3. Financial Performance

The Covid-19 pandemic has adversely impacted exports and with second order impact on the domestic markets with both exports as well as domestic sales falling. The pandemic has affected the majority of India's export market (the US and EU together constitute for approximately, 60% of the total apparel exports from India in value terms), causing order cancellations/deferral of order leading to inventory build-up and expectation of slower realization of export receivables leading to higher working capital requirements.

Still, the Company continues to strengthen its market leadership in garment export across US and European markets during the year amid global pandemic CoVID- 19. Your Company continued to build good relationships with our customers. The quality in our products is prime motto of our business. The manpower of the Company also remained a priority. During the year under report, there was a sustained focus to increase strength of your company and sharpen competitive advantages with a view towards long term value creation.

Your Company is financially strong & self-reliant in terms of funds generation and debt servicing. A constant rise in turnover of the Company is apparent. However, your Directors are expecting better results both in terms of operations of the Company and its financial position.

4. Standalone Performance

On a standalone basis, your company reported the revenue from operation and other income was Rs. 11,575.17 lakhs against Rs. 18,682.77 Lakhs for the previous financial year. The net profit for the year was Rs. 1,355.19 lakhs against Rs. 3,127.40 lakhs reported in the previous year. The EPS from continuing operations for the reporting year was Rs. 4.67.

5. Directors Responsibility Statement

Pursuant to the requirement under Sec 134 (5) of the Act, the Board of Directors of the Company hereby state and confirm that;

- i. in the preparation of the Annual accounts for the year ended March 31, 2021, the applicable accounting standard have been followed along with proper explanation relating to the material departures, if any;
- ii. the Directors had selected such accounting policies and applied them consistently and made judgments and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the Company as at March 31, 2021 and of the profit of the Company for the year ended on that date;

- iii. that the Directors have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the Companies Act, 2013 for safeguarding the assets of the Company and for preventing and detecting fraud and other irregularities;
- iv. the annual accounts have been prepared on a going concern basis;
- v. that proper internal financial controls were followed by the Company and that such internal financial controls are adequate and were operating effectively; and
- vi. that the Directors had devised proper systems to ensure compliance with the provisions of all applicable laws and that such systems were adequate and operating effectively.

6. Dividend and Transfer to Reserve

In order to conserve the resources, your Board has decided not to declare any dividend for the financial year 2020-21. Your Company does not propose to transfer amounts to the general reserve out of the amount available for appropriation.

As per Regulation 43A of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, top five hundred listed entities based on market capitalization are required to formulate a Dividend Distribution Policy. However, during the year your company has remained to be a small cap company and hence this regulation does not apply to the Company.

7. Share Capital

The paid-up equity share capital as on March 21, 2021 was Rs. 29.00 Crores consisting of 2,90,00,004 equity shares of Rs. 10/- each fully paid-up.

8. Transfer to Investors Education and Protection Fund

The Company had no liability to transfer any unpaid/unclaimed equity shares and/or dividends up to the financial year 2011-12 to the Investor Education and Protection Fund (IEPF) established by the Central Government pursuant to Section 125 of Companies Act 2013.

9. Change in Nature of Business

During the year under review, there was no change in the nature of the business.

10. Listing

The Equity Shares of the Company continue to remain listed on BSE Limited and the National Stock Exchange of India Limited.

11. Deposit from Public

The Company has not accepted any deposit within the meaning of Chapter V of the Companies Act, 2013 and the Rules framed thereunder.

Management Discussion and Analysis

I. Economy

Global Economy

The COVID-19 pandemic has challenged the textile industry drastically in FY 2020-21. Asia, which is one of the largest markets for the textile industry in the world, has suffered from the prolonged lockdowns and restrictions in the majority of Asian countries along with the sudden drop in international demand for their products. The loss was particularly high in countries where the textile industry accounted for a larger share of the exports. According to the study by the International Labour Organization (ILO) the global textile trade collapsed during the first half of 2020. Also, exports to the major buying regions in the European Union, the United States, and Japan fell by around 70%. The industry also suffered several supply chain disruptions due to the shortages of cotton and other raw materials.

The textile industry is an ever-growing market, with key competitors being China, the European Union, the United States, and India. China is the world's leading producer and exporter of both raw textiles and garments. The United States is the leading producer and exporter of raw cotton, while also being the top importer of raw textiles and garments. The textile industry of the European Union comprises Germany, Spain, France, Italy, and Portugal at the forefront with a value of more than 1/5th of the global textile industry. India is the third-largest textile manufacturing industry and is responsible for more than 6% of the total textile production, globally. The rapid industrialization in the developed and developing countries and the evolving technology are helping the textile industry to have modern installations which are capable of high-efficient fabric production.

Figure 1: Growth Projection of Advanced and Emerging Economies

II. Indian Economy

The Indian textile industry is one of the oldest in the country's economy, dating back several centuries. Today, the textile industry accounts for 14% of the overall industrial production, contributes to approximately 30% of the total exports, adds 4% to India's GDP and is the second-largest employment generator after agriculture.

The sector is highly branched out, catering to various divisions ranging from conventional handloom products to cotton, wool, silk products, natural and man-made fibre, yarn, and apparel. Usage of textiles is widespread across key end-use industries like healthcare, defence, automobile, and construction. Its massive potential for employment generation opportunities in the industrial and organized sectors in rural and urban areas has transformed the industry into a significant contributor to accelerating the economy.

India's Gross Domestic Product (GDP) contracted 7.7% in 2020-21, as per provisional National Income estimates released by the National Statistical Office on Monday, marginally better than the 8% contraction in the economy projected earlier. GDP growth in 2019-20, prior to the

COVID-19 pandemic, was 4.2%.

Figure 3: GDP comparison

Textile Industry in India continues to be dominated by cotton, accounting for nearly 3/4th of the total fibre consumption in the country. Globally fibre consumption is dominated by manmade fibers having 70 per cent of share in total fibre consumption. Contrary to the global trend, fibre consumption in India is skewed towards natural fibres with around 65% share, especially cotton.

III. Textiles

A. Global Textile Industry

The COVID-19 pandemic has impacted each and every business in some way or the other, the global textile industry has been drastically impacted. Asia, being one of the largest markets for textile industry in the world has suffered due to sudden drop in international demand for their products coupled with prolonged lockdowns and restrictions in majority of Asian countries. Shortage of cotton and other raw materials and several supply chain disruptions have worsened the situation globally. It is estimated that exports to major buying regions in the European Union, United States, and Japan might decline by approx. 70%. The key markets in the textile industry are China, European Union, the United States and India, all of which were affected due to the COVID-19 pandemic.

B. Indian Textile Industry

The textiles and apparels sector is a major contributor to the Indian economy in terms of foreign exchange earnings and employment. Textile & garments industry in India is expected to reach US\$223 Billion by 2021 from US\$140.4 Billion in 2018. India is the third-largest textile manufacturing industry and contributes approximately 6% to the total textile production, globally. India ranks 2nd as the largest producer of textiles and garments and is the 5th largest exporter of textiles spanning apparel, home and technical products. The Indian textile industry is set for growth, buoyed by both strong domestic consumption as well as export demand. Favorable demographic, rising per capital income and a shift in customer preference to branded products is expected to revive the textile industry which has been severely impacted by the COVID-19 pandemic. The Government of India is working on major initiatives and reforms in the Textile sector, including launch of a 'Mega Integrated Textile Region and Apparel (MITRA) Park' scheme to establish seven textile parks with state-of-the-art infrastructure, common utilities and R&D lab over a three-year period; starting a focused product scheme; positioning the country as a global hub in the man-made fibre (MMF) and technical textiles segments. Competitive advantage, robust demand, favorable government policies, increasing investments and urbanization are expected to be the key drivers for revival of the industry.

C. Company's Performance

At 110.08 Crores, the revenue was substantially down over previous year. The business witnessed progressive improvement on a quarter-on-quarter basis in sales, boosted by pickup in wholesale channel. India has occupied a remarkable position in global textile rankings. The country has high market potential, low economic risk and moderate political risk. India's high growth potential compared to global peers has made it a highly favorable destination. According to a study by Boston Consulting Group, India is expected to become the world's third largest consumer economy by reaching US \$400 billion in consumption by 2025. All safety measures were taken as per the protocol to provide secure manufacturing and export experience to the vendors amid the pandemic.

SPL Industries Limited was founded back in 1991 in the name of M/s Shivalik Prints Private Limited being promoted by Mr. H R Gupta and Mr. Vijay Kumar Jindal. Initially the company was incorporated as a Private Limited Company and later on it was reconstituted as a Public limited company in the year 1994. The company got listed on the National Stock Exchange and Bombay Stock Exchange in 2005. The company is a leading Apparel Export House of India. The company is engaged in the business of manufacturing and exporting ready-made garments to multiple countries around the world, which included European, Middle-Eastern, American, Asian and many.

VI. Hits and Misses

1. Opportunities

- i. Rich heritage of the presence of entire textile value chain.
- ii. Expected growth in consumer market in per capita spending and consumption.
- iii. Company & top management focus shifting to branded, value added garments.
- iv. Basic infrastructure to grow at very high rates.
- v. Listed and well recognized in stock markets – huge opportunity for multiplying wealth as branded garments enjoy high P/E multiples today.

2. Threats

- i. More dependence on cotton.
- ii. Fluctuating and declining cotton production
- iii. Declining margins of the spinning industry (decreasing gap between cotton yarn and cotton prices).
- iv. Low level of productivity in garment sector.
- v. Banks tightening norms and increasing rates.
- vi. High debt levels
- vii. Negligible growth of Textiles & Clothing industry.
- viii. Current management pool getting old, less aggressive & hungry.

VII. Internal Control System

The Company has an Internal Control System, commensurate with the size, scale and complexity of its operations. The internal Audit functions reports to the Chairman of the Audit Committee and to Chairman and Managing Director of the Company. The Internal Audit monitors and evaluates the efficiency and adequacy of internal control systems in the company. VIII. Human Resources Development

“An organization is only as good as the people within” is an axiom, which the company understands and appreciates deeply. The Company continues to emphasize on its commitment to acquiring, developing and enhancing its human resources.

Recruitment and retention of intellectual capital is a key management exercise. The Company's human capital constitutes a diverse pool of knowledge, a judicious mix of youth, imaginations, risk - taking ability and seasoned experience. The Company follows a continuous performance appraisal system to ensure the employees are dynamically being trained and appraised about improvement areas and performance gaps. Further the management maintains an open-door policy, to ensure free flow communication with all levels.

IX. Performance Discussion

The Covid-19 pandemic has adversely impacted exports and with second order impact on the domestic markets with both exports as well as domestic sales falling. The pandemic has affected the majority of India's export market (the US and EU together constitute for approximately, 60% of the total apparel exports from India in value terms), causing order cancellations/deferral of order leading to inventory build-up and expectation of slower realization of export receivables leading to higher working capital requirements.

Still, the Company continues to strengthen its market leadership in garment export across US and European markets during the year amid global pandemic CoVID- 19. Your Company continued to build good relationships with our customers. The quality in our products is prime motto of our business. The manpower of the Company also remained a priority. During the year under report, there was a sustained focus to increase strength of your company and sharpen competitive advantages with a view towards long term value creation.

Your Company is financially strong & self-reliant in terms of funds generation and debt servicing. A constant rise in turnover of the Company is apparent. However, your Directors are expecting better results both in terms of operations of the Company and its financial position.

X. Statutory Compliance

All the statutory compliance with respect to Securities and Exchange Board of India (Listing obligations and Disclosure Requirements) Regulations, 2015, Income Tax Act, Sales Tax Act, Companies Act, 2013 and all other applicable Acts, and Rules & Regulations are complied with.

XI. Health & Safety

The Company continuously focuses on the health and safety of all its workers and staff. Adequate safety measures have been taken at the plant for the prevention of accidents or other untoward incident. The necessary medical facilities are available for the workers and staff to maintain good health. During the pandemic worldwide, the Company ensures proper sanitisation and safety measures. During the worldwide pandemic situation the Company followed all the worldwide pandemic situation the Company followed all the norms and advisory issued by the Government of India/State Government.

Particulars of Energy Conservation, Research and Development Technology Absorption and Foreign Exchange Earnings and Outgo

(Particulars pursuant to the Rule 8(3) Companies (Accounts) Rules, 2014)

A. Conservation of Energy

i. Steps taken for conservation of energy:

Your company continuously taking necessary steps to absorb and adopt the latest technology and innovation in the Garment Industry. These initiatives enable the facilities to become more efficient and productive as the company expands, thereby helps in energy conservation. All machinery and equipment are continuously serviced, updated and overhauled in order to maintain them in good condition. This resulted in consumption of lesser energy consumption. Energy Conservation continues to receive increased emphasis at all the units of the Company. Inter unit studies are carried out on a regular basis for taking steps for reduction of the energy consumption. Hence your company has not opted for alternate energy sources. Additionally, constant efforts in continuing all previous conservation measures and increasing awareness of energy management amongst employees have continued which should enable further savings to transpire going forward.

ii. The steps taken by the Company for utilizing alternative source of energy:

Your company has taken steps for up gradation and modernization of various machines in phased manner. The Company also replaces old plant and machinery in the processing unit and steps are taken to modernization of various operations including installation of robotic machines for handling very specialized work/activities.

B. Technology Absorption

In addition to product and raw material development which continues to be strengthened, Research and Development activities on fashion designing are carried out on on-going basis. Absorbing technologies with state of art machineries like automated cutting machine, automated fabric inspection machines, etc., the quality of the products and efficiency of the systems have been substantially improved. By applying those technologies, the cost of production was under control. The nature of activities of the Company does not warrant any exclusive R&D department.

The Company has installed ZLD (Zero Liquid Damage) plant and Water RO plant for the workers of the company. ZLD technology is used to utilize the waste water to the last extent till where it can be utilized avoiding water wastage. ROs are used to purify the water and making it fit for drinking for the workers of the company.

INDEPENDENT AUDITOR’S REPORT

TO THE MEMBERS OF SPL INDUSTRIES LIMITED

Report on the Audit of standalone Financial Statements Report on the audit of Financial Results

Opinion

We have audited the accompanying standalone financial statements of SPL INDUSTRIES LIMITED (“The Company”) which comprises the Balance Sheet as at March 31, 2021, the Statement of Profit and Loss (including Other Comprehensive Income), statement of changes in equity, statement of cash flows for the year ended on that date, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the Companies (Indian Accounting Standards) Rules, 2015, as amended (“Ind AS”) and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2021, and its profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Due to outbreak of COVID 19 pandemic and consequent restrictions carrying out audit physically at auditee premises and limitations on physical access to audit records, the audit procedures have been modified and we conducted audit through remote locations by accessing the audit records through electronic modes and making enquiries and collecting evidence through emails, phone/ conference calls.

Key Audit Matters

Key Audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matters	Procedures Performed/Auditor’s Response
<p>As described in the accounting policy in note 3 (a) to the Ind AS financial statements, Revenue is measured at the fair value of the consideration received or receivable, net of returns & discounts, volume rebates, outgoing sales taxes, Goods & Service Tax (GST) and other indirect taxes. Responsibility of Management for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Company's Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A", a statement on the matters specified in paragraph 3 and 4 of the Order, to the extent applicable.

**2. As required by section 143(3) of the Act, we report that:**

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- b) in our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
- c) the balance sheet, the statement of profit and loss, and the cash flow statement dealt with by this Report are in agreement with the books of account;
- d) in our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014;

Annexure - B to the Independent Auditor's Report

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act").

We have audited the internal financial controls over financial reporting of SPL INDUSTRIES LIMITED ("the Company") as of March 31, 2021 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include

the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered of India.

40 SEGMENT REPORTING

The Segment reporting of the Company has been prepared in accordance with IND AS-108, " Operating Segment" (Specified Under section 133 of the companies Act 2013, read with Rule 7 of Companies (Accounts) Rules 2015). For management purposes, the company is organized into business units based on its products and services and has two reportable segments as follows:-

(a) Manufacturing cotton knitted garments and made ups and Processing Charges b) Trading of garments

Segments have been identified as reportable segments by the Company chief operating decision maker ("CODM"). Segment profit amounts are evaluated by the board, which has been identified as the CODM, in deciding how to allocate resources and in assessing performance.

Segments Revenue, Results, Assets and Liabilities include the respective amounts identifiable to each of the segments and amount allocated on a reasonable basis. Unallocated expenditure consists of common expenditure incurred for all the segments and expenses incurred at corporate level. The assets and liabilities that cannot be allocated between the segments are shown as unallocated corporate assets and liabilities respectively.

The accounting policies of the reportable segments are the same as the Company's accounting policies described in Note 3. Segment profit (Earnings before interest, depreciation and amortization, and tax) amounts are evaluated regularly by the Board that has been identified as its CODM in deciding how to allocate resources and in assessing performance. The Company financing (Including finance costs and finance income) and income taxes are reviewed on an overall basis and are not allocated to operating segments.

Fair Value Hierarchy

The table shown below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined below:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

Total	-	-	-

The fair value of the financial assets and liabilities are included at the amount that would be received to sell an asset and paid to transfer a liability in an orderly transaction between market participants. The following methods and assumptions were used to estimate the fair values:

Other non-current financial assets and liabilities: Fair value the carrying value as considered to approximate to fair value.

Derivative financial assets/liabilities: The Company enters into derivative contracts with various counterparties, principally financial institutions. Forward foreign currency contracts are valued using valuation techniques with market observable inputs. The most frequently applied valuation techniques for such derivatives include forward pricing using present value calculations, foreign exchange spot and forward premium rates.

There has been no transfer between level 1 and level 2 during the above periods

NOTES ON FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2021

49 Financial risk management objectives and policies

The Company's activities expose it to the following risks:

- a) Credit risk
- b) Liquidity risk
- c) Market risk

a) Credit Risk

Credit risk is the risk that counter party will not meet its obligations under a financial instruments or customer contract leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

i) Trade receivables

Customer credit risk is managed by the Company subject to the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored and major customers are generally secured by obtaining other forms of credit insurance. The maximum exposure to credit risk at the reporting date is the carrying value of trade receivable disclosed in **Note 10**.

ii) Financial instrument and cash deposit

Credit risk is limited as the Company generally invest in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies. Counterparty credit limits are reviewed by the Company periodically and the limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically the Company ensures that it has sufficient cash on demand to meet expected short term operational expenses. The Company's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans/internal accruals.

c) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and foreign currency risk. Financial instruments affected by market risk include borrowings, trade receivable and trade payable.

Interest rate risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in market interest rates. The Company does not have significant debt obligations with floating interest rates, hence, is not exposed to any significant interest rate risk.

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Company having a foreign currency risk majorly for trade receivables. The company mitigate the forex risk in relation to trade receivables by entering into the derivative instrument i.e forward sale contract.

49.1 Foreign currency risk management

The company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise.

The carrying amount of the company foreign currency dominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

Particulars	Rounded off to Nearest Lakhs			
	Liabilities (Foreign Currency)		Assets (Foreign Currency)	
	As at March, 31 2021	As at March, 31 2020	As at March, 31 2021	As at March, 31 2020
In US Dollars (USD)	-	-	13.02	24.28

	As at March, 31 2021	As at March, 31 2020	As at March, 31 2021	As at March, 31 2020
In INR	-	-	956.92	1,700.74

49.2 Foreign currency sensitivity analysis

The Company is mainly exposed to the currency : USD

The following table details the Company's sensitivity to a 5% increase and decrease in the INR against the relevant foreign currencies. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. This is mainly attributable to the exposure outstanding on receivables and payables in the Company at the end of the reporting period. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% charge in foreign currency rate. A positive number below indicates an increase in the profit or equity where the INR strengthens 5% against the relevant currency. For a 5% weakening of the INR against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

Impact on Profit/(Loss)/ Total Equity

Particulars	As at March31, 2021	As at March31, 2020
Increase in Exchange Rate by 5%	47.85	91.54
Decrease in Exchange Rate by 5%	-47.85	-91.54

50 Capital management

The Company's objective is to maintain a strong capital base to ensure sustained growth in business. The Capital Management focusses to maintain an optimal structure that balances growth and maximizes shareholder value.

The Company is predominantly equity financed. Further, the Company has sufficient cash, cash equivalents, current investments and financial assets which are liquid to meet the debts.

51 Critical estimates and judgements in applying accounting policies

The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Information about estimates and judgements made in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are as follows:

i) Property, plant and equipment and useful life of property, plant and equipment and intangible assets

The carrying value of property, plant and equipment is arrived at by depreciating the assets over the useful life of assets. The estimate of useful life is reviewed at the end of each financial year and changes are accounted for prospectively.

ii) Provisions and contingencies

The assessments undertaken in recognising provisions and contingencies have been made in accordance with the applicable Ind AS.

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Where the effect of time value of money is material, provisions are determined by discounting the expected future cash flows. The Company has significant capital commitments in relation to various capital projects which are not recognized on the balance sheet.

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Guarantees are also provided in the normal course of business. There are certain obligations which management has concluded, based on all available facts and circumstances, are not probable of payment or are very difficult to quantify reliably, and such obligations are treated as contingent liabilities and disclosed in the notes but are not reflected as liabilities in the financial statements. Although there can be no assurance regarding the final outcome of the legal proceedings in which the Company involved, it is not expected that such contingencies will have a material effect on its financial position or profitability (Refer Note 41 and 42)

iii) Defined benefit plan

The cost of the defined benefit gratuity plan and other post-employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in

these assumptions. All assumptions are reviewed at each reporting date. The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. The mortality rate is based on publicly available mortality table. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates. **(Refer note no. 32)**

iv) Taxes

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies. Deferred tax assets on unabsorbed depreciation/business loss have been recognised to the extent of deferred tax liabilities on taxable temporary differences available. It is expected that any reversals of the deferred tax liability would be offset against the reversal of the deferred tax assets. The Company has determined that it cannot recognise deferred tax assets on the tax losses carried forward as it is not probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised. Further details on taxes are disclosed in **note no 36**.

(v) Estimates relating to Pandemic from COVID-19

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, intangibles, investments and other assets. In developing the assumptions relating to the possible future uncertainties in the economic conditions because of this pandemic, the Company has used internal and external sources of information. The Company has reviewed the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

Note -Significant Accounting Policies

1 General Information

The company was incorporated on December 6, 1991 in India. The company is into export of garments. During the year value of exports are INR 5926.06 lakhs. Further, company has domestic sales and processing income during the year.

2 Basis of preparation of financial statements

a) 2.1 Basis Of Preparation and compliance with Ind AS

The financial statements of the company have been prepared in accordance with Indian Accounting Standards (Ind-AS) notified under the Companies (Indian Accounting Standards) Rules, 2015.

For all periods up to and including the year ended 31 March 2021, the Company prepared its financial statements in accordance with accounting standards notified under the section 133 of the Companies Act 2013, read together with Rule 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP). The financial statements for the year ended 31 March 2018 was the first year when the company prepared its financials in accordance with Ind AS.

The financial statements have been prepared on the historical cost basis, except for certain financial instruments (refer accounting policy regarding financial instruments), which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services as at the date of respective transactions.

b) Basis of measurement

The Ind AS Financial Statements have been prepared on a going concern basis using historical cost convention and on an accrual method of accounting, except for certain financial assets and liabilities, including derivative financial instruments which have been measured at fair value as described below and defined benefit plans which have been measured at actuarial valuation as required by relevant Ind ASs.

Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Fair value for measurement and /or disclosure purpose in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

With effect from April 1, 2019, the Company adopted Ind-AS 116 – Leases. The effect on adoption of Ind-AS 116 is insignificant on the financial statements.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

c) Functional and presentation currency

These Ind AS Financial Statements are prepared in Indian Rupee which is the Company's functional currency. All financial information presented in Rupees has been rounded to the nearest lakhs with two decimals.

3 Significant Accounting Policies

The Company has applied following accounting policies to all periods presented in the Ind AS Financial Statement.

a) Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable, net of discounts, volume rebates, outgoing sales taxes, Goods & Service Tax (GST) and other indirect taxes.

- i) Sales are recognised when the substantial risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract.
- ii) Processing Charges are recognised at the time of dispatch of goods to the customers and are net of trade discounts, rebates and sales taxes, etc.
- iii) Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.
- iv) Income from duty drawback is recognised on accrual basis
- v) Income from other Export Incentive are recognised as and when accepted by the Government Authority
- vi) Dividend Income is recognised when right to receive is established.
- vii) Claim receivables are accounted for depending on the certainty of receipt and claims payable are accounted for at the time of acceptance.

b) Property, Plant and Equipment

(i) Property, plant and equipment

On transition to Ind-AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognised as at 1st April, 2015 measured as per the previous GAAP and use that carrying value as a deemed cost of property, plant and equipment

(ii) Capital Work in Progress

Capital work in progress, property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred.

The Company identifies and determines cost of each component/ part of Property, plant and equipment separately, if the component/ part has a cost which is significant to the total cost of the Property, plant and equipment and has useful life that is materially different from that of the remaining asset.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances and cost of assets not ready for use at the balance sheet date are disclosed under capital work-in-progress.

(iii) Depreciation

Assets in the course of development or construction and freehold land are not depreciated.

Other property, plant and equipment are stated at cost less accumulated depreciation and any provision for impairment. Depreciation commences when the assets are ready for their intended use.

Depreciation on all plant and machinery is provided on Written Down Value Method and on other fixed assets is provided on the basis of Straight Line Method. Depreciation has been provided on the basis of useful life of the assets and the manner as prescribed in Schedule II of The Companies Act 2013. Following useful life were used for calculating depreciation amount as per Schedule II of The Companies Act 2013:

Particulars	Useful Life (in Years)
Factory Building	30 Years
Plant & Machinery	15 Years
Electric Installation & Equipment	10 Years
General Laboratory Equipment	10 Years
Office Equipments	5 Years
Servers & Networks	6 Years
End User Devices (Computer)	3 Years
Furniture & Fixtures	10 Years
Motor Cycles	10 Years
Motor Car & Buses	8 Years

When significant spare parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

c) **Intangible assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

d) **Impairment of financial assets**

Financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 ('Financial Instruments') requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. The Company provides for impairment upon the occurrence of the triggering event.

Non-financial assets

Tangible and intangible assets

Property, plant and equipment and intangible assets are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit and loss.

e) **Financial instruments**

Financial assets and liabilities are recognised when the Company becomes a party to the contract that gives rise to financial assets and financial liabilities. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are immediately recognised in statement of profit and loss.

Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

**De-recognition of financial instruments**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized when the obligation specified in the contract is discharged or cancelled or expires.

Fair value of financial instruments

In determining the fair value of its financial instruments, the Company uses following hierarchy and assumptions that are based on market conditions and risks existing at each reporting date.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable
For other fair value related disclosures For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period For other fair value related disclosures **Refer note no 48.**

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets and financial liabilities. For financial assets a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains or losses) or interest

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

For more information on financial instruments **Refer note no 48**

f) Derivative financial instruments and hedge accounting**Initial recognition and subsequent measurement**

In order to hedge its exposure to foreign exchange, the Company enters into forward, futures and other derivative financial instruments. The Company does not hold derivative financial instruments for speculative purposes.

Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss.

g) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

h) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Current v/s Non-Current Classification

Company presents assets and liabilities in balancesheet based on current/non current classification.

An asset is current when it is:

- * Expected to be realised or intended to be sold or consumed in normal operating cycle
- * Held primarily for the purpose of trading
- * Expected to be realised within twelve months after the reporting period, or
- * Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non current.

A liability is current when:

- * It is expected to be settled in normal operating cycle
- * It is held primarily for the purpose of trading
- * It is due to be settled within twelve months after the reporting period, or
- * There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Advance tax paid is classified as non current assets.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

i) Inventories

Inventories are valued at lower of cost or net realizable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overhead incurred in bringing them to their respective present location and condition. Cost of raw materials, process chemicals, stores and spares, packing material, trading and other products are determined on First in First out (Weighted Average) method. Scrap is valued at net realizable value.

j) Taxation

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences, except when it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Sales/value added. Taxes/GST paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of sales/ value added taxes/GST paid, except:

· When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

k) Employee benefit schemes

(i) Short-term employee benefits

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee benefits. These benefits include salaries and wages, performance incentives and compensated absences which are expected to occur in next twelve months. The undiscounted amount of short-term employee benefits to be paid in exchange for employee services is recognised as an expense as the related service is rendered by employees.

Compensated absences:

The cost of short term compensated absences are provided for based on estimates. Long term compensated absence costs are provided for based on actuarial valuation using the project unit credit method. The Company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

Gratuity

Gratuity, which is a defined benefit plan, is accrued based on an independent actuarial valuation, which is done based on project unit credit method as at the balance sheet date. The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income. In accordance with Ind AS, re-measurement gains and losses on defined benefit plans recognized in OCI are not to be subsequently reclassified to statement of profit and loss. As required under Ind AS compliant Schedule III, the Company transfers it immediately to retained earnings.

Provident Fund

Eligible employees of the Company receive benefits from a provident fund, which is a defined benefit plan. Both the eligible employee and the Company make monthly contributions to the provident fund plan equal to a specified percentage of the covered employee's salary.

(ii) Termination benefits

Termination benefits if any are recognised as an expense immediately

l) Provision for liabilities and charges, Contingent liabilities and contingent assets

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past event whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

Refer Note 40 & 41 for details.

n) Foreign currency transactions

In the financial statements of the Company, transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in other currencies are translated into the functional currency at exchange rates prevailing on the reporting date except for those whose provisions have already been booked. Non-monetary assets and liabilities denominated in other currencies and measured at historical cost or fair value are translated at the exchange rates prevailing on the dates on which such values were determined.

All exchange differences are included in the statement of profit and loss.

m) Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during

the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

n) **Segment Reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. Revenue and expenses are identified to segments on the basis of their relationship to the operating activities of the segment. Inter segment revenue are accounted for based on the cost price. Revenue, expenses, assets and liabilities which are not allocable to segments on a reasonable basis, are included under "Unallocated revenue/ expenses/ assets/ liabilities".

o) **Cash Flow Statement**

Cash flows are reported using indirect method as set out in Ind AS -7 "Statement of Cash Flows", whereby profit / (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

p) **Leases**

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

For arrangements entered into prior to 1 April 2016, the Company has determined whether the arrangement contains lease on the basis of facts and circumstances existing on the date of transition.

Company as a lessor

A lease is classified at the inception date as a operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease & a lease other than finance lease is operating lease.

Operating lease payments are recognised as an income in the statement of profit and loss on a straight- line basis over the lease term.

Refer Note:-43 for disclosure

q) **Use of Estimates and Judgments**

The preparation of the financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates under different assumptions and conditions.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are elaborated in **note no. 51**.

r) **Investment Property**

(i) **Recognition & Measurement**

Land or building held to earn rentals. An investment property is measured initially at its cost. The cost of an investment property comprises its purchase price and any directly attributable expenditure. After initial recognition, the company carries the investment property at the cost less accumulated depreciation and accumulated impairment, if any. The residual value, and the fair value of investment property is reviewed at least at each financial year end and, if expectations differ from previous estimates, the change(s) is accounted for as a change in an accounting estimate in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors.

(ii) **Depreciation**

Depreciation on Investment property is provided on Straight Line Value Method. Depreciation has been provided on the basis of useful life of the assets and the manner as prescribed in Schedule II of The Companies Act 2013.

s) **Government Grants**

The Company recognises government grants only when there is reasonable assurance that the conditions based grants will be received. Where Government grants attached to non-monetary assets (PPE), the cost of such assets are presented at Net value after reducing the grant and depreciation is charged on net value of PPE.
