EXPLANATORY STATEMENT PURSUANT TO SECTION 102 OF THE COMPANIES ACT, 2013

ITEM NO.1

To alter the Objects Clause of the Memorandum of Association.

Considering the growth prospects of the company, POWERGRID plans to diversify its business into other business fields viz. Information & Communication Technologies (ICT) infrastructure, Data Centre, Mobile Tower Infrastructure services, signaling telecommunication system, Network/Security Operation Centre, Network Control Center, Smart Grid, Electric Vehicle charging infrastructure, Project Management Consultancy in renewable, non-renewable and non-conventional energy projects etc. POWERGRID is already having experience in telecom, railway electrification, Smart Grid and project management consultancy, etc. POWERGRID intends to further augment its experience in the following areas to diversify its business:

- (i) **Mobile Tower Infrastructure Service Provider:** While the Digital India Program of Govt. of India envisages universal mobile connectivity, several villages in the country are still without mobile connectivity and countless sparsely populated areas are still suffering from poor connectivity.

POWERGRID owns about 2,50,000 transmission towers mostly located in rural areas. POWERGRID has undertaken an initiative to explore the possibility of using its transmission infrastructure to enable mobile connectivity to these rural locations by leasing out tower space along with reliable power for installation and operation of Base Transceiver Station (BTS). A pilot BTS has been made operational on one of its towers in the vicinity of Delhi which has been running satisfactorily for the past one year.

- (ii) **Railways Modernization:** In addition to experience and expertise across development and operation of transmission systems, POWERGRID has been associated with Indian Railways to electrify some of their routes. POWERGRID has developed expertise in establishing tower design, telecom infrastructure, rural electrification etc.

The Company intends to participate in business opportunities arising out of Indian Railways plans to modernize its signaling system.

- (iii) **Data Centre:** Data-intensive initiatives by the government such as the Aadhar and Digital India campaign will lead to lead multifold growth in data generation by both private and public entities, and it is envisaged that requirements for data storage space (Data Center) would surge in future, thereby creating opportunities in this area.

POWERGRID's more than 230 Substations equipped with fiber optic connectivity, reliable power infrastructure and 24x7 security can provide a viable solution to the emerging needs for Data Centers.

Accordingly, existing Object **Clause 3A in Part III A (Main Objects)** of the Objects Clause of the Memorandum of Association is proposed to be altered subject to approval of Members of the Company.

Further, **three new Clauses i.e. 3B, 3C and 3D** are proposed to be inserted [after Object 3A in the Part III A (Main Objects)] to undertake following activities:

- (i) **Clause 3B: To invest and/or act as Project Management Consultant in Energy projects:**

According to an Independent Professional Institution in the energy efficiency area, India has a market size of around Rs.93,000 crore to Rs.1,20,000 crore, in 2017, across four verticals – Commercial Buildings, Industries, Agriculture and Municipalities. This market offers a potential opportunity for POWERGRID to diversify in these energy projects, as an investor, and/or a Project Management Consultant, having project implementation expertise and Pan-India presence. POWERGRID is also registered with Bureau of Energy Efficiency as an Energy Service Company (ESCO).

Further, a thrust on Renewable Energy Projects offers an opportunity for POWERGRID to act as a Project Management Consultant for such projects.

- (ii) **Clause 3C: To develop Smart Grid infrastructure:**

POWERGRID sees an emerging business opportunity in developing Smart Grid infrastructure which involves installing communicable devices in distribution network such as smart meters, fault pass indicators (FPI), field remote terminal units (FRTU), replacing the conventional meters with two-way communicable smart meters, integrating all the meters to the control centers, providing information to customers about consumption and facilitate time of use, pre-paid/ post-paid options and participate in demand side management, setting up control center with complete visibility of the system and capability to continuously monitor losses to take remedial actions and the Outage Management System (OMS) which would assist in fast restoration of the system.

As Government of India is emphasizing development of Smart Grid across the country with about 30 crore customers, entering into this business, as and when opportunity arises and subject to policies and regulations, shall help POWERGRID to undertake works in this area.

POWERGRID has developed a pilot Smart Grid Project in Puducherry, with most of the above attributes, which is being leveraged for furthering business interests and the Company is providing Consultancy Services for a number of smart grid projects in a number of States.

POWERGRID now aims to offer its investment led services to States, for implementation of Smart Grid projects, and recover the investment over a period of time through annuity.

(iii) Clause 3D: To develop Electric Vehicle Charging Infrastructure:

Government of India is promoting use of Electric Vehicles and it is expected that penetration of Electric Vehicles (EV) into Indian roads will steadily increase as it happens in many countries. In the year 2012, the National Electric Mobility Mission Plan – 2020 (NEMMP-2020) was formulated to introduce 5-7 million electric vehicles by 2020. In May '17, NITI Aayog in association with Rocky Mountain Institute, USA formulated action plans to transform mobility sector of India into e-mobility. The report suggests that deployment of charging infrastructure can help in mass adoption of EV. Thus, it is imperative to focus on developing charging infrastructure along with EV.

In order to participate in Gol's e-mobility mission, POWERGRID envisages to get actively involved in developing EV Charging Stations across India to facilitate e-mobility solutions in road transport. In this direction, a pilot initiative has been undertaken at Hyderabad to develop public charging station at the Metro Station and for E-Taxi operators. Considering Gol's thrust in addressing energy security issues by reducing the dependence on imports for fuel, the Company sees huge business potential for investment into this business in future.

None of the Directors and Key Managerial Personnel of the Company or their relatives are concerned or interested in the resolution financially or otherwise except to the extent that he or she is a Director and/or Shareholder of the Company.

The Board of Directors of your Company recommends passing of the resolution as set out at Item No. 1 as a Special Resolution.

ITEM NO.2

Increase in Shareholding limit of Foreign Portfolio Investors (FPIs) including Foreign Institutional Investors (FIIs) limits in POWERGRID.

As per the provisions of the Foreign Exchange Management Act, 1999 and Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 as amended from time to time read with Consolidated FDI Policy Circular of 2017 (DT. 28.08.2017) issued by DIPP and Master Direction – Foreign Investment in India (FED Master Direction No.11/2017-18 updated as on 06.04.2018) issued by the Reserve Bank of India ("Regulatory Provisions on Foreign Investment in India"), the aggregate holdings of FPIs (including FIIs) registered with SEBI shall not exceed 24% of paid-up Equity Capital of a company. However, this limit of 24% is permissible to be increased upto the Sectoral cap i.e. permissible Foreign Investment limit for the sector with the approval of the Board of Directors and the shareholders of the Company by way of a Special Resolution. POWERGRID increased the limit of FPI holding in the Equity Shares of the Company from 24% to 30% in the year 2013 with the approval of Shareholders.

Presently, the FPIs / FIIs holding in POWERGRID is about 24%. Considering past FPI interest in POWERGRID Stock, investor feedback in various fora and to attract foreign investments and have more headroom available for FPIs to invest in equity share capital of the Company, it is proposed to increase the investment limit of FPIs from 30% to 35% of paid up equity share capital of the Company.

None of the Directors and Key Managerial Personnel of the Company or their relatives are concerned or interested in the resolution financially or otherwise except to the extent that he or she is a Director and/or Shareholder of the Company.

The Board of Directors of your Company recommends passing of the resolution as set out at Item No. 2 as a Special Resolution.

Members are requested to pass the proposed special resolution through postal ballot as permissible under Section 110 of the Companies Act, 2013, Article 25(ii) of the Articles of Association of the Company read with the Companies (Management and Administration) Rules, 2014.

Pursuant to Sub-rule 5 of Rule 22 of Companies (Management and Administration) Rules, 2014 CS Savita Jyoti, Prop. Savita Jyoti Associates, Company Secretaries, Secunderabad, has given her consent to act as Scrutinizer for the Postal Ballot exercise.

All the documents referred to in the accompanying Notice and explanatory Statement are open for inspection between 10.00 a.m. to 12.00 Noon on all working days at the Corporate Office of the Company i.e. 'Saudamini', Plot No. 2, Sector-29, Gurgaon-122 001 or at the Registered Office i.e. B-9, Qutab Institutional Area, Katwaria Sarai, New Delhi – 110 016 up to Monday, 17th December, 2018
