to be our priorities, along with delivering the business results. Our team has been working hard on these initiatives and we are all thankful that we have been able to maintain normal operations without any significant incidents.
