Dear Sir/Madam,

Sub.: Gensol Engineering Limited Successfully Commissions 10.6 MWp Single Rooftop Solar Project in Madhya Pradesh

Ref: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

According to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations"), we would like to inform you that Gensol Engineering Ltd. has announced the commissioning of a 10.6 MWp single Rooftop Solar project for Trident Limited at its Budhni plant in Madhya Pradesh.

We request you to take the above information on your records and disseminate the same on your respective websites.

Further in this regard, an Investor Release issued by the Company is enclosed herewith for the information of the exchanges.

Yours Faithfully,

For, Gensol Engineering Limited

Anmol Singh Jaggi

“Investors Release”

Gensol Engineering Limited Powers Up Trident's Budhni Textile Unit with 10.6 MWp Rooftop Solar Project

Ahmedabad, March 21, 2024: Gensol Engineering Limited (BSE: 542851, NSE: GENSOL), a leading player in solar power EPC (engineering, procurement, and construction) services and electric mobility, today announced the successful completion of a significant 10.6 MWp rooftop solar project for Trident Limited in Madhya Pradesh. This project marks a major milestone for both companies, showcasing Gensol's expertise in sustainable energy solutions and propelling Trident Limited towards its clean energy goals.

The project utilises high-efficiency Bi-facial solar modules, strategically chosen to maximise energy output and ensure long-term durability. This innovative approach aligns perfectly with India's ambitious renewable energy targets and contributes significantly to the development of a robust green energy infrastructure.

Equipped with close to 20,000 solar panels, this colossal rooftop solar plant is estimated to generate enough clean energy to offset close to a staggering 11,000 tonnes of carbon dioxide emissions annually. By significantly reducing its reliance on fossil fuels for power generation, Trident Limited demonstrates exceptional environmental stewardship and makes a substantial contribution towards a cleaner future. This project serves as a powerful inspiration for other industries, paving the way for a more sustainable world powered by the sun.

Commenting on successful project commissioning, **Mr. Ali Imran Naqvi, CEO (EPC Business), Gensol** said, “This project ranks among the top five biggest rooftop solar ventures globally utilising a rooftop area exceeding 70,000 square meters. This massive project is a testament to Gensol's commitment to cutting-edge solutions and our ability to execute complex projects at scale. We are proud to collaborate with Trident Limited on this achievement, which not only positions them as a leader in sustainable manufacturing but also sets a powerful example for other industries worldwide.”

By leveraging their expert design and execution capabilities, Gensol meticulously maximised the available rooftop space at Trident's Budhni plant, ensuring optimal capture and utilisation of solar energy.

The successful completion of this project exemplifies the transformative power of collaboration between leading companies. By embracing clean energy solutions like rooftop solar, Trident takes a giant leap towards environmental responsibility and reduces its carbon footprint.

About Gensol Engineering Limited:

Established in 2012, Gensol Engineering Limited, the flagship company within the Gensol group, specialises in engineering, procurement, and construction (EPC) services, focusing on the solar power sector. Boasting a robust team of over 240 professionals, Gensol has demonstrated expertise in executing turnkey projects globally, having installed both ground-mounted and rooftop solar installations totaling more than 600 MW. Venturing beyond solar, Gensol has established a state-of-the-art electric vehicle (EV) production facility in Pune, India, dedicated to crafting electric three-wheelers and four-wheelers. Gensol EV have received approval from the Automotive Research Association of India (ARAI). In pursuit of revolutionising India's EV landscape, Gensol not only manufactures but also provides comprehensive EV leasing solutions, catering to a diverse clientele that includes PSUs, educational institutions, government entities, multinational corporations, ride-hailing services, employee transport companies, rental services, logistics, and last-mile delivery enterprises.

Thanking You,
Yours Faithfully,

For, Gensol Engineering Limited
