IFB vs Nifty—Daily Price Movement Chart

IFB Industries Limited's operations consist of three divisions, Fine Blanking, Appliances and Motor. IFB Industries Limited, originally known as Indian Fine Blank Limited, started its operations in India in 1974 in collaboration with Heinrich Schmid AG of Switzerland. The Company's product range includes fine blanked components, tools and related machine tools.

The Appliances Division began operations in 1989 and has its manufacturing facilities
in Goa. It also imports and markets some of its products from other countries. An air conditioner factory in Goa commenced operations on 17 March, 2020.

The Fine Blanking Division has two manufacturing facilities, one each at Kolkata and Bengaluru.

In addition, IFB has manufactured motors for its washing machines for the last three decades. In 2019–20, the Company acquired Automotive Motor business and merged it with the Appliances Motor Division for synergy in operations. The combined entity will develop next generation platforms in areas of BLDC technology for appliances and also manufacturing motors for EV etc.

The Company also acquired the Stamping Division of IFB Automotive Ltd, on a going concern basis, on 1 October, 2019. The objective behind the acquisition was synergy in business with our Fine Blanking Division.

Financial Review
Profit and Loss
Quarter Ended June 2020
The Company has reported a total income of ₹282.67 crore, a degrowth of 58.2% over the corresponding Quarter of the previous year.

The EBDITA margin stood at (-)10.3% during the 1st Quarter of 2020–21 as against 4.6% during the corresponding period of the previous year, mainly due to a drop in sales as a result of the COVID-19 pandemic.

Balance Sheet
As on 30 June, 2020, our Cash and Bank Balances (including investment in Mutual Funds) were as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash and Bank Balance</td>
<td>₹131.96 crore</td>
</tr>
<tr>
<td>Capital Gain Deposits</td>
<td>₹19.42 crore</td>
</tr>
<tr>
<td>Investments in Mutual Fund</td>
<td>₹180.87 crore</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>₹332.25 crore</strong></td>
</tr>
</tbody>
</table>

The amount of ₹332.25 crore as stated above has increased from ₹274.01 crore as on 31 March, 2020.

The Company has outstanding ECB borrowing amounting to ₹141.6 crore ($20 million), which was taken for the Air Conditioner Project and a term borrowing of ₹105.63 crore pertaining to the Fine Blanking and Stamping Divisions. It also has buyer’s credit liability of ₹54.24 crore (which will be settled by next year). We have a total borrowing of ₹281.47 crore. Hence, the Company is debt free on a net basis as on 30 June, 2020.

Outlook
The rupee is expected to remain at the current level over the short term, with a likely negative bias. As shared earlier, there has been minimal impact on washers and clothes dryers as the localisation programme in these categories was completed as detailed in previous newsletters. Localisation has been completed in the air conditioner category as well and the import percentage will drop significantly by the 4th Quarter of the current fiscal.

On account of the pandemic, both 2-wheeler and 4-wheeler OEMs were shut down from the third week of March till the end of May. The OEMs began opening their plants in June, after
sanitisation, with greatly reduced manpower. This led to very low production numbers as most of the dealers did not become fully operational due to lockdowns in individual states.

The Fine Blanking Division was also shut down from the end of March and as a result there were no sales in April and May. The sales in June were also very low.

**The Appliances Division**
The Division’s range of products covers both domestic appliances and industrial applications categories. These are domestic and industrial washing machines, special commercial laundry equipment for dry cleaning and other finishing equipment (like ironers and others), microwave ovens, domestic and industrial dishwashers, domestic and industrial clothes dryers, modular kitchens, kitchen appliances (hobs, chimneys and built-in ovens) and air conditioners.

The updates at the end of the 1st Quarter for each of the product categories are given below:

**Washing Category**

- **Front Loads (Domestic Segment)**
  In the 1st Quarter, we have had supply chain issues, with the COVID-19 pandemic affecting both the supply chain and the manufacturing facility at Goa. The manufacturing is running at a lower capacity per shift and production has been spaced out across two shifts in order to ensure social distancing.

  We expect manufacturing and supply chain stress to remain in place for the next few months. Demand has been high and currently we are running short of demand.

  In the front load category, a washer dryer platform will be introduced in the 3rd Quarter of this fiscal. A washer range, with the technology to significantly reduce/eliminate water usage during the clothes cleaning process, will also be tested and introduced this year, for both the domestic and industrial ranges. The Company has also completed the initial development of statutory labelling for energy efficiencies (which were already introduced in the market ahead of the norms being formally notified), deployment of AI and IoT capabilities, including app-based controls, from the 4th Quarter of the last fiscal. A new model, which is India’s first fully voice and app controlled front load, has already been introduced in the market and has received highly positive reviews.

- **Top Loads (Domestic Segment)**
The demand vs supply situation is the same in the top load category as it is in the front load category and we are short in fulfilling demand. The initial response to the introduction of a new 6.5 Kg machine has been good and we expect the new model to add volumes and market share for the Company. The key task for the fiscal is to expand the placement of the top load range and also drive the new model introduction to generate volumes. In this category also, new models with better user interfaces, capacities and price points, will being introduced in the market from the 3rd Quarter onwards.

- **Clothes Dryers and Dishwashers (Domestic Segment)**
  Both the clothes dryer and dishwasher segments have seen an increase in demand over the lockdown period. We have large
backlogs in both categories. In dishwashers, we have increased the order pipeline by 7-8 times, against orders and forecasts received from the market. The Company expects that, in the medium term, demand for these categories will remain healthy. In these categories, we will also launch new models with better user interfaces and designs this fiscal.

- **Dishwashing and Laundry Equipment (Industrial Segment)**
  IFB covers the full range in the categories of glass washers, under counter dishwashers as well as hood type and rack conveyor type dishwashing equipment. The Company has a dominant market share across all the customer segments, including defence establishments, restaurants, bars, large institutions, hotels, ships etc.

  The Company’s range of industrial laundry equipment (up to high level capacities of ~400 Kg) is completely manufactured within India. The range includes a competitively priced spectrum of dryers, ironers, finishing equipment for clothing, including suits, special silk wear etc.

  The order pipelines have greatly reduced over the last Quarter as a result of the outbreak of the pandemic.

**Kitchen Appliances**

- **Microwave Ovens**
  IFB continues to be amongst the top three players in this category, with a market share of ~24% as on date. The demand for this category has also increased during the lockdown period. The key aim for the fiscal is to address new model introductions, including models with new technologies for automating and improving the cooking process. The Company is actively driving implementation of new technologies in the areas of steaming, grilling and baking. IFB’s aesthetics and also its unique ‘Oil Free Cooking’ technology continue to be USPs in the market.

- **Modular Kitchens**
  We are expanding the kitchen format presence in Goa and Bangalore by adding another ~5 outlets by the end of the 2nd Quarter. The new design format combines the modular kitchens with appliances and is a part of the expansion of the 5 outlets mentioned. The Company has also identified ~100 additional existing exclusive stores, which can incorporate the new design format. Of these, ~25 stores will be re-formatted additionally in the fiscal, once the 5 stores underway are completed.

  The IFB design offering for this category is of a uniquely high quality. The products with various storage modules are well priced and include attractive EMIs and an enabling range of accessories for the various storage modules.

- **Built-in Ovens, Chimneys and Hobs**
  The market placements in this category are in ~950 stores across the country as on date. These include the displays in the ~535 current IFB Points. The IFB Points account for ~55% of sales in this category. The Company will continue to invest in full range product displays for an increased presence across customer channels. The key focus, as shared earlier, is on marketing this range to IFB’s own customer base through the IFB Points and digital media. This is the marketing work that the Company will focus on in the 2nd and 3rd Quarters of this fiscal.

  In the 4th Quarter of the last fiscal, the Company introduced baffle filters as well as an auto-cleaning feature in its chimneys, both of which are in line with current market needs.
Cooling Category

- Air Conditioners
In this category, production has started in the new facility. We are currently running at partial capacity, however, due to COVID-19 related issues and protocols. The new range has been well accepted in the counters where placements have happened. Performance and customer experience feedback are very good.

The 2nd and 3rd Quarter periods will be used to expand placements across all of IFB’s counters and set the base for the season ahead. Work is also ongoing on projects for reduction of import content, for example in the case of electronics, as these are to be completed by December 2020.

For the Quarter ended 30 June, 2020
The Appliances Division reported net revenues from operations of ₹249.29 crore for the Quarter ended 30 June, 2020, a degrowth of 55.9% as compared to the same period of the previous year.

Fine Blanking Division
The Fine Blanking Division mainly caters to the automobile sector, both 2-wheeler, 4-wheeler and commercial vehicle segments. The commercial vehicle segment has struggled with sales over the last fiscal. The downturn continued during the Quarter as well.

The revenue of the FBD (excluding AFM Division) is as under

<table>

</tbody>
</table>

The Fine Blanking Division, including the After Market (AFM) Division, has reported a revenue of ₹28.37 crore in the 1st Quarter of the current year, as compared to ₹110.44 crore for the corresponding period of previous year.

**Future Outlook & Strategy**

The automotive sector is expected to have a difficult time ahead on account of the COVID-19 pandemic for at least two Quarters.

- The passenger car segment will be badly hit. The SUV and high-end car segments will see a slowdown in sales. The low-end car segment will have significant sales as buyers will look forward to owning cars rather than relying on shared mobility.
- IFB had 4-wheeler sales of ₹3.62 crore with a segmental percentage of 21.6% of total sales in the 1st Quarter.
- The sales of 2-wheeler are expected to have a spurt in demand within the next 1–2 months, which may continue for the next 6–8 months. IFB had 2-wheeler sales of ₹12.08 crore with a segmental percentage of 72.61% in the 1st Quarter.

IFB Industries Limited, the Holding Company, has a subsidiary Trishan Metals Private Limited (TMPL), a wholly owned subsidiary Global Automotive & Appliances Pte Ltd (GAAL) and a step-down subsidiary Thai Automotive and Appliances Limited (TAAL).

**Trishan Metals Private Limited**

IFB Industries Limited holds 51.12% equity shares of TMPL, which were acquired on 11 July, 2016, which is engaged in manufacturing CRCA.

Revenue from Operations for the Quarter has decreased by around 89% as compared to the corresponding period of the previous year (₹2.60 crore vs ₹23.75 crore). Revenue was badly impacted due to nationwide lockdown. However from the 2nd Quarter onwards, the situation is likely to improve.

Margins were also impacted due to lower turnover. The unit has made a loss of ₹1.37 crore in the 1st Quarter as against ₹0.25 crore in the corresponding period of the previous year (at PBDIT level).

Global Automotive & Appliances Pte Ltd (GAAL) and Thai Automotive and Appliances Limited

GAAL continued its operations for sourcing and supply of electronic components. This is its third year of operation and during the 1st Quarter GAAL achieved a total revenue of $0.13 million, which is a decline of 57% compared to same period of the last year. During the Quarter, GAAL made a loss of $0.03 million, mainly due to low sales as result of the outbreak of the pandemic.

As reported earlier, IFB Industries Limited holds 100% equity shares of GAAL, which in turn holds 100% in TAAL. We are hopeful of a recovery in business from 2nd Quarter onwards.

TAAL has targeted THB 240 million orders from OEMs in Thailand, which will go into mass production in this fiscal. The Company has completed an expansion of its manufacturing facilities. During the Quarter, TAAL achieved a total revenue of THB 24.78 million, which is a decline of sales by 38% compared to same period of the last year. During the Quarter, TAAL made a loss of THB 3.56 million, mainly due to the outbreak of the pandemic, subsequent halt in economic activities and nationwide lockdown.
