Sub: Intimation Under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sir/Madam

Sybly Industries Limited has faced a very tough time in the last 5 years owing to tough markets, cut throat competitions & over exposure to lending among various other things which has led to a lot of pain to its investors and shareholders. Now the board has taken some harsh decisions for a better future for SIL and its shareholders. The board has now decided to change its operations and venture into the field of Biofuels & Bioenergy.

Sybly envisions to setup core operations in Biomass processing, coal replacing bio-fuels & Bio fuels for applications such as transport fuels. Management feels there are ample opportunities for growth and expansion in this field and the economic policies should be very favorable for any business in this field.

The management has been working and researching in this sector for the last two years. Our research and various other reports predict an excellent double-digit growth in this game changing field of the future. The management feels the business operations will start in the current quarter of FY 22-23.

The Decision-making board is very optimistic about this and feels this will be a game changer for Sybly and this is a start of a new era for SIL. The board is also finalizing new management for the relevant field and the investors will be updated very soon about this.

Finally, the board also wants its investors to know that they can expect SIL to be debt free within 2 quarters from now.

We request you to take this information on record.

Thanking You,

Yours faithfully
For Sybly Industries Limited
