Dear Sirs/Madam,

Sub: Press Release

Please find enclosed the press release titled "Infosys Science Foundation Recognizes Six Inspiring Researchers and Scientists".

This will also be made available on the Company's website at www.infosys.com.

Yours sincerely

For Infosys Limited

A.G.S. Manikantha
Company Secretary
PRESS RELEASE

Infosys Science Foundation Recognizes Six Inspiring Researchers and Scientists

Bengaluru – November 15, 2017: The Infosys Science Foundation (ISF) today announced the winners of the Infosys Prize 2017, across six fields: Engineering and Computer Science, Humanities, Life Sciences, Mathematical Sciences, Physical Sciences and Social Sciences. Now in its ninth year, the Infosys Prize continues to honour and recognize some of the best researchers and scientists of our time. Among the winners are a neuroscientist using computers to map the human brain, a computer scientist studying biological systems and a chemist trying to make DNA machines to study living cells. The prize for each category consists of a purse of Rs. 65 lakh, a 22-karat gold medallion and a citation certificate.

The winners were shortlisted from over 236 nominations by a scholarly jury panel, comprising renowned scientists and professors. The jury chairs of the six categories are: Prof. Pradeep K. Khosla (University of California, San Diego) for Engineering and Computer Science; Prof. Amartya Sen (Harvard University) for Humanities; Dr. Inder Verma (Salk Institute of Biological Sciences) for Life Sciences; Prof. Srinivasa S. R. Varadhan (New York University) for Mathematical Sciences; Prof. Shrinivas Kulkarni (California Institute of Technology) for Physical Sciences; and Prof. Kaushik Basu (Cornell University and former SVP, World Bank) for Social Sciences.

The six winners were informed of their selection shortly before the announcement via a phone call from the trustees and the respective jury chairs. The winners of the Infosys Prize 2017 are:

**Engineering and Computer Science**

Prof. Sanghamitra Bandyopadhyay, Director, Indian Statistical Institute (ISI), Kolkata, for a scholarly record in algorithmic optimization and for its significant impact on biological data analysis. Her discoveries include a genetic marker for breast cancer, determination of co-occurrence of HIV and cancers, and the role of white cells in Alzheimer’s disease.

**Humanities**

Prof. Ananya Jahanara Kabir, Professor of English Literature, King’s College London, for her highly original explorations of the long-standing historical elements – conceptual, social and cultural – in colonial modernity, and for her subtle and insightful ethnography of cultural and political life in Kashmir.
Life Sciences
Prof. Upinder Singh Bhalla, Professor, National Centre for Biological Sciences (NCBS), Bengaluru, for his pioneering contributions to the understanding of the brain’s computational machinery. His investigations have revealed essential neuronal computations that underlie the ability to acquire, integrate and store complex sensory information, and to utilize that information for decision and action.

Mathematical Sciences
Prof. Ritabrata Munshi, Professor, Tata Institute of Fundamental Research (TIFR), Mumbai and Indian Statistical Institute (ISI), Kolkata, for his outstanding contributions to analytic aspects of number theory. Besides ingenious contributions to the Diophantine problem, he has established important estimates known as sub-convexity bounds for a large class of L-functions with methods that are powerful and original.

Physical Sciences
Prof. Yamuna Krishnan, Professor, Department of Chemistry, University of Chicago, for her ground-breaking work in the emerging field of DNA architecture. By successfully manipulating DNA—the building blocks of life—to create biocompatible nanomachines, she has created novel ways of interrogating living systems, increasing our knowledge of cell function and getting one step closer to answering unresolved biomedical questions.

Social Sciences
Prof. Lawrence Liang, Professor, School of Law, Ambedkar University Delhi, in recognition of his creative scholarship on law and society. His prodigious output in the fields of copyright law, digital technologies and media, and popular culture raises probing questions about the nature of freedom, rights, and social development. His provocative answers link historical context and ethical practice in unexpected and illuminating ways.

Speaking during the event, Mr. K. Dinesh, President – Board of Trustees, Infosys Science Foundation, said, “The winners of Infosys Prize 2017 were selected from several nominations received from across universities and institutes and we are grateful to our distinguished jury members to have taken the time to evaluate and award the most deserving. By shining light on science, we hope to gradually stimulate the minds of future talent, and open up a new world of possibilities for all of us.”

He further added, “This award aligns with our core principle of promoting science and inspiring young researchers in the country. We are pleased to note that the Infosys Prize is increasingly gaining recognition and has become one of the most coveted prize awards in the field of science and research in the country.”
The Awards Ceremony for the Infosys Prize 2017 will be held on January 10, 2018, in Bengaluru. The winners will be felicitated by Prof. Kip S. Thorne, Professor Emeritus at California Institute of Technology. Prof. Thorne is a theoretical physicist who won the Nobel Prize in Physics in 2017 for his contributions to the observation of gravitational waves in 2015, posthumously Albert Einstein a 100 years ago.

About The Infosys Science Foundation

The Infosys Science Foundation is a not-for-profit set up in 2009 by the board of directors of Infosys at the time and some senior management. The mission of the Foundation is to encourage an interest in science and research. The Foundation’s flagship initiative is the Infosys Prize, awarded annually to stellar work across six categories to contemporary researchers and scientists. It also engages in a host of related activities to further its mission.

About Infosys Ltd.

Infosys is a global leader in technology services and consulting. We enable clients in 45 countries to create and execute strategies for their digital transformation. From engineering to application development, knowledge management and business process management, we help our clients find the right problems to solve, and to solve them effectively. Our team of 198,000+ innovators, across the globe, is differentiated by the imagination, knowledge and experience, across industries and technologies that we bring to every project we undertake.

Visit www.infosys.com to see how Infosys (NYSE: INFY) can help your enterprise thrive in the digital age.

Safe Harbor

Certain statements mentioned in this release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the ‘safe harbor’ under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings.
including our Annual Report on Form 20-F for the fiscal year ended March 31, 2017. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company’s filings with the Securities and Exchange Commission and our reports to shareholders. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
