This is for your information and dissemination.

Thanking you,

Yours faithfully,

For **Sun Pharmaceutical Industries Limited**

(Anoop Deshpande)
Company Secretary and Compliance Officer

Enclosed: As above

FOR IMMEDIATE RELEASE

Sun Pharma to launch Brillo[®], a first-in-class oral lipid-lowering drug in India

- *Bempedoic Acid has a new mechanism of action compared to existing products*
- *Bempedoic Acid administered as a 180-mg dose, is approved by the US FDA and European Union for the treatment of hypercholesterolemia*

Mumbai, May 18, 2022: Sun Pharmaceutical Industries Limited (Reuters: SUN.BO, Bloomberg: SUNP IN, NSE: SUNPHARMA, BSE: 524715, "Sun Pharma" and includes its subsidiaries and/or associate companies) today announced that one of its wholly-owned subsidiaries plans to launch a first-in-class oral drug, Bempedoic Acid, in India for reducing low-density lipoprotein (LDL) cholesterol. The company will launch the drug under the brand name "Brillo[®]".

Brillo[®] is a first-in-class drug which has a new mechanism of action compared to the currently available lipid-lowering agents. It is indicated for people who have an inherited genetic disorder that causes high cholesterol levels or established heart disease where cholesterol levels remain high, despite lifestyle changes and the use of maximum tolerated dose of statins.

Kirti Ganorkar, CEO – India Business, Sun Pharma said, "Sun Pharma is the leader in the cardiovascular segment and a pioneer in lipid-lowering therapy in India. In line with our commitment to introducing novel products, we are launching this first-in-class oral drug, Brillo[®]. It is a novel treatment option that will help manage high LDL cholesterol in patients with heart diseases, a condition which is growing at an alarming rate."

One in four deaths in India is now because of heart diseases, with ischemic heart disease and stroke responsible for >80% of this burden.¹ These diseases tend to affect patients in the most productive years of their lives and result in catastrophic social and economic consequences.²

The burden of heart disease at 272 per 1,00,000 population in India is higher than the global average of 235 per 1,00,000 population¹. Some patients with elevated cholesterol levels may respond inadequately to statins. There also a set of patients who are intolerant to statins. Bempedoic acid can be a useful treatment option for such patients. The launch of Brillo[®] will address this significant unmet need in India.

As per SMSRC Feb-2022 data, Sun Pharma is ranked No. 1 by prescriptions amongst Cardiologists in India. With a strong product portfolio and leading prescription brands like Aztor, Storvas, Rozavel and Rosuvas, Sun Pharma's Cardiology division constantly strives to
