*Note: Performance for the quarter and YTD FY20 is to be viewed in the backdrop of challenging macro-economic conditions as well as evolution of auto industry towards new emission standards and new technologies.
Commenting on the performance, Mr. Rajeev Sikand, Group CEO - Alicon Castalloy, said

“The auto industry continued to witness tepid volumes in Q3 given the challenging macro-economic conditions as well as uncertainty amidst the evolution towards BS-VI emission standards. The festive season which carried into the third quarter did not see increased production at Auto Manufacturing. In this backdrop, we are encouraged to report a relatively stable performance accompanied by improved operating profitability on the back of our cost management initiatives.

Investments in new technologies and talent in recent years have enhanced our preparedness for emerging trends across the industry landscape. We are focused towards increasing market share in India, increase penetration among global customers as well as elevate our platform of products catering to non-auto sectors.

Amidst the dynamic operating environment, we are tightening our belts to enhance efficiencies. Contract wins announced last quarter are progressing along targeted schedules. We believe we are well placed to capitalize on opportunities that will arise as demand recovers.”
