HCL Software Announces Domino Volt With New Low-Code Application Development Capability

New York, NY, and Noida, India, April 13, 2020 – HCL Technologies (HCL), a leading global technology company, today announced the general availability (GA) of HCL Domino Volt, a new low-code capability built on the HCL Domino platform. This release continues HCL’s commitment to transform over 10 million enterprise-grade apps powering business for more than 15,000 customers. Starting today:

- **Domino Volt adds low code to your team’s arsenal.** Traditional app developments are time-consuming, expensive to build, and rely heavily on IT developers and resources. Domino Volt puts more power in the hands of business users and IT staff, providing them the ability to build enterprise apps lightning fast to quickly overcome challenges and react to market demands.

- **Domino Volt builds apps 70% faster.** Domino Volt users can create web apps complete with forms, views, and workflows in minutes, even from a spreadsheet. More technical developers can build apps up to 70% faster and efficiently extend them with integrations, customized CSS, JavaScript, and REST APIs. Domino Volt apps are native Domino apps; customers can deploy, manage, and extend the functionality of their apps and deliver them on mobile devices quickly.

- **Domino Volt is powered by Domino.** Domino has always been a leader in application development, business transformation, and automation. Built on Domino, Domino Volt offers low-code tools with advanced enterprise-grade scale and functionality — with stability and security built in. See increased productivity and enjoy the same low total cost of ownership the trusted and proven Domino platform already provides.

“Domino Volt continues our mission of relentlessly innovating and modernizing the Domino apps that run the business of more than 15,000 customers worldwide. With this release, we are empowering the business users closest to daily processes and issues to build their own apps that not only solve their challenges, but align with their business processes and workflows,” said Darren Oberst, CVP and Head of HCL Software. “From departmental to mission-critical apps, we want to extend the value of Domino to everyone in the organization.”

About HCL Technologies

HCL Technologies (HCL) empowers global enterprises with technology for the next decade today. HCL’s Mode 1-2-3 strategy, through its deep-domain industry expertise, customer-centricity and entrepreneurial culture of ideapreneurship™ enables businesses to transform into next-gen enterprises.

HCL offers its services and products through three business units - IT and Business Services (ITBS), Engineering and R&D Services (ERS) and Products & Platforms (P&P). ITBS enables global enterprises to transform their businesses through offerings in areas of Applications, Infrastructure, Digital Process Operations and next generational digital transformation solutions. ERS offers engineering services and solutions in all aspects of product development and platform engineering. Under P&P, HCL provides modernized software products to global clients for their technology and industry-specific requirements. Through its cutting-edge co-innovation labs, global delivery capabilities and broad global network, HCL delivers holistic services in various industry verticals, categorized under Financial Services, Manufacturing, Technology & Services, Telecom & Media, Retail & CPG, Life Sciences & Healthcare and Public Services.
As a leading global technology company, HCL takes pride in its diversity, social responsibility, sustainability and education initiatives. As of 12 months ended December 31, 2019, HCL has a consolidated revenue of US$ 9.7 billion and its 149,000 ideapreneurs operate out of 45 countries. For more information, visit www.hcltech.com

Forward-looking Statements

Certain statements in this release are forward-looking statements, which involve a number of risks, uncertainties, assumptions and other factors that could cause actual results to differ materially from those in such forward-looking statements. All statements, other than statements of historical fact are statements that could be deemed forward-looking statements, including but not limited to the statements containing the words ‘planned’, ‘expects’, ‘believes’, ‘strategy’, ‘opportunity’, ‘anticipates’, ‘hopes’ or other similar words. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding impact of pending regulatory proceedings, fluctuations in earnings, our ability to manage growth, intense competition in IT services, business process outsourcing and consulting services including those factors which may affect our cost advantage, wage increases in India, customer acceptances of our services, products and fee structures, our ability to attract and retain highly skilled professionals, our ability to integrate acquired assets in a cost-effective and timely manner, time and cost overruns on fixed-price, fixed-timeframe contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, the success of our brand development efforts, liability for damages on our service contracts, the success of the companies/entities in which we have made strategic investments, withdrawal of governmental fiscal incentives, political instability, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property, other risks, uncertainties and general economic conditions affecting our industry. There can be no assurance that the forward-looking statements made herein will prove to be accurate, and issuance of such forward-looking statements should not be regarded as a representation by the Company, or any other person, that the objective and plans of the Company will be achieved. All forward-looking statements made herein are based on information presently available to the Management of the Company and the Company does not undertake to update any forward-looking statement that may be made from time to time by or on behalf of the Company.
