Current Market Scenario and outlook (Yarn)

- *The export of cotton yarn in the first six months of this financial year declined 39 per cent.*
- *The continuous fall in cotton yarn exports since start of this year has raised concerns in the textile industry.*
- *Increase in raw cotton prices, import duty by importing countries and no export benefits on cotton yarns has increased the cost of Indian yarn as compared to competing countries.*
- *India is the second largest producer of Manmade Fibre (MMF) and Filaments globally after China.*
- *Domestic manmade yarn demand witnessed an uptick in Q2.*
- *Domestic demand of cotton and manmade yarn expected to increase further in Q3 and Q4 due marriage and uniform season.*
- *We are putting more thrust on sale of value added & new products to protect bottomline.*

Current Market Scenario and outlook (Denim)

- *There is a tremendous oversupply situation in the Indian denim industry. This is sharply affecting demand patterns. Denim fabric manufacturing is growing in the unorganised segment. Number of denim units have increased to 46, from 30 in 2012. Capacity has increased to 1500 million metres per annum from 800 million metres per annum. Another 150 million metres per annum is in pipeline. Estimated Domestic market size is 750 to 800 million metres per annum and Export market size is estimated at 200 million metres per annum.*
- *The overall capacity utilisation in the industry is low, as domestic brands and dealers are challenged with increased inventories and low retail offtake. Buying patterns have altered drastically. Most units are understood to have temporarily shut down a part capacity, therefore running at capacity utilisation of 70%*
- *The influx of imported denim fabrics in an already saturated market is causing further drop of demand.*
- *Indian branded garmenters are moving their production to Bangladesh, as importing garments has become easier. Brand buying in India has been severely affected, as large number of imported garments are getting placed on retail shelves, at lower costs.*
- *Denim fabric export has been sluggish, prices under high pressure, as sales for International brands too are slower than last season. Roll over of seasonal orders, delay in garment manufacturing cycles have a negative impact on fabric demand.*
- *With the changes in product mix, value additions, increased customer base and rationalisation of operational costs, we have been able to revive our denim business in first 6 months of current fiscal.*

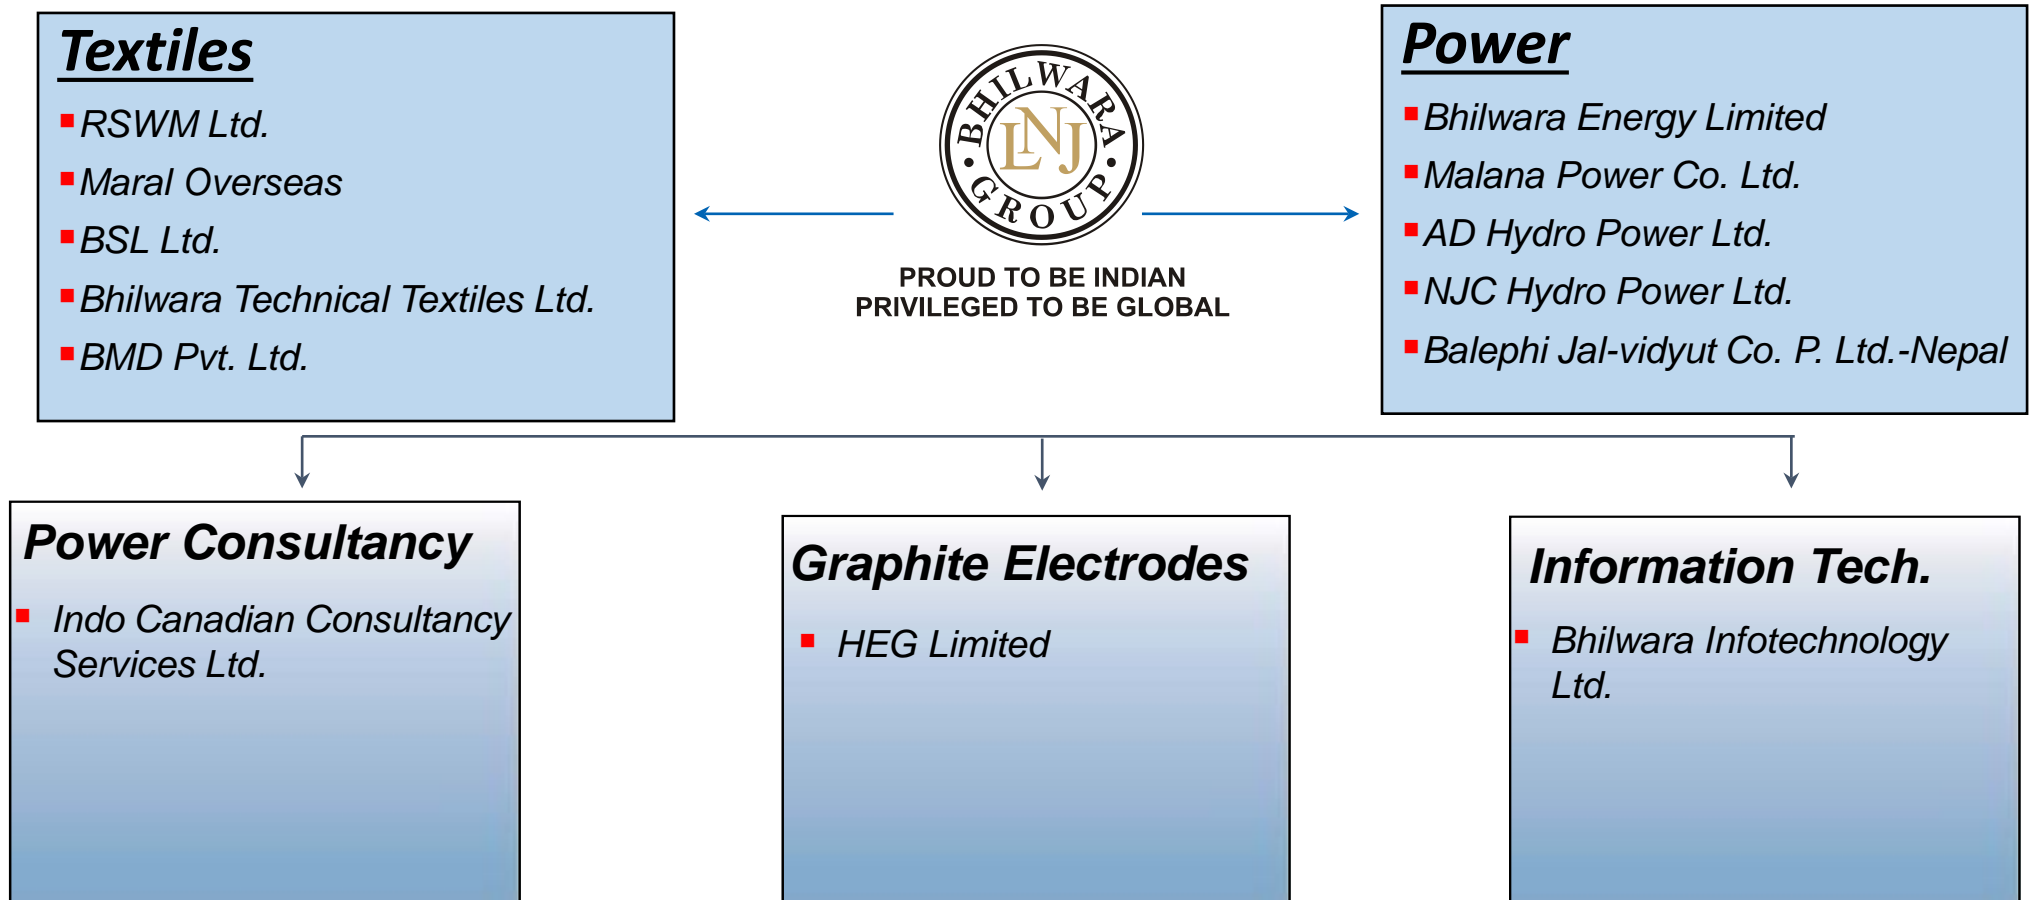

Opportunities (Denim)

- *The large format retailers in India – Reliance, Future Lifestyles, Madura Lifestyle Fashions, Myntra are yet churning our large volumes for their quickly increasing shelf space. Though the price points remain challenging, this arena is now major focus for growth.*
- *Our focused attention is to further increase our share in National and International brands who are procuring fabrics within India.*
- *Large format retailers and offline retailers are increasingly searching for full garment package solutions.*
