# MANAGEMENT DISCUSSION AND ANALYSIS REPORT

## INDUSTRY OVERVIEW

The Gems and Jewellery sector plays a significant role in the Indian economy, contributing around 7 per cent of the country's GDP. One of the fastest growing sectors, it is extremely export oriented and labour intensive. Based on its potential for growth and value addition, the Government of India has declared the Gems and Jewellery sector as a focus area for export promotion. The Government has recently undertaken various measures to promote investments and to upgrade technology and skills to promote 'Brand India' in the international market.

India is deemed to be the hub of the global jewellery market because of its low costs and availability of high-skilled labour. India is the world's largest cutting and polishing centre for diamonds, with the cutting and polishing industry being well supported by government policies. Moreover, India exports 95 per cent of the world's diamonds, (Source: Gems and Jewellery Export promotion Council (GJEPC)). India's Gems and Jewellery sector has been contributing in a big way to the country's foreign exchange earnings (FEEs). The Government of India has viewed the sector as a thrust area for export promotion. The Indian government presently allows 100 per cent Foreign Direct Investment (FDI) in the sector through the automatic route.

India is one of the largest centres for cut and polished diamonds. 9 of 10 diamonds in the world are cut and polished in India and Japan is the third largest consumer of polished diamonds and one of the leading consumers of gold, precious stones and studded jewellery in the world.

## NOVEL CORONAVIRUS

An outbreak of a novel strain of the coronavirus, COVID-19, was identified in China and has subsequently been recognized as a pandemic by the World Health Organization. This coronavirus outbreak has severely restricted the level of economic activity around the world. In response to this coronavirus outbreak the governments of many countries, states, cities and other geographic regions have taken preventative or protective actions, such as imposing restrictions on travel and business operations and advising or requiring individuals to limit or forego their time outside of their homes. Given the uncertainty regarding the spread of this coronavirus, the related financial impact cannot be reasonably estimated at this time.

## OPPORTUNITIES & THREATS

India is a country where jewellery and precious metal shows the status of the person, thus rendering the demand for our product relatively price inelastic. Also, there is tremendous opportunity for organized players like Mini Diamonds (India) Limited to grow as consumer tastes and preferences evolve. The new age consumer prefers convenience and quality. Although traditional jewellers still occupies 90% of the industry. This offers a huge growth opportunity players like us.

However, the jewellery industry is highly capital intensive due to its long working capital and realisation cycle. A few recent incidents of financial defaults have created a liquidity squeeze in the industry, prompting banks and financial institutions to reduce their exposure to industry players. This liquidity crunch has caused a slowdown in profitability and growth of the jewellery industry.

## **Investments/Developments opportunities**

The Gems and Jewellery sector is witnessing changes in consumer preferences due to adoption of western lifestyle. Consumers are demanding new designs and varieties in jewellery, and branded jewellers are able to fulfil their changing demands better than the local unorganised players. Moreover, increase in per capita income has led to an increase in sales of jewellery, as jewellery is a status symbol in India.

The cumulative Foreign Direct Investment (FDI) inflows in diamond and gold ornaments in the period April 2000-September 2017 were US\$ 1,045.58 million, according to Department of Industrial Policy and Promotion (DIPP).

## **Government Initiatives**

India has signed a Memorandum of Understanding (MoU) with Russia to source data on diamond trade between the two countries. India is the top global processor of diamonds, while Russia is the largest rough diamond producer. The Government of India is planning to establish a special zone with tax benefits for diamond import and trading in Mumbai, in an effort to develop the city as a rival to Antwerp and Dubai, which are currently the top trading hubs for diamond.

The Bureau of Indian Standards (BIS) has revised the standard on gold hallmarking in India from January 2018. The gold jewellery hallmark will now carry a BIS mark, purity in carat and fitness as well as the unit's identification and the jeweller's identification mark. The move is aimed at ensuring a quality check on gold jewellery.

### **Limitations of Internal Financial Controls over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected.

Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
