ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

FORWARD - LOOKING STATEMENTS

This Draft Letter of Offer contains certain “forward-looking statements”. Forward looking statements appear throughout this Draft Letter of Offer, including, without limitation, under the chapters titled “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” and “*Industry Overview*”. Forward-looking statements include statements concerning our Company’s plans, objectives, goals, strategies, future events, future revenues or financial performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, our Company’s competitive strengths and weaknesses, our Company’s business strategy and the trends our Company anticipates in the industries and the political and legal environment, and geographical locations, in which our Company operates, and other information that is not historical information. These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “likely”, “may”, “objective”, “plan”, “potential”, “project”, “pursue”, “shall”, “seek to”, “will”, “will continue”, “will pursue”, “forecast”, “target”, or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements.

All statements regarding our Company’s expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our Company’s business strategy, planned projects, revenue and profitability (including, without limitation, any financial or operating projections or forecasts), new business and other matters discussed in this Draft Letter of Offer that are not historical facts. These forward-looking statements contained in this Draft Letter of Offer (whether made by our Company or any third party), are predictions and involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of our Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or other projections.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, the competition in our industry and markets, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in laws, regulations and taxes, incidence of natural calamities and/or acts of violence. Important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- As an NBFC, we are subject to periodic inspections by the RBI. Non-compliance with observations made by RBI during these inspections could expose us to penalties and restrictions;
- We operate in a highly competitive industry and our inability to compete effectively may adversely affect our business;
- Our business will require substantial funds, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition;
- We are affected by volatility in interest rates for both our lending and fund raisings operations, which could cause our net interest income to decline and adversely affect our results of operations and profitability; and
- We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 20, 70 and 117, respectively, of this Draft Letter of Offer. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect the current views of our Company as of the date of this Draft Letter of Offer and are not a guarantee of future performance. These statements are based on the management's beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, our Promoters, the LM, the Syndicate Member(s) nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the SEBI ICDR Regulations, our Company and the Lead Manager will ensure that investors are informed of material developments from the date of this Draft Letter of Offer until the time of receipt of the listing and trading permissions from the Stock Exchange.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. As an NBFC, we are subject to periodic inspections by the RBI. Non-compliance with observations made by RBI during these inspections could expose us to penalties and restrictions.***

Under section 45N of the Reserve Bank of India, 1934 (“**RBI Act**”) we are subject to periodic inspections by the RBI to verify correctness or completeness of any statement, information or particulars furnished to the RBI for the purpose of obtaining any information or particulars which our Company has failed to furnish on being called upon to do so. While we may respond to RBI and address such observations; there can be no assurance that the RBI will not make similar or other observations in the future. If we are unable to resolve such deficiencies to RBI’s satisfaction, our ability to conduct our business may be adversely affected. Imposition of any penalty or adverse findings by the RBI during the ongoing or any future inspections may have an adverse impact on our business prospects, financial condition and results of operations.

NBFCs in India are subject to strict regulation and supervision by the RBI. We require certain approvals, licenses, registrations and permissions for operating our business. Such approvals, licenses, registrations and permissions must be maintained / renewed over time and we may have to comply with certain conditions in relation to these approvals. Moreover, the applicable requirements may change from time to time. We are required to obtain and maintain a license for carrying on business as an NBFC. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. RBI has the authority to change these norms/ criteria as and when required. Inability to meet the prescribed norms/ criteria, can adversely affect the operations and profitability of our Company.

- 2. We operate in a highly competitive industry and our inability to compete effectively may adversely affect our business.***

We operate in a highly competitive industry. Given the diversity of our businesses, and the products and services offered by us, we face competition from the full spectrum of public sector banks, private sector banks (including foreign banks), financial institutions, captive finance affiliates of players in various industries, small finance banks and other NBFCs who are active in SME, retail and individual lending. Many of our competitors may have greater resources than we do, may be larger in terms of business volume and may have significantly lower cost of funds compared to us. They may also have greater geographical reach, long-standing partnerships and may offer their customers other forms of financing that we may not be able to provide. Competition in our industry depends on, amongst others, the ongoing evolution of government and regulatory policies, the entry of new participants and the extent to which there is consolidation among banks and financial institutions in India. We cannot assure you that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in our increasingly competitive industry and our inability to compete effectively may adversely affect our business.

- 3. Our business will require substantial funds, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.***

Our liquidity and profitability are, in large part, dependent upon our timely access to, and costs associated with raising capital including both debt and equity. Our business depends and will continue to depend on our ability to access diversified low-cost funding sources. As a financial services company, we face certain additional regulatory restrictions on our ability to obtain financing from banks. Further, under Indian Law, foreign investors are subject to investment restrictions that may limit our ability to attract foreign investors or capital from overseas investors.

Pursuing our growth strategy and introducing new product offerings to our customers will have an impact on our long-term capital requirements. With the growth of our business, we may be increasingly reliant on funding from debt capital markets. The market for such funds is competitive and our ability to obtain funds at competitive rates will depend on various factors. If we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors, including the regulatory environment and policy initiatives in India, lack of liquidity in the market, developments in the international markets affecting the Indian economy, investors’ and/or lenders’

perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition. If we are unable to obtain adequate financing or financing on terms satisfactory to us and in a timely manner, our ability to grow or support our business and to respond to business challenges could be limited and our business prospects, financial condition and results of operations would be materially and adversely affected.

4. *The majority of Issue proceeds will be utilized by our Company for repayment of unsecured loans availed by it from our Promoter and members of our Promoter Group.*

One of the Objects of this Issue is to repay the unsecured loans amounting to ₹ 2,490 lakhs availed by our Company from our Promoter and members of our Promoter Group. As on January 31, 2023, we have outstanding unsecured loans aggregating to ₹ 2,490 lakhs from our Promoter and member of the Promoter Group. Out of the Issue proceeds, we intend to utilize ₹ 2,490 lakhs for repayment of unsecured loans availed by our Company from our Promoter and members of the Promoter Group. For further details, please see the chapter titled “*Objects of the Issue*” beginning on page 48 of this Draft Letter of Offer.

5. *We are affected by volatility in interest rates for both our lending and fund raisings operations, which could cause our net interest income to decline and adversely affect our results of operations and profitability.*

A significant component of our revenue is the interest on loans and other financing activity we receive from the loans we disburse. Our net interest margins are affected by any volatility in interest rates in our lending operations. Interest rates are highly sensitive to many factors beyond our control, including competition from other banks and NBFCs, the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors, which have historically generated a relatively high degree of volatility in interest rates in India. Persistently high inflation in India may discourage the Government from implementing policies that would cause interest rates to decrease. Moreover, if there is an increase in the interest rates we pay on our borrowings that we are unable to pass to our customers, we may find it difficult to compete with our competitors, who may have access to funds at a lower cost or lower cost deposits. To the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than lenders that borrow only at fixed interest rates. Further, our ability to pass on any increase in interest rates to borrowers may also be constrained by regulations implemented by the Government or the RBI. In a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, it could lead to a reduction in our net interest income and net interest margin.

6. *We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.*

In deciding whether to extend credit or enter into other transactions with customers, for certain key elements of the credit assessment process, we rely on information furnished to us by or on behalf of customers (including in relation to their financial transactions and past credit history). We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given, may affect our judgement of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

7. *High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.*

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Customers may default on their

obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

8. *We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans.*

The value of the security provided to us, may be subject to reduction in value on account of other extraneous reasons. Consequently, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs recoverable from such customers.

Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such pledges and if at the time of such enforcement, due to adverse market conditions, the market value of the pledged securities have fallen to a level where we are unable to recover the monies lent by us, along with interest accrued thereon and associated costs, the results of our operations would be adversely affected. In case of any shortfall in margins in connection with the securities pledged as collaterals, we typically call upon the relevant customer to provide further collateral to make up for the deficit in such margins. Furthermore, enforcing our legal rights by litigating against defaulting customers is generally a slow and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

9. *Our Company's inability to obtain, renew or maintain the statutory and regulatory permits and approvals which are required to operate its existing or future businesses may have a material adverse effect on its business, financial condition, cash flows and results of operations.*

NBFCs in India are subject to regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as an NBFC with the RBI, we are also required to comply with certain other regulatory requirements for its business imposed by the RBI. In the future, there could be circumstances where our Company may be required to renew applicable permits and approvals and obtain new permits and approvals for its current and any proposed operations or in the event of a change in applicable law and regulations. There can be no assurance that RBI or other relevant authorities will issue any such permits or approvals in the time-frame anticipated by our Company, or at all. In addition, we require several registrations to operate our branches in the ordinary course of business. These registrations include those required to be obtained or maintained under applicable legislations governing shops and establishments, professional tax, GST registrations etc. Some of these approvals may have expired in the ordinary course, and our Company has either applied, or is in the process of applying for renewals of them. Failure by our Company to renew, maintain or obtain the required permits or approvals may result in an interruption of its operations and may have a material adverse effect on its business, financial condition, cash flows and results of operation.

10. *Our borrowers may transfer loan balances to other banks or financial institutions, resulting in a loss of expected interest income expected from such loans.*

If interest rates rise, borrowers with variable interest rates on their loans are exposed to increased equated monthly instalments ("EMIs") when the loans' interest rate adjusts upward. Such borrowers may seek to refinance their loans through balance transfer to other banks and financial institutions to avoid increased EMIs that result from an upwards adjustment of the loans' interest rate. Even if interest rates do not increase, our borrowers may seek to transfer loans to banks or other financial institutions that offer lower interest rates. Loan balance transfers result in a loss of interest income expected from such loans over the course of their tenure. All NBFCs and HFCs are prohibited from charging pre-payment penalties on any floating rate term loan sanctioned for purposes other than business to individual borrowers. Even where we are allowed to charge a prepayment penalty, the amount of such penalty will not make up for all of the loss of interest income expected from such loans. Some of our borrowers may be able to find balance transfer options at comparably lower interest rates or other financing alternatives, which could have an adverse effect on our business, results of operations and financial condition.

11. We may experience difficulties in expanding our products.

Expanding our products portfolio with new or existing products can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high -risk credit and impose significant costs on us.

12. We are exposed to operational and credit risks which may result in NPAs, and we may be unable to control or reduce the level of NPAs in our portfolio.

Our Company's inability to control the number and value of its NPAs may lead to deterioration of the quality of its loan portfolio and may adversely impact its business. Further, if our customers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected.

13. We may face asset-liability mismatches, which could affect our liquidity and consequently may adversely affect our operations and profitability.

Assets and liability mismatch ("ALM") represents a situation when financial terms of an institution's assets and liabilities do not match. ALM is a key financial parameter indicative of an NBFC's performance. We cannot assure you that we will be able to maintain a positive ALM always. We may rely on funding options with short term maturity periods for extending long term loans, which may lead to a negative ALM. Further, mismatches between our assets and liabilities are compounded in case of prepayment of financing facilities we grant to customers. Any mismatch in our ALM, may lead to a liquidity risk and have an adverse effect on our business prospects, financial condition, results of operations and profitability.

14. Security breaches of customers' confidential information that we store may harm our reputation and expose us to liability.

We store customers' bank information, credit information and other sensitive data. Any accidental or willful security breaches or other unauthorized access could cause the theft and criminal use of this data. Security breaches or unauthorized access to confidential information could also expose us to liability related to the loss of the information, time-consuming and expensive litigation and negative publicity. If security measures are breached because of third party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to customer data, our relationships with customers will be severely damaged, and we could incur significant liability. Further, we engage with certain third party service providers, and although our contracts with them restrict the usage of client data and impose protective precautions, there can be no assurance that they will abide by such contractual terms or that the contracts will be found to be in compliance with data protection laws. Because techniques used to obtain unauthorized access or to sabotage systems change frequently and generally are not recognized until they are launched against a target, we and our third party hosting facilities may be unable to anticipate these techniques or to implement adequate preventative measures. In addition, we may be required under applicable regulations to notify individuals of data security breaches involving their personal data. These mandatory disclosures regarding a security breach are costly to implement and often lead to widespread negative publicity, which may cause customers to lose confidence in the effectiveness of our data security measures. Any security breach, whether actual or perceived, would harm our reputation, and result in lost customers, which could in turn have a material adverse effect on our business, prospects, results of operations, financial condition or cash flows.

15. If we are unable to comply with the capital adequacy requirements stipulated by the RBI in connection with our lending business, our business, results of operations and cash flows may be materially and

adversely affected.

Our lending business, is subject to various regulations relating to the capital adequacy of NBFCs, which determine the minimum amount of capital we are required to maintain. There can be no assurance that we will be able to maintain CRAR within the regulatory requirements. Further, as we grow our lending business loan portfolio, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios with respect to such business. There can be no assurance that we will be able to raise adequate additional capital in the future on favourable terms, or at all. This could result in non-compliance with applicable capital adequacy ratios, which could have a material adverse effect on our business, results of operations and cash flows. Also, there is no assurance that RBI will not take any action for breaches in capital adequacy norms by our Company in the future. This could materially adversely affect our business, prospects, results of operations, financial condition and cash flows and could impair our ability to continue current operations and in extreme case, may lead to suspension/ cancellation/ withdrawal of our license to operate as an NBFC.

16. Any failure or severe weakness in our internal controls system could result in operational errors or fraud, affecting our profitability and reputation materially and negatively.

We have appropriate internal controls that are commensurate with the size and complexity of our operations. Our internal control procedures are equipped to conduct continuing assessments of the sufficiency and effectiveness of internal controls to ensure that business units follow our internal risk policies, compliance requirements, and internal circular guidelines. While we test and update our internal controls systems on a regular basis, we are nevertheless susceptible to operational risks deriving from the potential inadequacy or failure of internal processes or systems, and our measures may not be enough to ensure effective internal controls in all instances.

Our management information systems and internal control procedures for monitoring our operations and overall compliance may not catch every instance of non-compliance or suspicious transaction. If internal control deficiencies are discovered, our actions may not be sufficient to remedy the situation. We encounter operational risks and there may be losses as a result of internal control system failures or shortcomings. Deal errors, pricing problems, erroneous financial reporting, fraud, and the loss of essential systems and infrastructure may all result from failures in our internal controls systems. Such incidents may have a negative impact on our reputation, business, and operational outcomes. Internal control failures or material deficiencies can also lead to fraud situations. There can also be no assurance that we would be able to prevent frauds in the future or that our existing internal mechanisms to detect or prevent fraud will be sufficient. Any fraud discovered in the future may have an adverse effect on our reputation, business, results of operations and financial condition.

17. We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments.

A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage to our computers or systems or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers' or businesses' personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

18. *Our insurance coverage may not adequately protect us against losses.*

We keep insurance coverage that we believe is sufficient for our activities. Our insurance policies, on the other hand, may not provide appropriate coverage in some situations and are subject to deductibles, exclusions, and policy limits. We cannot, however, guarantee that the terms of our insurance policies will be adequate to cover any damage or loss we incur, that such coverage will continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims, or that the insurer will not deny coverage for any future claim.

19. *Our inability to completely and timely detect money laundering and other illicit actions may expose us to extra responsibility and affect our business and reputation.*

In India, we must follow all applicable anti-money laundering ("AML") and anti-terrorism laws and regulations. We bear the risk of failing to follow the statutory know your customer ("KYC") requirements, as well as fraud and money laundering by dishonest customers, in the ordinary course of our business. Despite having internal rules, processes, and controls in place to prevent and identify any AML activity and maintain KYC compliance, we cannot guarantee that we will be able to entirely manage instances of any possible or attempted violation. Any failure or ineffectiveness of our control system to detect such activities completely and immediately may subject us to regulatory action, including fines and penalties, and have a negative impact on our business and reputation.

20. *Our trademarks used by us are currently not registered in the name of our Company. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.*

Our name and logo are not registered under the provisions of Trademark Act, 1999 and therefore may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs. Thus, we cannot guarantee that the application for registration of some of our trademarks made by us will be allowed. In case we are unable to obtain the registration for the said trademarks in our name, we may suffer reputation loss, loss of customers etc. as we do not enjoy any statutory protection under the Trade Marks Act, 1999 which is important to retain our brand image. Further even if our name and logo are registered, we cannot assure that third parties will not infringe on our intellectual property, thereby causing damage to our business prospects, reputation and goodwill.

21. *In the past, there have been instances of delayed or non-filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company.*

In the past, there have been certain instances of delay in filing of statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company. Further, there have been instances of non-filings of statutory forms with RoC as per the reporting requirements laid down under the Companies Act 1956 and Companies Act, 2013 by our Company, for instance, while our Company has repaid the loans which were availed from The Vysya Bank Limited, State Bank of India and Bank of Maharashtra, however it failed to file the statutory form, Form 17 with the RoC for satisfaction of the charge, consequent to which the loans availed from the aforementioned banks are still reflecting under the index of charges maintained by the RoC. No show cause notice in respect to the above has been received by our Company till date. The occurrence of instances of delayed or erroneous filings in future may impact our results of operations and financial position.

22. *If we are unable to maintain and enhance the 'Enbee' brand equity, the sales of our services may suffer*

which would have a material adverse effect on our financial condition and results of operations

The brand we have developed, has over the years, significantly contributed to the success of our business. We also believe that maintaining and enhancing the ‘Enbee’ brand, is critical to maintaining and expanding our client base. Maintaining and enhancing our ‘Enbee’ brand may require us to make substantial investments in various areas, such as development, marketing and brand building activities, and these investments may not be successful. Further, in the event that we are not able to maintain the quality of our service or our goodwill is affected for any reason, our business and results of operations may be adversely affected. There can be no assurance that consumers will continue to be receptive to our brand.

In particular, as we expand into new market segments, there can be no assurance that consumers in these market segments will accept our brand. Further, our brand may also be adversely affected if our public image or reputation is tarnished by any negative publicity. Maintaining and enhancing our brand will depend largely on our ability to anticipate, gauge and respond in a timely manner to changing trends and consumer demands and preferences, and to continue to provide high quality services, which we may not do successfully. If we are unable to maintain or enhance our brand image, our results of operations and our business may be affected.

23. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- a. our ability to acquire and retain clients for our services;
- b. maintaining high levels of customer satisfaction;
- c. costs relating to our operations;
- d. adhering to our high quality and process execution standards;
- e. pricing/interest rate policies introduced by our competitors;
- f. the timing and nature of, and expenses incurred in, our marketing efforts;
- g. recruiting, training, and retaining sufficient skilled technical and management personnel; and
- h. developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

24. *We have experienced negative cash flows in relation to our operating activities and investment activities in recent years/periods. Any negative cash flows in the future could adversely affect our results of operations and financial condition.*

We have experienced negative cash flows from operations in the recent past. Our cash flow for FY 2019-20, FY 2020-21 and FY 2021-22, are set forth in the table below:

(in ₹ lakhs)

Particulars	For the year ended March 31		
	2021-22	2020-21	2019-20
Net cash used in operating activities	(1,202.08)	1.74	11.95
Net cash used in investing activities	(0.01)	(0.02)	(12.69)
Net cash from financing activities	1,085.30	0.00	0.00

Any negative cash flows in the future could adversely affect our results of operations and financial condition.

For further details, see “Management’s Discussion and Analysis of our Financial Condition and Results of Operations” on page 117.

25. *We do not own our Registered Office. Disruption of our rights as licensee/ lessee or termination of the agreement with our licensors/ lessors would adversely impact our business.*

The Registered Office of our Company is taken on lease for a fixed tenure from our Promoter. The lease is renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said

business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. We may have to find new premises which may lead to higher costs. However, since the registered office premises are owned by our promoter/promoter group, we do not foresee any problem in renewal.

26. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. For further details, please see the section titled “*Financial Information*” at page 75 of this Draft Letter of Offer.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

27. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

After the completion of the Issue, our Promoters and the members of the Promoter Group will hold approximately [●]% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoters and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Equity Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters’ shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

28. *Our Promoter is not the original promoter of our Company and has acquired control of our Company on in 2016, therefore we cannot trace certain historical records of our Company.*

Our Promoter is not the original Promoter of the Company and has acquired control of our Company in the year 2016. In view of the change in management, we are unable to access certain historical records of the Company, such as prospectus issued during the initial public offer of the Company. Accordingly, we have relied on other documents, including annual returns, directors’ report, the statutory register of members of the Company, minutes of the meetings of the Board of Directors and Shareholders. We cannot assure you that on account of any of the missing records, we will not be subject to any penalties imposed by the relevant regulatory authority in this respect.

29. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of December 31, 2022, March 31, 2022, March 31, 2021, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to

our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please see the section titled “*Financial Information*” at page 75 of this Draft Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

30. *Our Company has taken certain unsecured loans from our Promoter and members of our Promoter Group, which may be recalled at any time.*

As on January 31, 2023, our Company has outstanding unsecured loans aggregating to ₹ 2,490 lakhs, which have been extended by our Promoter and members forming part of our Promoter Group and may be recalled by them at any time. In the event, any of such lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations.

31. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

32. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience and continued services and the management skills of our Key Managerial Personnel and the guidance of our Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management and Organisational Structure*” on page 73 of this Draft Letter of Offer.

33. *Our Company has been unable to make payment towards certain statutory dues for more than six months and therefore our Statutory Auditor has included an emphasis of matter in the CARO report for the Financial Year ended March 31, 2022.*

Our Statutory Auditor has included the following Emphasis of Matter in the CARO report for the Financial Year ended March 31, 2022:

“*In respect of Company’s Statutory Dues:*

According to the information and explanations given to us and the records of the Company examined by us, in our opinion, the Company is regular in depositing the undisputed statutory dues, including provident fund, employees' state insurance, income tax, sales tax, service tax, duty of customs, duty of excise, value added tax, cess, goods and services tax and other material statutory dues, as applicable, with the appropriate authorities except for following:

As on balance sheet date, the company has not paid following statutory dues for more than 6 months:

The statutory due outstanding as at December 31, 2022 were ₹ 86.49 lakhs of which ₹ 32.85 lakhs is outstanding for more than six months. The details of such statutory dues have been provided below:

Particulars	Outstanding amount as at December 31, 2022	Outstanding amount for more than six months as at December 31, 2022
Income Tax	45.98	25.80
Profession tax	0.36	0.20
TDS	40.15	6.86
Total	86.49	32.86

Although no show cause notice in respect to the above has been received by our Company till date and no penalty or fine has been imposed by any regulatory authority, it cannot be assured that there will not be such instances in the future or that our Company will not commit any further delays or defaults in relation to the applicable regulatory requirements, or that any penalty or fine will not be imposed by any regulatory authority in respect to the same.

34. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future.

35. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled "Objects of the Issue".

As the issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — "Objects of the Issue" on page 48 of this Draft Letter of Offer.

36. As the securities of our Company are listed on BSE Limited, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.

The Equity Shares of our Company are listed on BSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations, as well as requirements under the Companies Act for a listed Company. During the preceding one year from the date of filing of this Draft Letter of Offer, there have been no defaults in complying with the applicable provisions of SEBI Listing Regulations and accordingly, our Company has filed this Draft Letter of Offer under Part B of Schedule VI of SEBI ICDR Regulations.

Our Company endeavours to comply with all applicable obligations/reporting requirements, however, upon occurrence of any future instances of non-disclosures/delayed/erroneous disclosures and/or any other violations by us, our Company may be exposed to imposition of penalties, warnings and show cause notices being against us by SEBI and Stock Exchanges. For instance, BSE Limited has imposed fine on our Company in the past on account of non-compliance of certain provisions of the SEBI Listing Regulations, for further details, refer to – “*Outstanding Litigations and Defaults - Proceedings involving material violations of statutory regulations by our Company*” on page 127. Any future adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

- 37. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “*Industry Overview*” of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

- 38. *We will not distribute the Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.***

In accordance with the SEBI ICDR Regulations and SEBI Rights Issue Circular our Company will send, only through email, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

- 39. *SEBI has recently, by way of circular dated January 22, 2020, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise

caution, carefully follow the requirements as stated in the SEBI circular dated January 22, 2020 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 135 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned / reversed / failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

40. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the circular SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. For details, please refer chapter “*Terms of the Issue*” on page 138 of this Draft Letter of Offer.

41. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 138 of this Draft Letter of Offer..

42. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

43. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchanges on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

44. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

45. *Investors will be subject to market risks until the Equity Shares credited to the investors demat account are listed and permitted to trade.*

Investors can start trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

46. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

47. *The trading price of our Equity Shares may be subject to volatility and you may not be able to sell your Equity Shares at or above the Issue Price.*

The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political

and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our Equity Shares.

48. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

49. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

50. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "*Terms of the Issue*" on page 138 of this Draft Letter of Offer. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

51. *There is no guarantee that our Equity Shares will be listed, or continue to be listed, on the Indian stock exchanges in a timely manner, or at all, and prospective investors will not be able to immediately sell their Equity Shares on the Stock Exchange.*

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be applied for or granted until after our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. Accordingly, there could be a failure or delay in listing our Equity Shares on the Stock Exchange, which would adversely affect your ability to sell our Equity Shares.

52. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the*

trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

53. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

54. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our summary statements of assets and liabilities and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity, as per the Financial Statements, have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

55. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

56. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

57. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the

profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

58. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange's indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

59. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

60. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

61. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

62. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as “gig workers” and “platform workers” and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

63. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

64. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders’ equity and the price of our Equity Shares.

Accordingly, investors should not place undue reliance on information.

Global Industry Outlook

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia’s war in Ukraine could escalate, and tighter global financing conditions could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

Forces shaping the Outlook

The global fight against inflation, Russia’s war in Ukraine, and a resurgence of COVID-19 in China weighed on global economic activity in 2022, and the first two factors will continue to do so in 2023.

Despite these headwinds, real GDP was surprisingly strong in the third quarter of 2022 in numerous economies, including the United States, the euro area, and major emerging market and developing economies. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia’s invasion of Ukraine.

In the fourth quarter of 2022, however, this uptick is estimated to have faded in most—though not all—major economies. US growth remains stronger than expected, with consumers continuing to spend from their stock of savings (the personal saving rate is at its lowest in more than 60 years, except for July 2005), unemployment near historic lows, and plentiful job opportunities. But elsewhere, high-frequency activity indicators (such as business and consumer sentiment, purchasing manager surveys, and mobility indicators) generally point to a slowdown.

COVID-19 deepens China's slowdown. Economic activity in China slowed in the fourth quarter amid multiple large COVID-19 outbreaks in Beijing and other densely populated localities. Renewed lockdowns accompanied the outbreaks until the relaxation of COVID-19 restrictions in November and December, which paved the way for a full reopening. Real estate investment continued to contract, and developer restructuring is proceeding slowly, amid the lingering property market crisis. Developers have yet to deliver on a large backlog of presold housing, and downward pressure is building on house prices (so far limited by home price floors). The authorities have responded with additional monetary and fiscal policy easing, new vaccination targets for the elderly, and steps to support the completion of unfinished real estate projects. However, consumer and business sentiment remained subdued in late 2022. China's slowdown has reduced global trade growth and international commodity prices.

Monetary policy starts to bite. Signs are apparent that monetary policy tightening is starting to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022 (Figure 1). Prices of fuel and nonfuel commodities have declined, lowering headline inflation, notably in the United States, the euro area, and Latin America. But underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels. It has persisted amid second-round effects from earlier cost shocks and tight labor markets with robust wage growth as consumer demand has remained resilient. Medium-term inflation expectations generally remain anchored, but some gauges are up. These developments have caused central banks to raise rates faster than expected, especially in the United States and the euro area, and to signal that rates will stay elevated for longer. Core inflation is declining in some economies that have completed their tightening cycle—such as Brazil. Financial markets are displaying high sensitivity to inflation news, with equity markets rising following recent releases of lower inflation data in anticipation of interest rate cuts (Box 1), despite central banks' communicating their resolve to tighten policy further. With the peak in US headline inflation and an acceleration in rate hikes by several non-US central banks, the dollar has weakened since September but remains significantly stronger than a year ago.

Figure 1. Twin Peaks? Headline and Core Inflation
(Percent, year over year)

Sources: Haver Analytics; and IMF staff calculations.
Note: The figure shows the developments in headline and core inflation across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the change in prices for goods and services, but excluding those for food and energy (or the closest available measure). For the euro area (and other European countries for which the data are available), energy, food, alcohol, and tobacco are excluded. The gray bands depict the 10th to 90th percentiles of inflation across economies.

Winter comes to Europe. European economic growth in 2022 was more resilient than expected in the face of the large negative terms-of-trade shock from the war in Ukraine. This resilience—which is visible in consumption and investment data for the third quarter—partly reflects government support of about 1.2 percent of European Union GDP (net budgetary cost) to households and firms hit by the energy crisis, as well as dynamism from economies reopening. Gas prices have declined by more than expected amid higher non-Russian pipeline and liquefied natural gas flows, compression of demand for gas, and a warmer-than-usual winter. However, the boost from reopening appears to be fading. High-frequency indicators for the fourth quarter suggest that the manufacturing and services sectors are contracting. Consumer confidence and business sentiment have worsened. With inflation at about 10 percent or above in several euro area countries and the United Kingdom, household budgets remain stretched. The accelerated pace of rate increases by the Bank of England and the European Central Bank is tightening financial conditions and cooling demand in the housing sector and beyond.

The Forecast

Growth Bottoming Out

Global growth, estimated at 3.4 percent in 2022, is projected to fall to 2.9 percent in 2023 before rising to 3.1 percent in 2024 (Table 1). Compared with the October forecast, the estimate for 2022 and the forecast for 2023 are both higher by about 0.2 percentage point, reflecting positive surprises and greater-than-expected resilience in numerous economies. Negative growth in global GDP or global GDP per capita—which often happens when there is a global recession—is not expected. Nevertheless, global growth projected for 2023 and 2024 is below the historical (2000–19) annual average of 3.8 percent.

The forecast of low growth in 2023 reflects the rise in central bank rates to fight inflation—especially in advanced economies—as well as the war in Ukraine. The decline in growth in 2023 from 2022 is driven by advanced economies; in emerging market and developing economies, growth is estimated to have bottomed out in 2022. Growth is expected to pick up in China with the full reopening in 2023. The expected pickup in 2024 in both groups of economies reflects gradual recovery from the effects of the war in Ukraine and subsiding inflation. Following the path of global demand, world trade growth is expected to decline in 2023 to 2.4 percent, despite an easing of supply bottlenecks, before rising to 3.4 percent in 2024.

These forecasts are based on a number of assumptions, including on fuel and nonfuel commodity prices, which have generally been revised down since October, and on interest rates, which have been revised up. In 2023, oil prices are projected to fall by about 16 percent, while nonfuel commodity prices are expected to fall by, on average, 6.3 percent. Global interest rate assumptions are revised up, reflecting intensified actual and signaled policy tightening by major central banks since October.

For *advanced economies*, growth is projected to decline sharply from 2.7 percent in 2022 to 1.2 percent in 2023 before rising to 1.4 percent in 2024, with a downward revision of 0.2 percentage point for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023.

For *emerging market and developing economies*, growth is projected to rise modestly, from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024, with an upward revision of 0.3 percentage point for 2023 and a downward revision of 0.1 percentage point for 2024. About half of emerging market and developing economies have lower growth in 2023 than in 2022.

Inflation Peaking

About 84 percent of countries are expected to have lower headline (consumer price index) inflation in 2023 than in 2022. Global inflation is set to fall from 8.8 percent in 2022 (annual average) to 6.6 percent in 2023 and 4.3 percent in 2024—above pre-pandemic (2017–19) levels of about 3.5 percent. The projected disinflation partly reflects declining international fuel and nonfuel commodity prices due to weaker global demand. It also reflects the cooling effects of monetary policy tightening on underlying (core) inflation, which globally is expected to decline from 6.9 percent in the fourth quarter of 2022 (year over year) to 4.5 percent by the fourth quarter of 2023. Still, disinflation will take time: by 2024, projected annual average headline and core inflation will, respectively, still be above pre-pandemic levels in 82 percent and 86 percent of economies.

In *advanced economies*, annual average inflation is projected to decline from 7.3 percent in 2022 to 4.6 percent in 2023 and 2.6 percent in 2024—above target in several cases. In *emerging market and developing economies*,

projected annual inflation declines from 9.9 percent in 2022 to 8.1 percent in 2023 and 5.5 percent in 2024, above the 4.9 percent pre-pandemic (2017–19) average. In *low-income developing countries*, inflation is projected to moderate from 14.2 percent in 2022 to 8.6 percent in 2024—still high, but close to the pre-pandemic average.

Rise to the Outlook

The balance of risks to the global outlook remains tilted to the downside, with scope for lower growth and higher inflation, but adverse risks have moderated since the October 2022 World Economic Outlook.

9/ The inflation rate for the euro area is 5.7% in 2023 and 3.3% in 2024, that for Japan is 2.8% in 2023 and 2.0% in 2024, and that for the United States is 4.0% in 2023 and 2.2% in 2024.

Upside risks—Plausible upside risks include more favorable surprises to domestic spending—as in the third quarter of 2022—which, however, would increase inflation further. At the same time, there is room for an upside scenario with lower-than-expected inflation and less monetary tightening:

- *Pent-up demand boost*: Fueled by the stock of excess private savings from the pandemic fiscal support and, in many cases, still-tight labor markets and solid wage growth, pent-up demand remains an upside risk to the growth outlook. In some advanced economies, recent data show that households are still on net adding to their stock of excess savings (as in some euro area countries and the United Kingdom) or have ample savings left (as in the United States). This leaves scope for a further boost to consumption—particularly of services, including tourism. However, the boost to demand could stoke core inflation, leading to even tighter monetary policies and a stronger-than-expected slowdown later on. Pent-up demand could also fuel a stronger rebound in China.

- *Faster disinflation:* An easing in labor market pressures in some advanced economies due to falling vacancies could cool wage inflation without necessarily increasing unemployment. A sharp fall in the prices of goods, as consumers shift back to services, could further push down inflation. Such developments could imply a “softer” landing with less monetary tightening.

Downside risks—Numerous downside risks continue to weigh on the global outlook, lowering growth while, in a number of cases, adding further to inflation:

- *China’s recovery stalling:* Amid still-low population immunity levels and insufficient hospital capacity, especially outside the major urban areas, significant health consequences could hamper the recovery. A deepening crisis in the real estate market remains a major source of vulnerability, with risks of widespread defaults by developers and resulting financial sector instability. Spillovers to the rest of the world would operate primarily through lower demand and potentially renewed supply chain problems.
- *War in Ukraine escalating:* An escalation of the war in Ukraine remains a major source of vulnerability, particularly for Europe and lower-income countries. Europe is facing lower-than-anticipated gas prices, having stored enough gas to make shortages unlikely this winter. However, refilling storage with much-diminished Russian flows will be challenging ahead of next winter, particularly if it is a very cold one and China’s energy demand picks up, causing price spikes. A possible increase in food prices from a failed extension of the Black Sea grain initiative would put further pressure on lower-income countries that are experiencing food insecurity and have limited budgetary room to cushion the impact on households and businesses. With elevated food and fuel prices, social unrest may increase.
- *Debt distress:* Since October, sovereign spreads for emerging market and developing economies have modestly declined on the back of an easing in global financial conditions (Box 1) and dollar depreciation. About 15 percent of low-income countries are estimated to be in debt distress, with an additional 45 percent at high risk of debt distress and about 25 percent of emerging market economies also at high risk. The combination of high debt levels from the pandemic, lower growth, and higher borrowing costs exacerbates the vulnerability of these economies, especially those with significant near-term dollar financing needs.
- *Inflation persisting:* Persistent labor market tightness could translate into stronger-than-expected wage growth. Higher-than-expected oil, gas, and food prices from the war in Ukraine or from a faster rebound in China’s growth could again raise headline inflation and pass through into underlying inflation. Such developments could cause inflation expectations to de-anchor and require an even tighter monetary policy.
- *Sudden financial market repricing:* A premature easing in financial conditions in response to lower headline inflation data could complicate anti-inflation policies and necessitate additional monetary tightening. For the same reason, unfavorable inflation data releases could trigger sudden repricing of assets and increase volatility in financial markets. Such movements could strain liquidity and the functioning of critical markets, with ripple effects on the real economy.
- *Geopolitical fragmentation:* The war in Ukraine and the related international sanctions aimed at pressuring Russia to end hostilities are splitting the world economy into blocs and reinforcing earlier geopolitical tensions, such as those associated with the US-China trade dispute. Fragmentation could intensify—with more restrictions on cross-border movements of capital, workers, and international payments—and could hamper multilateral cooperation on providing global public goods.¹ The costs of such fragmentation are especially high in the short term, as replacing disrupted cross-border flows takes time.

Indian Economy Overview

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India’s recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

India's Gross Domestic Production

- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Indian Outlook of Construction and Infrastructure Industry

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Market Size

India plans to spend US\$ 1.4 trillion on infrastructure through 'National Infrastructure Pipeline' in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion.

India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of 22 August, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).

Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country's increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over FY21-26 driven by spending on water supply, transport and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the 10th five year plan as against 9% in the 11th five year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five year plan, with 40% of the funds coming from the private sector.

Road Ahead

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom as a result of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the

preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the standalone financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

B) Financial risk management

The Company has to manage various risks associated with the lending business. These risks include credit risk, liquidity risk and market risk.

i. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company undertakes regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Board.

ii. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from :

- a. **Company's receivables from customers**
- b. **Loan Portfolio**
- c. **Cash and cash equivalents and other bank balances**

a. Receivables:

The receivables from customers is NIL at present.

b. Loans

Composition	Particulars	Carrying amount	
		March 31, 2022	March 31, 2021
Loans to Related parties		0	0
Other Loans and Advances		2,194.20	965.53
Total		2,194.20	965.53

Expected credit losses are a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive. Because expected credit losses consider the amount and timing of payments, a credit loss arises even if the entity expects to be paid in full but later than when contractually due. The Company measures the expected credit loss of loans based on historical trend, industry practices and the business environment in which the entity operates.

Key components of credit risk assessment

The key components of credit risk assessment are:

- Probability of Default ("PD"): represents the likelihood of default over a defined time horizon.
- Exposure at Default ("EAD"): represents how much the counter-party is likely to be borrowing at the time of default.
- Loss Given Default ("LGD"): represents the proportion of EAD that is likely to be lost post-default.
- The ECL is computed as a product of PD, LGD and EAD.

Definition and assessment of default

The Company considers the following as constituting an event of default:

- the borrower is past due more than 90 days on any material credit obligation to the Company; or
- the borrower is unlikely to pay its credit obligations to the Company in full.

When assessing if the borrower is unlikely to pay its credit obligation, the Company takes into account both qualitative and quantitative indicators. Quantitative indicator such as overdue status is key inputs in this analysis.

Quantitative indicators such as overdue status and non-payment on another obligation to the Company of the same counterparty are key inputs in this analysis.

Delinquency buckets have been considered as the primary basis for the staging of all loans with:

- 0-30 days past due loans classified as Stage 1
- 31-90 days past due loans classified as Stage 2 and
- Above 90 days past due loans classified as Stage 3

Along with delinquency buckets; the internally developed criteria's to analyse whether there is increase in credit risk or whether the asset is credit impaired are considered for staging of loans.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
