Infosys and Celonis Collaborate to Transform ERP Modernization and Business Process Optimization Worldwide

Bengaluru, India and New York City, USA – June 8, 2020: Infosys (NYSE: INFY), the global leader in next-generation digital services and consulting, today announced their global partnership with Celonis, a market leader in AI-enhanced process mining and process excellence software, to transform ERP modernization and business process optimization. This new partnership will enable customers to embark on long term transformation projects with significant operational savings, overcoming challenges typically associated with crowded technology landscapes, blends of legacy and homegrown systems, and operational silos that threaten digital transformation agendas.

Together, Infosys and Celonis will enable enterprise customers to meet their digital needs by helping them to scale the adoption of SAP S/4HANA and SaaS platforms. Leveraging Celonis’ unique capabilities, Infosys will drive business excellence and improve productivity through automation and building cutting-edge technology platforms.

Dinesh Rao, EVP and Global Head, Enterprise Application Services, Infosys said, “In current times, business resilience is the most pressing need for organizations as they navigate the present landscape as well as prepare for future disruption. Digitizing the core will be a key element for enterprises and Infosys’ industry-leading Digital Process Automation expertise together with Celonis’ unique AI capabilities, will be the catalyst for ERP modernization and business process optimization. We are confident that our expertise in enterprise system management, AI and data-driven approach will help our clients take their digital transformation journey to its next phase.”

“The Celonis Intelligent Business Cloud combines real-time transactional data collection, business context, machine learning, and process automation to help customers make operations more frictionless, intelligent, and outcome-driven,” Co-Founder and Co-CEO of Celonis, Bastian Nominacher said. “With the Infosys partnership, customers will be able to manage variability across complex lines of business, technology across locations and languages, and for ERPs and BPO Transformation thereby reducing total costs of ownership. We are looking forward to building a global partnership with Infosys’ teams to drive frictionless technology and process excellence agendas for our customers.”

Safe Harbor
Certain statements in this release concerning our future growth prospects, financial expectations and plans for navigating the COVID-19 impact on our employees, clients and stakeholders are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding COVID-19 and the effects of government and other measures seeking to contain its spread, risks related to an economic downturn or recession in India, the United States and other countries around the world, changes in political, business, and economic conditions, fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry and the outcome of pending litigation and government investigation. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2019. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.

About Celonis
Celonis is the leader in AI-powered process mining and process excellence software. Its Intelligent Business Cloud empowers companies to put AI to work in their operations, by sensing operational friction in real time and enabling intelligent action and automation. By combining real-time transactional data collection, business context, machine learning, and process automation, Celonis customers are able to optimize operations for desired outcomes. Companies around the world including Siemens, Uber, 3M, Airbus and Vodafone have embraced the Superfluid Enterprise vision and harnessed the power of Celonis to drive execution and outcomes, resulting in millions of dollars of value.
