#### (ii) If management is unable to estimate the impact, reasons for the same:

Provision for terminal benefits to employees like gratuity is not made in view of the heavy losses and due to the skeleton eligible staff strength; no actuarial working is taken to avoid extra expenditure for it. The estimated amount of provision for gratuity is low and not material. The actuarial valuation will be done once the financial position of the company improves.

#### (iii) Auditors' Comments on (i) or (ii) above:

# Auditor is unable to quantify the impact of non-provision of gratuity for want of actuarial valuation. Total expenditure will be higher while Net Profit and Net Worth will be lower by amount of required gratuity provision. However, management has estimated that required provision amount will not be material as number of staff eligible for gratuity employed at the company is small.
