The result declared along with the Scrutinizer's report shall be communicated to the stock exchanges within two working days from the conclusion of AGM. The result, along with the Scrutinizer's Report, will be placed on the Company's website and the same shall be communicated to BSE.

15. Instructions for Remote E-Voting/ E-Voting during AGM

THE INTRUCTIONS OF SHAREHOLDERS FOR E-VOTING AND JOINING VIRTUAL MEETINGS ARE AS UNDER:

Step 1 : Access through Depositories CDSL/NSDL e-Voting system in case of individual shareholders holding shares in demat mode.

Step 2 : Access through CDSL e-Voting system in case of shareholders holding shares in physical mode and non-individual shareholders in demat mode.

- (i) The voting period begins on Sunday, **September 11, 2022 at 9.00 A.M.** and ends on Thursday, **September 15, 2022 at 5.00 P.M.** During this period shareholders' of the Company, holding shares either in physical form or in dematerialized form, as on the cut-off date (record date) of Friday, **September 09, 2022** may cast their vote electronically. The e-voting module shall be disabled by CDSL for voting thereafter.
- (ii) Shareholders who have already voted prior to the meeting date would not be entitled to vote at the meeting venue.
- (iii) Pursuant to SEBI Circular No. **SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 09.12.2020**, under Regulation 44 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, listed entities are required to provide remote e-voting facility to its shareholders, in respect of all shareholders' resolutions. However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to **all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants**. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

Step 1 : Access through Depositories CDSL/NSDL e-Voting system in case of individual shareholders holding shares in demat mode.

- (iv) In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants.

Shareholders are advised to update their mobile number and email Id in their demat accounts in order to access e-Voting facility.

MANAGEMENT DISCUSSION & ANALYSIS REPORT

S.I.Capital& Financial Services Limited (“SI Capital”/ “the Company”) is a Non Deposit Taking Non-Systemically Important Non-Banking Financial Company registered with Reserve Bank of India (RBI). It is a Subsidiary Company of Sharewealth Securities Limited. SI Capital also possess license to carry on the business of Full Fledged Money Changer. The Company has a diversified lending portfolio covering the retail and commercial customers.

ECONOMIC OVERVIEW**Global**

Financial year 2021-22 started amidst second wave of pandemic Covid-19. It closed with optimism of a post Covid-19 pandemic recovery but the invasion of Ukraine by Russia in February 2022 resulted in significant slowdown in global growth thereafter. Fuel and food prices have increased rapidly, hitting vulnerable populations in low-income countries hardest.

Global growth is projected to slowdown from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. It is expected to hover around that pace over 2023-24, as the war in Ukraine disrupts trade activity and investment in the near term.

On the interest rate front, market-implied volatility has remained elevated, reflecting uncertainties about the policy normalization process in advanced economies. Conditions have also tightened for many emerging market economies, reflecting higher interest rates to combat inflation, lower equity valuations, and higher external borrowing costs.

Global firms have been hit by the rise in energy and raw material prices. In addition, supply chain challenges that have emerged during the pandemic have been exacerbated by the uncertainties and reductions in export quantities of agricultural commodities, energy, metals, and technology inputs affecting a variety of industries.

Emerging and developing economies that are net importers of energy and food will be hit the hardest by surging international prices. Governments are currently focused on ensuring greater resilience through investment in health, food, and sourcing energy from cleaner sources.

India

The Indian economy, the world's fifth-largest by nominal GDP and the third-largest by purchasing power parity (PPP), renewed its tryst with recovery from pandemic in 2021-22, although interrupted by a virulent second wave of infections and a relatively milder third wave. Headline inflation spiked on repetitive supply shocks during the year, though decline to the target was also evident as shocks receded.

Monetary and credit conditions evolved in sync with the accommodative monetary policy stance, although global spillovers towards the close of the year led to some tightening in financial conditions and heightened volatility in financial markets. The intensification and materialisation of geopolitical risks in early 2022 overcast the global outlook, with EMEs including India, being the most vulnerable to spillovers. A robust recovery in tax revenues helped contain the gross fiscal deficit close to budgetary targets. The sustained strength of exports and revival in inbound remittances underpinned the viability of the balance of payments, with net capital flows also contributing to the accretion to foreign exchange reserves.

With revival of economy, employment indicators bounced back to pre-pandemic levels and merchandise exports and imports surpassed pre-covid levels. India's merchandise exports touched US\$ 417.8 billion for the whole year as against the target of US\$ 400 billion set for 2021-22. Multiple initiatives including product diversification to export hi-tech goods, Geographic Indicator (GI) products, roll out of export incentives schemes such as Remission of Duties and Taxes on Export Products (RoDTEP) and Rebate of State and Central Taxes and Levies (RoSCTL) have contributed to the robust export performance. The exports of major commodities, viz., engineering goods, petroleum products, chemicals and gems and jewellery, accounting for more than half of the exports, witnessed robust expansion during 2021-22. Macroeconomic stability indicators suggest that the Indian Economy is well placed to take on the challenges of 2022-23. Combination of high foreign exchange reserves, sustained foreign direct investment, and rising export earnings is expected to provide adequate buffer against possible global liquidity tapering in 2022-23.

Economic impact of second wave was much smaller than that during the full lockdown phase in 2020-21, though health impact was more severe. Government of India's unique response comprised of safety-nets to cushion the impact on vulnerable sections of society and the business sector, significant increase in capital expenditure to spur growth and supply side reforms for a sustained long-term expansion. Government's flexible and multi-layered

response is partly based on an “Agile” framework that uses feedback-loops, and the use of eighty High Frequency Indicators (HFIs) in an environment of extreme uncertainty. (Source: RBI / PIB Bulletins, 2022)

NBFC Industry

The Non-Banking Financial Companies (NBFC) sector has, over the years, evolved considerably in terms of size, operations, technological sophistication and entry into newer areas of financial services and products. The number of NBFCs as well as the size of the sector have grown significantly. There is an increasingly complex web of inter-linkages of the sector with banks, capital market and other financial sector entities, on both sides of the balance sheet. The sector has also seen advent of many non-traditional players leveraging technology to adopt tech-based business models.

Borrowings remained the major source of funds for NBFCs, mainly in the form of debentures and bank borrowings. Aggregate credit extended by NBFCs stood at ₹28.5 lakh crores in March 2022. Loans to industry constituted the largest segment (39.1 per cent), followed by personal loans (27.4 per cent) and those to services (15.3 per cent). Credit to agriculture sector accounted for a miniscule share (1.8 per cent). In terms of credit dispensation by category of NBFC, investment and credit companies (NBFC-ICC) and infrastructure finance companies (NBFC-IFC) predominated in gross loans and advances in March 2022. The GNPA ratio of NBFCs eased in March 2022 from 6.8 per cent in September 2021, the moderation witnessed across both public and private sector NBFCs. The improvement was primarily on account of 340 bps dip in the GNPA ratio of the services sector. Nevertheless, it remained higher than other sectors at 9.9 per cent. There was a larger concentration of NPAs in the industrial sector for which the loan book size far exceeds that of the services sector.

The aggregate NNPA ratio of NBFCs also ebbed in March 2022, despite a 90 bps rise in the NNPA ratio for the industrial sector loans on account of curtailed provisioning. The capital position of NBFCs remained robust and their return on assets (RoA) recouped in March 2022. Credit expansion in the services sector was led by NBFCs and trade, which together constitute around 58 per cent of the total services sector credit. Credit growth to the NBFCs moved out of negative territory in October 2021 and rose sharply to 14.6 per cent in February 2022 from 7.0 per cent a year ago.

Recognizing the role played by NBFCs in providing credit to the sectors at the bottom of the pyramid, which contribute significantly in terms of exports and employment, and with a view to augmenting the liquidity position of the NBFCs, the dispensation provided to banks to classify their lending to NBFCs [other than microfinance institutions (MFIs)] for ‘on-lending’ to the agriculture and MSE sectors as PSL was extended up to March 31, 2022. Following the Statement on Developmental and Regulatory Policies dated December 04, 2020, RBI has put in place a Scale Based Regulatory (‘SBR’) framework for NBFCs, encompassing different facets of regulation covering capital requirements, governance standards, prudential regulation, etc., effective from October 01, 2022. THE COMPANY – BUSINESS OVERVIEW & OUTLOOK

S.I.Capital is a Non-Systemically Important Non-Deposit taking NBFC and a Full Fledged Money Changer. Your company’s focus is to extend credit to unbanked sectors of the economy. The Company’s disbursements stood at 250.17 lakhs during the year under review, an increase of 14.39%, reflecting the improved market conditions and focused efforts of the company. Compared to previous financial year, vehicle and business loans increased by 42.84% and 100.48% respectively, while gold and personal loan declined by 46.61% and 77.27% respectively. The income from forex business recorded a decline of 26.96%.

S.I.Capital has been maintaining comfortable liquidity in the form of liquid investments and absence of leverage. The Company expects to benefit from repo hike and stringent credit norms on financial products of banks announced by RBI in 2022. The Company plans to focus on rural markets, where significant gaps in credit facility exists, as compared to semi-urban zones. Rural inflation being well ahead of urban inflation and emphasis on electric vehicles remains a concern, but the forecast of another normal monsoon is a positive as is the government’s efforts to sustain and accelerate the startup environment.

RISK MANAGEMENT

As an NBFC, SI Capital is exposed to liquidity, credit, interest and market risk. The Company has a strong risk management policy and will continue to invest in processes to build advance risk management.

A strong governance framework ensures that the Board of Directors and its committees approve risk strategies and delegates credit authorities. Risk assessment of customers is made at the time of initial appraisal for pricing and granting loans.

HUMAN RESOURCES / INDUSTRIAL RELATIONS

Company's relation with employees & Industrial Relations remained cordial during the year under review, and no material developments occurred during that period. Nine employees were on the payrolls of the Company as on 31st March 2022.

SWOT ANALYSIS

Strength	The Company is virtually debt free, well-defined management etc.
Weakness	Presence of accumulated loss
Opportunity	Untapped market potential, continuing opportunities in unbanked sectors
Threat	High competition, Spread of Covid-19 pandemic

INTERNAL CONTROL SYSTEM

The Company's internal control system is properly placed and strengthened taking into account the nature of business and size of operations. Internal auditors are conducting periodic audits and bring out any deviations in internal audit procedures and their observations are periodically reviewed and compliance is ensured. The audit committee is properly reviewing and monitoring this internal audit process.

KEY FINANCIAL RATIOS

Particulars	As on 31-03-2022	As on 31-03-2021	Explanation
Current Ratio	10.91	12.60	N.A.
Interest Coverage Ratio	-2.32	-12.95	Subordinated debt for the year increased to 97.48 (current year) from 80.75 (last year). Subsequently, the interest liability also increased. In addition to this the Loan portfolio also increased from 218.70 (Previous Year) to 250.17 (Current Year). This helped to reduce the loss and the Interest Coverage Ratio.
Debt Equity Ratio	0.40	0.32	The Subordinated debt liability increased from 80.75 to 97.48 as against last year. The loss of the current financial year is also included in equity. Thus reduces the value of equity. Hence the ratio increased from 0.32 to 0.40.
Operating Profit Margin (%)	-37.55	-122.26	The loan size is increased to 250.17 as against 218.70 and this reduced losses in the current year due to return in EMI/Interest Collection. Subsequent increase in Loan also affects increase in return. Hence the ratio increased from -122.26 to -37.55
Net Profit Margin (%)	-21.37	-112.39	The operating profit affected the Net Profit. Hence the Net Profit margin has increased.
Return on Net worth	-0.05	-0.16	Earnings on Networth increased due to subsequent rise in Operating profit and resulted in reduction of loss. Hence the return on Net worth Ratio has increased.

INDEPENDENT AUDITOR'S REPORT

To the Members of

S.I. CAPITAL & FINANCIAL SERVICES LIMITED

Report on the Audit of Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **S.I. CAPITAL & FINANCIAL SERVICES LIMITED** (the company), which comprise the Balance Sheet as at 31st March 2022, the Statement of Profit and Loss (Including Other Comprehensive Income), Statement of changes in equity and Statement of Cash Flow for the year ended and notes to financial statement including a summary of significant accounting policies and other explanatory information (herein referred to as “standalone financial statements”).

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act 2013 as amended (the “Act”) in the manner so required and give a true and fair view in conformity with the Indian accounting standards prescribed under section 133 of the Act read with the companies (Indian Accounting standards) Rules 2015, as amended (“Ind AS”) and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March 2022, the loss and total comprehensive income, change in equity and its cash flow for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the standalone financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of standalone financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1.Provision for Expected Credit Losses (ECL) on Loans

Management estimates impairment provision using Expected Credit loss model for the loan exposure. Measurement of loan impairment involves application of significant judgement by the management. The most significant judgements are:

Timely identification and classification of the impaired loans, and

Determination of probability of defaults (PD) and estimation of loss given defaults (LGD) based on the value of collaterals and relevant factors.

The estimation of Expected Credit Loss (ECL) on financial instruments involves significant judgements and estimates. Following are points with increased level of audit focus: Classification of assets to stage 1, 2, or 3 using criteria in accordance with Ind AS 109 which also include considering the impact of recent RBI's Covid-19 regulatory circulars; Accounting interpretations, modelling assumptions and data used to build and run the models; Measurement of individual borrowers' provisions including Covid-19 impact assessment of multiple economic scenarios.

Inputs and Judgements used in determination of management overlay at various asset stages considering the current uncertain economic environment arising out of the COVID 19 Pandemic and

The disclosures made in the financial statements for ECL especially in relation to judgements and estimates by the Management in determination of the ECL. Refer note 41 to the standalone financial statements.

Principle Audit Procedures:

We evaluated the design and operating effectiveness of controls across the processes relevant to ECL. These controls, among others, included controls over the allocation of assets into stages including management's monitoring of stage effectiveness, model monitoring including the need for post model adjustments, model validation, credit monitoring, individual/collective provisions and production of journal entries and disclosures. We tested the completeness of loans included in the Expected Credit Loss calculations as of 31 March 2022. We tested assets in stage 1, 2 and 3 on sample basis to verify that they were allocated to the appropriate stage. For samples of exposure, we tested the appropriateness of determining Exposure at Default (EAD), PD and LGD. We performed an overall assessment of the ECL provision levels at each stage including management's assessment on Covid-19 impact to determine if they were reasonable considering the Company's portfolio, risk profile, credit risk management practices and the macroeconomic environment. We assessed the adequacy and appropriate

We assessed the adequacy and appropriateness of disclosures in compliance with the Ind AS 107 in relation to ECL especially in relation to judgements used in estimation of ECL provision.

Information other than the financial statements and auditor's report thereon

The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Annual Report but does not include the standalone financial statements and our auditors' report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position and financial performance including other comprehensive income, cash flows and changes in equity of the company in accordance with Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the company's ability of each entity to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The board of directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected

to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also.

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act 2013, we are also responsible for expressing our opinion on whether the company has adequate financial control with reference to standalone financial statements in place and the operating effectiveness of the such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on company's ability to continue as going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all

relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements for the financial year ended March 31, 2022 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

“Annexure B” to the Independent Auditor’s Report**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**

We have audited the internal financial controls over financial reporting of SI Capital & Financial Services Limited (“the Company”) as of March 31, 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the company maintained in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The equity shares of the Company are listed on the BSE Limited. The Company is registered with the Reserve Bank of India (RBI). The registration details are as follows:

1. NBFC License No. - 07.00078

2. FFMC License No. - FE.CHE.AM.400/2022

3. Corporate Identity Number (CIN) : L67190TN1994PLC029151

The Company is the Subsidiary company of the Sharewealth Securities Limited.

The company's registered office is at 64, Montieth Road, Egmore, Chennai - 600 008, Tamil Nadu.

2 Basis of preparation

The financial statements have been prepared as a going concern in accordance with the Indian Accounting Standard ('Ind AS'), notified under section 133 of the Companies Act, 2013 read together with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) amendments Rules, 2016 issued by the Ministry of Corporate Affairs (MCA). The Company has adopted Ind AS from April 1, 2019 with effective transition date as April 1, 2018

The preparation of financial statements requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosed amount of contingent liabilities. Areas involving a higher degree of judgement or complexity, or areas where assumptions are significant to the Company are discussed in Note 6 - Significant accounting judgements, estimates and assumptions.

The financial statements are presented in Indian Rupees (INR) and all values are rounded to the nearest lakhs, except when otherwise indicated.

3 Presentation of financial statement

The financial statements of the Company are presented as per Schedule III (Division III) of the Companies Act, 2013 applicable to NBFCs, as notified (as amended) by the Ministry of Corporate Affairs (MCA). Financial assets and financial liabilities are generally reported on a gross basis except when, there is an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event and the parties intend to settle on a net basis in the following circumstances:

- i. The normal course of business
- ii. The event of default
- iii. The event of insolvency or bankruptcy of the Company and/or its counterparties.

4 Statement of compliance

These separate financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 and the generally accepted accounting principles as referred to in paragraph 2 "Basis of Preparation" above.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

5 Significant accounting policies

5.1 Financial instruments

(i) Classification of financial instruments

The Company classifies its financial assets into the following measurement categories:

1. Financial assets to be measured at amortised cost
2. Financial assets to be measured at fair value through other comprehensive income
3. Financial assets to be measured at fair value through profit or loss account

The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets.

The Company determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The business model is assessed on the basis of aggregated portfolios based on observable factors. These factors include:

- ▶ Reports reviewed by the entity's key management personnel on the performance of the financial assets
- ▶ The risks impacting the performance of the business model (and the financial assets held within that business model) and its management thereof
- ▶ The compensation of the managing teams (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- ▶ The expected frequency, value and timing of trades.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account.

The Company also assesses the contractual terms of financial assets on the basis of its contractual cash flow characteristics that are solely for the payments of principal and interest on the principal amount outstanding.

'Principal' is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

In making this assessment, the Company considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

The Company classifies its financial liabilities at amortised costs unless it has designated liabilities at fair value through the profit and loss account or is required to measure liabilities at fair value through profit or loss such as derivative liabilities.

(ii) Financial assets measured at amortised cost

These Financial assets comprise bank balances, Loans and other financial assets.

Financial Assets with contractual terms that give rise to cash flows on specified dates, and represent solely payments of principal and interest on the principal amount outstanding; and are held within a business model whose objective is achieved by holding to collect contractual cash flows are measured at amortised cost.

These financial assets are initially recognised at fair value plus directly attributable transaction costs and subsequently measured at amortised cost. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or a financial liability.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

(iii) Financial assets measured at fair value through profit or loss

Items at fair value through profit or loss comprise:

- Investment in equity shares held for trading;
- Items specifically designated as fair value through profit or loss on initial recognition; and
- debt instruments with contractual terms that do not represent solely payments of principal and interest.

Financial instruments held at fair value through profit or loss are initially recognised at fair value, with transaction costs recognised in the statement of profit and loss as incurred. Subsequently, they are measured at fair value and any gains or losses are recognised in the statement of profit and loss as they arise.

Financial instruments held for trading

A financial instrument is classified as held for trading if it is acquired or incurred principally for selling or repurchasing in the near term, or forms part of a portfolio of financial instruments that are managed together and for which there is evidence of short-term profit taking, or it is a derivative not designated in a qualifying hedge relationship.

Trading derivatives and trading securities are classified as held for trading and recognised at fair value.

(iv) Debt securities and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and transaction costs that are an integral part of the Effective Interest Rate (EIR).

(v) Recognition and derecognition of financial assets and liabilities

A financial asset or financial liability is recognised in the balance sheet when the Company becomes a party to the contractual provisions of the instrument, which is generally on trade date. Loans and receivables are recognised when cash is advanced (or settled) to the borrowers. Financial assets at fair value through profit or loss are recognised initially at fair value. All other financial assets are recognised initially at fair value plus directly attributable transaction costs.

The Company derecognises a financial asset when the contractual cash flows from the asset expire or it transfers its rights to receive contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability. A financial liability is derecognised from the balance sheet when the Company has discharged its obligation or the contract is cancelled or expires.

(vi) Impairment of financial assets

The Company recognises impairment allowance for expected credit loss on financial assets held at amortised cost.

The Company recognises loss allowances (provisions) for expected credit losses on its financial assets (including non-fund exposures) that are measured at amortised costs or at fair value through other comprehensive income account.

The Company applies a three-stage approach to measuring expected credit losses (ECLs) for the Loan assets that are not measured at fair value through profit or loss. No ECL is recognised on equity investments. Financial assets migrate through the following three stages based on the change in credit risk since initial recognition:

Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised.

Stage 2: Lifetime ECL - not credit impaired

For exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired, a lifetime ECL (i.e. reflecting the remaining lifetime of the financial asset) is recognised.

Stage 3: Lifetime ECL - credit impaired

Exposures are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For exposures that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than the gross carrying amount.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

Determining the stage for impairment

At each reporting date, the Company assesses whether there has been a significant increase in credit risk for exposures since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose.

This includes quantitative and qualitative information and also, forward-looking analysis.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the loss allowances reverts from lifetime ECL to 12-months ECL.

The loss allowances for these financial assets is based on a 12-months ECL.

When an asset is uncollectible, it is written off against the related allowance. Such assets are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off reduce the amount of the allowances in the profit and loss statement.

The Company assesses whether the credit risk on an exposure has increased significantly on an individual or collective basis. For the purposes of a collective evaluation of impairment, financial instruments are grouped on the basis of shared credit risk characteristics, taking into account instrument type, credit risk ratings, date of initial recognition, remaining term to maturity, industry, geographical location of the borrower and other relevant factors.

Measurement of ECLs

ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive. The Company has grouped its various financial assets in to pools containing loans bearing homogeneous risks characteristics. The probability of default for the pools are computed based on the historical trends, adjusted for any forward looking factors. Similarly the Company computes the Loss Given Default based on the recovery rates.
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate.

Collateral Valuation

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as movable and immovable assets, guarantees, etc. However, the fair value of collateral affects the calculation of ECLs. To the extent possible, the Company uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as vehicles, is valued based on data provided by third parties or management judgements.

Collateral repossessed

In its normal course of business whenever default occurs, the Company may take possession of properties or other assets in its retail portfolio and generally disposes such assets through auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, assets under legal repossession processes are not recorded on the balance sheet.

(vii) Write-offs

The Company reduces the gross carrying amount of a financial asset when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subjected to write-offs. Any subsequent recoveries against such loans are credited to the statement of profit and loss.

(viii) Determination of fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. The Financial assets and liabilities are presented in ascending order of their liquidity. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. No such instances of transfers between levels of the fair value hierarchy were recorded during the reporting period.

Difference between transaction price and fair value at initial recognition

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e. the fair value of the consideration given or received) unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets. When such evidence exists, the Company recognises the difference between the transaction price and the fair value in profit or loss on initial recognition (i.e. on day one).

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Company recognises the difference between the transaction price and fair value in net gain on fair value changes. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

5.2 Revenue from operations**(i) Interest Income**

Interest income is recognised by applying the Effective Interest Rate (EIR) to the gross carrying amount of financial assets other than credit-impaired assets and financial assets classified as measured at FVTPL.

The EIR in case of a financial asset is computed

- a. As the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset.
- b. By considering all the contractual terms of the financial instrument in estimating the cash flows
- c. Including all fees received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Any subsequent changes in the estimation of the future cash flows is recognised in Interest Income with the corresponding adjustment to the carrying amount of the assets.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

(ii) Dividend Income

Dividend income is recognised

- a. When the right to receive the payment is established,
- b. it is probable that the economic benefits associated with the dividend will flow to the entity and
- c. the amount of the dividend can be measured reliably.

(iii) Fees & Commission Income

Fees and commissions are recognised when the Company satisfies the performance obligation, at fair value of the consideration

Processing fee which is not form part of effective interest rate has been recognised as and when it accrues.

(iv) Net gain on Fair value changes

Any differences between the fair values of financial assets classified as fair value through the profit or loss, held by the Company on the balance sheet date is recognised as an unrealised gain / loss. In cases there is a net gain in the aggregate, the same is recognised in "Net gains on fair value changes" under Revenue from operations and if there is a net loss the same is disclosed under "Expenses" in the statement of Profit and Loss.

Similarly, any realised gain or loss on sale of financial instruments measured at FVTPL and debt instruments measured at FVOCI is recognised in net gain / loss on fair value changes. As at the reporting date the Company does not have any financial instruments measured at FVTPL and debt instruments measured at FVOCI.

However, net gain / loss on derecognition of financial instruments classified as amortised cost is presented separately under the respective head in the Statement of Profit and Loss.

5.3 Expenses

(i) Finance costs

Finance costs represents Interest expense recognised by applying the Effective Interest Rate (EIR) to the gross carrying amount of financial liabilities other than financial liabilities classified as FVTPL.

The EIR in case of a financial liability is computed

- a. As the rate that exactly discounts estimated future cash payments through the expected life of the financial liability to the gross carrying amount of the amortised cost of a financial liability.
- b. By considering all the contractual terms of the financial instrument in estimating the cash flows
- c. Including all fees paid between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Any subsequent changes in the estimation of the future cash flows is recognised in interest income with the corresponding adjustment to the carrying amount of the assets.

Interest expense includes issue costs that are initially recognized as part of the carrying value of the financial liability and amortized over the expected life using the effective interest method. These include fees and commissions payable to advisers and other expenses such as external legal costs, Rating Fee etc, provided these are incremental costs that are directly related to the issue of a financial liability.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

(ii) Retirement and other employee benefits

Short term employee benefit

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. These benefits include short term compensated absences such as paid annual leave. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised as an expense during the period. Benefits such as salaries and wages, etc. and the expected cost of the bonus/ex-gratia are recognised in the period in which the employee renders the related service.

Post-employment employee benefits

a) Defined contribution schemes

All the employees of the Company are entitled to receive benefits under the Provident Fund and Employees State Insurance scheme, defined contribution plans in which both the employee and the Company contribute monthly at a stipulated rate. The Company has no liability for future benefits other than its annual contribution and recognises such contributions as an expense in the period in which employee renders the related service. If the contribution payable to the scheme for service received before the Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the Balance Sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

b) Defined Benefit schemes

The Company provides for the gratuity, a defined benefit retirement plan covering all employees. The plan provides for lump sum payments to employees upon death while in employment or on separation from employment after serving for the stipulated years mentioned under 'The Payment of Gratuity Act, 1972'.

(iii) Other income and expenses

All Other income and expense are recognized in the period they occur.

(iv) Impairment of non-financial assets

The carrying amount of assets is reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets, net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

(v) Taxes

Current Tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from, or paid to, the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

Deferred tax

Deferred tax assets and liabilities are recognised for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are only recognised for temporary differences, unused tax losses and unused tax credits if it is probable that future taxable amounts will arise to utilise those temporary differences and losses. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities are realised simultaneously.

Minimum Alternate Tax (MAT)

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that it is probable that the Company will pay normal income tax during the specified period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the MAT Credit Entitlement asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

Goods and services tax /value added taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the goods and services tax/value added taxes paid, except:

- i. When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- ii. When receivables and payables are stated with the amount of tax included

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

5.4 Cash and cash equivalents

Cash and cash equivalents comprise the net amount of short-term, highly liquid investments that are readily convertible to known amounts of cash (short-term deposits with an original maturity of three months or less) and are subject to an insignificant risk of change in value, cheques on hand and balances with banks. They are held for the purposes of meeting short-term cash commitments (rather than for investment or other purposes).

Cash Flows are reported using the indirect method whereby cash flows from operating, investing and financing activities of the Group are segregated and profit before tax is adjusted for the effects of transactions of non - cash nature and any deferrals or accruals of past or future cash receipts or payments.

5.5 Property, Plant and equipment (PPE)

Property, plant and equipment (PPE) are measured at cost less accumulated depreciation and accumulated impairment, (if any). The total cost of assets comprises its purchase price, freight, duties, taxes and any other incidental expenses directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the management. Changes in the expected useful life are accounted for by changing the amortisation period or methodology, as appropriate, and treated as changes in accounting estimates.

Subsequent expenditure related to an item of tangible asset are added to its gross value only if it increases the future benefits of the existing asset, beyond its previously assessed standards of performance and cost can be measured reliably. Other repairs and maintenance costs are expensed off as and when incurred.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

Depreciation is calculated using the Written Down Value Method (WDV) in accordance with the useful life prescribed in Schedule II to the Companies Act, 2013 to write down the cost of property and equipment to their residual values over their estimated useful lives. Land is not depreciated.

The estimated useful lives are, as follows:

Particulars	Useful life estimated by Company
Computers and data processing units	
- Enduser devices -Desktops, Laptops	3 years
Furniture and fittings	
- General	10 years
Office equipment	5 years

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Property plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in other income / expense in the statement of profit and loss in the year the asset is derecognised. The date of disposal of an item of property, plant and equipment is the date the recipient obtains control of that item in accordance with the requirements for determining when a performance obligation is satisfied in Ind AS 115.

5.6 Intangible assets

An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Company.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of an intangible asset comprises its purchase price and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is presented as a separate line item in the statement of profit and loss. Amortisation on assets acquired/sold during the year is recognised on a pro-rata basis to the Statement of Profit and Loss from / upto the date of acquisition/sale.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives. Intangible assets comprising of software are amortised on a straight-line basis over a period of 6 years, unless it has a shorter useful life.

The Company's intangible assets consist of computer software with definite life.

Gains or losses from derecognition of intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in the Statement of Profit and Loss when the asset is derecognised.

5.7 Provisions

Provisions are recognised when the enterprise has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

When the effect of the time value of money is material, the enterprise determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

5.8 Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

5.9 Earnings Per Share

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after attributable taxes) by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. In computing the dilutive earnings per share, only potential equity shares that are dilutive and that either reduces the earnings per share or increases loss per share are included.

5.10 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (CODM).

The Board of Directors (BOD) of the Company assesses the financial performance and position of the Company, and makes strategic decisions. The BOD, which has been identified as being the chief operating decision maker. The Company is engaged in the business of i) Lending finance and ii) Fees & commission income. The said business are aggregated for the purpose of review of performance by CODM. Accordingly, the Company has concluded that the business of lending finance and fees & commission income to be the only reportable segment.

5.11 Leases

Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to Company's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances. Since all leases of the Company is for a term less than 12 months, single lessee accounting model under Ind AS 116 is not applicable.

6 Significant accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with the Ind AS requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosure and the disclosure of contingent liabilities, at the end of the reporting period. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

S.I. Capital & Financial Services Limited

Notes to Standalone Financial Statements for the year ended 31 March 2022

7 Impairment of loans portfolio

The measurement of impairment losses across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

It has been the Company's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

The impairment loss on loans and advances is disclosed in more detail in Note 5.1(vi) Overview of ECL principles.

In case, higher provisions are to be considered as per the prudential norms of the Reserve Bank of India, they are considered.

8 Effective Interest Rate (EIR) method

The Company's EIR methodology, recognises interest income / expense using a rate of return that represents the best estimate of a constant rate of return over the expected behavioural life of loans given / taken and recognises the effect of potentially different interest rates at various stages and other characteristics of the product life cycle (including prepayments and penalty interest and charges).

This estimation, by nature, requires an element of judgement regarding the expected behaviour and life-cycle of the instruments, as well expected changes to India's base rate and other fee income/expense that are integral parts of the instrument.

Note 40: Fair Value Measurement

40.1 Valuation principles

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions, regardless of whether that price is directly observable or estimated using a valuation technique. In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques.

40.2 Valuation governance

The Company's process to determine fair values is part of its periodic financial close process. The Audit Committee exercises the overall supervision over the methodology and models to determine the fair value as part of its overall monitoring of financial close process and controls. The responsibility of ongoing measurement resides with business units. Once submitted, fair value estimates are also reviewed and challenged by the Risk and Finance functions.

40.3 Assets and liabilities by fair value hierarchy

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

Particulars	31 March 2022				31 March 2021			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets measured at fair value on a recurring basis								
<i>Financial instrument held for trading</i>								
Equity Shares	3.02	-	-	3.02	1.36	-	-	1.36
Mutual Funds	25.16	-	-	25.16	-	-	-	-
Total financial instrument held for trading	28.18	-	-	28.18	1.36	-	-	1.36

40.4 Valuation techniques

Equity instruments

The majority of equity instruments are actively traded on public stock exchanges with readily available active prices on a regular basis. Such instruments are classified as Level 1. Units held in funds are measured based on their published net asset value (NAV), taking into account redemption and/or other restrictions. Such instruments are generally Level 2. Equity instruments in non-listed entities included investment in private equity funds are initially recognised at transaction price and re-measured (to the extent information is available) and valued on a case-by-case and classified as Level 3.

Valuation methodologies of financial instruments not measured at fair value

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the Group's financial statements. These fair values were calculated for disclosure purposes only.

Short-term financial assets and liabilities

For financial assets and financial liabilities that have a short-term maturity (less than twelve months), the carrying amounts, which are net of impairment, are a reasonable approximation of their fair value. Such instruments include: cash and balances, balances other than cash and cash equivalents, trade payables and other financial liabilities without a specific maturity. Such amounts have been classified as Level 2 on the basis that no adjustments have been made to the balances in the balance sheet.

Loans and advances to customers

The fair values of loans and receivables are estimated by discounted cash flow models that incorporate assumptions for credit risks, foreign exchange risk, probability of default and loss given default estimates.

Note 41: Risk Management

Risk is an integral part of the Company's business and sound risk management is critical to the success. As a financial intermediary, the Company is exposed to risks that are particular to its lending and the environment within which it operates and primarily includes credit, liquidity and market risks. The Company has a risk management policy which covers risk associated with the financial assets and liabilities. The Board of Directors of the company are responsible for the overall risk management approach, approving risk management strategies and principles. The company have a risk management policy which covers all the risk associated with its assets and liabilities.

The Company has implemented comprehensive policies and procedures to assess, monitor and manage risk throughout the Company. The risk management process is continuously reviewed, improved and adapted in the changing risk scenario and the agility of the risk management process is monitored and reviewed for its appropriateness in the changing risk landscape. The process of continuous evaluation of risks includes taking stock of the risk landscape on an event-driven basis.

The Company has an elaborate process for risk management. Major risks identified by the businesses and functions are systematically addressed through mitigating actions on a continuing basis.

Credit Risk

Credit risk is the risk that a customer or counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company's main income generating activity is lending to customers and therefore credit risk is a principal risk. Credit risk mainly arises from loans and advances.

The credit risk management policy of the Company seeks to have following controls and key metrics that allows credit risks to be identified, assessed, monitored and reported in a timely and efficient manner in compliance with regulatory requirements.

- Standardize the process of identifying new risks and designing appropriate controls for these risks
- Maintain an appropriate credit administration and loan review system
- Establish metrics for portfolio monitoring
- Minimize losses due to defaults or untimely payments by borrowers
- Design appropriate credit risk mitigation techniques

In order to mitigate the impact of credit risk in the future profitability, the company makes reserves basis the expected credit loss (ECL) model for the outstanding loans as balance sheet date.

The below discussion describes the Company's approach for assessing impairment as stated in the significant accounting policies.

The Company considers a financial instrument defaulted and therefore Stage 3 (credit impaired) for ECL calculations in all cases when the borrower becomes 180 days past due on its contractual payments.

As a part of a qualitative assessment of whether a customer is in default, the Company also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Company carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

Exposure at Default (EAD)

The outstanding balance at the reporting date is considered as EAD by the Company. Considering that the PD determined above factors in amount at default, there is no separate requirement to estimate EAD.

The Company don't have historical information and hence uses the PD default rates stated by external reporting agencies. Considering the different products and schemes, the Company has bifurcated its loan portfolio into various pools.

Based on its review of macro-economic developments and economic outlook, the Company has assessed that there are certain adjustments on account of impact of COVID 19 are required in the form of temporary overlays on its PD's as at 31 March 2022, the PD percentages are mentioned below:

Pools	Stage I	Stage II	Stage III
1) Gold Loan	5.41%	5.41%	5.41%
2) Vehicle Loan	0.00%	0.00%	0.00%
3) Business Loan	1.50%	1.50%	1.50%
4)Term Loan	0.00%	0.00%	0.00%
4) Personal Loan	1.00%	1.00%	100.00%

Loss Given Default

The Company determines its recovery rates by analysing the recovery trends over different periods of time after a loan has defaulted. Based on its analysis of historical trends, the Company has assessed that significant recoveries happen in the year in which default has occurred.

1) Gold Loan	55.00%
2) Vehicle Loan	45.00%
3) Business Loan	45.00%
4)Term Loan	45.00%
4) Personal Loan	45.00%
In all classified 'Loss Assets', LGD has been considered as 100%.	

LGD Rates have been considered based on proxy FIRB rates for all loans.

The Company has applied management overlays to the ECL Model to consider the impact of the Covid-19 pandemic on the provision. The adjustment to the probability of default has been assessed considering the likelihood of increased credit risk and consequential default due to the pandemic.

Asset & Liability management

Asset and Liability Management (ALM) is defined as the practice of managing risks arising due to mismatches in the asset and liabilities. Company's funding assets consist long term source with different maturity patterns and varying interest rates. On the other hand, the asset book also comprises of loans of different duration and interest rates. Maturity mismatches are therefore common and has an impact on the liquidity and profitability of the company. It is necessary for Company's to monitor and manage the assets and liabilities in such a manner to minimize mismatches and keep them within reasonable limits.

The objective of this policy is to create an institutional mechanism to compute and monitor periodically the maturity pattern of the various liabilities and assets of Company to (a) ascertain in percentage terms the nature and extent of mismatch in different maturity buckets, especially the 1-30/31days bucket, which would indicate the structural liquidity (b) the extent and nature of cumulative mismatch in different buckets indicative of short term dynamic liquidity and (c) the residual maturity pattern of repricing of assets and liabilities which would show the likely impact of movement of interest rate in either direction on profitability. This policy will guide the ALM system in Company.

The scope of ALM function can be described as follows:

- Liquidity risk management
- Management of market risks
- Others

Liquidity Risk

Liquidity risk refers to the risk that the Company may not meet its financial obligations. Liquidity risk arises due to the unavailability of adequate funds at an appropriate cost or tenure. The objective of liquidity risk management, is to maintain sufficient liquidity and ensure that funds are available for use as per requirements. The Company consistently generates sufficient cash flows from operating and financial activities to meet its financial obligations as and when they fall due. Our resource mobilisation team sources funds from multiple sources. The resource mobilisation team is responsible for diversifying fund raising sources, managing interest rate risks and maintaining a strong relationship with banks, financial institutions, mutual funds, insurance companies, other domestic and foreign financial institutions and rating agencies to ensure the liquidity risk is well addressed.

The table below provide details regarding the contractual maturities of significant financial assets and liabilities as on:-

Market Risk

Market Risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in market factor. Such changes in the values of financial instruments may result from changes in the interest rates, credit, liquidity, and other market changes. The Company is exposed to two types of market risk as follows:

Interest Rate Risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

We are not subject to interest rate risk, because we lend to clients at fixed interest rates and for periods that may differ from our funding sources and our borrowings i.e. subordinated debts are at fixed interest rate for different periods.

Price Risk

The Company's exposure to price risk is not material.

Operational and business risk

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to operate effectively, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Company cannot expect to eliminate all operational risks, but it endeavours to manage these risks through a control framework and by monitoring and responding to potential risks. Controls include effective segregation of duties, access, authorisation and reconciliation procedures, staff education and assessment processes, such as the use of internal audit.
