Prasad in self isolation

IT and Communications

Minister Rajeev Shuddha Prasad on Monday said he has gone into self-isolation after his personal staff member tested positive for Covid-19. The minister, who tested negative for the virus last week, said the positive staff member has been shifted to a residential quarantine facility.

Railways to give Ayodhya station ₹104-crore facelift

The new station will have domes and pillars just like the Ram temple

Power units step on gas

Two-thirds of migrant workers

still not returned to cities or plan to: Survey

PRESS TRUST OF INDIA

Nearly two-thirds of migrant workers in India do not plan to return to their hometowns due to the coronavirus-induced lockdown in the last three months to end June from the same period last year, data from the Central Electricity Authority (CEA) show.

Imports accounted for 67.4% or overall gas consumption by power plants, up from 59.5% a year ago.

Power producers say the trend is likely to continue until at least the next two to three years, as the gas demand from refineries is expected to remain low due to the lockdown.

Gas consumption by power plants rose 31.7% to 33.4.9 million standard cubic metres per day in the same period last year.

The CEA data show that the coronavirus lockdown had a significant impact on the gas demand from the industrial sector, which accounts for the largest share of gas consumption in India.

Three out of four gas-fired power plants were shut down due to low gas availability in the third quarter of the fiscal year ending March 2020.

The lockdown led to a sharp drop in industrial activity and a reduction in the demand for gas, which is used in various industries for heating and cooling purposes.

The government has taken several measures to ensure that gas supplies to critical sectors, such as hospitals and other essential services, are not disrupted.

However, the lockdown has also resulted in a reduction in the demand for gas, which has impacted the overall gas market in India.

The CEA data show that the gas demand from the industrial sector is expected to remain low until the end of the fiscal year ending March 2021, due to the ongoing lockdown.
