## TCS Launches ignio™ Cheetah to Accelerate Transformation of Enterprise IT Operations

*New Release of Tata Consultancy Services' Cognitive Automation Software Suite Comes with Advanced Capabilities to Accelerate Deployment and Value Realization by Customers*

**SANTA CLARA | MUMBAI, February 26, 2019:** Digitate, a venture of Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS), a leading global IT services, consulting, and business solutions organization, announced the release of ignio™ Cheetah, a major upgrade of its highly successful cognitive automation product suite for IT operations and workload management.

ignio Cheetah augments its proven blueprinting and automation functionality with several new capabilities, including: (1) intelligent events and alerts management, capable of real-time detection and prediction of anomalous IT conditions that need attention, suppression of redundant or false alerts, aggregation of correlated events, and prioritization of alerts based on business impact; (2) intelligent incident handling, with auto-triage capability that learns from experience.

A key component of the Cheetah release is ignio Studio, which makes it easier for users to extend the functionality to support newer technologies and use-cases. The latest release also comes with a significantly enhanced blueprinting capability that supports easier integration with third party IT operations management tools and uses real-time data streams to continuously refine the enterprise IT blueprint.

ignio Cheetah supports cloud-first deployments, SaaS engagement models, horizontal scaling to handle large enterprise environments and data volumes, and stronger security and safety controls. Additionally, the new release has a completely revamped user experience and supports multiple languages.

Commenting on the Cheetah release, **Dr Harrick Vin, Global Head, Digitate**, said, *"This is a significant milestone in our journey. The ignio Cheetah release will accelerate customer deployments and value realization. ignio Studio will also make it easier to extend cognitive automation to business functions across the enterprise."*

*"With the Cheetah version, and its advances in scalability, alert management, and incident handling, ignio will continue to extend its distinctive strengths in combining automation with advanced IT analytics, with support for predictive, prescriptive and if/then decision making,"* said **Dennis Drogseth, Vice President, Enterprise Management Associates**. *"EMA views the handshake between automation and analytics as one of the most needed, and potentially fastest growing areas in the industry. And Digitate is well positioned to take a leadership role in addressing this critical opportunity."*

**Akhilesh Tripathi, Chief Commercial Officer, Digitate**, added, *"Within a short period of time, across industries, many large organizations have already discovered how ignio improves their IT operations and employee experience, while generating significant cost savings. With its enhanced features, ignio Cheetah will accelerate the speed with which new customers can achieve similar benefits."*

Launched in 2015, ignio reimagines enterprise IT operations with its unique and innovative design that blends artificial intelligence, machine learning, and advanced software engineering to quickly and

R

autonomously resolve issues when they arise, and preempt incidents wherever possible. ignio has been adopted by large, global enterprises, mostly Fortune 500 and Global 2000 corporations, which are leaders and innovators in their respective industries. ignio currently manages over 1.5 million technology resources autonomously for over 50 clients.
