*Details of instruments/facilities in Annexure-1*

@ Tier II Bonds under Basel III are characterized by a 'Point of Non-Viability' (PONV) trigger due to which the investor may suffer a loss of principal. PONV will be determined by the Reserve Bank of India (RBI) and is a point at which the bank may no longer remain a going concern on its own unless appropriate measures are taken to revive its operations and thus, enable it to continue as a going concern. In addition, the difficulties faced by a bank should be such that these are likely to result in financial losses and raising the Common Equity Tier I capital of the bank should be considered as the most appropriate way to prevent the bank from turning non-viable.

In CARE's opinion, the parameters considered to assess whether a bank will reach the PONV are similar to the parameters considered to assess rating of Tier II instruments even under Basel II. CARE has rated the Tier II bonds under Basel III after factoring in the additional feature of PONV.

# CARE has rated the aforesaid Basel III Compliant Tier-I Perpetual Bonds [Additional Tier I Bonds (Basel III)] after taking into consideration its key features as mentioned below:

- The bank has full discretion at all times to cancel coupon payments.
- The coupon is to be paid out of current year profits. However, if the current year's profits are not sufficient, i.e., payment of such coupon is likely to result in losses during the current year, the balance of coupon payment may be made out of reserves representing appropriation of net profits, including statutory reserves and excluding share premium, revaluation reserve, foreign currency translation reserve, investment reserve and reserves created on amalgamation provided the bank meets the minimum regulatory requirements for Common Equity Tier I [CET I], Tier I and Total Capital Ratios and capital buffer frameworks as prescribed by the Reserve Bank of India [RBI].
- The instrument may be written-down upon CET I breaching the pre-specified trigger of 5.5% before April 1, 2021, and 6.125% on and after April 1, 2021, or written-off / converted into common equity shares on occurrence of the trigger event called point of non-viability (PONV). The PONV trigger shall be determined by RBI. Any delay in payment of interest/principal (as the case may be) due to invocation of any of the features mentioned above would constitute as an event of default as per CARE's definition of default and as such these instruments may exhibit a some-what sharper migration of the rating compared with other subordinated debt instruments.

### Detailed Rationale & Key Rating Drivers

The ratings assigned to the various debt instruments of The Lakshmi Vilas Bank Limited (LVB) have been placed on credit watch with developing implications with the moratorium imposed by Government of India (GoI) on LVB, after considering an application made by the RBI. RBI's action comes on the backdrop of significant deterioration in the financial risk profile of the bank with weakened capitalisation levels and in the absence of a credible revival plan. The RBI has superseded the Board of Directors of the bank and appointed Mr. T N Manoharan (former non-executive chairman of Canara bank) as the Administrator and on November 17, 2020, RBI has published a draft scheme for amalgamation of LVB with DBS Bank India Limited (DBS). CARE will closely monitor the progress on the amalgamation scheme and will consider taking appropriate rating action in due course.

### Rating Sensitivities

**Positive Factors:** Factors that could, individually or collectively, lead to positive rating action/upgrade

- Improvement in the capital adequacy levels based on the proposed scheme of amalgamation

**Negative Factors:** Factors that could, individually or collectively, lead to negative rating action/downgrade

- Any delay in the amalgamation process
- Any restriction on payments of coupon

### Liquidity Profile: Poor

Post the moratorium put on the bank by RBI, restrictions have been imposed on banking operations and ability of the bank to meet all its commitments in timely manner is severely constrained. It is to be noted that in respect of Tier II Bonds (Basel III Compliant) –III, coupon payment is due on December 09, 2020.
