Forward-looking statements

Some information in this report may contain forward-looking statements which include statements regarding Company’s expected financial position and results of operations, business plans and prospects etc. and are generally identified by forward-looking words such as “believe,” “plan,” “anticipate,” “continue,” “estimate,” “expect,” “may,” “will” or other similar words. Forward-looking statements are dependent on assumptions or basis underlying such statements. We have chosen these assumptions or basis in good faith, and we believe that they are reasonable in all material respects. However, we caution that actual results, performances or achievements could differ materially from those expressed or implied in such forward-looking statements. We undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

Our quest for exploring and reinventing our offerings in line with changing trends #WhatYouNeedToKnowMore remains unabated. To enable sustained progress and to enhance consumer delight, we continue to expand our footprints in health and convenience food by leveraging our farm to fork approach, strong brand equity, global distribution and supply chain network. With our dynamic range of products including rice based snacks, organic products, Cuppa rice, ready-to-heat and saute sauces, we remain relentlessly focused to introduce innovative, healthy and convenient food offerings for our consumers across the world.

Our integrated business model, strong R&D capabilities and increasing brand penetration across all consumer segments, asserts LT Foods’ position as a truly global player – evolving and growing with changing consumer preferences. With a continuously growing brand affinity, we are steadfast about enhancing value-creation for our valued stakeholders while sustainably growing and expanding our core.
Our Iconic Brands

As we continue to cater to a varied global consumer tastes and preferences, we have introduced some of the most iconic brands in the food industry. Catering to the needs of a vast market in India and globally, we have fervently focused on improving the scope and scale of our operations to leverage our strong brand value.

From delivering our flagship Daawat brand to the Indian consumer, to making a mark in the US basmati rice market with our Royal brand, we have continuously expanded our brand recall to 60+ countries. New avatar of Daawat has also been launched in Europe to solidify our position in the region as well. We believe in promoting a versatile brand, whereby we aspire to launch specific brands through certain channels while diversifying our product portfolio basis the need of specific geography.

In keeping with our aspirations to create a truly memorable brand, we have enthusiastically reacted and responded to market changes to sustain seamless supply chains beyond borders and solidify our position across geographies. Our brands enjoy leadership position in India with 26% market share, the US with 54% market share and other geographies as well.
Strong Supply chain

LT Foods is today among the leading consumer food Company in Basmati and Other Specialty Rice, with strong end-to-end control over the entire value chain in key products. Over the years, we have invested significantly towards building scale and capabilities in India and at international level. Today, we are well-positioned to capitalize on opportunities that arise in a rapidly evolving food industry in our category, across geographies.

Our strategically located state-of-the-art processing and packaging facilities and milling infrastructure, across the globe, are equipped with latest technologies, enabling us to consistently deliver the finest products to our consumers. Some of the features include:

- Scientifically maintained silos for storage
- Dedicated organic processing facility with CO₂ treatment
- Robust practices to secure highest standards of food safety
- Lot wise tracking at each phase of processing

LT Foods Limited | Annual Report 2019-20
New growth engines
Organic, Health & Convenience Product Portfolio

We, at LT Foods, forayed into the organic business segment in 1999 through our subsidiary Nature Bio Foods Limited, long before the world paid heed to the incredible health benefits of organic food & ingredients. As consumers continued to be influenced by the health and environmental consequences of their food choices, we remained focused on fortifying our range of organic products and ingredients including rice, pulses, oil seeds, cereal grains, spices and nuts. Marketed under the ‘EcoLife’ brand, our organic portfolio strives to offer the healthiest and purest products, catered for your well-being.

To deliver

TRUSTED ORGANIC FOOD AND INGREDIENTS

We have joined hands with more than 80,000 farming families from villages across India. Staying true to our commitment towards sustainability, our endeavor to produce organic food & ingredients enables us to support sustainable farming communities while effectively promoting fair trade practices.

We have also established two wholly owned subsidiaries in Netherlands and in the USA to further boost sales in the overseas market and foray into newer geographies. For years, we have strengthened our organic portfolio with new and innovative products to capitalize on growing consumer interest and improve awareness about the phenomenal benefits of organic food. To satisfy the ‘organic’ demand in International markets, we have also introduced a range of ‘ready to heat’ products, specially curated for our valued patrons.

Health & Convenience Products

LEVERAGING OUR STRONG BRAND EQUITY, WORLD-CLASS INFRASTRUCTURE, A STRONG SUPPLY BASE AND GLOBAL DISTRIBUTION CHAIN, WE ARE STRENGTHENING OUR HEALTH AND CONVENIENCE FOOD SEGMENT IN LINE WITH CHANGING CONSUMER TRENDS. FOR FULFILLING THE DEMAND FOR CONVENIENT AND HEALTHY FOOD, WE HAVE LAUNCHED RICE BASED KARI KARI SNACKS, A RANGE OF READY-TO-HEAT PRODUCTS, SAUTE SAUCES AND CUPPA RICE. DESIGNED TO OFFER THE PERFECT BLEND OF HEALTH AND CONVENIENCE, WE CONTINUE TO STRENGTHEN OUR NEW BUSINESS SEGMENT WITH HEALTHY FOOD, PREPARED WITH CHOICEST INGREDIENTS & CONVENIENCE
**Profitable Growth and sustainability**

LT Foods reported another year of robust financial performance, delivering on its strategies. The year under review was a year of significant progress. Despite volatile industry dynamics and changing consumer sentiments, we identified growth opportunities to increase our market presence, in India and around the world.

Message from the Management

Dear Shareholders

We write this Annual Report amidst a situation that has never been witnessed in our living memory (at least for a majority of the world’s population). The COVID-19 pandemic has left national leaders battling to save the lives of fellow citizens, while trying to bring economic growth back on track, as phased lockdown continues.

As we adapt to a post-COVID world, we are pleased to share with you our achievements in the year gone by, showcasing our efforts towards building a sustainable business whilst creating value for all stakeholders. FY19-20 was marked by satisfactory growth across our geographies and business verticals.

The love for food

We are proud to be in the business of food - something that unites families, especially at an age where digital connectivity has left little time for moments of togetherness. The simple joys of cooking meals and reconnecting with your family over meals, continues to offer meaningful contributions across diverse emotional quotients.

At the heart of our business lies our consumers and it is what drives us to scale our capabilities and tap into emerging opportunities. While changing lifestyles and food preferences are impossible to ignore for a Company like ours, we have proudly reinvigorated our business over the last seven decades to emerge as a preferred consumer food company for millions of people, in India and across the world. Besides, a widening product basket gives our consumers the freedom to truly enjoy their food while nourishing their body and soul with healthy offerings.

Reviewing our performance

We are pleased to once again deliver on our strategies, now fully ingrained in our business model. Our approach to building a value-accretive business now rests on the three-fold strategies of growth, margin expansion and strengthening our key financial metrics & improving the ROCE (Return on Capital Employed). Growth pertains to the sustained market leadership of our key brands across geographies we operate, coupled with an expanding product portfolio and consistent demand for our products.

Ashwani Kumar Arora
Chief Executive Officer & Managing Director

Our flagship brands Daawat and Royal further strengthened their position in India and US during the year.

Ashwani Kumar Arora
Chairman

Growth pertains to the sustained market leadership of our key brands across geographies we operate, coupled with an expanding product portfolio and consistent demand for our products.

Vijay Kumar Arora
Chief Executive Officer & Managing Director

The double-digit growth in international markets validates our market leadership across geographies with increased share of premium products.

Chairman

LT Foods Limited Annual Report 2019-20

Corporate Overview

14

15
We delivered a 10% growth in International markets, validating our market leadership across geographies with increased share of premium products. Our flagship International brand ‘Royal’ in US further strengthened its #1 ranking in the US during the year. Our offerings now include a range of rice variants i.e. Ready-to-heat that serve a growing consumer base.

We strengthened our market share in Europe, Far East and Middle East region, with our products finding increasing acceptance in a competitive environment. We are also increasing our engagement and reach across both the regions, with presence across all channels and price points to reach a wider consumer base.

Our organic food and ingredient division continues to deliver to a double-digit growth, with increasing population adopting organic food over conventional food. Having started the division almost two decades, we have today 1,18,000 hectares of organic farmland, producing varied organic food products.

We remain focused on strengthening our margins with our strategic focus on margin expansion. Our operating model today is structured on value-creation, with a culmination of the right product mix and excellent operational processes, perfectly designed to create a positive impact on the bottom-line and improving Return on Capital Employed. The introduction of new supply chain strategies, built on a strong foundation of technology, well-ahead of its time, helped us to strengthen our brand presence. We registered an EBITDA growth of 2% YoY from Rs. 421 crore in FY 2018-19 to Rs. 509 crore in FY 2019-20; while our PAT increased by 45% YoY from Rs. 137 crore in FY 2018-19 to Rs. 199 crore in FY 2019-20.

Our operational excellence is aptly reflected by our strengthened financial matrices. Our EBITDA margin showed improvements by 140 bps over the previous year, to reach 12.2% in FY 2019-20, while our PAT margin improved by 125 bps to stand at 4.8% as compared to 3.5% in the previous year. We also reduced our debt level (bank borrowings) significantly, with an impressive interest coverage of 3.2x, with a comfortable debt-equity ratio of 0.30x, as on March 31, 2020. We also improved our ROCE from 11.3% in FY 2018-19 to 13.6% in FY 2019-20.

Driven by Innovation and automation

At LT Foods, we are driven by consumer centricity, backed by our ability to continually map the gaps in existing consumer offerings and filling it up with our innovative approach to add new products in our portfolio. The launch of new brands, like Daawat Quick Brown Rice and Daawat Sehat (fortified with iron, vitamins and folic acids) has not only strengthened our portfolio but improved our market share in key geographies. The recent launch of Daawat Cuppa Rice (a quick ready to eat rice based meal with no preservatives) has validated our promise on customer-centricity.

After the successful launch of Kari Kari premium rice-based snacks, we now have a dedicated manufacturing unit in Haryana, to aid our ambitious plans of a pan-India launch. We are now excited to launch Kari Kari snacks to a larger section of the Indian population through a joint venture with Kameda Seika (Japan’s snack food major).

Our years of integrated infrastructure and automated technologies allow us to turn our innovation, into quality consumer product. Further, our operations, products and facilities abide by strictest quality standards to ensure food safety, consistency of our products.

Reaching out far and wide

Riding on the strong brand equity, we are now present across mediums, like multi-cultural (ethnic channel), direct retail, food service channel and e-commerce platforms.

Our aggressive brand positioning was leveraging to accelerate growth in new-age channels of distribution. Participation in food festivals, 360° marketing campaign, expansive shelf space and greater visibility across multiple e-commerce platforms, contributed to impressive growth in current fiscal.

We continue to leverage our robust network of suppliers and distributors, enabling steady supply. Right from automating our sales force team to aggressive spends on digital media platforms, we are moving in the right direction towards harnessing technologies. We strategically customized synergies of our products with digital-precision marketing in different geographies, resulting in defined business growth.

Building trust

We are pleased to welcome Saudi Agriculture Livestock Investment Company (SALIC) on the Board of Daawat Foods Limited, our subsidiary company. The acquisition of 29.91% stake in our subsidiary by SALIC opens up new opportunities to grow and expand our business in the Middle East region and validates the trust and confidence reposed by them in our value-accretive business model.

Responding to COVID-19

Our already existing automated operational setup with best-in-class industry practices, technology-driven integrated supply chain and last mile distribution network ensured uninterrupted production and supply during the lockdown due to pandemic COVID-19. And even as this Annual Report goes into print, the Coronavirus continues to pose challenges to business continuity and economic growth for countries worldwide. However, at LT Foods, our established operational culture built on the foundation of progression, global presence, versatility and sustainability defines our growth journey as we navigate the challenges and converting the same into opportunities.

Appreciation

We remain grateful to our Board members, team, vendors, consumers, bankers and investors for their continued trust in LT Foods. As we continue to place our consumer at everything we do, we would continue to deliver on our four strategic pillars of delivering growth, in our core business, organic business, strengthening our new growth engines, balance sheet metrics with improved ROCE. As we look ahead, our optimism drives us to dream bigger, enable prolonged value creation for our stakeholders and welcome new beginnings to lay the foundations for perfecting change.

Regards,

Vijay Kumar Arora
Chairman

Ashwani Kumar Arora
Chief Executive Officer & Managing Director
Being progressive is a culmination of a multitude of factors. It is the perfect blend of our abilities to innovate, create opportunities, adapt to changing preferences and showcase an unmatched flexibility to mould our ways in tune with shifting trends.

Remaining true to our commitment of building a progressive and sustainable business model, we continue to invest in culture of excellence across value chain and making it consumer centric. This welcome change has helped establish LT Foods as a trendsetter – carving well defined paths to greater achievements.

Aligning our actions to our goals, we endeavor to emerge as a future-ready enterprise, adopt novel practices and nurture a cohesive culture to consistently enhance value, across business verticals.
LT Foods’ progression

More than seven decades ago, the seeds of a business were sowed, that have today traversed continents and set new benchmarks in the food industry. We continue to march ahead, having come a long way from our modest beginnings in a village of Amritsar to have grown into a globally recognized consumer foods company.

What started as a trading Company has now evolved into a leading consumer food company with presence in Indian and International markets. Nevertheless, the journey was never seamless. While we were challenged to keep pace with a vibrant business landscape, our aptitude for excellence guided us on the growth path.

Staying true to our values and our commitment to create a sustainable business, we continued to lead the way with a progressive attitude - reflected through the adoption of best industry practices across the group, investments across value chains, automation of production units and the creation of a robust distribution model. Our ability to adopt organic and inorganic routes to promote channel wise and geographic reach of our products also showcase our enthusiasm to constantly look for newer avenues of growth.

Keeping pace with changing times, during the recent COVID-19 outbreak, we demonstrated the agility to quickly adapt to a ‘new normal’, relying on advanced technology to implement go-to market strategies that helped us to sustain our market leadership amidst crisis.

Today, our relentless focus on delivering better outcomes have empowered us to produce leading brands and offer consistent returns to our stakeholders, enabling us to successfully lay the foundations for a sustainable organization.

The consumer foods industry is vibrant. It is constantly morphing, adopting new practices and adjusting to changing preferences. For LT Foods, it is not just imperative to recognize such shifts. Rather, we believe in changing ourselves according to the needs and aspirations of our consumers.

With an unswerving focus on creating a progressive, sustainable, profitable and growing business model, LT Foods continues to make significant investments to inculcate a consumer centric approach across its value chain. Keeping the consumer at the core of our operations, we strive to deliver exceptional products designed to meet evolving needs.

It is our consumer centric attitude that prevents complacency and compels us to pay heed to lifestyle and cultural changes reflected through food choices. Therefore, we don’t just aspire to offer the finest quality long grain Basmati rice, but also understand the need to explore the convenience and healthy foods segment as well. Growing awareness about health and well-being is influencing consumers to opt for a perfect blend of healthy, tasty and convenient food. At LT Foods, we are ready to satisfy these demands. To provide what our consumers desire, we have explored organic food varieties, introduced Brown rice, a range of healthy and convenient Kari Kari snacks and fulfilled the need for quick cooking with ready-to-heat, saute sauces and Cuppa Rice. Our expanding product portfolio is, therefore, nothing but a reflection of our consumer centric behaviour and our relentless dedication to deliver what our consumers need.
We are responsible to the consumers we serve. We keep the consumer at the centre of our endeavours, and ensure all our actions will benefit the ultimate user.

We do what we say we will do and fulfill all our promises. What we commit to do is based on our principles and we apply them consistently in every situation.

We are accountable for each of our actions and take full responsibility of each task we take up as LT Foods. We strive to fulfill all promises made by us, by giving 100% of our energies to the task at hand and having a ‘never give up’ attitude.

We believe in striving until we achieve the best in all our endeavors. We continually set high benchmarks and don’t settle until we reach them.

We continuously strive to learn and grow to provide our stakeholders with the finest output and continuously attempt to improve our processes and find new ways so as to deliver superior results and to ensure that we are future ready.

We respect the individuality, opinions and contributions of our stakeholders.
Strategies for Growth

LT Foods remains committed towards creating a progressive, sustainable, profitable and growing business model to build value for its stakeholders.

Being one of the leaders in the core basmati segment, our focus is on maintaining the leadership position by offering products across multiple price points, being available across channels and delivering a world-class experience to consumers.

While strengthening the core business and going by our forte (i.e. advanced farm-to-fork infrastructure, global supply chain base, class leading distribution network and strong brand equity across geographies), we are also looking to nurture new initiatives in line with changing consumer trends in the market, especially in the health and convenience segment.

Strategic goal
To create progressive, sustainable, profitable and growing business to create value for our stakeholders

Strategic Pillars

- Grow the Core Basmati Business
- New Growth engines
- Grow the Organic Food & Ingredient Business
- Improving Return on Capital Employed
- Expanding the margins in the core business by changing the product mix.

Global Expansion: We have been steadily investing in international markets to penetrate our brand through existing and new channels of reaching to the consumer. US is a strategic priority market for us, where we have been expanding the product portfolio and leveraging the market leadership position to maintain the momentum of growth. Europe is another strategic market for us, where we have ventured through greenfield operations and penetrated the market with a new avatar of our brand, Daawat. The region is witnessing steady growth as well.

In Middle East and Far East, LT Foods is working on expanding its distribution reach with the help of new distributors and undertaking customized marketing initiatives to gain market share. Similarly, in Africa and other geographies, we expect our growth momentum to continue as well.

Grow the Organic Food & Ingredient Business

LT Foods is a pioneer in the Organic food & ingredient space and has created strong entry barriers with investments in back-end infrastructure and a diversified consumer portfolio globally.

Quality control measures: Stringent quality controls and effective supply chain systems have helped LT Foods to position itself as a trustworthy partner in the organic space. Strong back-end infrastructure, Organic land base, connect with farmers and diversified product portfolio have enabled the growth of Organic Business and increased the contribution of this segment to more than 9% in the overall revenue of the Company.

Going forward also Organization would focus on creating new channels of reaching out to consumers and addition of more value added products with stringent processes to grow this vertical.
Strategies for Growth

New growth engines
We will continue to focus on portfolio expansion with a healthy mix of core basmati business and future growth engines aligned to changing consumer needs.

Health and convenience food: In India, we have witnessed consistent traction in the health and convenience food space. We will continue to drive penetration of rice-based health and convenience products, i.e., Daawat Sehat, Daawat saute sauces and Daawat cuppa rice. We have ventured into “On the go” space as well with Rice based snacks.

Ready to heat: In the US, we have seen positive traction on our newly launched convenience-based products – ‘ready to heat’. We are evaluating such opportunities in other geographies as well to launch new products inline with changing trends and by leveraging our brand equity and the distribution network of that country.

Improve Return on Capital Employed (ROCE)
Strategically, LT Foods is working on improving Return on Capital Employed with a combination of improved margins and better utilization of Capital.

We would continue to focus on change of product mix and increasing the scale of Core Business to expand the margins and optimise the capital utilization to deliver better ROCE to its stakeholders.

Enablers for strategic growth

Business and go-to-market strategies
Expanding the business in new geographies and increasing the depth in existing geographies are the key focus areas for LT Foods with its current product portfolio. LT Foods has followed a channel focused strategy leading to leadership positions in newer channels and organized trade environments.

Going forward, increase in penetration across channels through cutting edge analytics and digital enablement and customized marketing strategies will be in focus to be closer to our consumers and drive business growth.

Product innovation
Consumer centric innovation is another enabler for the organization to grow and tap into newer opportunities in the business. We need to keep a close eye on changing consumer trends in the food space, and accordingly offer them new products to fill in gaps in consumers’ kitchens, by leveraging our R&D capabilities and the strong equity of our brands Daawat and Royal.

LT Foods has launched new products on health and convenience and is seeing good traction in the market. We will continue to work with our teams to identify gap areas and look out for such opportunities to offer innovative products to consumers.

Cost efficiencies
Having control on the complete value chain gives LT Foods an edge over its competitors. Staying cost conscious at every step of the value chain has helped the organization to stay competitive in its space. In the current scenario, the organization has increased its focus on adding efficiencies across all levels, with the use of analytics and creating new benchmarks to achieve.

People
People and cultural change have been the key drivers of growth for LT Foods. Nurturing existing talent with external support, driving ownership among team members, and adapting to change by aligning team members to the strategic goals and shared vision have been the key strategies for growth.

We aim to create a culture of entrepreneurship by empowering teams, and with clarity of the role in the complete value chain. We will continue to drive the agenda of empowering people by developing ownership and by giving them opportunities to learn and develop in their space.

Technology and automation
LT Foods has always been open to new ideas and adapting to changing industry practices, which has helped the organization to stay future-ready.

Use of technology to automate systems and processes has helped the organization during a time when the industry was going through the challenge of labor availability and movement.

Digitalization and other technology inventions such as AI and Automation technologies will continue to be a focus area to bring in control and transparency in the systems and for effective end to end decision making.

Sustainability
One of the core strategic driver for the organization is to create a sustainable business with the combination of increased share of consumer business. Since the inception of the Company, we have focussed on this philosophy of Farm to Fork and made investments to assure the consistent experience to its consumers. Investments on the complete value chain in on back end with the farmers on agri extension services and sustainability programs, on infrastructure for creating a global supply chain and in front end for creating a strong Distribution network in India as well as Globally has further strengthened the business model. Its financial metrics and made it future ready.

This approach of the organization gives it a edge over others to tap into the true potential of some of the key markets and strengthen its position.

We will continue this momentum by staying connected with all stakeholders in the value chain, including farmers, suppliers, vendors, customers, consumers and other partners in our value creation journey.
Transcending our national boundaries, we have moved further to

**STRENGTHEN OUR DOMINANCE GLOBALLY**

WE ARE CONSTANTLY FORGING STRONG RELATIONSHIPS WITH CONSUMERS IN DIFFERENT PARTS OF THE WORLD, CATERING TO THEIR PREFERENCES AND INTRODUCING PRODUCTS THAT APPEAL TO OUR GROWING CONSUMER BASE.

OUR COMMUNICATION STRATEGIES HAVE EVOLVED AND OPERATIONS IN KEY MARKETS HAVE BEEN SCALED TO ENHANCE OUR GLOBAL REACH. IN A CONNECTED WORLD, IT IS IMPERATIVE TO OFFER A CONSISTENT MARKETING STRATEGY TO DELIVER SIMILAR OUTCOMES AND EXCEPTIONAL EXPERIENCES ACROSS TOUCH POINTS.

With an aim to sustain our market leadership in India as well as in foreign shores, we lay constant emphasis on our brand building initiatives to sustain consumer loyalty and limit opportunities for competition. Relying on a solid reputation, excellent brand recall and a commitment to consistently deliver value, LT Foods today has securely cemented its position as a global leader par excellence.
India Business

In India, we operate in an organised yet fragmented market, involving multiple players with regional and national brands. It is therefore crucial for us to expand adequate distribution channels to cater to a growing consumer base in India. It has not only enabled us to expand our presence but also helped us to maintain a strong position.

We continue to deepen our market presence placing our consumer even more firmly in the center of our business activities. We are leveraging our deep-rooted expertise of market penetration to widen our retail presence.

During the year, we implemented a project on trial basis driven on market-expansion strategies that helped us to expand our reach. We identified critical constraints in our distribution network, rolling-out a specific plan that helped in outlet expansion.

We are also now scaling up our Sales Force Automation (SFA) and Distributor Management System (DMS) program. Our investments in digital tools are aimed at empowering decision making at all operational levels, to ensure faster decision making and deliver higher operating efficiencies. The use of multiple digital tools across the operational value chain have helped manage inventory at retailers and distributors with ease and ensure last-mile delivery.

We are buoyant about the country’s consumption-driven growth, riding on the back of our established and prominent presence across multiple network. We continue to partner with several HoReCa players for the last eight years and have grown multi-fold. The wholesale channel is one of the most important channels in India with the retail sector being extremely unorganized. To sustain our market leadership, we have established a prominent network of distributors and wholesale outlets in the country.

OUR E-COMMERCE PARTNERS
International Business

LT Foods today possesses an unrivalled scale and scope in operations, with a growing International presence. Leveraging our decades of experience, we curated our International presence on a strong foundation of our India operations. Our production and backward integration of sourcing paddy remains in India, while our packaging and processing units are located strategically in India and International countries. This helped us widen our reach with improved cost efficiencies, and maintain quality under control and expand our business with global hubs.

We have streamlined specific processing and packaging units to ensure faster-time-to-market in International regions, with excellent connectivity with ports. We have also partnered with dedicated logistics partners to have a better control in the supply chain and achieve fast order fulfilment across our countries of presence. Our operations team continue to improve forecast, streamline inventory and minimise any risk of product unavailability across our distributors and SKUs.

Key geographic regions

America
We were the first India-based Company to penetrate the US basmati rice market with the acquisition of ‘Royal’ in 2007. Since then, we have leveraged our strong brand equity, distribution network and industry expertise to widen our offerings and market reach across channels.

Europe
We strengthened our footprint and set up a production facility in 2017. The stringent food, safety and quality norms in the region, conventionally creates a strong entry barrier. However, with our strong Sustainable Rice Platform (SRP) program, quality standards and extensive distribution network, we continue to deepen our presence across many countries in Europe, with innovative products, catering to a diverse consumer base.

Middle East
With a growing presence in several countries, we continue to increase our market share in the Middle East region, with our flagship brand ‘Daawat’. Post the acquisition of ‘Gold Seal Indus Valley’ and ‘Rozana’, we are now among the leading basmati rice player in several Middle East countries. Our recent strategic equity association with Saudi Agricultural and Livestock Investment Co. (SALIC), Saudi Sovereign Fund is expected to further strengthen our market share, building on supply chain synergies with SALIC.

Rest of World
We continue to grow our presence in other countries apart from America, Europe and the Middle East. We are now strengthening our position across geographies such as Far East, Mauritius, etc.

Did you know?

‘Royal’ was worth $35 million when we acquired in 2007. Today, we have grown the brand at a 3-year CAGR of 20%, with Royal remaining the largest selling basmati rice brand in Americas. We have also widened our product portfolio, that now comprises of rice variants like Jasmine rice, Arborio rice, Wheat flour and Ready-to-heat rice. Daawat and 817 Elephant also continue to garner a significant market share in the region.
We believe sustainability comes from our aptitude for excellence. It is reflected in our efforts to deliver impressive performances as well as in our commitment towards communities and the ecosystem.

Over the years, we have not just curated a truly renowned brand, but have successfully made our way to the hearts and minds of our loyal patrons. It is our sustainability that remains visible in every aspect of our operation, from our procurement and supply systems to our endeavours to ensure profitable business growth — enabling us to add value beyond business.
Integrated operations
Delivering value – from farm to fork.

Through our integrated business model, we seek to bring consistent experience to our consumers through our unique and innovative products. We operate our entire value chain with a continuous focus on quality, efficiency and optimum utilisation of our raw materials, capital and human resources.

Sustainable farming
We work closely with the farmers, helping them to practise sustainable farming measures at par with global food safety norms. We are partners in the Sustainable Rice Platform (SRP) program as initiated under UN Environment and International Rice Research Institute.

Efficient Procurement Mechanism
We procure our paddy from Mandis through Commission Agents. This is driven by analysing trends in production through scientific methods with an early access to key varieties with prompt payment to agents associated with mandis. Our in-house models help analyse and forecast demand, enabling full control on procurement procedures. We have a team of expert professionals to maintain consistency in Aroma, Taste, and Texture. A part of our paddy, We source materials from farmers, under our SRP program, streamlined to play a major part in our journey of value-creation.

Our SRP audited score have increased from 80 to 96.1 in 3 years

Sustainable Rice Platform (http://www.sustainablerice.org) is a UN Environment and International Rice Research Institute initiative. It has instituted a third-party audit to certify cultivation in sustainable ways. LT Foods is among the best growing companies as per Sustainable Rice Platform standards.

in 3 years
Over the years, we have built an effective supply chain and distribution network across the globe, ensuring steady and uninterrupted supply of our products to end-users. In India, we benefit from our strategically located distribution and supply centres across the country. In key International markets of the USA, Europe and Middle East, we have established our distribution centres to maintain adequate stocks to ensure sustained business activity. We enjoy a reliable association with renowned and leading logistic companies to ensure efficiency in our distribution process.

Over the years we have been consistently investing in building an automated manufacturing process that has ensured optimum capacity utilisation levels to maintain consistent quality parameters. We have introduced technologies from Japan to stay abreast with latest technology at our manufacturing and processing units. Over the years, we have not just curated a truly renowned brand, but have successfully made our way to the hearts and minds of our loyal patrons. It is our sustainability that remains visible in every aspect of our operation, from our procurement and supply systems to our endeavours to ensure profitable business growth – enabling us to add value beyond business.
Strong Brand Portfolio

As a dynamic and vibrant brand, we strive to promote our offerings to the farthest corners of the world. To fulfil our aspirations, we continue to innovate through new ways of communication, engage with our consumers and liaise with icons in the food industry to spread the message of healthy living.

With a focus on creating sustainable business model, organisation has continuously made investments on its brands i.e. Dawaat, Royal, Kari Kari. 360° approach of marketing to strengthen the brand has helped to increase our market share to 26% in India and 35% in rural segment. Royal also enjoys leadership position in US with 54% market share. Organisation adapted itself with agility during Covid times & used the digital platform to strengthen brand equity and increase recall value across geographies.

ARIKARI
Reveals the chef in you
During the year under review, we strengthened our quality commitments while increasing productivity and improving our capacities and technological capabilities. All our facilities are now certified and accredited by internationally acclaimed third party certification & accreditation bodies, as per HACCP and HARPC principles and standards.

Certified as per global standards
During the year, we sustained all our Food safety certifications and successfully acquired major industry accreditations.

Quality Audits
We conduct audits by certified institutions to ensure compliance to globally defined quality and safety standards. We comply with all leading import standards, as specified by FDA, CFIA, EU, GCC and SASO. Our facilities are also regularly audited by global retail consumers to ensure compliance to international country specific standards.

Food Safety
Our commitment to deliver exceptional value to our consumers is derived from our reputation and pursuit to achieve safety and quality practices across operations. As a part of our ongoing commitment to quality and provide consistent products to our consumers, we continue to introduce innovative quality assurance methods and processes across our value chain.

Effective assessment
Our state-of-the-art laboratories play a vital role in providing independent assessment of quality. The laboratories are designed in accordance with the requirements of respective regions as well as global requirements for testing and analysis. Equipped with latest machinery and tools, the laboratory is perfectly suited to determine the accuracy and reliability of our analytical results.

We analyse the effects of pesticides, heavy metals, physical, microbiological, mycotoxins and chemicals in our routine analysis to further improve the quality of our products.

Our testing team comprises of highly experienced and qualified chemists and analysts. Our laboratories are accredited by the National Accreditation Board for Testing and Calibration Laboratories (NABL), Agricultural and Processed Food Products Export Development Authority (APEDA), EIC [full form needed] and Food Safety and Standards Authority of India (FSSAI).
Our year-on-year performance reflects our continuing efforts to maximize and optimize the cash generating capability of our unique business model. Our diversified market presence as well as our balanced portfolio, serving a wider consumer audience, positions us to capitalize on emerging opportunities in the consumer food business.

We have taken conscious financial measures to maintain our long-term profitability and margin levels, and deliver sustainable value for our shareholders.

VALUE-ACCRETE BUSINESS
Our consumer food business portfolio continues to generate attractive margins. Over the years, we have increased our revenues from high-margin business substantially, scaling up our business, strengthening our distribution network and solidifying our brands across geographies.

Organic food & ingredient business (revenue share)
Our visionary two decades old business segment, continues to demonstrate a growing consumer acceptance. Our decades of investment - both at the backend, in terms of organic farm land, and expanding our market reach, has positioned us as a preferred and trusted organic food & ingredient player in the key markets we operate.

Health and convenience business
Leveraging our decades of experience in consumer food industry, we strategically diversified into health and convenience-based food by leveraging strong brand equity, back-end infrastructure and global distribution network that continue to deliver higher margins and a growing consumer acceptance.

STRENGTHENING BALANCE SHEET
In an effort to deleverage our balance sheet, we have reduced our long-term debt, showcasing our robustness in our capital structure.

We are actively strengthening our human resource policies that are directed towards strategic and well-planned recruitment, development, and empowerment of our employees, aligned to the Group’s Management Principles and Activity Guidelines.

We were awarded as one of India’s Best Companies to Work in 2020, that serves as testament to our rich culture and our organizational values.

Recruitment, Selection and Induction

In the pursuit of excellence, we recruit management trainees from top Business Schools. We also took steps to improve our executive leadership pipeline, investing in leadership assessment and creating a long-term succession pool within the employees.

At LT Foods, every new employee goes through an elaborate corporate orientation, covering our philosophy, vision, policies and processes. Additionally, the contents of the Code of Conduct are also shared in detail with the employees through a specific module that forms part of the HR session of the employee induction training program.

Learning & Development

Aligned to the changing needs of the organization, our employees were trained on multiple aspects of knowledge transfer, skill development and behavioural interventions. We continuously provide effective learning and development processes to our employees to upgrade their knowledge, skills and competencies through the following training modules:

- Recruitment, Selection and Induction
- Learning & Development
  - Competency Based training
  - Class Room Training
  - SDS, Behavioural & Technical Trainings
  - Online Learning Platform (E-Learning)

280+ hours

Leading the way responsibly

Adopting a proactive sustainability strategy

We have adopted a new concept to build upon our sustainability strategy – the 4R strategy of Reuse, Reduce, Refuse, Recycle. This approach helps farmers in adopting sustainable practices and contributes to reducing water consumption and greenhouse gas emissions.

Reducing water consumption and greenhouse gas emissions in Basmati rice cultivation

We are helping farmers of rice to comply with global food safety norms, to adopt economic, environmental and socially sustainable methods. While most of the industry players buy paddy from market yards, we at LT Foods get a significant portion of paddy directly from farmers with whom we work for the full crop season and help them to implement sustainable and safe growing practices.

Water management and yield prediction. These technologies have benefitted farmers with knowledge and skills to take informed farming decisions. It has also helped to improve the farmer’s income and has also led to a significant reduction in water consumption. Farmers have also profited from lower cost of fertilizers and pesticides.

The initiative has saved 48 billion litres of ground water and contributed to -30% less greenhouse gas emissions (combined effect of water and fertilizer reduction through use of water saving technologies like laser levelling, micro-irrigation, AWD (Alternate Wetting and Drying), SRI and direct sowing). It has also improved annual household income by 25%, from the baseline values calculated at the inception of the project.

Waste Management

We are converting agro-wastes into valuable agricultural input. We have undertaken several initiatives for agro-waste management, partnering with farming families. Instead of burning wheat and rice straws, we use it as much for the next harvest season. This has helped decrease weed growth, saving farmers from associated productivity loss.

We have taken initiatives to improve our energy and resource consumption patterns, for renewable as well as non-renewable sources of energy, within the office building, production factories and farmer fields.

We are a leading partner of Sustainable Rice Platform (SRP), a UN Environment and International Rice Research Institute initiative. As a part of this initiative, we have deployed technologies like remote sensing, image processing, and artificial intelligence to enable a dynamic advisory on pest and disease forecasts, water management and yield prediction. These technologies have benefitted farmers with knowledge and skills to take informed farming decisions. It has also helped to improve the farmer’s income and has also led to a significant reduction in water consumption. Farmers have also profited from lower cost of fertilizers and pesticides.

The initiative has saved 48 billion litres of ground water and contributed to -30% less greenhouse gas emissions (combined effect of water and fertilizer reduction through use of water saving technologies like laser levelling, micro-irrigation, AWD (Alternate Wetting and Drying), SRI and direct sowing). It has also improved annual household income by 25%, from the baseline values calculated at the inception of the project.

Making meaningful contributions – to people and communities

At LT Foods we are committed to conduct business in an economically, socially and environmentally viable manner, with a focus on empowering communities and people.

For us, business decisions are not just influenced by financial outcomes, but are guided by its environmental and social consequences. As a responsible entity, we believe in making meaningful contributions to society – to empower and enable the weaker sections of society with education, skill development and employment opportunities.

For LT Foods, CSR initiatives form an integral part of a sustainable business strategy. We continue to collaborate and participate in diverse activities to fulfill our commitments towards the environment and the communities in which we operate.

Making meaningful contributions – to people and communities

**Education**

**Compute Education Project** - We have set up six computer training centres to improve the quality of education for children in remote villages of Uttarakhand, Uttar Pradesh, Madhya Pradesh & Haryana. The project enabled more than 500 children to access computers (some of whom have never had exposure to technology) and learning programs through trained teachers.

**School Adoption Program** - We are working to ensure that children belonging to the marginalised sections of society, without access to education, are offered adequate infrastructure and facilities to pursue education. To meet this objective, we have adopted 9 schools in Madhya Pradesh, Haryana, Uttarakhand & Uttar Pradesh for renovation. We helped to build boundary walls, enhance classroom infrastructure and set up libraries and teacher training programs to ensure access to improved facilities.

**Clean Drinking Water**

Inadequate access to clean drinking water leads to waterborne diseases, endangering lives, especially of those living in rural communities. We undertook projects to install community water treatment systems with our project partners, in different villages, schools, and PHCs that are now providing safe drinking water to over 10,000 beneficiaries.

**Rural Development**

In our efforts to achieve sustainable development of rural communities we have built community centres, roads, bridges & drainage systems. Additionally, we undertook various initiatives such as Transport Transformation and Farm Fencing to substantially improve living standards.
Treading the path of excellence

Foundation

Pre 1980s

- Founded by the Arora Family
- 1st Rice Mill

1985-1995

- Incorporation of LT Overseas Limited
- Launched the ‘Daawat’ brand in India as well as the global market

Focus on B2B (Private label)

Focus on Brands and product value

1995-2006

- Set up state-of-the-art manufacturing facilities in India
- Listed on BSE & NSE

2007-2014

- Acquired the ‘Royal’ brand basmati rice in US
- Infusion of equity by Rabobank – India Agri Business Fund
- Strengthened processes and systems
- Expanded our global presence to 20 more countries

Expanding our global presence

Inorganic/Greenfield routes to expand

2015-2019

- Greenfield operations in Europe turns EBITDA positive
- Launched new product variants like ready-to-heat food, Saute Sauces, Daawat Sehat and Kari Kari
- Marquee investors join with a successful Qualified Institutional Placement (QIP) of Rs. 400 crore
- Launched our own organic brand ‘Ecolife’ to strengthen our position in North America, Middle East

2020 and beyond

- To become category leader in core Basmati business in key markets we operate
- Take the new growth engines – Organic, Health and Convenience business to next level
- Strengthen the financial metrics, expand margins and improve our ROCE

Progressive

2020 and beyond

Corporate Overview
Economic Review

Global Economy
The global economy continued to maintain a slow growth trajectory and recorded an estimated growth rate of 2.9% in 2019, its slowest pace since the global financial crisis of 2008. Persistent trade uncertainties between the US and China, idiosyncratic factors leading to macroeconomic stress in several emerging market economies, and structural factors such as low productivity and an aging demography in advanced economies further contributed to the decline of an ailing economy.

Rising trade barriers and associated uncertainty weighed heavily on business sentiment and activity, globally. In advanced economies and China specifically, these developments magnified cyclical and structural slowdowns. Tighter financial conditions in Iran, and social unrest in Venezuela, Libya, and Yemen worsened macroeconomic stress and caused significant stress to overall global economic growth. Towards the end of FY19-20, the COVID-19 pandemic wreaked havoc and disrupted global supply chains and international trade. As earnings dipped significantly, pay cuts, job loss and hiring freeze ensued in the aftermath. However, central banks around the world reacted aggressively and introduced favourable fiscal policies and stimulus packages to revive and restore confidence.

Outlook
The COVID-19 pandemic compelled countries around the world to impose stringent protective measures. It not only brought economic activity to a standstill but, also hampered growth globally. Given the grim economic outlook, the economy is projected to contract by 4.9% in 2020. Macroeconomic policy stimulus in the most exposed economies will help to restore confidence as the effects of the virus outbreak and supply-side disruptions fade in advanced economies. Low interest rates should help cushion demand, although the impact of recent and projected changes in policy interest rates on activity is likely to be modest in the advanced economies.

Indian Economy
In FY 2019-20, India’s GDP stood at 4.2%, as it witnessed persistent decline throughout the year. In Q1 FY 19-20, it registered growth of 5.2%, while in Q4 it further slipped to 3.1%. A synchronised global slowdown, plummeting domestic automobile sales, flattening of core sector growth and declining investment in construction and infrastructure sectors were primarily responsible for the muted growth of the Indian economy. Factors like declining credit disbursements, deceleration in consumption patterns and reduced demand, significantly affected the economy.

Outlook
As the impact of the coronavirus outbreak becomes profound and widespread in FY20-21, economic outlook is severely impaired. The economy is expected contract by 4.5% in fiscal 2019-20. The nationwide lockdown posed massive challenges to business continuity and altered the economic forecast quite frequently. Import restrictions on key raw materials from China increased on year-on-year basis, especially of basmati and regional rice. Economic relief packages, a combination of moratoriums and liquidity boosting measures is expected to revive economic growth to 6.0% in FY 2021-22.

Industry Overview
Consumer Food
The consumer food market continues to evolve at a rapid scale. The importance of healthier and sustainable food ecosystem continues to find increasing importance today, than it was ever before. Within the consumer food space, the global rice market is valued at approximately $275 billion and is projected to grow at a CAGR of 0.88% during 2019-2024. Rice is the staple food for more than half of the world’s population and more than 500 million metric ton of rice is produced annually, across the globe. It is the second-most important cereal crop after maize and ensures food security for numerous developing countries in East Asia and the Southeast Asian regions, with India being among the leading rice producers in the world. Global consumption of rice has increased on year-on-year basis, especially of basmati and regional rice.

Outlook

World
Advanced Economies
Emerging markets and Developing Economies

[Source: IMF, WEO, June 2020]

Source: MODOR Intelligence
Of the total global rice industry, Basmati accounts for around 2.1%, valued at $9 billion and is projected to grow at an annual growth rate of 16.4% between 2014 and 2022, to reach $327.6 billion.\(^4\)

Increasing health awareness, higher disposable income and its eco-friendly nature augers demand for this segment. Moreover, rising awareness about the advantages of organic food and government impetus to develop this sector continues to drive reliable and qualitative growth for organic food.

Asia is the third-largest market for organic food products and Southeast Asia is experiencing healthy growth of the organic food segment. North America remains the largest market for organic food consumption with multiple-channel sales streams. An ageing population, especially in Western Europe and North America, continues to influence food choices and purchasing habits that fulfil the objective of a healthy life.

India is among the largest producers of organic food, with every state in the country chipping in with their contribution towards this sector. Over the last few years, production has improved considerably owing to growing demand for organic products. By 2024, the market is projected to touch $2 billion.\(^7\)

### Health & Convenience Segment

Food consumption patterns and preferences are undergoing significant changes. As dietary patterns change, lifestyles evolve and health awareness grows, food habits are undergoing transformations. With growing incidence of lifestyle-related diseases like diabetes, obesity, etc., consumers worldwide are showing an interest in preventive instead of curative lifestyles. As a result, the demand for healthy, nutritious and convenience food has grown manifold. Companies operating in this space, are therefore geared to deliver innovative products to meet changing customer preferences. The Health and wellness foods industry is pegged at around Rs. 10,352 crore\(^1\) and is projected to grow at an average rate of 10%.

A notable shift has also been noticed towards an increasing demand for quick cooking, convenience food. Urbanization, a burgeoning working population and a constant rise of nuclear families mandates the requirement for food that can be cooked or prepared almost instantly. As per a survey conducted by Assocham, around 79% of Indian households today prefer to have instant food due to time constraints.

Growing media awareness, higher literacy rates and improved standards of living have created a greater affinity for this extremely useful segment of healthy yet convenience food. Besides, consumers in urban and semi-urban areas are drifting gradually towards the consumption of hygienically packaged, fortified Ready-to-Heat & Eat Products. With these factors driving growth, the Convenience Food industry is projected to grow at a CAGR of 6.1% in 2020-22, from its current market value of $25 billion.

#### Mega trends in the food industry

- **Working Population and Urbanization** – It is projected that around 45% of the total population of India will dwell in urban zones by 2030\(^2\). The increase in urban populace infers development of standard of living. It also leads to lifestyle changes that increase the demand for convenience food and ready-to-cook meals.

- **Channel Shift** – We witnessed a shift in the consumer space and consumers have moved towards e-commerce platforms. It has facilitated growth in the consumer foods industry. The COVID-19 outbreak has also accelerated growth of India’s e-commerce market, projected to grow at a CAGR of 19.6% between 2019 and 2023 to reach Rs. 7 trillion by 2023.

- **Increasing internet penetration** – Greater internet penetration backed by low-cost access to the internet has allowed people to learn about the benefits of quality food. Digital literacy has allowed consumers to make an informed decision to take their pick from a wide selection of finest quality products with high hygiene and safety quality levels.

- **Government Regulations** – The Government of India is keen to promote Organic Farming in the country and has introduced schemes like Paramparagat Krishi Vikas Yojana (PKVY). Under this scheme, 2 lakh hectares have been allocated for organic farming and is estimated to benefit 5 lakh farmers. Additionally, Food Standards and Safety Authority of India (FSSAI), in December 2017, have mandated all organic food to be certified either under NPOP or PGS-India. It has improved confidence in Indian organic food among the international buyers and has increased its demand in international markets.

- **Higher Spending Capacity** – According to a research by the India Brand Equity Foundation, the spending capacity of the Indian middle class is expected to double by 2025. With the rise in disposable income and access to credit, the Indian middle class will have a high spending capacity on convenience and branded food products.

- **Growing health awareness** – Eating habits have been significantly influenced on account of rising health awareness. People are not only conscious about their consumption patterns but, are also cognizant about the nutrient content of their food. This drives demand for convenient, healthy and safe packaged food.

Consumer Food

India Business

Overview

LT Foods is one of the leading consumer food companies in India in specialty rice offering Daawat, one of the most renowned brands in the market. The Company offers premium quality basmati rice, regional rice, rice-based snacks, sauté’ sauces and other products on the health and convenience platform. It has established a prominent presence through brands including DAAWAT, Rozana, Chef Secretz and Heritage across different price points. Leveraging its wide distribution network, LT Foods has strengthened its presence across various trade channels including General Trade, Modern Trade, HORECA and e-commerce.

Performance review

In FY 2019-20, the overall India business volume grew by 5% YoY, from 1,78,400 MT in FY 2018-19 to 1,88,000 MT in the year under review. The revenues grew from Rs. 947 crore in FY 18-19 to Rs. 986 crore in FY 19-20, with realisation levels sustaining at Rs. 52 per kg in FY 19-20. The sustained revenue growth was driven by balanced performance from multi-channels, backed by our widening product portfolio with consistent quality that now caters to a discerning consumer base.

Segment review

Driven by its resilient focus on building a truly coveted brand, the company initiated measures to strengthen its reach and market presence. Daawat, the Company’s flagship brand in India, remains one of India’s leading basmati rice brands with a overall market share of 26% and rural market share of 35%. It also enjoys more than 23% market share of basmati rice at grocery stores and above 30% market share in modern trade segment.

The Company’s Daawat Quick Cooking Brown Rice – has emerged as the fastest growing product in the new innovations segment. Launched with a clear-focused brand approach, highlighting the unique Daawat benefit of a genuine quick cooking brown rice, it has garnered significant appreciation from its targeted consumer base.

The introduction of Daawat Sehat in 2019-20 marked another achievement in our legacy of innovations under health segment. Fortified with iron, Vitamins and Folic Acid, this product highlights the Company’s undeterred commitment to develop a need based product portfolio.

The Company’s regional rice portfolio comprising Sona Masoori and Lachkari was widely accepted by consumers. Currently, it is available only in selected regions but going forward, the Company plans to expand it to other markets as well. The Company’s range of saute sauces, available in 5 different variants, also captured a significant market share during the year under review.

Distribution network

The Company’s strong distribution network is a testimony to the Company’s sustained financial performance, year after year. FY 19-20 was a watershed year for the supply chain and distribution team, as it helped increase LT Foods’ presence across all channels of trade. LT Foods now serves customers across ~1,18,000 retail outlets, ~7,200 modern trade channels and leading e-commerce platforms.

Supply Chain

For LT Foods, digitising the supply chain network was one of the major highlights of FY19-20. The Company has already recorded an improved vehicle turn-around-time to 14 hours from 36 hours, while the loading time to trucks have been improved to 2 hours from 6 hours earlier. The implementation of advanced automated systems and daily systematic operating procedures review have further streamlined the operations.

The Sales Force automation journey that started two years back is now perfectly aligned to drive efficiencies with data analytics to deliver targeted
results. The backward integration of Document Management System (DMS) with SAP has enhanced operations for improved order tracking and inventory visibility. The new Go-To-Market model, that works on ‘selling based replenishment’ model with automation tools was introduced on pilot basis in FY 2019-20. It has not only resulted in deriving process efficiencies, but also helped achieving faster delivery of products across our distribution network and improve the Return on Investment of shareholders.

Brand review
To strengthen brand presence and recall, the company undertook various marketing initiatives including participation in various food festivals and others events. Branding initiatives like 360-degree marketing and television campaigns were also undertaken to promote Biryani, Pulav and Brown Rice recipes using Daawat basmati rice. The Company scaled up its secondary branding at modern trade stores.

The Company also focused on social media platforms to stay engaged and strengthen its connect with its consumers about its brands. Daawat basmati rice YouTube channel has one of the highest subscribers, keeping users engaged with innovative, traditional and modern rice recipes. To fortify its marketing campaigns and branding initiatives, LT Foods continued their association with Master Chef Sanjeev Kapoor during the year.

International Business
The Company’s international business comprises of various leading brands like Daawat, Royal, Indus Valley, Devaaya, Daawat Rozana and 817 elephant across key international markets. The Company reaches out to consumers in more than 60 countries including North America, Middle East, Europe, Far East and Rest of the World. The overall volume of international business grew from 2,06,000 MT in FY 2018-19 to 2,24,000 MT in FY 2019-20, registering a growth of 9% YoY. The International business recorded a revenue of Rs. 2,322 crore in FY 19-20 as compared to Rs. 2,103 crore in FY 18-19, registered a growth of 10%.

North America
The Flagship brand - Royal® is the #1 selling Basmati brand in the United States. In addition, the company also offers Daawat® in the U.S. & Canada targeted towards the south Asian diaspora as well as 817 Elephant® in Canada. All 3 brands assist LT Foods in achieving more than 50% market share of all Basmati imports into the United States. Royal® has roughly 37% market share of the U.S. basmati segment as measured by Nielsen in all mainstream grocery, mass & club accounts. In addition to Basmati rice, the company also offers Jasmine rice, Arborio rice, Wheat Flour, and Ready-to-Heat rice in North America servicing several different channels of business including multi-cultural (Ethnic channel), grocery, club, mass, food service and e-commerce channels. To address the rising consumer need for innovative, value-added, convenient food, the Company recently launched into the ready-to-heat (RTH) segment. Since launch, the business has achieved roughly 30% All Commodity Value (ACV) across a range of 7 SKUs aimed at introducing basmati rice in a fast, simple format to the U.S. general population consumer through both plain and flavored varieties. Key partners in this initiative include Walmart, Kroger, Meijer, HEB, & Albertsons/Safeway.

Middle East
Middle East accounts for ~45% of the world’s total basmati rice consumption. Given the size of the market, it plays a crucial role for the Company’s business growth. The Company has a strong market presence in various countries in the region including UAE, Kuwait, Qatar, Oman, Yemen, Saudi Arabia and Iraq. The Company is present across all channels and price points – Modern Trade, Self Service, Traditional Trade and Food Service. The region contributes 9% of the overall revenue of LT Foods, and the company holds 10% market share in Premium Basmati segment (as per AC Nielsen).

The acquisition of 29.91% equity stake by Saudi Agricultural & Live Stock Investment Company marks a landmark moment for the Company’s corporate journey in the Middle East. To expand its presence in food services, LT Foods partnered with one of largest food services distributors in State of Kuwait. In addition, it also participated in several events in the gulf region, that helped the Company gain a stronger foothold in the region. LT Foods participated in the Gulf Food Show every year and it is a very important event in its yearly calendar. It provides a perfect opportunity for our Global Distribution partners and the Company Management to interact at a common platform. This event provides an forum to talk about the achievements of the year gone by and the Company presents its growth Strategies and Plans for the Year ahead. LT Foods en-cashed this opportunity to introduce its new products- Kari Kari and Daawat Cuppa Rice on the convenience platform to its global partners.
Management
Discussion & Analysis

Europe

During the year, the region recorded more than 80% YoY growth in its revenue that stood at Rs. 468 crore in FY 19-20. Despite macro-economic challenges, the Company registered a healthy EBITDA margin of 3.6%. Driven by strong marketing initiatives, the Company has expanded its retail and geographic presence across Europe. The sustained capex investment in a processing unit in Europe, now runs at 80% capacity with the addition of new machines to improve efficiency. Sustainable Rice Production and other Agri initiatives are undertaken by the organization with 5,000+ farmers across an area of 1,00,000 acres directed towards residue compliant product, that has largely contributed to our brand equity in the region. This has helped produce superior quality products, that meet stringent quality benchmarks across the European region.

During the year, the Company expanded its product portfolio by offering Jasmine & Long grain rice sourced from Thailand & Vietnam, respectively along with its core offering of basmati rice.

Rest of World Business (RoW)

RoW contributed 5% of overall revenue during FY 19-20, maintaining sustained volume growth. The Company has strengthened its distribution network and market penetration by implementing various initiatives by leveraging its brand and distribution strength across geographies. LT Foods is also working on filling the portfolio gaps in various countries to match the consumers preferences and needs and serve them better at all price points.

Organic Food & Ingredient Business

The Company’s subsidiary, Nature Bio Foods Limited (NBF/NBFL) drives the ingredient-based organic food segment. Today, it has emerged as a trusted brand, offering authentic organic ingredients to consumers across the markets of the US and Europe. It offers a range of organic products including rice, pulses, oil seeds, cereals grains, spices and nuts. With over two decades of existence and experience, NBF/NBFL now partners with 80,000+ farmer families across India, to build enduring relations with farmers with over 118,000 hectares of certified organic land in India. The Company has established a strong foothold in various countries including Germany, the Netherlands, Italy, France, Austria, the US, Canada, Australia, New Zealand, the UAE and Israel. The Company resolves to maintain safety across its operations that has enabled it to achieve a rare feat of being the first company in India to be conferred with the coveted CII Food Safety Award in FY 2019-20. During the year, the segment reported revenues of Rs. 367 crore, and contributing 9% to the overall revenue.

The Company has incorporated two subsidiaries in US and Europe to strengthen its position in these geographies via the stock and sell model. Investment at the backend, strong supply chain and expansion in product portfolio has helped the organization to prove itself as the trusted partner during challenging COVID-19 time.

Health & Convenience business

The Company remains a pioneer to introduce quick cooking brown rice under brand Daawat. With approximate 15-minutes of cooking time, the product remains a frontrunner in our innovation pipeline, aimed to build an integrated portfolio.

As an extension to build our innovative product pipeline, we also launched Daawat Sehat brand of basmati rice, fortified with iron, vitamins and folic acid. With the brand certified as F+ by FSSAI, meeting the quality expectations of consumers as well as delivering health benefits.

The growing consumer preference towards Saute sauces validates our belief in introducing new products that are centered around our consumer business, creating rich and value-added culinary of food choices.

The bouquet of ‘Royal’ ready-to-heat products recently launched in our international market, have also found increasing acceptance among the consumers.

After the successful launch of Kari Kari in the previous financial year, the Company has set-up a Kari Kari manufacturing unit in Haryana with a production capacity of 3,000 units per day capacity of Kari Kari production unit in Haryana.

The product is now available in Modern retail outlets and online platforms. In FY 2020-21, it expects to widen the reach to more Indian cities.

The Company’s recent launch of Cuppa Rice - A convenience product, has already garnered a lot of interest, with already a long-term contract signed with the Indian Railways. The Company shall launch the full line of products in the near-short across its distribution network, expecting to capitalise the growing ready-to-heat market.

3,000 units per day capacity of Kari Kari production unit in Haryana
Management Discussion & Analysis

Impact of COVID-19

The already existing business model backed with automated technologies, streamlined supply chain & distribution network and enhanced safety and quality measures ensured ‘zero’ disruptions during the phased lockdowns due to COVID-19 across the Company’s locations. With a robust supply chain network, the Company had adequate inventory of raw material to fulfil the increased demand during the lockdown. Even during the multiple lockdowns witnessed in the first quarter of FY 20-21, the Company’s operational value chain did not face any disruption, the distribution channels were strengthened with new approaches and the organization adapted to the “New Normal” with agility. The demand for products further gained traction on account of increased home consumption and people started opting for safe, hygienic and branded food. Online sales also witnessed significant growth across all major e-commerce platforms. Additionally, to minimize the impact of the pandemic on the HoReCa segment, the Company partnered with Cloud Kitchens, Shipping rationing/Military, Navy, Air Force Mess and Canteens, NGOs.

Agility in Converting Challenges into Opportunities

Sales and Marketing
- Developed innovative Go-To-Market Strategies
- Expanded Rural Reach
- Enabled tele ordering
- Partnering with delivery partners such as Swiggy, Zomato, Dominos, etc.
- SMS blasts
- Distributor point pick up
- Focused Digital Campaigns

Procurement
- Ensured raw material availability at all times
- Expanded our Vendor engagement
- Educating the farming community on the new technologies to reduce manpower requirement and increase yield

Manufacturing
- Unhindered plant operations at all times
- Ramped up capacity due to increased demand
- Optimization of Conversion Cost
- Inventory optimization through better planning
- Hygiene drives conducted to ensure delivery of safe food

Support Services
- Finance - worked to ensure uninterrupted backend operations and drive cost reduction
- IT - digitalization to ensure remote working for all employees
- HR - ensured safety and engagement of employees
- Compliances - ensured timely compliances

Distribution
- Serviced with low inventory
- Direct sales from Depot

Reason for increase in PAT Margin - Increase in PAT margin from 3.5% to 4.8% on Y-o-Y basis was on account of operational efficiencies at EBITDA level and reduction in effective tax rate from 35.6% to 27.7%.
Integrated Farm to Fork Business model

The Company’s integrated farm to fork business model is a key driver of its sustained market leadership and long-term business growth in its core Basmati business. LT Foods’ sound business model testifies its ability to deliver value to its growing stakeholder base. With a strong focus on quality, costs, profitability and digital transformation, LT Foods has increased its market share in India and abroad.

Farming via Sustainable Rice Production

The Company sources majority of its paddy from farmers associated with it through the Sustainable Rice Production (SRP) Programs. The Company is a leading partner of Sustainable Rice Platform (SRP), a UN Environment and International Rice Research Institute initiative. More than 5,000 farmers are associated with LT Foods, through its SRP program, growing residue compliant paddy in more than 1,00,000 acres of land. As a part of this initiative, the Company has deployed digital tools like remote sensing, image processing, and artificial intelligence to enable a dynamic advisory on pest and diseases, weather forecasts, water management and yield prediction. These technologies have benefitted farmers with knowledge and skills to take informed farming decisions. It has also helped to improve farmer’s income and has also led to a significant reduction in water consumption.

More than 5,000 farmers are associated with LT Foods, through its SRP program, growing residue compliant paddy in more than 1,00,000 acres of land.

The initiative has resulted in conserving 48 billion litres of ground water, resulting in -30% less greenhouse gas emissions (combined effect of water and fertilizer reduction through use of water saving technologies like laser levelling, micro-irrigation, AWD (Alternate Wetting and Drying), SRI and direct sowing). It has also improved annual household income of farmers by 25%, from the baseline values calculated at the inception of the project.

Further, to source raw material for its organic products, the Company engages in contract farming with small-holding farmers. It encourages farmers to practice organic and sustainable cultivation techniques and procedures.

Procurement

The Company sources its raw materials through an extensive procurement network of agents spread across the basmati paddy producing regions of Northern India. The entire procurement process is divided into two parts - Pre-harvest and Post-harvest. The pre-harvest process comprises of surveys and analysis that determines the estimated paddy supply. This involves field survey, mandi agents survey, remote sensing / satellite survey. Then a thorough analysis of the demand-supply factors is made, in alignment with international trade policies. While natural factors like, monsoon and health of the crop are also important, the pre-harvest process is concluded with dedicated and structured supplier meets.

The post-harvest season involves a detailed data collection on varieties of paddy collected with a structured 5-tier system. A weekly quality tracking methodology system provides a better understanding of quality-wise trend. The Company conducts a purchaser feedback mechanism and commission agent feedback mechanism, that allows procurement of paddy at best quality.

With more than 270 agents in more than 235 mandis (procurement markets) across the country, that are government authorised, the Company monitors quality control measures and procurement of materials at competitive rates.

Processing and Packaging

LT Foods possesses five state-of-the-art facilities located in Haryana, Punjab and Madhya Pradesh along with one advanced processing unit in Europe. It also has three packaging units in California, Texas and New Jersey. The manufacturing and packaging units adopt global best practices and has passed stringent national and international certification standards to deliver consistent product of desired quality standards. The shift in consumer preferences towards quality and safe branded products, the Company continues to invest in strengthening its overall processing and packaging units and automating it to add efficiencies at floor level.

Distribution and Sales

The consistent efforts on strengthening its distribution network across geographies has helped the organisation to make its products available and expand its reach to more than 60 countries and 1 lakh outlets in India. LT Foods’ responsible marketing and promotion efforts are pivotal for its growing market presence. The ‘Go-To-Market’ strategies resulted in expansive rural reach and growing market presence. A robust distribution and sales network, ensures servicing with faster product reach to a global customer base. Over the years, the Company has evolved its distribution framework, that includes several network routes, with a set of optimised logistic services that suit our diverse distributors and dealer network resulting into 26% market share in India and 35% market share in rural market. In US also, LT Foods enjoys leadership position with a 50% market share.

Food Safety

LT Foods abides by stringent food safety standards prescribed at India and international levels to deliver superior quality products to its customers. Through its state-of-the-art testing facilities, it undertakes a wide range of reliable and analytical tests to verify the safety, identity and purity of its products. The Company also conducts several quality audits to ensure compliance to country specific standards applicable in its areas of operation.

Outlook

In FY 2019-20, LT Foods has retained its growth momentum despite headwinds. The COVID-19 outbreak and subsequent lockdown in first quarter of FY 2020-21 did not hamper operations significantly as the Company relied on its efficient processes and advanced methods to ensure continuity in the value-chain. To ensure value accretive business, LT Foods has defined a threefold strategy of growth, margin expansion and strengthening of financial metrics by improving the Return on Capital Employed.

The Company has delivered on all its strategic pillars i.e. as Growth, Margin Expansion and Strengthening the Financial metrics which is visible in our financial performance as the well. The overall revenue of the Company has increased by 7% wherein the Consumer business of the organisation is up by 14%.

Our margin profile has improved and our Gross Margins were up from 24.9% to 26.7%, EBITDA margins from 10.8% to 12.2% and PAT margins from 3.5% to 4.8%.

The financial metrics also improved, Debt/Equity Ratio improved from 1.16 to 0.90, Debt-EBITDA improved from 4.0x to 2.8x, Working Capital Cycle down by 19 days, Net Worth up by 12% to Rs. 1599 Crore and Cash from Operations up by 365% to Rs. 477 crore. The Return on Capital Employed has also improved from 11.3% to 13.6% during the year.

The Company aims to further consolidate and grow its market share by increasing consumer penetration across all segments. LT Foods endeavours to widen its supply and distribution across the globe by expanding and improving its product offerings, to include unique, healthy and innovative products. To drive margin expansion, it plans to change its product mix with products that assure higher margins, increase efficiency and drive cost synergies.

Going forward, Company will continue to focus on its strategic goal to create progressive, sustainable, profitable and growing business to create value for its stakeholders by growing its core basmati business by recruiting new consumers and expanding distribution and driving growth in organic business, by adding new customers and expanding the product portfolio. It will also keep evaluating opportunities in consumer space to add more products by leveraging our strong brand equity, distribution network and infrastructure with a focus on improving ROCE.

Human Resource

Human Resource development continues to be a key focus at LT Foods and the Company takes great pride in the commitment, competence and passion shown by its workforce in all realms of business. The Company has a dedicated team of over 1780 employees across geographies including India.

The Company has drawn up a comprehensive human resource strategy (the ‘Human Resource’ strategy) to address key aspects of human resource development. It includes the following:

- Drive and reinforce the values of the organisation

- Code of conduct and fair business practices

- A performance management system linked to business performance for identifying and differentiating high performing candidates

- Implementation of performance-based compensation packages to attract and retain talent
Automation has empowered Remote Real-time Data Capture without any manual intervention. A salesperson also captures Sales Order from Retailer using mobile devices only which get immediately visible to Distributor. This helped us in increasing the service level.

**Investment in technologies**

LT Foods, has always believed in embracing technology to align its business to changing market shifts. It continues to lead through innovation, as technology continues to be growth enabler by adding more control, efficiency and transparency in the system.

**Highlights of Technologies Initiatives**

**Control System Automation** - The Company introduced QR code technique, that was integrated to inventory, enabling its distributors to manage the entire value-chain (right from ordering to invoicing) without any manual intervention.

**Remote Real-time Data Capture** - The Cloud-based Sales Force Automation has empowered the Field Force and distributors to capture sales order on their mobile application. The integration of Internet of Things (IoT) has resulted in faster turnaround time for inventory management, strengthening the supply chain system.

**Real Time Online MIS System** - The Company implemented Cloud-based analytical tools to capture and report data on real-time mode. This internal data analysis has helped the team to present data to the Board on various parameters, thereby resulting in strengthening the operations.

**Inventory Management through QR code** - The Company introduced a pilot QR-based inventory tracking project, that helped in inventory management, enabling tracking of goods movement with mobile handheld devices.

**Sales Force Automation** - We have implemented mobile based Sales Force Automation solution wherein our Field force carries mobile device and follows route as suggested by software. A salesperson also captures Sales Order from Retailer using mobile devices only which get immediately visible to Distributor. This helped us in increasing the service level.

**SAP integration with banking system** - To make the payment process smooth and simple, the Company has implemented real-time integration of SAP with Banking system. It has helped the Company to settle ledger balances without any manual intervention wherever there are debits / credits in the bank.

**Internal Audit Control Systems**

LT Foods has a well-established system of internal controls and procedures, in line with the size and nature of its operations. The Company regularly conducts internal audit of operations, establishments and stockyards to ensure that the set processes are strictly adhered to. The Audit Committee reviews the reports of internal auditors and evaluates the operational efficiency of the internal control systems. The Committee then suggests improvements in the Company’s business processes, systems, and internal controls. Annual internal audit plans are prepared by internal auditors in consultation with the Audit Committee. The Company has implemented SAP, the world’s leading ERP system, to automate the internal control environment and keep track of processes and performance.

**Risk Management**

LT Foods recognises risk as inherent part of business sustainability. The Company has identified risks under three categories, developing an understanding and preparing a mitigating response for each of them. These risks comprehensively cover the entire value-chain of business wherein it has defined each risks in the context of severity of its consequence, and how would it threaten the business model, solvency, liquidity and future performance, should the risk materialise.

**Strategic risk**

**Shift consumer tastes and choices**

From increasing awareness to better product quality to attractive offers – consumer shifts pose a challenge to demand for renewing market for food products.

**Mitigation**

The R&D team collaborates with the strategy team, keeps a tab on the emerging trends in the market to develop new food products and also actively monitor the social media trends to spot the changing consumer needs with agility.

**Perception**

Having started the business as a basmati rice company, the company is still perceived as a commodity player.

**Mitigation**

the Company has over the last 7 decades evolved from being a rice trader to a Consumer Food Company with all the elements in place to be known as a consumer food company such as strong iconic brands, global footprint, integrated Farm to Fork business model, global supply chain network, strong financials and a future ready approach to expand product portfolio based on changing consumer trends.

**Unacceptance of new products**

The achievements that define a consumer food company solely relies on its ability to achieve success on new products launched at regular intervals that are adaptive to changing consumer preference. In a dynamic food sector space, failure to penetrate the market.

**Mitigation**

the Company has a well-defined stage gate process from ideation to execution prior to introducing a new product in the market. The product goes through this rigorous process in terms of its market demand, commercial viability, return on investment, future demand, etc. Each product is first tested launched in a smaller market and then post the success of the same is launched at a larger scale with requisite investment in marketing and brand building activities. LT Foods has launched products in the Health and Convenience category and one such example of a successful launch is Daawat Quick Cooking Brown Rice. Riding on the success of this product the Company has launched another product Daawat Sehat (Fortified Rice). A few more products that have been recently launched in the convenience category are Daawat Salt Free Sauces, Royal Ready-to-Heat, Keri Keri, Daawat Cuppa Rice, etc.

**Competitive market conditions**

The Company has made investments in various brand building activities across geographies and enjoys leadership position in India, US, Far East, Europe, etc. Our market share has increased year on year in different geographies. The Company has also diversified its product portfolio and entered into Health and Convenience category to minimise risk. The Company also keeps a close watch on the competitor’s pricing strategies and responds to the same with agility.

**Private Label**

growth in e-commerce and modern trade channels could lead to emergence of private label brands.

**Mitigation**

Investment in brand building activities to ensure higher recall of our brands in consumer’s mind and also partnering with modern trade and e-commerce channels in category management. LT Foods holds more than 30% market share in the Modern Trade category as per AC Nielsen.
Management Discussion & Analysis

Operational risk

Volatility in Raw material costs
Challenges in procurement of paddy (prime raw material) due to unfavorable weather conditions or pricing, may result in difficulties to business operations.

Mitigation
LT Foods is a Consumer Food Company with strong brands in place. The strength of our brands acts as a shock absorber in case of any volatility in the raw material prices to a great extent. The Company has an integrated procurement model in place, partnering with the farmers for timely procurement of paddy. The Company’s plant at five locations, all strategically located close to the procurement areas that helps the company to procure paddy rice in the required quantity at competitive prices. Our procurement team conducts field surveys, commission agent survey and remote sensing/satellite surveys and all the data acquired from these sources is used to implement an effective procurement strategy that helps to adapt to changing supply patterns in line price volatility across different locations.

Increase in use of Pesticides exceeding MRL (Minimum Residue Levels)
frequent change in a country’s MRLs can pose as a threat to the business performance of a company

Mitigation
LT Foods has been working extensively at the back end with farmers to give them a know-how on the use of pesticides so as to ensure residue compliant paddy to meet the global standards as well as ensuring the farmers income. The Company is associated with more than 5,000 farmers through its Sustainable Rice Production program growing residue compliant paddy in more than 1,00,000 acres of land. The Company is a leading partner of Sustainable Rice Platform (SRP), a UN Environment and International Rice Research Institute initiative. The Company’s SRP audited score has increased from 80 to 96.1 in the last 3 years.

Political Instability in Operating Geographies
political instability and unrest in the geographies that we operate can have an adverse impact of the financial performance of the business

Mitigation
LT Foods has a well-defined policy in place to select countries that are politically stable in nature, have future growth opportunities for business expansion and also where the consumption of core product category is increasing.

Compliance & Governance Risk

Non-Compliance with various Regulatory requirements
non-compliance on any account can expose the company to legal consequences thereby causing financial loss and penalty. The same can also adversely impact the reputation of the company.

Mitigation
LT Foods has invested in an extensive IT enabled global compliance tool that has all the requisite compliances mapped for each entity and are monitored on regular basis with a two-step authentication for each completed compliance. Regular workshops are held across all geographies with offices and production facilities to emphasize on the importance of the compliance framework and how non-compliance can severely impact the reputation of the organization.

Violation of ethics & business integrity
Any non-compliance with respect to the Code of Conduct of the company can adversely impact the reputation of the company as well as the business performance.

Mitigation
LT Foods has a Code of Conduct in place that is signed by any new recruitment done and is also a part of the orientation process for new induction. The same is reviewed on a regular basis with the Board of Directors to keep the document updated with the changing governance norms. The Company also has a Whistle Blower Policy that enables all the stakeholders to report any fraud/unethical behavior to the designated Ombudsman.

Liquidity & Financial Risk

Currency Risk
The Company’s presence into more than 60 countries exposes it to a potential loss in revenues due to currency volatility

Mitigation
LT Foods has a well-defined policy in place to select countries that are politically stable in nature, have future growth opportunities for business expansion and also where the consumption of core product category is increasing.

Working Capital Intensive Business
Excessive use of capital into inventory might result in increasing debt and impact profitability

Mitigation
The Company continues to secure funds from a consortium of banks at competitive interest rates. The Company has over the last few years improved its interest coverage ratios and the cash flow from operations. The interest coverage ratio improved from 2.5 to 3.2 and the cash flow from operations have improved by 355% to Rs. 477 crore.

Macro-Economic Factors
Lower GDP growth can lead to shift in consumer demand from branded to unbranded and premium to value range products

Mitigation
LT Foods caters to the requirement of its consumers across all price points ranging from premium to value range. LT Foods also has a robust supply chain network and has presence across channels. The Company is also working on product portfolio expansion to keep itself future ready.
Social Risk

Failure to meet product quality and safety requirements

being a consumer food company any non-compliance in meeting the quality and safety norms with respect to our products can lead to reputational risk, loss of customer trust and legal consequences.

Mitigation

the Company has checks at each step of the value chain with respect to the quality and safety of a product. A stringent compliance system is in place to ensure adherence to regulatory requirements. There is also a proper feedback mechanism for the consumers to get in touch with the company at any given point and time.

Talent Acquisition & Retention

A mismatch in hiring of skilled talent may lead impact the Company’s ability to achieve its strategic goals

Mitigation

The Human Resource department ensures that the talent acquired is in line with the needs of the organization and are those who understand the strategic goal of the Company. It also ensures that the workforce is provided with suitable training and development tools so as to enhance their productivity at all levels. They also ensure that various workshops, town halls, etc. are conducted from time to time to keep the team members abreast with any new developments in the Company and it also provides them with a framework/open platform to give their suggestions as well as opinions.

Environmental Risk

Disruption due to climatic changes

any change in the rainfall pattern can have an adverse impact on the crop health.

Mitigation

it is a myth that Basmati as a crop is mostly grown in areas that are not dependent on rainfall and that has access to other ways of irrigation such as canal and ground water. Basmati as a crop is mostly grown in areas that are not dependent on rainfall and that has access to other ways of irrigation such as canal and ground water.

Opportunities

Basmati Market

The overall rice market is of 500 million tonnes, out of which 7.5 million tonnes is that of Basmati. Approximately 80% of the entire market that exists for Basmati is catered by India. The overall production by India is c.6.50 million out of which 4.5 million tonnes is exported and the remaining is consumed in India. The trends in both India and International markets are changing and are thus creating a huge opportunity for increase in Basmati consumption globally.

In India, the demand for hygienic and packaged products is increasing and also c. 40% of the Basmati market is branded and thus the remaining portion also opens up huge opportunities for players like us in India. In the International markets a lot of new ethnicities are switching to packaged foods with more shelf life are rising. The demand for global organic food market is expected to rise by 23% CAGR by 2023. LT Foods has a strong back-end in place with 80,000+ farmer families across India, to build enduring relations with farmers with over 118,000 hectares of certified organic land in India. The Company has also incorporated two subsidiaries in US and Europe to strengthen this product portfolio.

Organic Category

Demand for natural, fresh and locally sourced foods, which are healthier and more wholesome than packaged foods with more shelf life are rising. The demand for global organic food market is expected to rise by 23% CAGR by 2023. LT Foods has a strong back-end in place with 80,000+ farmer families across India, to build enduring relations with farmers with over 118,000 hectares of certified organic land in India. The Company has also incorporated two subsidiaries in US and Europe to strengthen this product portfolio.

Health and Convenience Category

Consumers are adapting to healthy eating habits for leading a good life. They are looking for options that are indulgent, delicious and produced with quality ingredients. The food sector is also rapidly evolving on the back of various lifestyle-induced changes such as increase in working population and urbanization, growing health awareness, higher spending, etc. Global Health and Wellness Food Market is expected to grow by USD 236 billion by 2024, with at a CAGR of 6%. LT Foods has been keeping a close tap on the changing consumer needs and preferences and has ventured in the Health & Convenience category with products such as Daawat Quick Cooking Brown Rice, Daawat Sauté Sauces, Kari Kari, Royal Ready-to-Heat products, Fortified Rice, Daawat Cuppa Rice, etc. The Company will be leveraging its strong brand equity, integrated business model and distribution network to strengthen this product portfolio.

Threats

Particulars for operational efficiencies. The Profit before Tax was up by 30% to ₹ 277 crore from ₹ 214 crore on year-on-year basis due to lower interest cost. The Profit After Tax increased by 45% to ₹ 199 crore on year-on-year basis while the margins expanded by 125 bps to 4.8%. This led to an increase in Earnings Per Share by 46% to ₹ 5.77 from ₹ 3.96 on year-on-year basis.

Moving on to the geographical split – India’s Consumer Business was up by 4% on-year-on-year basis at ₹ 866 crore and International Consumer Business was up by 20% on-year-on-year basis at ₹ 1,645 crore. All the geographies performed as per the assumptions. Our US business saw a double digit growth in revenue terms and the recently launched Ready-to-Heat business in the US was well received by the consumers and its sales were more than doubled in the fourth quarter of this financial year. Our Europe business has been performing well quarter on quarter and became PAT positive in the year.

Our organic business revenue stood at ₹ 367 crore and contributes c. 9% to the overall revenue. The business had experienced a fall in its soya meal business in the first half of the year with the company’s plan to move into valued added soy meal processing, the business has seen a ramp up in the second half with implementation of a dedicated organic soy meal processing in a record time of around 3 months. The plant is running at full capacity to cater to the large orders received from global customers.

The Company also worked on strengthening its Balance Sheet. The Company’s net worth was up by 11.5% to ₹ 1,599 crore led by strong accruals. The overall debt (bank borrowing) of the Company was down by ₹ 215 crore to ₹ 1435 crore. The debt-equity ratio improved from 1.15 times to 0.90 times. Long term debt to equity has reduced to negligible levels of 0.14 times from 0.17 times last year. This is to reiterate that majority of our debt is working capital Debt which is required because of the nature our business and our focus is to maintain the debt to EBITDA ratio to less than 3 times.

Because of our continuous focus on working capital optimization, our net working capital has reduced by 19 days to 231 days which has helped in reducing short term debt by ₹ 193 crore to ₹ 1,228 crore. Interest coverage ratio has also improved significantly from 2.5 to 3.1 year-on-year basis. Current ratio has also improved to 1.52 from 1.43 on year-on-year basis. Return on Capital Employed also improved by 250 bps to 13.6%.

The Cash generated by Operations was up by 365% on-year-on-year basis to ₹ 477 crore. The Company also declared an Interim Dividend of Re. 0.50 per share on its fully paid up shares.

On standalone basis, Company’s revenue for FY 20 was up by 8% at ₹ 2,378 crore on year-on-year basis. The Gross Margins stood at 18.5% and the Gross Profit was up by 7% on-year-on-year basis at ₹ 440 crore. The EBITDA margins stood at 8.4% and in absolute terms EBITDA was up by 9% on-year-on-year basis from ₹ 183 crore to ₹ 199 crore. The Profit before Tax was up by 35% to ₹ 115 crore from ₹ 83 crore on year-on-year basis due to lower interest cost. The Profit After Tax increased by 56% to ₹ 85 crore from ₹ 54 crore on year-on-year basis while the margins expanded by 112 bps to 3.6%. This led to an increase in Earnings Per Share by 56% to ₹ 1.70 on year-on-year basis.

2. Company’s working during the year

On consolidated basis, Company’s revenue for FY 20 was up by 7% at ₹ 4,184 crore on year-on-year basis. The strategic intent of the Company has been to focus on our consumer business. With continued focus our consumer business was up by 1% and the share of our branded rice portfolio increased to 74% vs 69% last year.

The Gross Margins expanded by 174 bps to 26.7% vs. 24.9% last year. In absolute terms, Gross Profit was up by 14% on-year-on-year basis at ₹ 1,117 crore. This was on account of increase in the contribution of consumer business and strong growth from all the geographies. This is to further highlight that our Premium & mid-price product range achieved double digit growth on year-on-year basis.

The EBITDA margins expanded by 140 bps to 12.2% vs. 10.8% last year. In absolute terms EBITDA was up by 22% on-year-on-year basis from ₹ 421 crore to ₹ 509 crore due to better Gross Profit and operational efficiencies. The Profit before Tax was up by 30% to ₹ 277 crore from ₹ 214 crore on year-on-year basis due to lower interest cost. The Profit After Tax increased by 45% to ₹ 199 crore on year-on-year basis while the margins expanded by 125 bps to 4.8%. This led to an increase in Earnings Per Share by 46% to ₹ 5.77 from ₹ 3.96 on year-on-year basis.

The Cash generated by Operations was up by 365% on-year-on-year basis to ₹ 477 crore. The Company also declared an Interim Dividend of Re. 0.50 per share on its fully paid up shares.

On standalone basis, Company’s revenue for FY 20 was up by 8% at ₹ 2,378 crore on year-on-year basis. The Gross Margins stood at 18.5% and the Gross Profit was up by 7% on-year-on-year basis at ₹ 440 crore. The EBITDA margins stood at 8.4% and in absolute terms EBITDA was up by 9% on-year-on-year basis from ₹ 183 crore to ₹ 199 crore. The Profit before Tax was up by 35% to ₹ 115 crore from ₹ 83 crore on year-on-year basis due to lower interest cost. The Profit After Tax increased by 56% to ₹ 85 crore from ₹ 54 crore on year-on-year basis while the margins expanded by 112 bps to 3.6%. This led to an increase in Earnings Per Share by 56% to ₹ 1.70 on year-on-year basis.

3. Change in the nature of business, if any-

During the current year, there has been no major change in the business.

4. Dividend

The Board of Directors has recommended and paid 10.50 per share as interim dividend for the financial year 2019-20 and decided to retain back the remaining earnings.

9. Board Meetings

During the year, seven Board Meetings were held, the dates on which these meeting were held are 16th May, 2019, 8th Aug 2019, 19th August 2019, 07th November, 2019, 12th December 2019, 06th February, 2020 and 12th February 2020.

Apart from the Board Meetings mentioned above, the Board decided urgent businesses through resolution by circulation also. A resolution was passed through circulation on 17th March 2020 for appointment of Ms. Neeru Singh as Additional Director.

The details of the Board Meetings are given in the Corporate Governance Report. The intervening gap between the meetings was within the period prescribed under the Companies Act, 2013.

10. Performance Evaluation

In pursuance of Section 178 of the Companies Act, 2013 read with Regulation 4(2), 17(10) and 19(4) read with Schedule II Part D of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements), Regulations, 2015 and Secretarial Standards-I, the Nomination and Remuneration Committee has framed the evaluation process and the performance evaluation of Independent Directors, Executive Directors and of the Board as a whole as well as working of its Audit, Nomination & Remuneration and Stakeholders Relationship Committees has been carried out during the financial year 2019-20.

The Independent Directors of the Company met separately on 06th February 2020 without the presence of Non-Independent Directors and interalia reviewed the performance of the members of management, Executive Directors, Board as a whole, performance of the Chairman of the Company and the Committees.

In compliance with the provisions of SEBI Listing Regulations, the Board of Directors has also carried out evaluation of every Independent Director's performance during the year. The Board members had submitted to Nomination and Remuneration Committee, their response on a scale from 5 to 1 (Excellent to Performance Needs Improvement) for evaluating the entire Board, respective Committees including Chairman of the Board.

The Nomination and Remuneration Committee has also carried out evaluation of every Director's performance.

The Directors duly completed with the evaluation process. It was further acknowledged that every individual Member and Committee of the Board has contributed best in the growth to the organization.

11. Statement of Declaration by Independent Director(s) and re- appointment, if any

All the Independent Directors have given their Independence declaration as provided in sub-section (6) of Section 149 of the Companies Act, 2013.

12. Remuneration Policy

The Company has framed the Remuneration Policy in compliance with Section 178 of the Companies Act, 2013 read along with the applicable rules and Regulation 19 of Securities and Exchange Board of India (Listing Obligation and Disclosure Requirements) Regulations, 2015. The Remuneration policy of the Company is in compliance of Section 178 (4) of the Companies Act, 2013. The Remuneration policy can be referred to the weblink http://www.lftgroup.in/pdf/LT-Foods-Remuneration-Policy.pdf.

The salient features of Remuneration policy are as follows:

- To formulate a criteria for determining qualifications, positive attributes and independence of a Director.
- To recommend to the Board, the appointment and removal of Senior Management.
- To carry out evaluation of Director's performance and recommend to the Board appointment/removal based on his/her performance.
- To recommend to the Board on (i) policy relating to remuneration for Directors, Key Managerial Personnel and Senior Management and (ii) Executive Directors remuneration and incentive.
- To make recommendations to the Board concerning any matters relating to the continuation in office of any Director at any time including the suspension or termination of service of an Executive Director as an employee of the Company subject to the provision of the law and their service contract.
- To ensure that level and composition of remuneration is reasonable and sufficient, relationship of remuneration to performance is clear and meets appropriate performance benchmarks.
- To devise a policy on Board diversity.
- To develop a succession plan for the Board with segregated succession readiness of the management council and executive.

13. Details of Subsidiary/Joint Ventures/Associate Companies

Pursuant to sub-section (3) of Section 129 of the Act, the statement containing salient features of the financial statement of Company’s subsidiaries, associate or joint venture is given as Annexure-V (Performance and financial position of each of the subsidiaries, associates and joint venture companies included in the consolidated financial statement).

During the year, the Company generated a revenue of ₹ 4,184 Crores at group level. Its subsidiaries played a major role in contributing to the overall revenue. LT Foods Americas (formerly known as Kushal Inc), the fellow subsidiary of the Company contributed approx. 37% to the overall revenue. Dawat Foods Limited, a majority owned subsidiary contributed 24% to the total revenue. The organic arm NBFL, a wholly owned subsidiary contributed approx. 9% to the group revenue.
Further, the Annual Accounts and related documents of the subsidiary Company shall be kept open for inspection at the registered & Corporate Office of the Company. The Company shall also make available copy thereof upon specific request by any member of the Company interested in obtaining the same. Further, pursuant to Accounting Standard AS-21 issued by the Institute of Chartered Accountants of India, Consolidated Financial Statements presented by the Company in this Annual Report include the financial information of its subsidiary.

Name of the Companies, which became or have ceased to become as Subsidiaries/Joint Ventures/Associates Companies during the year.

During the year, Expo Services, fellow subsidiary of the Company was closed under voluntary strike off.

14. Auditors

M/s. Walker Chandik & Co. LLP, Chartered Accountants were re-appointed as Statutory Auditors of your Company at the Annual General Meeting held on 18th September 2015, for a term of five consecutive years. Accordingly, their term of 10 years will expire on the conclusion of 30th Annual General Meeting to be held in year 2020. As per the provisions of Section 139 of the Companies Act, 2013, the company is required to appoint new statutory auditors. Therefore, the Board in its meeting held on 30th July 2020 proposed M/s. MSKA & Associates Chartered Accountants as statutory auditors of the Company. The appointment of new auditors is subject to the approval of shareholders in the ensuing annual general meeting.

M/s MSKA & Associates has given their consent to be appointed as Statutory Auditors of the Company and have confirmed that they are not disqualified under any provisions of Section 145(4) of Companies Act, 2013 and also their engagement with the Company is within the prescribed limits under Section 141 (3)(a) of Companies Act, 2013

15. Auditors’ Report

The Auditors’ Report does not contain any qualification. Notes to Accounts and Auditors remarks in their report are self-explanatory and do not call for any further comments. They have been no instances of fraud reported by the Statutory Auditors under Section 143(12) of the Companies Act, 2013 read with rules framed thereunder, either to the Company or to the Central Government.

16. Audit Committee

In pursuance of Section 177 of the Companies Act, 2013 read with Regulation 18 of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Company has constituted the Audit Committee and the details in respect of the composition of Audit Committee of the Company is given in Corporate Governance Report of the Company.

17. Secretarial Audit Report

In terms of Section 204 of the Act and Rules made thereunder, M/s. D Dixit & Associates, Practicing Company Secretary has been appointed as Secretarial Auditors of the Company. The report of the Secretarial Auditors is enclosed as Annexure IV to this report. The point-wise comments are enumerated as follows:

(i) Delay in filing forms: Due to oversight, the Company has failed to file few forms within prescribed time frame of the Companies Act, 2013. The applicable additional fees has been paid to Ministry of Corporate Affairs.

(ii) CSR spent- Out of the total CSR expenditure required to be made, the Company has spent 54% and the remaining amount will be spent in the next financial year in compliance with Section-135 of the Companies Act, 2013

(iii) Delay in filing of Annual Performance Report- The Company has submitted Annual Performance Report late for its wholly owned subsidiary LT Foods International Limited, UK due to delay in audit. The Company has filed for condonation for delay for the same.

(iv) Non-Intimation to controlling authority under Payment of Gratuity Act, 1972 and delay in payment of gratuity to ex-employees- The Company will give intimation to controlling authority whenever gratuity is due for an employee along with the amount of gratuity and the payment of the gratuity was duly made to all ex-employees of the Company.

(v) Inadequate composition of Directors- The Company is making all efforts to appoint one more Independent Director on the Board of Directors.

(vi) Appointment of Independent Director on the Board of material subsidiary- The Company will appoint one of its Independent Director on the Board of its Foreign material subsidiary LT Foods Americas.

18. Internal Audit & Controls

In terms of compliance of Section 138 of the Companies Act, 2013 read with the Companies (Accounts) rules, 2014, the Company continues to engage Pro Advisory India LLP as its Internal Auditors. During the year, the Company continued to implement their suggestions and recommendations. Their scope of work includes review of processes for safeguarding the assets of the Company, review of operational efficiency, effectiveness of systems and processes, statutory compliances, and assessing the internal control strengths in all areas. Internal Auditors findings are discussed with the process owners and suitable corrective actions taken as per the directions of Audit Committee on an ongoing basis to improve efficiency in operations.

19. Vigil Mechanism:

In pursuant to the provisions of Section 177(9) & (10) of the Companies Act, 2013, a Vigil Mechanism Policy for Directors and employees to report genuine concerns has been established. The Vigil Mechanism Policy can be found on the following link http://www.ltgroup.in/pdf/whistle-blower-policy.pdf on the website of the Company. In terms of amendment in regulation 9A(6) of the SEBI (Prohibition of Insider Trading) Regulations, 2015, which requires a listed Company to have a whistle-blower policy and to make employees aware of such policy to enable them to report instances of leak of unpublished price sensitive information. Since the Company has already in place a policy on Whistle Blower formulated in terms of Listing agreement and thereby informed the employees through internal circular, about their right to report any instance of leak or suspected leak of UPSI under the guard of the said policy in place.

In order to prevent sexual harassment of women at work place a new Act The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 was notified on 9th December 2013. Under the said Act, every Company is required to set up an Internal Complaints Committee to look into the complaints relating to sexual harassment at workplace of any woman employee.
The Company has adopted a policy for prevention of sexual harassment of Women at workplace and has set up Committee for implementation of said policy. During the year, Company has not received any complaint of harassment.

32. Conservation of energy, technology absorption and foreign exchange earnings and outgo
The details of conservation of energy, technology absorption, foreign exchange earnings and outgo are as follows:

a) Conservation of energy
Energy conservation has been one of the key objectives that are associated with the manufacturing units from past many years. LT Foods has shown improvement year on year basis and has successfully achieved the targets. There have been several initiatives taken in this direction, few of them are listed below:
• Machine output plays a vital role in energy consumption. This year, we worked on increasing the plant throughput with better production planning and as a result of this initiative, we were able to achieve reduction in units per metric tonnes.
• Efficient production planning has resulted in reducing our net production days thereby identifying certain days or shifts in a particular month where there is no need to carry out production and hence enabling in reduction of power consumption over the month.
• Identification of no production days also resulted in the optimal usage of alternate source of electricity (Diesel Generator) and operating only the critical machineries when required.
• Power boosters were installed in the compressor line which resulted in lowering down the power consumption in the form of reduction in the requirement of compressed air for plant operations.
• Energy audit was also conducted and the suggested recommendations were able to plug in certain leakages which further helped in reducing the overall energy consumption.

**Note:** Change in shareholding is calculated from the beginning of the year to end of the year (31/03/2020). The table above gives shareholding of the company at different dates as per the shareholding calculation. The increase/decrease in the number of shares is given in the "No. of Shares" column, with the corresponding reason in the "Increase/ Decrease in Shareholding" column. The cumulative shareholding during the year is calculated by adding the increase/decrease in shareholding to the previous cumulative shareholding. The percentage of the total shareholding is given in the "% total Shares of the Company" column.

For and on behalf of the Board of Directors

Sd/-
Vijay Kumar Arora
Chairman & Managing Director
DIN: 00012203

Place: Gurugram
Date: 30th July, 2020
Key Points of Our CSR POLICY

OBJECTIVE:
I. To set up the guiding principles for carrying out CSR activities.
II. To set up processes for promoting, investing, engaging, collaborating, implementing and monitoring of the CSR activities to be undertaken by the Company.
III. To conduct its business in line with the Responsible Business framework.
IV. To create superior value for our stakeholders.
V. Implementation of the CSR activities in Projects / Programme mode through a focused approach for generating maximum approach.

PLANNING AND IMPLEMENTATION
All CSR activities will be in the form of Projects/ Programmes, which will, as far as possible, entail the following components:
- Details of annual financial allocation.
- Baseline Survey/Need Assessment where considered necessary/feasible.
- Identification of Beneficiaries.
- Signing of agreement with implementing agency.
- Formulation of detailed Project Report with clear deadlines.
- Preparation and Implementation of a comprehensive and concurrent documentation procedure.
- Regular Monitoring & Periodic review of the projects.
- Evaluation & Assessment by a third party.

Mandatory Reporting
The Company will endeavor at all times to develop the skills of the CSR team and capacity building of implementing agency that it engages with but the budget on the same limited to 5 percent of the total CSR budget in the financial year.

Mode of carrying CSR activities:
- Through a society, Non-Profit Organization set up by the Company or its holding, subsidiary or associate Company.
- Implementation through the Agency.
- Collaborating with other non-profit Organization, Corporate, Government.

CSR BUDGET
I. The Board of Directors will ensure that the company spends, in every financial year, at least 2% of the average net profit (to be calculated in accordance with the provision of section 198) of the company made during the three immediately preceding financial years, in pursuance of its Corporate Social Responsibility policy.
II. Any surplus or profit generated from CSR projects undertaken by us will be tracked and channelized into our CSR corpus or as a supplement to the CSR budget. These funds will be further used in development of the CSR projects and will not be added to the normal business profit.
III. In the event that the amount to be spent on CSR activities is not spent in its entirety in that FY, the reasons thereof will be outlined as per section 134 (3) (o).
IV. The Company will claim CSR expenditure only for the funds that are provided from its own resources and not for the contribution received from the other sources.
V. The CSR budget will be used as per the activities mentioned in the schedule VII in project / Programme mode with a process of monitoring, evaluation and clear outlining of desired outcomes.

One of event such as marathons/ awards/ charitable contribution/ advertisement/ sponsorship of TV programmes and the like would not qualify as part of CSR expenditure.

(1) The Composition of the CSR Committee.
CSR Committee consist of Mrs. Radha Singh (Chairman), Mr. Vijay Kumar Arora, Executive Director, Mr. Gokul Patnaik, Non Executive Director and Mr. Rajesh Kumar Srivastava, Nominee Director of the Company.

(2) Average net profit of the company for last three financial years - ₹ 6454.43 Lakhs

(3) Prescribed CSR Expenditure (two per cent. of the amount as in item 2 above) - ₹129.09 Lakhs

(4) Details of CSR spent during the financial year.
(a) Total amount to be spent for the financial year- ₹129.09 Lakhs
(b) Amount unspent, if any- ₹59.32
(c) The Company is exploring projects for CSR activities.

3. All our programs are executed and implemented through our partners.

About Fair Farming Foundation

Fair Farming Foundation (FFF) is a non-governmental, non-profit organization engaged in a broad range of rural development interventions throughout India. It is a movement to support the sustainable development in the country. Since 2009, they are engaged in rural development through the promotion and implementation of various development projects. FFF strongly believes that collective participatory action is required for balanced and sustainable community development. We are carrying out need based welfare & integrated programs of development by assisting in strengthen the farming community and by contributing to economically, ecologically and socially sustainable development.

Fair Farming Foundation Programs are designed on the principle that communities can take ownership of their own development through participation & implementation of Projects. Rural communities work together to create sustainable programs for managing water resources, increasing agricultural productivity, creating rural infrastructure, promoting education, Ensuring environment sustainability, providing safe drinking water, Women Empowerment & livelihood Enhancement. Our key strategies for creating sustainable rural development are using a rights-based approach and leveraging people’s participation.

Since inception, Fair Farming Foundation have been and continue to be involved in meaningful, welfare driven initiatives that distinctively impact the quality of life of the rural poor with an aim to improve the social and economic situation of people in underdeveloped areas of rural India.

About Udayan Care

The Organisation transform young lives by protecting and nurturing vulnerable children and youth igniting the spark in young women to pursue higher education. It creates livelihoods through digital education and skilling.

About Patiala Foundation

The Patiala Foundation is working on a livelihood project (UN-SDG 13) by the name of GreenCABS in the state of Punjab under which we are providing new ECOFriendly cycle rickshaws to persons who are already plying the same or who wish to start the same in the state of Punjab. They also provide the Traction Drivers more income enhancement options. They are providing them the Patiala GreenCABS with a package of Uniform sets, Membership ID card, MC permit etc. and the rickshaws are of new improved design which are lighter in weight hence they are easy to ply. Without using any wood, these rickshaws are ECOFriendly fitted with seat belts for the safety of the passengers and have more luggage space. In addition to the above project we are also working with the female SHGs and are linking them to the Banks so that they can start with their own livelihood. They have also expanded the operations in the state of Haryana.

## Annexure -IV to Directors Report for the year ended 31st March, 2020

### Form No. MR-3

#### SECRETARIAL AUDIT REPORT

**FOR THE FINANCIAL YEAR ENDED 31ST MARCH, 2020**

(Pursuant to section 204(1) of the Companies Act, 2013 and RuleNo.9 of the Companies (Appointment and Remuneration Personnel) Rules, 2014)

To,
The Members,

LT Foods Limited

I have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by M/s LT Foods Limited (hereinafter called the company). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on my verification of the M/s LT Foods Limited books, papers, minute books, forms and returns filed and other records maintained by the company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, I hereby report that in my opinion, the company has, during the conduct of secretarial audit, I hereby report that in my opinion, the company has, during the audit period covering the financial year ended on 31st March 2020 complied with the statutory provisions listed hereunder and also that the Company has proper Board/processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

**PARA ONE**

I have examined the books, papers, minute books, forms and returns filed and other records maintained by M/s LT Foods Limited (“the Company”) for the financial year ended on 31st March, 2020 to the extent applicable according to the provisions of:

- (i) The Companies Act, 2013 (the Act) and the rules made thereunder;
- (ii) The Securities Contracts (Regulation) Act, 1956 (‘SCRA’) and the rules made thereunder;
- (iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;
- (iv) Foreign Exchange Management Act, 1999 and the rules and regulations made thereunder to the extent of Foreign Direct Investment, Overseas Direct Investment and External Commercial Borrowings;

- (v) The following Regulations and Guidelines prescribed under the Securities and Exchange Board of India Act, 1992 (‘SEBI Act’):
  - (a) The Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011;
  - (b) The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015;
  - (c) The Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009;
  - (d) The Securities and Exchange Board of India (Share Based Employee Benefit) Regulations, 2014;
  - (e) The Securities and Exchange Board of India (Issue and Listing of Debt Securities) Regulations, 2008;
  - (f) The Securities and Exchange Board of India (Registrars to an Issue and Share Transfer Agents) Regulations, 1993 regarding the Companies Act and dealing with client;
  - (g) The Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2009; and
  - (h) The Securities and Exchange Board of India (Buyback of Securities) Regulations, 1998;

- (vi) I have also examined the Compliances of the Provisions of the following other laws applicable specifically to the Company wherein I have also relied on the Compliance Certificates/declaration issued by the head of the respective department/management in addition to the checks carried out by me and found that company has complied with all the provisions of said Acts and also the

Statutory Reports
Observations in Clause (vi) (12) of Para One of Our Report

1. As per section 7(2) of Payment of Gratuity Act, 1972, “The employer shall arrange to pay the amount of gratuity within 30 days from the date it becomes payable to the person to whom the gratuity is payable”. However, on verification of records of the Company, it has been found that the company has defaulted in giving such intimation to the controlling authority.

2. As per sub-section (3) of Section 7 of The Payment of Gratuity Act, 1972 “The employer shall arrange to pay the amount of gratuity within 30 days from the date it becomes payable to the person to whom the gratuity is payable”. However, on verification of records of the Company, it has been found that the company has defaulted in adherence to the timeline with respect to the payment of Gratuity to the ex-employees.

PARA SECOND

I have also examined compliance with the applicable clauses of the following:

(i) Secretarial Standards on meetings of the Board of Directors (SS-1) and Secretarial Standards on General Meeting (SS-2) issued by Institute of Company Secretaries of India.

(ii) The Listing Regulations executed by the Company with BSE Ltd & National Stock Exchange of India Limited.

Based on our verification of the Company’s Books, papers, minutes books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents, and its authorized representatives during the conduct of Secretarial Audit we hereby report that in our opinion during the period under review the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above.

I further report that

a. As required under Regulation 17(b) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, the Company do not have half of the Board of Directors as Independent after resignation of two Independent Directors on 06th February, 2020 and appointment of one Independent Director on 17th March 2020.

b. As required under Regulation 24(1) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, none of its Independent Director has been appointed on the Board of Directors of one of its Foreign Material Subsidiary LT Foods Americas INC as on close of its financial year

Note: This report is to be read with our letter of even date, which is annexed to this report.

CEO/CFO Certificate

To
The Board of Directors
LT Foods Limited

Sub: - Compliance Certificate as per Regulation 17(8) of SEBI (Listing Obligation & Disclosure Requirements) Regulation, 2015

We have examined the registers, records, books and papers of the Company as required to be maintained under the Companies Act, 2013 (the Act) and the rules made thereunder, the provisions of various statutes, wherever applicable, the provisions contained in the Memorandum and Articles of Association of the Company for the year ended on 31st March 2020 and in our opinion and to the best of our information

A. We have reviewed financial statements and the cash flow statement for the year and that to the best of their knowledge and belief:

(1) these statements do not contain any materially untrue statement or omit any material fact or contain statements that might be misleading;

(2) these statements together present a true and fair view of the listed entity’s affairs and are in compliance with existing accounting standards, applicable laws and regulations.

B. There are, to the best of our knowledge and belief, no transactions entered into by the listed entity during the year that are fraudulent, illegal or violative of the listed entity’s code of conduct.

C. We accept responsibility for establishing and maintaining internal controls for financial reporting and that we have evaluated the effectiveness of internal control systems of the listed entity pertaining to financial reporting and we have disclosed to the auditors and the audit committee, deficiencies in the design or operation of such internal controls, if any, of which they are aware and the steps they have taken or propose to take to rectify these deficiencies.

D. We have indicated to the Auditors and the Audit committee

(1) significant changes in internal control over financial reporting during the year;

(2) significant changes in accounting policies during the year and that the same have been disclosed in the notes to the financial statements; and

(3) instances of significant fraud of which they have become aware and the involvement therein, if any, of the management or an employee having a significant role in the listed entity’s internal control system over financial reporting.

Corporate Governance Report

Corporate governance is about maximizing shareholder value legally, ethically and on a sustainable basis. Our goal of corporate governance is to ensure fairness for every stakeholder – our customers, investors, vendor-partners, the community, and the governments of the countries in which we operate. We believe that sound corporate governance is critical in enhancing and retaining investor trust. It is a reflection of our culture, our policies, our relationship with stakeholders and our commitment to values.

The Company believes that good Corporate Governance emerges from the application of the best and sound management practices and compliance with the laws, coupled with adherence to the highest standards of transparency and business ethics. The Company places great emphasis on values such ownership, customer centricity, integrity, passion for excellence, constant innovation and respect.

We have prepared this Corporate Governance report on the basis of the provisions of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (Listing Regulations), and the report contains details of Corporate Governance systems and procedures followed within our Company. The two basic tenets of Corporate Governance are transparency and accountability and they form an integral part of our business strategy in guaranteeing fairness for each stakeholder, including our customers, investors, bankers and society as a whole. Our approach towards enhancing shared value is steered by strong principles and ethics established by our Board of Directors.

Corporate Governance, essentially, promotes and adheres to business integrity, transparency, fairness, and presents opportunities to stakeholders for redressal of their grievances. The customs and procedures associated with Corporate Governance is in accordance with our framework that is dedicated to releasing timely and accurate information regarding our financial and operational performance, as well as the Company’s leadership and governance structure.

An active, well informed and independent Board certifies the maintenance of the highest standards of Corporate Governance and safeguarding of long-term stakeholders’ interest.

BOARD OF DIRECTORS

In accordance with our corporate governance philosophy and in strict adherence to the provisions of SEBI (Listing and Other Disclosure) requirements, 2015 (LODR), we have a diverse Board with appropriate combination of skills as well as integrity of Independent Directors to maintain its autonomy. The Company has always recognized the advantages of a diversified Board in effecting better decision-making, better ideas, advancement of knowledge and improvement of brand and reputation.

Detailed diversity policy is available on the website of the Company at weblink http://www.ltgroup.in/pdf/LT-Foods-Diversity-Policy.pdf

On March 31, 2020, our Board consisted of seven members, three of whom are Executive, three are Non-executive independent members and one is Non-executive Nominee Director. On 17th March, 2020, the Board appointed Mrs Neeru Singh as Additional Director, who is independent of the other Board members.

a) The Company has one woman director on its Board. The Board has formed seven Committees including the Audit Committee, Nomination & Remuneration Committee, Stakeholders Relationship Committee, Capital Raising Committee, Management Committee, Governance Committee and Corporate Social Responsibility Committee.

b) None of the Directors on the Board are members of more than ten committees or hold the post of Chairman in more than five Committees in other companies. Necessary disclosures regarding the Committee positions on the Board of other Public Companies, as on March 31, 2020 have been made by the Directors.

c) Since the Chairman of the Board is Executive, more than half of the Board should have been Independent. Two independent Directors resigned from the Board of the Company on 06th
February 2020. However, the Board was proactive in filling the vacancy by appointing Mrs. Neeru Singh as Independent Director. The Board is still short of one more Independent Director to contain optimum combination as prescribed by Listing Regulations. The Company has put all its efforts to fill in the vacancy with the appointment of one more Director with requisite skills and knowledge.

d) The names and categories of the Directors on the Board, their attendance at the Board Meetings held during the year, and the numbers of Directorships and Committee Chairmanships/Memberships held by them in other Companies are given below:

The Composition of the Board and Attendance record of Directors for 2019-20:

The Board confirms that the Independent Directors fulfill the conditions specified in these regulations and are independent of the management.

Mrs. Radha Singh and Parmod Bhagat resigned on 06th February 2020. Mrs. Neeru Singh was appointed as Additional Director on 17th March 2020.
Role of the Board of Directors

The primary role of the Board is that of trusteeship, protecting and enhancing shareholder value by means of instilling strategic direction to the Company. As trustees, the Board has a fiduciary responsibility to ensure that the Company has clear goals that are aligned with its growth requirements and shareholders’ value. The Board exercises its duties with care, skill and diligence, putting to use independent judgement, alongside earmarking strategic goals and holding itself accountable for their successful attainment. The Board also directs and exercises appropriate control to ensure that the Company is working and delivering in a manner that lives up to stakeholders’ aspirations and societal expectations.

All departments of the Company schedule their work plans in advance, particularly in regard to matters requiring consideration at the Board/Committee meetings. Such matters are communicated to the Company Secretary beforehand, so that it can be included in the agenda for the Board/Committee meetings.

Definition of Independent Directors

The Companies Act 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 defines an ‘Independent Director’ as a person who is not a promoter or employee or one of the key managerial personnel of the Company or its subsidiaries. The laws also state that the person should not have a material/ pecuniary relationship or transactions with the Company or its subsidiaries, beyond receiving remuneration as an Independent Director.

Familiarization Programme of Independent Directors

All new Non-executive directors inducted into the Board are introduced to the Company’s culture through orientation sessions. Current Executive Directors and the senior management provide an overview of the operations to familiarize the new Non-executive Director. They are introduced to the organisation’s structure, services, group structure and subsidiaries, constitution, Board procedures, matters reserved for the Board, major risks and risk management strategies.

They are presented with an opportunity to interact with senior management and are provided with documents that enable them to have good understanding of the Company, its business model and operations. The web link for the details of familiarization programme imparted to Independent Directors is http://www.ltgroup.in/pdf/familiarization-programme-for-independent-directors.pdf. The Independent Directors attended a two-day programme on the five-year roadmap of the Organisation in financial year 2019-20, spending fifteen hours in the familiarization programmes about the Company and its future outlook. All business updates of the Company are communicated to the Directors well in time to stay informed on all developments of the business.

Performance Evaluation of Independent Directors

The Board of Directors, on recommendation from the Nomination and Remuneration Committee, has laid down the criteria for performance evaluation of the Board of the Company, its Committees and individual Board members, including Independent Directors. Performance evaluation of the Board is done by each Director and during such assessment the Director being evaluated is not in participation. The criteria for performance evaluation is posted on the website of the Company.

Evaluation of the Board and its Committees is subject to various aspects of their functioning, including adequacy of the constitution, composition of the Board and its Committees; matters addressed in the meetings, processes followed at the meeting, Board’s focus, regulatory compliances, Corporate Governance, and so on. Similarly, for evaluation of individual Director’s performance, various parameters like Director’s profile, contribution in Board and Committee meetings, execution and performance of specific duties, obligations, regulatory compliances, governance, and so on, are considered.

Additionally, the performance of Chairman, Executive Directors and Independent Directors are evaluated using certain indices depending upon their roles and responsibilities. For the Chairman, the criteria includes leadership, relationship with stakeholders, and so on, while for the Executive Directors the criteria includes execution of business plans, risk management, achievement of business targets, development of plans and policies aligned to the vision and mission of the Company, among others. Similarly, ideals for evaluation of Independent Directors include effective deployment of knowledge and expertise, commitment to his/her role towards the Company and various stakeholders, willingness to devote time and efforts to his/her role, high ethical standards, adherence to applicable codes and policies, effective participation and application of objective as well as independent judgement during meetings, among others. Accordingly, the annual performance evaluation of the Board, its Committees and each Director was carried out for the financial year 2019-20 by way of oral evaluation at the time of personal interaction.

The Nomination and Remuneration Committee has also carried out assessment of every Director’s performance. The evaluation of all the Independent Directors have been executed by the entire Board, excluding the Director being evaluated. Based on the Board’s assessment, the decision of whether to extend or settle their term of appointment, whenever their respective tenure expires, is undertaken. The Directors expressed their satisfaction with the evaluation process.

Separate Meeting of Independent Directors

The Listed Company needs to conduct at least one meeting in a year wherein Independent Directors can evaluate the Board as well as fellow Independent Directors individually in addition to assessing the Committees and the Board procedures of the Company. All Independent Directors met separately on February 6th, 2020.

In compliance with Listing Regulations, following matters were reviewed and discussed:

- Performance of non-Independent Directors and Board of Directors as a whole
- Quality and promptness of flow of information between the Company management and the Board.
- Performance of the Chairperson of the Company.

Succession Plan

The Board has reviewed the Company’s plans for orderly succession of its outgoing members and Senior Management Personnel. Appointment, re-appointment, removal or resignation of Independent Directors is in strict adherence to Schedule IV of the Companies Act, 2013. Re-appointment of the Independent Directors is based on the report of performance evaluation.

Audit Committee

Brief description and terms of reference:

The Audit Committee of the Board was constituted in accordance with the requirements prescribed under Section 177 of the Companies Act, 2013 and regulation 18 of Listing Regulations. Members of the Audit Committee possess financial accounting expertise and exposure.

The Committee oversees the work carried out by the Management and Internal Auditors with reference to the financial reporting process as well as the safeguards employed by them.

Powers of the Audit Committee

• To investigate any activity within its terms of reference.
• To seek information from any employee.
• To obtain outside legal or other professional advice.
• To secure attendance of outsiders with relevant expertise, if it so considers necessary.

Role of the Audit Committee

• Oversight of Company’s financial reporting process and the disclosure of its financial information to ensure that the financial statement is correct, adequate and credible
• Recommendations for appointment, remuneration and terms of appointment of Auditors of the Company
• Approval of payment to statutory auditors for any other services rendered by the Statutory Auditors
• Evaluation with the management, the annual financial statements and Auditors Report before submission to the Board for approval, with particular reference to:
  a. Matters required to be included in the Directors’ Responsibility Statement as well as the Board’s report in terms of clause (c) of sub section 3 of Section 134 of the Companies Act, 2013
  b. Changes, if any, in accounting policies and practices and reasons for the same
  c. Major accounting entries involving estimates based on the exercise of judgement by the management
  d. Significant adjustments made in financial statements arising out of audit discoveries
  e. Compliance with listing and other legal requirements relating to financial statements
  f. Disclosure of any related party transactions; and
  g. Qualifications in the draft Audit report

• Management review of the quarterly financial statements before submission to the Board for approval
• Monitoring and reviewing with the Management, the statement of uses/application of funds raised through an issue/public issue, right issue, preferential issue, and so on), the statement of funds utilized for purposes other than those stated in the offer document/prospectus/notice and the report submitted by the monitoring agency overseeing the utilization of proceeds of a public or right issue, and making appropriate recommendations to the Board to take up steps in this matter.
• Review and regulation of the auditors’ independence, performance, and effectiveness of audit process
• Approval or any subsequent modification of transactions of the Company with the related parties

Statutory Reports

Members of the Committee | Category and Designation | Number of the meetings held during the year 2019-20
--- | --- | ---
Parvod Bhagat | Independent, Non-executive (Chairman) | 5
Radha Singh | Independent, Non-executive | 5
Rajesh Kumar Srivastava | Nominee, Non-executive | 5
Gokul Patnaik | Independent Non-executive | 5

The Audit Committee invites executives who are considered important for the functioning of the Committee including functional heads (particularly the head of finance), representatives of the Statutory Auditors and the Internal Auditors, to be present at the meeting. The Company Secretary also acts as the Secretary of the Audit Committee.
II. NOMINATION & REMUNERATION COMMITTEE

The Nomination and Remuneration Committee is formed in pursuance of Section 178 of the Companies Act, 2013 and Regulation 19 of the LODR.

The Committee comprises of two Independent Directors and one Non-executive Nominee Director, viz. Ms. Radha Singh (Chairperson), Mr. Parmod Bhagat and Mr. Rajesh Kumar Srivastava (Member), respectively as members.

Mrs. Radha Singh was present at the twenty-ninth Annual General Meeting of the Company.

The Nomination & Remuneration Committee meeting was held on 08th August 2019.

The Nomination & Remuneration Committee meeting was held on 08th August 2019.

Brief Description and Terms of Reference:

In line with the strong emphasis of the Company on fair practices, the Nomination and Remuneration Committee outlined suitable policies and procedures to ensure prevention of violation of applicable laws. On behalf of the Board and shareholders, the Committee influences the Company’s policy on specific remuneration packages for executive Directors, including pension rights, and any compensation payment. ESOP plans, sitting fees to Non-executive Directors and similar functions are to be performed by the Remuneration Committee under the ESOP Guidelines. Beyond these duties, it also oversees other matters that may arise from time to time and attends to any statutory, contractual or other regulatory requirements that need the attention of such a Committee.

The Committee identifies persons who are qualified to become Directors and who may be appointed in Senior Management, recommend to the Board their appointment and removal and carry out evaluation of every Director and perform all other functions as enumerated by Companies Act, 2013 and LODR.

During the financial year, one Nomination & Remuneration/Compensation Committee Meeting was held. Further a Circular resolution was passed during the financial year ending March 31, 2020 for appointment of Mrs. Neeru Singh.

The Remuneration policy has been disclosed in the Directors report, which forms part of the Annual Report.

I. Remuneration Policy

The remuneration paid to the Executive Directors of the Company is sanctioned by the Board of Directors on the recommendation of Nomination and Remuneration Committee. The Company’s remuneration strategy aims at attracting and retaining high calibre talent. The strategy is in consonance with the existing industry practice and directed towards rewarding performance based on review of achievements on a periodic basis.

The Remuneration policy has been disclosed in the Directors report, which forms part of the Annual Report.

II. Directors Remuneration Policy

1. Independent Non-executive Directors - The Non-executive Directors are given sitting fees only, as recommended by Nomination & Remuneration Committee and approved by the Board.

2. Executive Directors - The Executive Directors are remunerated on the recommendation of the Nomination & Remuneration Committee and the approval of Board of Directors and the Shareholders of the Company.

III. No pecuniary relationship or transaction happened between the Non-Executive Directors vis-à-vis the listed entity, during the financial year ended March 31, 2020, except for the sitting fees for attending meetings of the Board and other Committees.

Mr. Surinder Kumar Arora, the Managing Director of the Company draws salary from Daawat Foods Limited.

Performance Evaluation criteria for the Board have been laid down and posted on the Company’s website.

Criteria for payment to Non-executive Directors is disclosed on the website of the Company.

Disclosure as per Companies Act, 2013 as required under Schedule V(C) (5) (c) of LODR has been disclosed in the Director’s Report.

There was no pecuniary relationship/transaction of Non-executive Directors vis-à-vis the Company.
III. STAKEHOLDERS RELATIONSHIP COMMITTEE

The Stakeholder Relationship Committee was formed in accordance with Section 178 of the Companies Act, 2013 and Regulation 20 of LODR.

During the financial year, four Stakeholders Relationship Committee Meetings were held.

The dates and other details of these meetings are as follows:

May 16, 2019, August 08, 2019, November 07, 2019 and February 06, 2020

The Committee comprises two Independent Directors and one Non-executive Nominee Director:

- Mrs. Radha Singh and Parmod Bhagat resigned on 06th February 2020. The Committee was reconstituted by appointing Mr. Gokul Patnaik as Chairman and members as Rajesh Kumar Srivastava and Mr. Suparas Bhandari.

Reasonable opportunity is given to all the shareholders to ask question to the Board of Directors, position items on the agenda of general meeting(s) and propose resolution.

Shareholder’s Complaints:

During the financial year 2019-20, the Company has received only one complaint, which was duly resolved within the stipulated time.

IV. GOVERNANCE COMMITTEE

The Governance Committee comprises three members:

During the financial year, four Governance Committee Meetings were held.

The dates and other details of these meetings are as follows:

Dates: May 16, 2019, August 08, 2019, November 07, 2019 and February 06, 2020

V. CSR COMMITTEE

During the financial year, two CSR Committee Meetings were held.

The dates and other details of these meetings are as follows:

Dates: May 16, 2019 and August 08, 2019

The CSR Committee includes the following members:

WHISTLE BLOWER MECHANISM

The Whistle Blower Policy of the Company allows a mechanism for employees/Board members and others to raise concerns, in good faith, regarding violations of the Company’s Code of Conduct and protects individuals who take such actions from subsequent retaliation or any threat of the same. Direct access to interaction with the Chairman of the Audit Committee is also provided in the event of exceptional cases. The functioning of the vigil mechanism is evaluated by the Audit Committee from time to time. The Whistle Blowers have access to the Audit Committee of the Board. The details of the Whistle Blower Policy are given in the Report on Corporate Governance and are also available on the website of the Company at the following link: http://www.ltgroup.in/pdf/whistle-blower-policy.pdf

In harmony with the amendments in the Securities and Exchange Board of India (Prohibition of Insider Trading) (Amendment) Regulations, 2018, the Company has made all necessary changes in the existing policies and simultaneously adopted new policy and procedures for inquiry in case of leak or suspected leak of unpublished price sensitive information.

RISK MANAGEMENT

Risks are an integral part of any business environment and it is essential that we create structures and processes that are capable of identifying and mitigating risks consistently. For LT Foods, risks are multidimensional and thus, they need to be looked in a holistic manner which includes Business risk, Financial and Governance risk and Operational risk.

The Company has a comprehensive risk management platform to identify principal threats, ascertaining that only the best practical procedures are employed to monitor and mitigate such risks.

The Audit Committee considers and discusses certain matters listed in Part A of Schedule II of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and makes recommendations to the Board for their consideration and approval.

**MATERIAL SUBSIDIARY COMPANIES**

There are three material subsidiaries as on 31st March, 2020. Including Daawat Foods Limited, LT Foods Americas and LT Foods Europe B.V.

Daawat Foods Limited is an unlisted material subsidiary of the Company with one Independent Director, Mr. Parmod Bhagat of LT Foods Limited on the Board who resigned from the Board of LT Foods as on 06th February, 2020. The Audit Committee and the Board of Directors of the Company evaluate the financial statements of the subsidiary.

The Financial statements, significant transactions, if any at any given point of time and proceedings of all the unlisted subsidiaries of the Company were periodically reviewed by the Audit Committee and placed before the Directors of LT Foods Limited. The Company has framed a policy for determining the material subsidiaries and it is available on our website www.ltgroup.in. The weblink for the same is: [http://www.ltgroup.in/pdf/policy-for-determining-material-subsidiary-policy-new.pdf](http://www.ltgroup.in/pdf/policy-for-determining-material-subsidiary-policy-new.pdf).

DISCLOSURES

1. During the financial year ended March 31, 2020, there were no materially significant transactions with related parties, including promoters, relatives, the management, and subsidiaries, among others, that may have a potential conflict with the interest of the Company at large other than the disclosed transactions. The relevant disclosures on related parties and transactions with them are appearing in the Notes to the Accounts (Schedule-21). The Company has formulated a policy on materiality of Related Party transactions and on dealing with RPT, in accordance with the relevant provision of Companies Act, 2013 and Listing Regulations, 2015 (as amended from time to time). The policy has been revealed on the website of the Company at weblink: http://www.ltgroup.in/pdf/policy_on_related_party_transactions-new.pdf under the investors section. Necessary disclosure has been made in Director’s Report Annexure III.

All related party transactions get prior approval of the Audit Committee before being approved by the shareholders if required and no related party to approve such resolutions, whether or not the entity is a related party to a particular transaction.

Transactions of the listed entity with any person or entity belonging to the promoter/promoter group which hold(s) 10% or more shareholding in the listed entity, is disclosed in the format prescribed in the relevant accounting standards for annual results.

2. The Company has been compliant and no penalty or stricture was imposed on it by any Stock Exchange, SEBI or statutory authority on account of non-compliance by the Company on any matter related to the Capital Market during the last three financial years.

3. The CEO/CFO Certificate in terms of Reg17 (b) of SEBI (Listing Obligations and Disclosure Requirements) 2015 has been placed before the Board.

4. In compliance with the Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations 2015, as amended till date, on prevention of Insider Trading, the Company has a comprehensive Code of Conduct and the same is being strictly followed by its management, staff and relevant business associates. The Code expressly lays down the guidelines, the procedure to be followed and disclosures to be made, while dealing with shares of the Company. It also cautions them on the consequences of non-compliance thereof.

5. The Company follows the practice of ‘Closure of Trading Window’ prior to the publication of price sensitive information. During this period, a mechanism was formulated whereby the management and relevant staff and business associates of the Company are informed regarding the same and advised not to trade in the Company’s securities.

6. The Company complies with all the mandatory requirements of Listing Regulations, 2015. It is in the process of conforming to the non-mandatory requirements of the LODR on ‘Corporate Governance’.

7. Reconciliation of Share Capital Audit

A qualified Company Secretary carried out a secretarial audit to reconcile the total admitted equity capital with the National Securities Depository Limited (NSDL) and the Central Depository Services Limited (CDSL), in addition to the total issued and listed equity capital. The Reconciliation of Share Capital Audit confirms that the total issued/paid up capital is in line with the total number of shares in the physical form and the total number of dematerialized shares held with NSDL and CDSL.

The Company has followed prescribed accounting standards as laid down by ICAI in preparation of its financial statements.

9. LT Foods also established effective whistle blower mechanism and hereby affirms that no personnel or stakeholder has been denied access to the Audit Committee.

10. Necessary disclosures have been made on the website of the Company as required under Regulation 46(2) of Listing Regulations.

Required disclosure for the matters as stipulated in regulation 17 to 27 and clauses (b) to (i) of sub-regulation (2) of regulation 46 of Listing Regulations is there on the Company’s website.

11. No personnel has been denied access to the Audit Committee under Vigil mechanism.

12. Details of the utilization of funds raised through preferential allotment or qualified institutional investor as specified under regulation 37(2A) of SEBI (Listing Obligations and Disclosure Requirements) 2015. NA

13. All the mandatory recommendation (wherever required) of the committee(s) are accepted by the Board.

Voluntary Disclosure of Dividend Distribution Policy

The Board of Directors of the Company has voluntarily approved Dividend Distribution Policy.

Brief objectives of the policy are:

1. This policy will regulate the process of dividend declaration and its pay-out by LT Foods Limited in accordance with the provisions of Companies Act, 2013, read with the applicable rules framed thereunder, as may be in force for the time being and other bylaws as applicable to the company.

2. To ensure a regular dividend income for the shareholders and long term capital appreciation for all stakeholders of the company. The company would ensure to strike the right balance between the quantum of dividend paid and amount of profits retained in the business for various purposes. The Board of Directors will refer to the policy while declaring/recommending dividends on behalf of the company.

3. Through this policy, the company would endeavour to maintain a consistent approach to dividend pay-out plans.

CODE OF CONDUCT

The Company has adopted Code of Conduct and Ethics for Directors and senior management personnel, including duties of the Independent Directors vide Board Meeting held on May 27, 2016. A copy of the Code has been uploaded on the Company’s website. The Code has been circulated to all members of the Board and Senior management personnel, who have confirmed compliance with the Code of Conduct for the year under review.

A DECLARATION SIGNED BY THE CHAIRMAN AND THE MANAGING DIRECTOR IS GIVEN BELOW

I hereby confirm that:

The Company has obtained, from all members of the Board and Senior management, personnel affirmation that they have complied with the Code of Conduct and Ethics for Directors and Senior Management personnel for the financial year 2019-20.

Sd/-

(Vijay Kumar Arora)

Statutory Reports

Unclaimed Dividend

The shareholders who have not encashed their dividend warrants for the year 2019-20 are requested to claim the amount from the Registrar and Share Transfer Agent (in case shares are held in the demat form) or the Corporate Office (in case shares are held in the physical form).

As per Companies Act, 2013, any money transferred by the Company to the Unpaid Dividend Account, which remains unclaimed for a period of seven years from the date of the transfer shall be transferred to a fund called ‘The Investor Education and Protection Fund’ by the Central Government. The unclaimed dividend for the financial year 2012-13 will be transferred to IEPF account on 30th Oct, 2020. The shareholders who have not claimed their dividend are requested to contact our Registrar and Share Transfer Agent Bigshare Services Private Limited.

There are no shares in Unclaimed Suspense Account.

Share Transfer System and Registrar and Share Transfer Agent

All requests for dematerialization, rematerialization, transfer, transmission, issue of duplicate share certificates, sub-divisions, issue of demand drafts in lieu of dividend warrants, and so on are being handled by the Registrar and Share Transfer Agent and registered within 15 days of receipt of documents, if found in order.

All requests for transfer of shares in the physical form are processed and the duly transferred share certificates are returned to the transferee within the time prescribed by law, subject to the share transfer documents being valid and complete in all respects.

Address & Contact No.of Registrar & Share Transfer Agent are as follows:

Big share Services Private Limited E-2/3, Ansa Industrial Estate, Saki Vihar Road, Saki Naka, Andheri (East), Mumbai Pin Code-400072.

Contact Person: Mr. N. V. K. Mohan Tel No. 022-28470652
Email id: mohan@bigshareonline.com and bssdelhi@bigshareonline.com

The Board has authorized the Stakeholders Relationship Committee to sub-delegate its power to the officers of the Company for prompt redressal of investor requests/complaints. Accordingly, the Committee has sub-delegated its powers to approve transfers/demat/remat/sub-division/consolidation of share certificates to the Company Secretary. A summary of requests for transfers/demat/remat approved by the Company Secretary between two meetings of the Committee is addressed during the subsequent meeting of the Committee.

As required under Regulation 40(9) of the Listing Regulations, the Company obtains a certificate regarding share transfer compliances, on a half-yearly basis, from a Practicing Company Secretary. A copy of this certificate is filed with the Stock Exchanges.
Dematerialization of Shares and Liquidity

Procedure for dematerialization/rematerialization of shares

Shareholders seeking demat/remat of their shares must approach the Depository Participants (DP) with whom they maintain a demat account. The DP will generate an electronic request and will send the physical share certificates to the Registrar and Share Transfer Agent (“the Registrar”).

Upon receipt of the request and share certificate, the Registrar will verify the same. Following verification, the Registrar will request the National Securities Depository Ltd. (NSDL)/Central Depository Services Ltd. (CDSL) to confirm the demat request. The demat account of the concerned shareholder will be credited with an equivalent number of shares. In case of a rejection of the request, it will be communicated to the shareholder.

In case of remat, upon receipt of a request from the shareholder, the DP generates a request and verification of the same is done by the Registrar. The Registrar then requests the NSDL and CDSL to confirm the request. The approval of the Company is sought, and an equivalent number of shares are issued in the physical form to the shareholder.

No GDRs/ADRs/warrants or any convertible instruments have been issued by the Company.

Upon receipt of the request and share certificate, the Registrar will verify the same. Following verification, the Registrar will request the National Securities Depository Ltd. (NSDL)/Central Depository Services Ltd. (CDSL) to confirm the demat request. The demat account of the concerned shareholder will be credited with an equivalent number of shares. In case of a rejection of the request, it will be communicated to the shareholder.

PRACTICING COMPANY SECRETARY’S CERTIFICATE REGARDING COMPLIANCE OF CONDITIONS OF CORPORATE GOVERNANCE

I have examined the compliance of conditions of Corporate Governance by LT Foods Limited, for the year ended March 31, 2019 as stipulated in applicable Regulations 17, 18, 19, 20, 22, 23, 24, 25, 26, 27 and clauses (b) to (i) of sub-regulation (2) of regulation 46 and para C, D and E of Schedule V of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (collectively referred to as ‘SEBI Listing Regulations, 2015’).

The compliance of conditions of Corporate Governance is the responsibility of the Company’s management. Our examination was limited to procedures and implementation thereof, adopted by the Company for ensuring the compliance of the conditions of Corporate Governance.

It is neither an audit nor an expression of opinion on the financial statements of the Company.

In my opinion, and to the best of our information and according to the explanations given to us, we certify that the Company has complied with the conditions of Corporate Governance as stipulated in the SEBI Listing Regulations, 2015.

I state that such compliance is neither an assurance as to the future viability of the Company nor the efficiency or effectiveness with which the management has conducted the affairs of the Company.

Independent Auditor’s Report

To the Members of LT Foods Limited

Report on the Audit of the Standalone Financial Statements

Opinion

1. We have audited the accompanying standalone financial statements of LT Foods Limited (‘the Company’), which comprise the Balance Sheet as at 31st March 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year ended 31st March 2020, and a summary of the significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 (‘Act’) in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Indian Accounting Standards (‘Ind AS’) specified under section 133 of the Act, of the state of affairs of the Company as at 31st March 2020, and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (‘ICAI’) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

4. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

5. We have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter How our audit addressed the key audit matter

Revenue recognition – Sale of Products

Refer to the significant accounting policies in note 2(iv)(a) and the inventory related disclosures in note 32 of the standalone financial statements.

Revenue of the Company primarily comprises of revenue from sale of rice and other food products.

In accordance with Standards on Auditing, there is a presumed fraud risk relating to revenue recognition. Further, there is continuous pressure on the management to achieve planned results. Accordingly, occurrence and existence of revenue is a key focus area on account of the multiple channels for sales, various categories of customers and significant variations in sales quantities during certain periods of the year. Further, there are sporadic high value transactions requiring special audit attention and evaluation as they involve varying terms of contracts with such customers.

Due to the above factors, we have identified testing of revenue recognition as a key audit matter.

Inventory existence and valuation

Refer to the significant accounting policies in note 2(iv)(a) and the inventory related disclosures in note 34 of the standalone financial statements.

The inventory primarily comprises of paddy, semi-finished and finished rice. Inventory holding is generally significant at the end of the financial year considering seasonality of the agricultural produce of paddy. Such inventory is stored in plants, warehouses, silos, yards and storage bags. High quantity of inventory at the year-end makes inventory physical verification an extensive procedure for the management.

The production process of rice involves mixing of different varieties of purchased rice and manufactured rice, and also leads to generation of by-products such as bran, husk and broken rice. Production process also involves ageing the paddy/ rice to achieve desired quality of end produce. The valuation of semi-finished and finished rice is a complex exercise and is carried out manually through excel spreadsheets. The valuation process involves estimation around determination of –

- Overhead absorption rates,
- Determination of yield,
- Determination of net realisable value of by-products, and
- Evaluated the terms and conditions of the contracts, including incoterms, with customers to ensure that the revenue recognition criteria are assessed by the management in accordance with the accounting standards;

- On a sample basis, tested revenue transactions recorded during the year, and revenue transactions recorded in the period before and after year-end, with supporting documents such as invoices, agreements with customers, proof of deliveries, and subsequent collection of payments;

- Performed other substantive audit procedures including obtaining debtor confirmations on a sample basis and reconciling revenue recorded during the year with statutory returns;

- Tested manual journal entries impacting revenue including credit notes, claims etc., which were material or irregular in nature with supporting documents and evaluated business rationale thereof;

- Evaluated disclosures made in the financial statement for revenue recognition from sale of goods for appropriateness in accordance with the accounting standards.

Our audit procedures included, but were not limited to the following:

Existence:

- Obtained an understanding of management’s process of inventory management and inventory physical verification performed at year end;

- Evaluated the design and effectiveness of controls over inventory management process/ inventory physical verification and tested key controls for their operating effectiveness;

- Reviewed the instructions given by senior management to stock count teams, including ensuring proper segregation of stock, use of calibration scales/charts, separate identification of goods received after year end, identification of damaged inventory, if any, etc.;

- Obtained inventory records and results of management conducted count;

- Reviewed reconciliation of differences, if any, between management physical count and inventory records, and tested the necessary adjustment made in the inventory records by the management, if any;

- Appointed an independent firm of Chartered Accountants (‘independent CA firm’) for
In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

7. The accompanying standalone financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

8. In preparing the financial statements, management is responsible for assessing the Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

9. Board of Directors is also responsible for overseeing the Company’s financial reporting process.

Auditor’s Responsibilities for the Audit of the Financial Statements

10. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

11. As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

   • Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

   • Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;

   • Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
Independent Auditor’s Report

Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention to this in our auditor’s report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with the requirements of the Companies (Auditor’s Report) Order, 2016 (‘the Order’) issued by the Central Government of India in terms of section 143(11) of the Act, we give in the Annexure A, a statement on the matters specified in paragraphs 3 and 4 of the Order.

Further to our comments in Annexure A, as required by section 143(3) of the Act, based on our audit, we report, to the extent applicable, that:

a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying standalone financial statements;

b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) the standalone financial statements dealt with by this report are in agreement with the books of account;

d) in our opinion, the aforesaid standalone financial statements comply with Ind AS specified under section 133 of the Act;

e) on the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31st March 2020 from being appointed as a director in terms of section 164(2) of the Act;

f) we have also audited the internal financial controls with reference to financial statements of the Company as on 31st March 2020 in conjunction with our audit of the standalone financial statements of the Company for the year ended 31st March 2020 and our report dated 31st March 2020 as per Annexure B expressed unmodified opinion; and

g) with respect to the other matters to be included in the Auditor’s Report in accordance with rule 11 of the Companies (Audit and

Report on Other Legal and Regulatory Requirements

15. As required by section 197(16) of the Act, based on our audit, we report that the Company has paid remuneration to its directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.

16. As required by the Companies (Auditor’s Report) Order, 2016 (‘the Order’) issued by the Central Government of India in terms of section 143(11) of the Act, we give in the Annexure A, a statement on the matters specified in paragraphs 3 and 4 of the Order.

iv. the disclosure requirements relating to holdings as well as dealings in specified bank notes were applicable for the period from 8th November 2016 to 30th December 2016, which are not relevant to these standalone financial statements. Hence, reporting under this clause is not applicable.

Independent Auditor’s Report

Annexure A to the Independent Auditor’s Report of even date to the members of LT Foods Limited, on the standalone financial statements for the year ended 31st March, 2020

Based on the audit procedures performed for the purpose of reporting a true and fair view on the financial statements of the Company and taking into consideration the information and explanations given to us and the books of account and other records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:

(i) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(ii) The Company has a regular program of physical verification of its fixed assets under which fixed assets are verified in a phased manner over a period of three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. In accordance with this program, certain fixed assets were verified during the year and no material discrepancies were noticed on such verification.

(iii) The title deeds of all the immovable properties (which are included under the head ‘Property, plant and equipment’) are held in the name of the Company. Accordingly, provisions of clause 3(vi) of the Order are not applicable.

(iv) In our opinion, the Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.

(v) The Central Government has not specified maintenance of cost records under sub-section (1) of Section 148 of the Act, in respect of Company’s products. Accordingly, the provisions of clause 3(vi) of the Order are not applicable.

(b) The Company has a regular program of physical verification of inventory at reasonable intervals during the year, except for goods-in-transit and stocks lying with third parties at the year-end, written confirmations have been obtained by the management. No material discrepancies were noticed on the aforesaid verification.

(vi) Undisputed statutory dues including provident fund, employees’ state insurance, income-tax, sales-tax, GST, service tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues, as applicable, have generally been regularly deposited to the appropriate authorities, though there has been a slight delay in a few cases. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.

(vii) The Company has not defaulted in repayment of loans or borrowings to any bank during the year. The Company did not have any outstanding debentures or loans or borrowing payable to any financial institution or government during the year. The Company did not have any outstanding demand draft against which the money raised by way of initial public offer/further public offer was applied the money raised by way of term loans for the purposes for these were raised.

(viii) No fraud by the Company or on the Company by its officers or employees has been noticed or reported during the period covered by our audit.

(x) No fraud by the Company or on the Company by its officers or employees has been noticed or reported during the period covered by our audit.

(xi) Managerial remuneration has been paid and provided by the Company in accordance with the requisite approvals mandated by the provisions of Section 197 of the Act read with Schedule V to the Act.

(xii) In our opinion, the Company is not a Nidhi Company. Accordingly, provisions of clause 3(xii) of the Order are not applicable.

(xiii) No preferential allotment or private placement of shares or fully or partly convertible debentures.

Independent Auditor’s Report

Annexure B to the Independent Auditor’s Report of even date to the members of LT Foods Limited on the standalone financial statements for the year ended 31st March 2020

Independent Auditor’s Report on the internal financial controls with reference to the standalone financial statements under Clause (1) of Sub-section 3 of Section 143 of the Companies Act, 2013 (‘the Act’)

1. In conjunction with our audit of the standalone financial statements of LT Foods Limited (‘the Company’) as at and for the year ended 31st March 2020, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The Company’s Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) issued by Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company’s business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the Company’s internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls with reference to financial statements.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company’s internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatement due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31st March 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in Guidance Note issued by the ICAI.

About the Company

LT Foods Limited is primarily in the business of milling, processing and marketing of branded and non-branded basmati rice and manufacturing of rice food products in the domestic and overseas market. LT Foods Limited operations include procurement, storage, processing, packaging and distribution. LT Foods Limited is also engaged in research and development to add value to rice and rice food products. The Company’s rice product portfolio comprises brown rice, white rice, steamed rice, parboiled rice, organic rice, quick cooking rice, value added rice and flavored rice in the ready to cook segment.

### ii) Basis of preparation

**a)** The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and the Companies (Indian Accounting Standards) (Amendment) Rules, 2016.

The financial statements have been prepared on a historical cost basis, except:
- Certain financial assets and liabilities which have been measured at fair value (refer accounting policy regarding financial instruments)
- Deferred tax assets and liabilities classified as non-current assets and liabilities.

**b)** Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:
- Expected to be realised or intended to be sold or consumed in normal operating cycle*
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:
- It is expected to be settled in normal operating cycle*
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

*Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

### iii) Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates, judgements and assumptions. These estimates, judgements and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.
Summary of Significant Accounting Policies
for the year ended March 31, 2020

iv) Significant Accounting Policies

a) Inventory

Inventories are valued as follows:

Raw materials, stores and spares and packing materials

Raw materials, components, stores and spares are valued at lower of cost or net realisable value. Cost of raw materials, components and stores and spares is determined on a 'First in First Out' basis and includes interest on raw materials as a carrying cost of materials where such materials are stored for a substantial period of time. Raw material comprising Bardana is valued at net realisable value. Stores and spares having useful life of more than twelve months are capitalised as tangible assets under “Property, plant and equipment” and are depreciated prospectively over their remaining useful lives in accordance with Ind AS 16.

b) Property, Plant and Equipment

Recognition and initial measurement

Property, plant and equipment are stated at their cost of acquisition. The cost comprises purchase price, taxes (against which input tax credit has not been availed), borrowing cost if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price. Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset. As appropriate, only when it is probable that future economic benefits attributable to such subsequent cost associated with the item will flow to the Company. All other repair and maintenance costs are recognised in Statement of Profit or Loss as incurred.

Subsequent measurement (depreciation and useful lives)

Depreciation on Property, plant and equipment is provided on the written down value arrived on the basis of the useful life prescribed under Schedule II of the Companies Act, 2013.

The residual values, useful lives and method of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

c) Intangible assets

Recognition and initial measurement

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

Subsequent measurement (amortisation and useful lives)

All finite-lived intangible assets, including internally developed intangible assets, are accounted for using the cost model whereby capitalised costs are amortised over their estimated useful lives. Residual values and useful lives are reviewed at each reporting date and any change in the same is accounted for prospectively. The following useful lives are applied:

<table>
<thead>
<tr>
<th>Intangible assets</th>
<th>Useful life (in years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brand</td>
<td>20</td>
</tr>
<tr>
<td>Software</td>
<td>03</td>
</tr>
</tbody>
</table>

De-recognition

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

d) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less costs of disposal and its value in use. Impairment losses of continuing operations are recognised in the Statement of Profit and Loss.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

e) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest calculated using the effective interest rate (EIR) that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

f) Functional and presentation currency

The financial statements are presented in Indian National Rupees (INR), which is also the Company’s functional currency.

Foreign Currencies

Transactions and balances

Initial recognition

Transactions in foreign currencies are initially recorded by the Company at its functional currency spot rates at the date the transaction first qualifies for recognition.

Subsequent measurement

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item.

Exchange differences

Exchange differences arising on the settlement of monetary items at rates different from those at which they were initially recorded during the year or reported in previous financial statements, are recognised as income or expense in the year in which they arise, except for exchange differences arising on foreign currency monetary items.

The exchange differences arising on forward contracts to hedge foreign currency risk of an underlying asset or liability existing on the date of the contract are recognised in the Statement of Profit and Loss of the period in which the exchange rates change, based on the difference between:

i. foreign currency amount of a forward contract translated at the exchange rates at the reporting date, or the settlement date where the transaction is settled during the reporting period, and
Summary of Significant Accounting Policies
for the year ended March 31, 2020

i. the same foreign currency amount translated at the rates of the date of the inception of the contract and the last reporting date, as the case may be.

g) Leases
The Company has adopted Ind AS 16-Leases effective from 1st April 2019, using the modified retrospective method. The Company has applied the standard to its leases with the cumulative impact recognised in the date of initial application (1st April 2019). Accordingly, previous period information has not been restated.

The Company’s lease asset classes primarily consist of leases for plant and machinery. The Company assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

(i) the contract involves the use of an identified asset;
(ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease;
(iii) the Company has the right to direct the use of the asset. At the date of commencement of the lease, the Company recognises a right-of-use asset (“ROU”) and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short term leases) and leases of low value assets. For these short term and leases of low value assets, the Company recognises the lease payments as an operating expense on a straight line basis over the term of the lease. The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any.

Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

(iv) The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made.

(v) A lease liability is remeasured upon the occurrence of certain events such as a change in the lease term or a change in an index or rate used to determine lease payments. The remeasurement normally also adjusts the leased assets. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

h) Fair value measurement
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is Unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period or each case.

i) Revenue recognition
Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. A performance obligation is a promise in a contract to transfer a distinct good or service (or a bundle of goods and services) to the customer and is the unit of account in Ind AS 115. A contract’s transaction price is allocated to each distinct performance obligation recognised as revenue, as, or when, the performance obligation is satisfied.

The Company recognises revenue when it transfers control of a product or service to a customer. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payments and excludes taxes and duties collected on behalf of the government. The Company recognises revenue from the following major sources:

Sale of goods:
Revenue from sale of goods is recognised when it transfers control of the product to a customer i.e. when customers are billed (in case of ex-works) or when goods are delivered at the delivery point, as per terms of the agreement, which could be either customer premises or carrier premises who will deliver goods to the customer. When payments received from the customers exceed revenue recognised to date on a particular contract, any excess (a contract liability) is reported in the statement of financial position under other liabilities.

Customer has a right to return for defective goods. Since the quantity of goods returned has been minimal for years, it is highly probable that a significant reversal in the cumulative revenue recognised will not occur.

In order to determine if it is acting as a principal or as an agent, the Company assesses whether it has exposure to the significant risks and rewards associated with the rendering of logistics services. Revenue from rendering of logistic services provided to its customer after the transfer of control of underlying goods is recognised on net basis i.e. after deducting the amount contractually payable to transporters out of the total consideration received and is recognised once the facilitation of such service is done as the Company does not assume any performance obligation.

Satisfaction of performance obligations
The Company’s revenue is derived from the single performance obligation to transfer primarily rice and other products under arrangements in which the transfer of control of the products and the fulfillment of the Company’s performance obligation occur at the same time. Therefore, revenue from the sale of goods is recognised when the Company transfers control at the point of time the customer takes undisputed delivery of the goods.

Whether the customer has obtained control over the asset depends on when the goods are made available to the carrier or the buyer takes possession of the goods, depending on the delivery terms. Revenue is measured at the transaction price of the consideration received or receivable, the amount the Company expects to be entitled to.

Payment terms
The sale of goods is typically made under credit payment terms differing from customer to customer and ranges between 0-180 days. No element of financing is deemed present as the sales are made with a credit term of 180 days, which is consistent with market practice.
Rentals income
Rentals income for operating lease is recognised on straight line basis with reference to terms of the agreements.

Interest income:
Interest income is recognised on time proportion basis taking into account the amount outstanding and rate applicable.

For all financial assets measured at amortised cost, interest income is recorded using the effective interest rate (EIR) i.e. the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial assets.

j) Financial Instruments
Financial instruments are recognised when the Company becomes a party to the contractual provisions of the instrument and are measured initially at fair value adjusted for transaction costs, except for those carried at fair value through profit or loss which are measured initially at fair value.

If the Company determines that the fair value at initial recognition differs from the transaction price, the Company accounts for that instrument at that date as follows:

• at the measurement basis mentioned above if that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets. The Company recognises the difference between the fair value at initial recognition and the transaction price as a gain or loss.

• in all other cases, at the measurement basis mentioned above, adjusted to defer the difference between the fair value at initial recognition and the transaction price as a gain or loss.

Subsequent measurement of financial assets and financial liabilities is described below.

Financial assets
Classification and subsequent measurement
For the purpose of subsequent measurement, financial assets are classified into the following categories upon initial recognition:

i. Financial assets at amortised cost
• A financial instrument is measured at amortised cost if both the following conditions are met:
  • The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
  • Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest method.

ii. Investments in equity instruments of subsidiaries
• Investments in equity instruments of subsidiaries are accounted for at cost in accordance with Ind AS 27 Separate Financial statements.

iii. Financial assets at fair value
• Investments in equity instruments other than above - All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are generally classified as at fair value through profit and loss (FVTPL). For all other equity instruments, the Company decides to classify the same either as at fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL).

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of Profit and Loss.

j) Hedge
Initial and subsequent measurement
The Company uses derivative financial instruments, such as forward contracts to hedge its foreign currency risks and non-derivative financial liabilities to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Foreign currency risk of non-derivative financial liabilities used for hedging is measured using spot rates.

Any gains or losses arising from changes in the fair value of derivatives and change in foreign currency risk component of non-derivative financial liabilities are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit or loss when the hedged item affects profit or loss. For the purpose of hedge accounting, hedges are classified as cash flow hedges where Company hedges its exposure to variability in cash flows that is attributable to foreign currency risk associated with recognised liabilities in the financial statements. At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Company’s risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in cash flows and are assessed on an ongoing basis to determine that they continue to be highly effective throughout the financial reporting periods for which they are designated.

When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in equity at that time remain in equity until the forecast transaction occurs. When the forecast transaction is no longer
Summary of Significant Accounting Policies

for the year ended March 31, 2020

1) Investment in subsidiaries

Investments in subsidiaries are carried at cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of the investment is adjusted and written down immediately to recoverable amount. On disposal of these investments, the difference between net disposal proceeds and the carrying amounts are recognised in the Statement of Profit and Loss.

m) Retirement and other employee benefits

Defined Contribution plan

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service. The Company has no obligation other than the contribution payable to the Provident Fund.

Defined benefit plans

The Company operates a defined benefit gratuity plan in India. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method with actuarial valuations being carried out at the end of each annual reporting period. Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the Balance Sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. The re-measurements of the net defined benefit liability are recognised directly in the other comprehensive income in the period in which they arise. Gratuity fund is administered through Life Insurance Corporation of India.

Other Employee Benefits

Compensated absences which are allowed to be carried forward over a period in excess of 12 months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date out of which the obligations are expected to be settled with actuarial valuations being carried out at each balance sheet date. Remeasurements, comprising of actuarial gains and losses are recognised immediately in the balance sheet with a corresponding debit or credit to Statement of profit and loss in the period in which they occur. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method.

Other short term benefits

Expense in respect of other short-term benefits is recognised on the basis of amount paid or payable for the period during which services are rendered by the employees.

n) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of profit and loss net of any reimbursement.

Provisions are measured at the present value of management’s best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The increase in the provision due to the passage of time is recognised as interest expense.

o) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

Potential ordinary shares shall be treated as dilutive when, and only when, their conversion to ordinary shares would decrease earnings per share or increase loss per share from continuing operations.

p) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax based on assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits (Minimum alternate tax credit entitlement) and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

q) Government grants and subsidies

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

r) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

Identification of segments:

In accordance with Ind AS 108 - Operating Segment, the operating segments used to present segment information are identified on the basis of information reviewed by the Company’s management to allocate resources to the segments and assess their performance. An operating segment is a component of the Company that engages in business activities from which it earns revenues and incurs expenses, including revenues and expenses that relate to transactions with any of the Company’s other components. Results of the operating segments are reviewed regularly by the number of segments (Chief financial officer) which has been identified as the chief operating decision maker (CODM), to make decisions about resources
Summary of Significant Accounting Policies
for the year ended March 31, 2020

to be allocated to the segment and assess its performance and for which discrete financial information is available.

Allocation of common costs:
Common allocable costs are allocated to each segment accordingly to the relative contribution of each segment to the total common costs.

Unallocated items:
Revenues and expenses, which relate to the Company as a whole and are not allocable to segments on a reasonable basis, have been included under “Unallocated corporate expenses”. Assets and liabilities, which relate to the Company as a whole and are not allocable to segments on reasonable basis, are shown as unallocated corporate assets and liabilities respectively.

Segment accounting policies
The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

1) Financial guarantee contracts
Financial guarantee contracts issued by the Company are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument.

Commission charged from the entity on whose behalf the guarantee has been issued is taken as commission income in the Statement of profit and loss.

t) Cash and cash equivalents
Cash and cash equivalent in the balance sheet comprise cash at banks and in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

u) Contingent liabilities
A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements.

v) Significant management judgment in applying accounting policies and estimation uncertainty
The following are the critical judgments and the key estimates concerning the future that management has made in the process of applying the Company’s accounting policies and that may have the most significant effect on the amounts recognised in the financial statements or that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

a. Impairment of trade receivables – The impairment for trade receivables reflects management’s estimate of losses inherent in its credit portfolio. This allowance is based on Company’s estimate of the losses to be incurred, which derives from past experience with similar receivables, current and historical past due amounts, write-offs and collections, the careful monitoring of portfolio credit quality and current and projected economic and market conditions. Should the present economic and financial situation persist or even worsen, there could be a further deterioration in the financial situation of the Company’s debtors compared to that already taken into consideration in calculating the allowances recognised in the financial statements.

b. Defined benefit obligation (DBO) – Management’s estimate of the DBO is based on a number of critical underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

c. Evaluation of indicators for impairment of assets – The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

d. Recognition of deferred tax assets – The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilised.

e. Contingent liabilities – The Company is the subject of legal proceedings and tax issues covering a range of matters, which are pending in various jurisdictions. Due to the uncertainty inherent in such matters, it is difficult to predict the final outcome of such matters. The cases and claims against the Company often raise difficult and complex factual and legal issues, which are subject to many uncertainties, including but not limited to the facts and circumstances of each particular case and claim, the jurisdiction and the differences in applicable law. In the normal course of business, management consults with legal counsel and certain other experts on matters related to litigation and taxes. The Company accrues a liability when it is determined that an adverse outcome is probable and the amount of the loss can be reasonably estimated.

f. Inventory – The valuation of finished rice involves estimations around determination of overhead absorption rates, rice yield from paddy and quantum of purchased rice and manufactured rice forming part of closing inventory. The production process also involves ageing the paddy/ rice to achieve the desired quality of rice and thus calculation of holding period and determination of weighted average borrowing cost involves management estimation. Further, management estimates the net realisable values of inventories including by- products, taking into account the most reliable evidence available at each reporting date.
### Notes to the Financial Statements for the year ended March 31, 2020

(All amounts are in ` in lakhs unless otherwise stated)

#### 2(i) Property, plant and equipment (Contd..)

As a result of initially applying Ind AS 116, in relation to the leases that were previously classified as operating leases, on 1st April 2019, the Company has recognised, a lease liability amounting to ` 308.42 measured at the present value of the remaining lease payments and Right-of-Use (ROU) asset amounting to ` 328.38 at its carrying amount as if the standard had been applied since the lease commencement date but discounted using the lessee’s incremental borrowing rate as at 1st April 2019. This has resulted in an adjustment to the opening balance of retained earnings amounting to ` 543. As at 31st March 2020 ` 275.80 of Right-of-use assets and ` 226.99 of lease liabilities is recognised. Also, in relation to those leases under Ind AS 116, the Company has recognised amortisation cost and finance cost, instead of operating lease expense. During the year ended 31st March 2020, the Company recognised ` 52.58 of amortisation charges and ` 29.41 of finance costs from these leases.

d. The following is the summary of practical expedients elected on initial application:

a) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date

b) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application

c) Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application

Following are the changes in the carrying value of right of use assets for the year ended 31st March 2020

(All amounts are in ₹ in lakhs unless otherwise stated)

Transferred receivables
The carrying amounts of trade receivables include receivables which are subject to a factoring arrangement. Under this arrangement, the Company has transferred the relevant receivables to the factor in exchange for cash and is prevented from selling or pledging the receivables. However, the Company has retained late payment and credit risk. The Company therefore continues to recognise the transferred assets in their entirety in its balance sheet. The amount repayable under the factoring agreement is presented as secured borrowing. The Company considers the held to collect business model to remain appropriate for these receivables and hence continues measuring them at amortised cost.

The relevant carrying amounts are as follows:

<table>
<thead>

</tbody>
</table>

The company has lease for laboratory equipments. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. The company classifies its right-of-use assets in a consistent manner to its property, plant and equipment. The company has considered automatic extension option available for property lease in lease period assessment since the company can enforce its right to extend the lease beyond the initial lease period.

(ii) Nature of the company’s leasing activities by type of right-of-use asset recognised on balance sheet:

<table>
<thead>
<tr>
<th>Right to use</th>

</tr>
</tbody>
</table>

The adoption of Ind AS 116 has resulted in the company recognising a right-of-use asset and related lease liability in connection with all former operating leases except for those identified as low-value or having a remaining lease term of less than 12 months from the date of initial application. Lease liability and ROU assets have been separately presented in the financial position and the payment of principal portion of lease liabilities has been classified as financing cash flows. The adoption of this standard resulted in the recognition of ROU assets and lease liabilities for operating leases of ₹ 308.42 as at 1st April 2019.

On transition to Ind AS 116 the weighted average incremental borrowing rate applied to lease liabilities recognised under Ind AS 116 was 11.00%.

</tr>
</tbody>
</table>

The reconciliation of the estimated tax expense at statutory income tax rate to income tax expense reported in the Statement of Profit and Loss is as follows:

- Profit before income taxes                        | 11,264.89                   | 8,322.17                    |
- *At India’s statutory income tax rate of 25.168%*| 2,835.15                    | 2,908.10                    |
- (31st March 2019: 34.944%)                        |                             |                             |
- Tax expense related to earlier years              | 114.19                      | -                           |
- Donation and charities                            | 24.72                       | 21.65                       |
- Fines, penalties and interest on statutory dues   | 0.24                        | 17.86                       |
- Impact of change in tax rates                     | (154.96)                    | 18.75                       |
- Deductions under section 80 of Income-tax Act, 1961| -                          | (70.20)                     |
- Others                                           | (70.71)                     | (22.53)                     |
| **Total income tax**                               | **2,748.63**                | **2,873.63**                |

*B The Company elected to exercise the option permitted under Section 115BAA of the Income-tax Act, 1961 as introduced by the Taxation Laws (Amendment) Ordinance, 2019. Accordingly, the company has re-measured its Deferred tax liabilities basis the rate prescribed in the said section. The impact of this change has been recognised in the Statement of Profit and Loss and other comprehensive income for the year.

The Company has pending appeals at Income Tax Appellate Tribunal (ITAT) for the assessment year 2014-15 and 2016-17 on the matters which were reported by CIT (Appeals) amounting to ₹ 1,380.69 (previous year ₹ 2,079.36).

The Company’s appeals for assessment years 2005-06 and 2009-10 against the demand under section 274(c)(ii) of the Income Tax Act, 1961 (the “Act”) amounting to ₹ 2,143.69 (previous year ₹ 2,412.17) are pending at various levels of appeals.

The Company has received demands under section 147 of the Act for assessment years 2016-17, 2017-18 and 2018-19 amounting to ₹ 3,198.45, ₹ 2,061.19 and ₹ 2,293.05 respectively, which are pending at various levels of appeals.

The Company has also received demands under section 147 of the Act for assessment years 2015-16, 2016-17 and 2017-18 amounting to ₹ 4,098.45, ₹ 4,822.12 and ₹ 3,799.07 respectively, which are pending at various levels of appeals.

Notes to the Financial Statements for the year ended March 31, 2020
(All amounts are in ₹ in lakhs unless otherwise stated)

42 Segment information

In accordance with Ind AS 108, the Board of directors being the Chief operating decision maker of the Company has determined its only one business segment of manufacture and storage of rice. Further, in terms of Paragraph 4 and 31 of Ind AS 108 ‘Operating Segments’, entity wide disclosures have been presented in the consolidated financial statements.

43 Transfer pricing

As per the international transfer pricing norms introduced in India with effect from 1st April 2001, the Company is required to use certain specified methods in computing arm’s length price of international transactions between the associated enterprises and maintain prescribed information and documents relating to such transactions. The appropriate method to be adopted will depend on the nature of transactions/ class of transactions, class of associated persons, functions performed and other factors, which have been prescribed. The Company is in the process of conducting a transfer pricing study for the current financial year. However, in the opinion of the Management the same would not have a material impact on these financial statements. Accordingly, these financial statements do not include any adjustments for the transfer pricing implications, if any.

A Gratuity

The Company provides gratuity for employees in India as per the Payment of Gratuity Act, 1972. The planned assets are managed by Life Insurance Corporation of India. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. For the funded plan the Company makes contributions to recognized funds in India. The Company does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

Disclosure of gratuity

<td>23.00%</td>
<td>10.00%</td>
</tr>
<tr>
<td>Rate of increase in compensation</td>
<td>4.00%</td>
<td>5.00%</td>
</tr>
</tbody>
</table>

The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

(vi) Movement in net liability recognised in balance sheet

<table>
<thead>
<tr>
<th>Description</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Defined Benefit Obligation</td>
<td>863.97</td>
<td>647.03</td>
</tr>
<tr>
<td>Fair value of Plan Assets</td>
<td>(442.91)</td>
<td>(322.14)</td>
</tr>
<tr>
<td>Liability recognised in the Balance Sheet</td>
<td>421.06</td>
<td>324.89</td>
</tr>
</tbody>
</table>

(vii) Sensitivity analysis for gratuity liability

<table>
<thead>
<tr>
<th>Description</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact of the change in discount rate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Present value of obligation at the end of the year</td>
<td>863.97</td>
<td>647.03</td>
</tr>
<tr>
<td>- Impact due to increase of 1%</td>
<td>(25.24)</td>
<td>(31.61)</td>
</tr>
<tr>
<td>- Impact due to decrease of 1%</td>
<td>26.75</td>
<td>34.72</td>
</tr>
<tr>
<td>Impact of the change in salary increase</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Present value of obligation at the end of the year</td>
<td>863.97</td>
<td>647.03</td>
</tr>
<tr>
<td>- Impact due to increase of 1%</td>
<td>26.41</td>
<td>31.16</td>
</tr>
<tr>
<td>- Impact due to decrease of 1%</td>
<td>(25.14)</td>
<td>(29.66)</td>
</tr>
</tbody>
</table>

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the balance sheet.

(viii) Maturity profile of defined benefit obligation (undiscounted)

<table>
<thead>
<tr>
<th>Description</th>
<th>As at 31st March 2020</th>
<th>As at 31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount rate</td>
<td>5.74%</td>
<td>7.57%</td>
</tr>
<tr>
<td>Future basic salary increase</td>
<td>23.00%</td>
<td>30.00%</td>
</tr>
<tr>
<td>Employee turnover/Withdrawal rate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Retirement age</td>
<td>58 years</td>
<td>58 years</td>
</tr>
</tbody>
</table>

Notes:

1. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of obligations.
2. The estimates of future salary increases considered takes into account the inflation, seniority, promotion and other relevant factors on long term basis.

B Compensated absence

The earned leave liability arises on retirement, withdrawal, resignation and death-in-service of an employee. The actuary has used projected unit cost (PUC) actuarial method to assess the plan’s liabilities of employees.

(i) Actuarial assumptions

<table>
<thead>
<tr>
<th>Description</th>
<th>As at 31st March 2020</th>
<th>As at 31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount rate</td>

</tr>
<tr>
<td>Employee turnover/Withdrawal rate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Retirement age</td>
<td>58 years</td>
<td>58 years</td>
</tr>
</tbody>
</table>

Notes:

1. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of obligations.
2. The estimates of future salary increases considered takes into account the inflation, seniority, promotion and other relevant factors on long term basis.

C Provident fund and ESI fund

Contribution made towards provident fund by the Company during the year is ₹ 175.91 (31st March 2019: ₹ 160.63)

Contribution made towards ESI fund by the Company during the year is ₹ 18.69 (31st March 2019: ₹ 26.66)

There are numerous interpretive issues relating to the Hon’ble Supreme Court (SC) judgement dated 28th February 2019 on provident fund on which the Company has obtained legal advice specifically on the retrospective applicability of the same. The Company has started recognising such expenditure/liability on account of enhanced provident fund contributions prospectively. Pending further clarification on the applicability of such ruling and on basis of the legal opinion so obtained, the management is of the view that such ruling is applicable prospectively. In view of the same, the Company had recorded an additional liability of ₹ 1.25 for the month of March 2019.

Investment in equity instruments and preference shares of subsidiaries, joint ventures and associates has been accounted at cost in accordance with Ind AS 27. Therefore not within the scope of Ind AS 109, hence not included here.

ii) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the balance sheet are categorised into three levels of fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: Quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Valuation process and technique used to determine fair value

(i) The fair value of investments in government securities and quoted equity shares is based on the current bid price of respective investment as at the balance sheet date.

(ii) In order to arrive at the fair value of unquoted investments, the company obtains independent valuations. The techniques used by the valuer are as follows:

a) Asset approach - Net assets value method
b) Income approach - Discounted cash flows (“DCF”) method
c) Market approach - Enterprise value/Sales multiple method

(iii) Key man insurance policy fair value is based on surrender value stated by Life Insurance Corporation of India, Max New York Life Insurance Company Limited, SBI Life Insurance Company Limited, Star Union Dai-ichi Life Insurance and Canara HSBC OBC Life Insurance which represents surrender value for the investors.

Derivative financial assets/liabilities:

The Company enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Foreign exchange forward contracts are valued using valuation techniques, which employs the use of market observable inputs. The most frequently applied valuation techniques include forward pricing models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates etc.

(iii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed is as follows:

Notes to the Financial Statements for the year ended March 31, 2020

(i) The management assessed that security deposits, loan to related parties, loan to employees, other financial assets, borrowings and other financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

- Long-term fixed-rate and variable-rate receivables are evaluated by the Company based on parameters such as interest rates, individual creditworthiness of the customer and other market risk factors. Based on this evaluation, allowances are taken into account for the expected credit losses of these receivables.

- All the long term borrowing facilities (other than vehicles loans) availed by the Company are variable rate facilities which are subject to changes in underlying Interest rate indices. Further, the credit spread on these facilities are subject to change with changes in Company’s creditworthiness. The management believes that the current rate of interest on these loans are in close approximation from market rates applicable to the Company. Therefore, the management estimates that the fair value of these borrowings are approximate to their respective carrying values.

(ii) Risk management framework

The Company's activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the Company is exposed to and how the Company manages the risk and the related impact in the financial statements.

48 Financial risk management

(i) Risk management framework

The Company’s activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the Company is exposed to and how the Company manages the risk and the related impact in the financial statements.

The Company’s risk management is carried out by a central treasury department (of the Company) under policies approved by the board of directors. The board of directors provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

A) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company’s receivables from customers and investments in debt securities. The carrying amount of financial assets represents the maximum credit exposure.

- cash and cash equivalents,
- trade receivables,
- loans and receivables carried at amortised cost, and
- deposits with banks

A) Credit risk management

The Company assesses and manages credit risk based on internal credit rating system, continuously monitoring defaults of customers and other counterparties identified either individually or by the company, and incorporates this information into its credit risk controls. Internal credit rating is performed for each class of financial instruments with different characteristics. The Company assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

A: Low
B: Medium
C: High

</tbody>
</table>

Cash and cash equivalents and other bank balances

Credit risk related to cash and cash equivalents and bank deposits is managed by only accepting highly rated banks and diversifying bank deposits and accounts in different banks.

Trade receivables

The Company closely monitors the credit-worthiness of the debtors through internal systems that are configured to define credit limits of customers, thereby, limiting the credit risk to pre-calculated amounts. The Company assesses increase in credit risk on an ongoing basis for amounts receivable that become past due and default is considered to have occurred when amounts receivable become past due one year.

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost includes loans and advances to employees, security deposits and others. Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.
Notes to the Financial Statements for the year ended March 31, 2020

(All amounts are in ₹ in lakhs unless otherwise stated)

b) Expected credit losses

Expected credit losses for financial assets other than trade receivables

The Company provides for expected credit losses on loans and advances other than trade receivables by assessing individual financial instruments for expectation of any credit losses. Since, the Company deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents, other bank balances and bank deposits is evaluated as very low. In respect of other financial assets, credit risk is evaluated based on Company's knowledge of the credit worthiness of those parties and loss allowance is measured as lifetime expected credit losses. The Company does not have any expected loss based impairment recognised on such assets considering their low credit risk nature, though incurred loss provisions are disclosed under each sub-category of such financial assets.

**Expected credit loss for trade receivables under simplified approach**

The Company uses expected credit loss model to assess the impairment loss. The Company uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account available internal credit risk factors such as the Company's historical experience for customers. The Company believes that amount receivable from related parties is collectible in full, based on historical payment behaviour and hence no loss allowance has been recognized on the same. The Company based upon past trends determines an impairment allowance for loss on receivables from others.

B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities. Management monitors rolling forecasts of the Company’s liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the company operates.

a) Financing arrangements

The Company had access to the following undrawn borrowing facilities at the end of the reporting period:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expiring within one year (cash credit and other facilities)</td>
<td>9,845.08</td>
<td>10,387.26</td>
</tr>
<tr>
<td>Expiring beyond one year (term loans)</td>
<td>-</td>
<td>9,845.08</td>
</tr>
</tbody>
</table>

The bank overdraft facilities may be drawn at any time and may be terminated by the bank without notice.

Maturities of financial liabilities

The tables below analyse the Company’s financial liabilities into relevant maturity of the Company based on their contractual maturities for all non-derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

C) Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – that will the Company’s income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

a) Foreign currency risk

The Company is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the US Dollar, GBP and Euro. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the company’s functional currency (INR). The risk is measured through a forecast of highly probable foreign currency cash flows. The objective of the hedges is to minimise the volatility of the INR cash flows of highly probable forecast transactions.

The Company’s policy is to hedge all material foreign exchange risk associated with highly probable forecast sales transactions denominated in foreign currencies. The Company’s policy is to hedge the risk of changes in foreign currency. The Company uses combination of pre-shipment credit in foreign currency (PCFCs) and forward contracts (derivative instruments) to hedge its exposure in foreign currency risk. The Company designates both change in spot and forward element of forward contracts and change in spot of PCFCs to hedge exposure of foreign currency risk on highly probable forecast sales.

(i) Exposure to currency risk:

The Company’s exposure to foreign currency risk at the end of the reporting period expressed in INR are as follows

Sensitivity

A reasonably possible strengthening (weakening) of the Euro, US dollar, GBP against all other currencies at 31st March 2020 and 31st March 2019 would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below. Further, the sensitivity of profit or loss to changes in the exchange rates arises mainly from foreign currency denominated financial instruments and the impact on other components of equity arises from foreign forward exchange contracts and pre-shipment credit in foreign currency (PCFC) designated as cash flow hedges. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

*Holding all other variables constant

b) Interest rate risk

i) Liabilities

The Company’s policy is to minimise interest rate cash flow risk exposures on long-term financing. As at 31st March 2020, the Company is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Company’s investments in fixed deposits all pay fixed interest rates.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Variable rate borrowing</td>
<td>56,733.25</td>
<td>66,473.27</td>
</tr>
<tr>
<td>Fixed rate borrowing</td>
<td>94.50</td>
<td>26.00</td>
</tr>
<tr>
<td>Total borrowings</td>
<td>56,827.75</td>
<td>66,499.27</td>
</tr>
</tbody>
</table>

Sensitivity

Profit or loss is sensitive to higher/ lower interest expense from borrowings as a result of changes in interest rates. In case of fixed rate borrowings a change in interest rates at the reporting date would not affect profit or loss.

<table>
<thead>
<tr>

<td>- Impact due to decrease of 50 basis points*</td>
</tr>
</tbody>
</table>

*Holding all other variable constant
Notes to the Financial Statements for the year ended March 31, 2020

(All amounts are in ₹ in lakhs unless otherwise stated)

ii) Assets

The Company’s fixed deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

c) Price risk exposure

The Company does not have any significant investments in equity instruments which create an exposure to price risk.

49 Capital management

The Company’s capital management objectives are:
- to ensure the Company’s ability to continue as a going concern
- to provide an adequate return to shareholders

The Company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of balance sheet.

Management assesses the Company’s capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Company’s various classes of debt. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

The Company’s adjusted net debt to equity ratio as at year end were as follows:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>

Equity shares

(i) Final Dividend
For the year ended 31st March 2019 of ₹ 0.15 per share (excluding tax) 479.77 -
For the year ended 31st March 2018 of ₹ 0.15 per share (excluding tax) - 479.77

(ii) Interim Dividend
For the year ended 31st March 2020 of ₹ 0.50 per share (excluding tax) 1,599.22 -

(iii) Proposed Dividend
For the year ended 31st March 2019 of ₹ 0.15 per share (excluding tax) - 479.77

The proposed dividend is subject to the approval of shareholders in the ensuing annual general meeting.

b) Loan covenants

Under the terms of major borrowing facilities, the Company is required to comply with the following covenants:
- the current ratio must be more than 1.25 times;
- the debt to equity ratio must not exceed 3 times;
- the interest coverage ratio must be more than 1.5 times;
- the promoter’s holding must not be less than 51%;
- the debt service coverage ratio must be more than 1.2 times;
- the debt to tangible net worth ratio must not be more than 2.5 times;
- the adjustable tangible net worth of the Company must be more than ₹ 73,440.

The Company has complied with these covenants throughout the reporting period.

50 Related party disclosures

The Company’s related party transactions and outstanding balances are with its subsidiaries, associates and joint venture, key management and others as described below.

A. Relationships

a) Subsidiaries

- Daawat Foods Limited
- SDC Foods India Limited
- Nature Bio Foods Limited
- LT International Limited

* During the current year the Company has sold its share in the Joint Venture (JV) Geona Rice Mills Private Limited in September 2019 however the agreement to terminate the JV was entered in the previous year 2018-19. Hence no figures related to the financial figures of the said JV are reportable.

53 Revenue from Contracts with Customers

Indian Accounting Standard 115 Revenue from Contracts with Customers (“Ind AS 115”), establishes a framework for determining whether, how much and when revenue is recognised and requires disclosures about the nature, amount, timing and uncertainty of revenues and cash flows arising from customer contracts. Under Ind AS 115, revenue is recognised through a 5-step approach:

(i) Identify the contract(s) with customer;
(ii) Identify separate performance obligations in the contract;
(iii) Determine the transaction price;
(iv) Allocate the transaction price to the performance obligations; and
(v) Recognise revenue when a performance obligation is satisfied.

54. The outbreak of Coronavirus (Covid 19) has disrupted economic activities across the world. However, the Company continued to operate its manufacturing facilities and distribute its products which are covered under the essential commodities category. Though, there have been some operational difficulties due to lockdown imposed in various regions, the impact on overall operations have not been significant. As the economic environment continues to remain highly uncertain, the management is regularly monitoring the development in countries where it operate or supplies goods and take necessary action to adapt to changing environment.

55. Previous year figures

Previous year’s figures have been regrouped/ reclassified wherever necessary, to confirm to current year’s classification.

Independent Auditor’s Report

To the Members of LT Foods Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

1. We have audited the accompanying consolidated financial statements of LT Foods Limited (‘the Holding Company’) and its subsidiaries (the Holding Company and its subsidiaries together referred to as ‘the Group’), its associates and joint venture, which comprise the Consolidated Balance Sheet as at 31st March 2020, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries and associates, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 (‘Act’) in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Indian Accounting Standards (‘Ind AS’) specified under section 133 of the Act, of the consolidated state of affairs of the Group, its associates and joint venture, as at 31st March 2020, and their consolidated profit (including other comprehensive income), consolidated cash flows and the consolidated changes in equity for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (‘ICAI’) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained, and the audit evidence obtained by the other auditors in terms of their reports referred to in paragraph 14 of the Other Matter section below, is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

4. Key audit matters are those matters that, in our professional judgment and based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries and associates, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

Revenue recognition – Sale of Products

Refer to the Group’s significant accounting policies in note 2(v)(ii) and the revenue related disclosures in note 35 of the consolidated financial statements.

Revenue of the Company primarily comprises of revenue from sale of rice and other food products.

In accordance with Standards on Auditing, there is a presumed fraud risk relating to revenue recognition. Further, there is continuous pressure on the management to achieve planned results. Accordingly, occurrence and existence of revenue is a key focus area on account of the multiple channels for sales, various categories of customers and significant variations in sales quantities during certain periods of the year. Further, there are sporadic high value transactions requiring special audit attention and evaluation as they involve varying terms of contracts with such customers.

Due to the above factors, we have identified testing of revenue recognition as a key audit matter.

How our audit addressed the key audit matter

Our audit procedures included, but were not limited to the following:

• Obtained an understanding of the process of revenue stream of sale of rice and other food products.
• Evaluated the design, implementation and tested the operating effectiveness of key controls over revenue recognition including around quantity sold, pricing and accounting of revenue transactions;
• Evaluated the terms and conditions of the contracts, including inco terms, with customers to ensure that the revenue recognition criteria are assessed by the management in accordance with the accounting standards;
• On a sample basis, tested revenue transactions recorded during the year, and revenue transactions recorded in the period before and after year-end, with supporting documents such as invoices, agreements with customers, proof of deliveries, and subsequent collection of payments;
• Performed other substantive audit procedures including obtaining debtor confirmations on a sample basis and reconciling revenue recorded during the year with statutory returns;
• Evaluated disclosures made in the financial statement for revenue recognition from sale of goods for appropriateness in accordance with the accounting standards.

Independent Auditor’s Report

Independent Auditor’s Report

Key audit matter

Inventory existence and valuation

Refer to the Group’s significant accounting policies in note 2(vi)(b) and the inventory related disclosures in note 12 of the consolidated financial statements.

The inventory primarily comprises of paddy, semi-finished and finished rice. Inventory holding is generally significant at the end of the financial year considering seasonality of the agricultural produce of paddy. Such inventory is stored in plants, warehouses, silos, yards and storage bags. High quantity of inventory at the year-end makes inventory physical verification an extensive procedure for the management.

The production process of rice involves mixing of different varieties of purchased rice and manufactured rice, and also leads to generation of by-products such as bran, husk and broken rice. Production process also involves ageing the paddy/ rice to achieve desired quality of end produce. The valuation of semi-finished and finished rice is a complex exercise and is carried out manually through excel spreadsheets. The valuation process involves estimation around determination of:

- Overhead absorption rates
- Determination of yield,
- Determination of net realisable value of by-products, and
- Calculation of holding period and determination of weighted average borrowing cost.

Due to outbreak of the COVID-19, there has been a lockdown enforced in the country near year-end and several restrictions were imposed by the government on travel and movement considering public health and safety measures which resulted into complexities for us to observe the physical verification of inventory conducted by the management. This necessitated using alternate audit techniques as further described in our audit procedures.

How our audit addressed the key audit matter

Our audit procedures included, but were not limited to the following:

Existence:

- Obtained an understanding of management’s process of inventory management and inventory valuation process performed at year end;
- Evaluated the design effectiveness of controls over inventory management process/inventory physical verification and tested key controls for their operating effectiveness;
- Reviewed the instructions given by senior management to stock count teams, including ensuring proper segregation of stock, use of calibration scales/charts, separate identification of goods received after year end, identification of damaged inventory, if any, etc;
- Obtained inventory records and results of management conducted count;
- Reviewed reconciliation of differences, if any, between management physical count and inventory records, and tested the necessary adjustment made in the inventory records by the management, if any;
- Appointed an independent firm of Chartered Accountants (‘independent CA firm’) for providing direct assistance in carrying out physical verification of the inventory on a sample basis subsequent to the balance sheet date and supervised and reviewed the work performed by them;
- Reviewed the inventory roll back reconciliation statement prepared by the management and performed tests on sample basis by reviewing the supporting documents and records to substantiate the existence of inventory as at the reporting date; and
- Reviewed the quantitative reconciliation of inventory taking into account the quantity of paddy milled, rice produced, sales and inventory till the date of the inventory verification by the independent CA firm.

Independent Auditor’s Report

Key audit matter

Valuation:

- Obtained an understanding of management process of inventory valuation;
- Evaluated design effectiveness of controls over inventory valuation process and tested key controls for their operating effectiveness;
- Tested inputs into the valuation process from source documents/ general ledger accounts;
- Tested reconciliation of opening inventory, purchase/ production, sales and year-end inventory to validate yield during the year and to identify any abnormal production loss;
- Compared key estimates, including those involved in computation of overhead absorption and borrowing cost, to prior years and enquired reasons for any significant variations;
- Checked net realisable value of by-products from actual sales proceeds near/ subsequent to the year-end, and
- Tested arithmetical accuracy of valuation calculations.

Evaluated appropriateness of disclosure of inventory year-end balance in the financial statements.

The auditors of Daawat Foods Limited have performed the below audit procedures:

- Discussed and obtained understanding of the Company’s process for identification and monitoring of significant developments in relation to the pending claim.
- Evaluated the design and tested the operating effectiveness of key controls around the estimation of the likely outcome of the litigation and its resultant impact on the accompanying consolidated financial statements.
- Held discussions with the management and legal head of the Group to understand the developments and corroborated the same from the relevant documents available including correspondence with external lawyers.
- Assessed the appropriateness and tenability of the quantum of claim recognised with underlying supporting documents including claim filed by the subsidiary company and surveyors’ reports.

Recoverability of insurance claim on loss of inventory by fire

In addition to the above, the auditors of Daawat Foods Limited, a subsidiary company, have reported below key audit matter:

Refer note 8 in the Consolidated financial statements.

A major fire occurred in the subsidiary company, Daawat Foods Limited, resulting in loss of inventory of raw material having a book value of ₹ 17,991.40 lakhs and the subsidiary company had filed an insurance claim of ₹ 18,971.02 lakhs. The insurance company has repudiated the insurance claim vide its order dated 4th February 2016 against which the subsidiary company filed a civil suit. On the basis of developments in the case including surveyor reports, the subsidiary company has written off claim of ₹ 4,400 lakhs. The carrying value of the insurance claim amounts to ₹ 13,410.53 lakhs as at 31st March 2020.
Independent Auditor’s Report

Key audit matter

The amounts involved are significant and determining the recoverability of the amount from the insurance company is dependent on future developments in the ongoing legal case which involves significant judgment considering the developments in the legal case because of the high estimation uncertainty involved, we have considered this matter to be a key audit matter in the current year.

This matter has also been considered as fundamental to the understanding of the users of the financial statements by the component auditor, who has drawn attention to the uncertainties related to the outcome of ongoing litigation related to the recoverability of insurance claim receivable.

How our audit addressed the key audit matter

• Obtained and evaluated independent external legal advice on the said matter. We also evaluated independence, competence and objectivity of the legal expert engaged by the management.

• Evaluated the appropriateness of the disclosures made in the accompanying consolidated financial statements with relation to this matter.

Information other than the Consolidated Financial Statements and Auditor’s Report thereon

The Holding Company’s Board of Directors are responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated financial statements and our auditor’s report thereon. The Annual Report is expected to be made available to us after the date of this auditor’s report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

6. The accompanying consolidated financial statements have been approved by the Holding Company’s Board of Directors. The Holding Company’s Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these consolidated financial statements that give a true and fair view of the consolidated state of affairs (consolidated financial position), consolidated profit or loss (consolidated financial performance including other comprehensive income), consolidated changes in equity and consolidated cash flows in the Group including its associates and joint venture in accordance with the accounting principles generally accepted in India, including the Ind AS specified under section 133 of the Act. The Holding Company’s Board of Directors is also responsible for ensuring accuracy of records including financial information considered necessary for the preparation of consolidated Ind AS financial statements. Further, in terms of the provisions of the Act, the respective Board of Directors /management of the companies included in the Group, and its associate companies and joint venture company covered under the Act are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements.

Independent Auditor’s Report

that give a true and fair view and are free from material misstatement, whether due to fraud or error. These financial statements have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

7. In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates and joint venture are responsible for assessing the ability of the Group and of its associates and joint venture to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

8. Board of Directors is also responsible for overseeing the financial reporting process of the companies included in the Group and of its associates and joint venture.

Auditor’s Responsibilities for the Audit of the Financial Statements

9. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

10. As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

• Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

• Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;

• Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;

• Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associates and joint venture to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Group and its associates and joint ventures to cease to continue as a going concern;

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

• Obtain sufficient appropriate audit evidence regarding the financial information of the entities within the Group, and its associates and joint venture, to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities included in the financial statements, of which the members are the independent auditors.
LT Foods Limited | Annual Report 2019-20

Independent Auditor’s Report

For the other entities included in the financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

13. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

14. We did not audit the financial statements of certain subsidiaries, whose financial statements reflect total assets of ₹ 248,562.69 lakhs (Net of eliminations ₹ 220,347.97 lakhs) and net assets of ₹ 69,719.51 lakhs as at 31st March 2020, total revenues of ₹77,795.74 lakhs (net of eliminations ₹ 249,350.02 lakhs) and net cash outflows amounting to ₹ 1,061.92 lakhs for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group’s share of net loss (including other comprehensive loss) of ₹ 117.34 lakhs for the year ended 31st March 2020, as considered in the consolidated financial statements, in respect of 2 associates and, whose financial statements have not been audited by us.

These financial statements have been audited by other auditors whose reports have been furnished to us by the management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and associates, and our report in terms of sub-section (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries and associates, are based solely on the reports of the other auditors.

Further, of these subsidiaries and associates, certain subsidiaries, are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Holding Company’s management has converted the financial statements of such subsidiaries located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Holding Company’s management. Our opinion on the consolidated financial statements, in so far as it relates to the balances and affairs of such subsidiaries, located outside India, are based on the report of other auditors and the conversion adjustments prepared by the management of the Holding Company and audited by us.

Our opinion above on the consolidated financial statements, and our report on other legal and regulatory requirements below, are not modified in respect of the above matters with respect to our reliance on the work done by and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

15. As required by section 197(16) of the Act, based on our audit and on the consideration of the reports of the other auditors, referred to in paragraph 14, on separate financial statements of the subsidiaries and associates, we report that the Holding Company, its subsidiary companies, associate companies and joint venture companies covered under the Act paid remuneration to their respective directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.

Independent Auditor’s Report

16. As required by Section 143 (3) of the Act, based on our audit and on the consideration of the reports of the other auditors on separate financial statements and other financial information of the subsidiaries and associates we report, to the extent applicable, that:

a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated financial statements;

b) in our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors;

c) the consolidated financial statements dealt with by this report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements;

d) in our opinion, the aforesaid consolidated financial statements comply with Ind AS specified under section 133 of the Act;

e) on the basis of the written representations received from the directors of the Holding Company and taken on record by the Board of Directors of the Holding Company and the reports of the statutory auditors of its subsidiary companies, associate companies and joint venture companies covered under the Act, none of the directors of the Group companies, its associate companies and joint venture company covered under the Act, are disqualified as on 31st March 2020 from being appointed as a director in terms of Section 164(2) of the Act;

f) with respect to the adequacy of the internal financial controls with reference to financial statements of the Holding Company, and its subsidiary companies, associate companies and joint venture company covered under the Act, and the operating effectiveness of such controls, refer to our separate report in ‘Annexure A’;

g) with respect to the other matters to be included in the Auditor’s Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries, associates and joint ventures:

i. the consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group, its associates and joint venture as detailed in Note 47 to the consolidated financial statements;

ii. the Holding Company and its subsidiary companies, associates and joint venture did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31st March 2020;

iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, and its subsidiary companies, associate companies and joint venture company covered under the Act, during the year ended 31st March 2020; and

iv. the disclosure requirements relating to holdings as well as dealings in specified bank notes were applicable for the period from 8th November 2016 to 30th December 2016, which are not relevant to these consolidated financial statements. Hence, reporting under this clause is not applicable.

Financial Statements
Independent Auditor's Report on the internal financial controls with reference to financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (‘the Act’)

In conjunction with our audit of the consolidated financial statements of LT Foods Limited (“the Company”), its subsidiaries (“the Holding Company and its subsidiaries together referred to as ‘the Group’”), its associates and joint venture as at and for the year ended 31st March 2020, we have audited the internal financial controls with respect to the financial statements of the Holding Company, its subsidiary companies, its associate companies and joint venture company, which are companies covered under the Act, as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

The respective Board of Directors of the Holding Company, its subsidiary companies, its associate companies and joint venture companies, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (“ICAI”). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company’s business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor’s Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Holding Company, its subsidiary companies, its associate companies and joint venture company, as aforesaid, based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. The Guidance Note prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the Guidance Note) issued by the ICAI. Those Standards and the Guidance Note require that we plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

1. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

2. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to financial statements of the Holding Company, its subsidiary companies, its associate companies and joint venture company as aforesaid.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company’s internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion and based on the consideration of the reports of the other auditors on internal financial controls with reference to financial statements of the subsidiary companies, associate companies and joint venture company, the Holding Company, its subsidiary companies, its associate companies and joint venture companies, which are companies covered under the Act, have in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31st March 2020, based on the criteria established by the Company considering the essential components of internal control stated in Guidance Note issued by the ICAI.

Independent Auditor’s Report

9. We did not audit the internal financial controls with reference to financial statements insofar as it relates to certain subsidiary companies, which are companies covered under the Act, whose financial statements reflect total assets of ₹ 127,029.30 lakhs (net of elimination ₹ 98,814.58 lakhs) and net assets of ₹ 31,085.88 lakhs as at 31st March 2020, total revenues of ₹159,973.76 lakhs (net of eliminations ₹ 37,041.03 lakhs) and net cash outflows amounting to ₹ 129.36 lakhs for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group’s share of net loss of ₹ 117.54 lakhs for the year ended 31st March 2020 in respect of 2 associate companies, which are companies covered under the Act, whose internal financial controls with reference to financial statements have not been audited by us. The internal financial controls with reference to financial statements in so far as it relates to such subsidiary companies and associate companies have been audited by other auditors whose reports have been furnished to us by the management and our report on the adequacy and operating effectiveness of the internal financial controls with reference to financial statements for the Holding Company, its subsidiary companies and its associate companies, as aforesaid, under Section 143(3)(i) of the Act in so far as it relates to such subsidiary companies and associate companies is based solely on the reports of the auditors of such companies. Our opinion is not modified in respect of this matter with respect to our reliance on the work done by and on the reports of the other auditors.

Basis of Preparation

The consolidated financial statements have been prepared on going concern basis in accordance with accounting principles generally accepted in India. Further, the consolidated financial statements have been prepared on historical cost basis except for certain financial assets and financial liabilities which are measured at fair values as explained in relevant accounting policies. Fair valuations related to financial assets and financial liabilities are categorised into level 1, level 2 and level 3 based on the degree to which the fair values to measurement are observable.

Summary of significant accounting policies
for the year ended March 31, 2020

1. i) Corporate Information

The consolidated financial statements of LT Foods Limited ("the Holding Group"), together with its subsidiaries (collectively referred to as the "Group"), associates and jointly controlled entity, having its registered office at Unit No 134, 1st Floor, Rectangle-I, Saket District Centre, New Delhi-110017, is primarily engaged in the business of milling, processing and marketing of branded and non-branded basmati rice and manufacturing of rice food products in the domestic and overseas market. LT Foods Limited operations include procurement, storage, processing, packaging and distribution. The Group is also engaged in research and development to add value to rice and rice food products. The Group’s rice product portfolio comprises brown rice, white rice, steamed rice, parboiled rice, organic rice, quick cooking rice, value added rice and flavored rice in the ready to cook segment.

2. Summary of significant accounting policies

i) Overall consideration

The consolidated financial statements have been prepared using the significant accounting policies and measurement basis summarised below. These were used throughout all periods presented in the financial statements, except where the Group has applied certain accounting policies and exemptions upon transition to Ind AS.

ii) Basis of Preparation

The consolidated financial statements have been prepared on going concern basis in accordance with accounting principles generally accepted in India. Further, the consolidated financial statements have been prepared on historical cost basis except for certain financial assets and financial liabilities which are measured at fair values as explained in relevant accounting policies. Fair valuations related to financial assets and financial liabilities are categorised into level 1, level 2 and level 3 based on the degree to which the fair values to measurement are observable.

iii) Current versus non-current classification

Deferred tax assets and liabilities are classified as non-current assets and liabilities. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

iv) Basis of consolidation

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed
Summary of significant accounting policies
for the year ended March 31, 2020

to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

Non-controlling interests (‘NCI’)
Non-controlling interests, presented as part of equity, represent the portion of a subsidiary’s Statement of Profit and Loss and net assets that is not held by the Group. Statement of Profit and Loss balance (including other comprehensive income (‘OCI’)) is attributed to the equity holders of the Holding Group and to the non-controlling interest the respective ownership interests and such balance is attributed even if this results in controlling interests having a deficit balance.

Equity accounted investees
The Group’s interests in equity accounted investees comprise interests in associates and joint ventures.

An associate is an entity in which the Group has significant influence, but not control or joint control, over the financial and operating policies. A joint venture is a venture in which the Group has joint control and has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities.

Interests in associates and joint ventures are accounted for using the equity method. They are initially recognised at cost which includes transaction costs. Subsequent to initial recognition, the consolidated financial statements include the Group’s share of profit or loss and OCI of equity-accounted investees until the date on which significant influence or joint control ceases.

Transactions eliminated on consolidation
Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group’s interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

v) Significant accounting policies

a) Use of estimates
The preparation of the consolidated financial statements in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

b) Inventories
Inventories are valued as follows:

- **Raw materials, stores and spares and packing materials**
  - Lower of cost or net realisable value. Cost is determined on ‘First in First Out’ basis and includes interest on raw materials as a carrying cost of materials where such materials are stored for a substantial period of time.
  - Raw material comprising Bardana is valued at net realisable value. Stores and spares having useful life of more than twelve months are capitalised as tangible assets under “Property, plant and equipment” and are depreciated prospectively over their remaining useful lives in accordance with Ind AS 16.

- **Work in progress**
  - Raw material cost and a proportion of direct and indirect overheads up to estimated stage of completion and also includes interest allocated as carrying cost.

Finished goods

Lower of cost or net realisable value. Cost includes cost of raw materials, direct and indirect overheads which are incurred to bring the inventories to their present location and condition and also includes interest as a carrying cost of goods where such goods are stored for a substantial period of time.

b) Property, plant and equipment

**Recognition and initial measurement**

Property, plant and equipment are stated at their cost of acquisition. The cost comprises purchase price, borrowing cost if capitalisation criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price. Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits attributable to such subsequent costs associated with the item will flow to the Group. All other repair and maintenance costs are recognised in Statement of Profit or Loss as incurred.

**Subsequent measurement (depreciation and useful lives)**

Depreciation on property, plant and equipment is provided on the written down value method arrived on the basis of the useful life prescribed under Schedule II of the Companies Act, 2013 or the management estimate of the useful life of the asset, disclosed separately below. The identified components are depreciated over their useful lives; the remaining asset is depreciated over the life of the principal asset.

Based on internal assessment and independent technical evaluation carried out by external valuer, the management has re-estimated the useful life of Silos included in Plant and Machinery from 15 years to 10 years with effect from 1st April 2016. The management believes that the useful life represents the period over which the assets are expected to be used. The useful life of this asset is different from the useful life as prescribed under part C of Schedule II of the Companies Act, 2013. The residual values, useful lives and method of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

Depreciation on the following property, plant and equipment of certain subsidiaries is charged on straight line basis, at the rates based on the useful life of the assets as estimated by the management.

De-recognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in Statement of Profit and Loss when the asset is derecognised.

c) Intangible assets

**Recognition and initial measurement**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and impairment losses, if any.

Intangible assets with finite lives are amortised over the useful economic life and impairment assessment is done annually. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify...
Summary of significant accounting policies  
for the year ended March 31, 2020

the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit and Loss.

**Amortisation**

Amortisation of intangible assets is provided on the written down value method arrived on the basis of the useful life prescribed under Schedule II of the Companies Act, 2013 or the management estimate of the useful life of the asset, disclosed separately below.

Amortisation of intangible assets of certain subsidiaries is provided on straight line basis, at the rates based on the useful life of the assets as estimated by the management.

**De-recognition**

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is de-recognised.

**e) Investment properties**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and borrowing costs (where applicable). Subsequent expenditure is capitalised to the asset’s carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is de-recognised.

**f) Impairment of non-financial assets**

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment losses of continuing operations are recognised in the Statement of Profit and Loss.

After impairment, depreciation / amortisation is provided on the revised carrying amount of the asset over its remaining useful life.

The impairment assessment for all assets is made at each reporting date to determine whether there is an indication that previous recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset’s or CGU’s recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset’s recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation / amortisation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss.

**g) Functional and presentation currency**

The consolidated financial statements are presented in Indian Rupee (‘INR’) which is also the functional and presentation currency of the Holding Group.

**Transactions and balances**

Foreign currency transactions are recorded in the functional currency, by applying to the exchange rate between the functional currency and the foreign currency at the date of the transaction. Foreign currency monetary items are converted to functional currency using the closing rate. Non-monetary items denominated in a foreign currency which are carried at historical cost are reported using the exchange rate at the date of the transaction, and non-monetary items which are carried at fair value or any other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

Exchange differences arising on monetary items on settlement, or restatement as at reporting date, at rates different from those at which they were initially recorded, are recognised in the Statement of Profit and Loss in the year in which they arise.

Conversion

Functional and reporting currencies of foreign operations are different from the reporting currency of the Holding Group. For all the foreign operations of the Group, all assets and liabilities (excluding share capital and opening reserves and surplus) are translated into INR using the exchange rate prevailing at the reporting date. Share capital, reserves and surplus are carried at historical cost. Revenues, costs and expenses are translated using the weighted average exchange rate during the reporting period. The resultant currency translation difference is recognised as foreign currency translation reserve under the head ‘other equity’.

**Foreign operations**

The assets and liabilities of foreign operations (subsidiaries) including goodwill and fair value adjustments arising on acquisition, are translated into INR, the reporting currency of the Group, at the exchange rates at the reporting date. The income and expenses of foreign operations are translated into INR at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

When a foreign operation is disposed of in its entirety or partially such that control, significant influence or joint control is lost, the cumulative amount of exchange differences related to that foreign operation recognised in OCI is reclassified to Statement of Profit and Loss as part of the gain or loss on disposal. If the Group disposes of part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is re-allocated to NCI. When the Group disposes of only a part of its interest in an associate or a joint venture while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to Statement of Profit and Loss.
Summary of significant accounting policies
for the year ended March 31, 2020

h) Fair value measurement
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account market participant’s ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period or each case.

For the purpose of fair value disclosures, group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

- Disclosures for valuation methods, significant estimates and assumptions
- Quantitative disclosures of fair value measurement hierarchy
- Investment in unquoted equity shares
- Financial instruments

i) Revenue Recognition
Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. A performance obligation is a promise in a contract to transfer a distinct good or service (or a bundle of goods and services) to the customer and is the unit of account in Ind AS 115. A contract’s transaction price is allocated to each distinct performance obligation recognised as revenue, as, or when, the performance obligation is satisfied. The Group recognises revenue when it transfers control of a product or service to a customer. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payments and excludes taxes and duties collected on behalf of the government. The Group recognises revenue from the following major sources:

Sale of goods:
Revenue from sale of goods is recognised when it transfers control of the product to a customer i.e. when customers are billed (in case of ex-works) or when goods are delivered at the delivery point, as per terms of the agreement, which could be either customer premises or carrier premises who will deliver goods to the customer. When payments received from the customers exceed revenue recognised to date on a particular contract, any excess (a contract liability) is reported in the statement of financial position under other liabilities.

Customer has a right to return for defective goods. Since the quantity of goods returned has been minimal for years, it is highly probable that a significant reversal in the cumulative revenue recognised will not occur.

In order to determine if it is acting as a principal or as an agent, the Group assesses whether it has exposure to the significant risks and rewards associated with the rendering of logistics services. Revenue from rendering of logistic services provided to its customer after the transfer of control of underlying goods is recognised on net basis i.e. after deducting the amount contractually payable to transporters out of the total consideration received and is recognised once the facilitation of such service is done as the Group does not assume any performance obligation.

Satisfaction of performance obligations
The Group revenue is derived from the single performance obligation to transfer primarily rice and other products under arrangements in which the transfer of control of the products and the fulfillment of the Group’s performance obligation occur at the same time. Therefore, revenue from the sale of goods is recognised when the Group transfers control at the point in time the customer takes undisputed delivery of the goods.

Whether the customer has obtained control over the asset depends on when the goods are made available to the carrier or the buyer takes possession of the goods, depending on the delivery terms. Revenue is measured at the transaction price of the consideration received or receivable, the amount the Group expects to be entitled to.

Payment terms
The sale of goods is typically made under credit payment terms differing from customer to customer and ranges between 0-180 days. No element of financing is deemed present as the sales are made with a credit term of upto 180 days, which is consistent with market practice.

Rental income
Leases in which the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Lease income on an operating lease is recognised in the Statement of Profit and Loss on a straight line basis over the lease term unless the escalation rate does not matches up in line with the increase in the inflation rate.

Dividend income
Dividend income is recognised at the time when right to receive the payment is established, which is generally when the shareholders approve the dividend.

Interest income
Interest income is recognised on time proportion basis taking into account the amount outstanding and rate applicable.

For all financial assets measured at amortised cost (refer ‘I’ below), interest income is recorded using the effective interest rate (EIR) i.e. the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial assets. The future cash flows include all other transaction costs paid or received, premiums or discounts if any, etc.

Service concession arrangements
Revenue related to construction or upgrade services provided under a service
Summary of significant accounting policies
for the year ended March 31, 2020

concession arrangement is recognised based on the stage of completion of the work performed, consistent with the Group’s accounting policy on recognising revenue on construction contracts. Operation or service revenue is recognised in the period in which the services are provided by the Group.

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably.

If the outcome of a construction contract can be estimated reliably, contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed by reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

Contract costs are recognised as expenses as incurred unless they create an asset related to future contract activity. An expected loss on a contract is recognised immediately in profit or loss.

Recognition and initial measurement

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

Subsequent measurement (Amortisation and useful lives)

All finite-lived intangible assets, including internally developed intangible assets, are accounted for using the cost model whereby capitalised costs are amortised on a straight line basis over their estimated useful lives. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition and other economic factors (such as the liability of the industry, and known technological advances), and the level of maintenance expenditure required to obtain the expected future cash flows from the asset.

De-recognition

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is de-recognised

Income from services:

The Group derives its other operating revenue primarily from service charges and processing charges and the revenue from these services are recognised as revenue when the related services are rendered i.e. on accrual basis in accordance with the terms of the contract entered into in respect thereof.

j) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest calculated using the effective interest rate (EIR) that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

k) Financial instruments

Financial assets and liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument and are measured initially at fair value. Financial assets and liabilities, except for those carried at fair value through profit or loss which are measured initially at fair value.

Subsequent measurement of financial assets and financial liabilities is described below.

Financial assets

Classification and subsequent measurement

For the purpose of subsequent measurement, financial assets are classified into the following categories upon initial recognition:

i. Financial assets at amortised cost – A financial instrument is measured at amortised cost if both the following conditions are met:

• The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and

• Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest method.

ii. Financial assets at fair value

• Investments in equity instruments – All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are generally classified as at fair value through profit and loss (FVTPL). All other equity instruments, the Group decides to classify the same either as at fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL). The Group makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the other comprehensive income (OCI).

There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity. Dividends on such investments are recognised in Statement of Profit and Loss unless the dividend clearly represents a recovery of part of the cost of the investment.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of Profit and Loss.

• Mutual funds – All mutual funds in scope of Ind-AS 109 are measured at fair value through profit and loss (FVTPL).

• Derivative assets – All derivative assets are measured at fair value through profit and loss (FVTPL).

De-recognition of financial assets

A financial asset is primarily de-recognised when the rights to receive cash flows from the asset have expired or the Group has transferred its rights to receive cash flows from the asset.

Financial liabilities

Subsequent measurement

After initial recognition, the financial liabilities, other than derivative liabilities, are subsequently measured at amortised cost using the effective interest method.

Amortised cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The effect of EIR amortisation is included as finance costs in the Statement of Profit and Loss.

Derivative liabilities – All derivative liabilities are measured at fair value through profit and loss (FVTPL).

De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged.
Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Impairment of financial assets

The Group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables only, the group applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Hedge

Initial and subsequent measurement

The Group uses derivative financial instruments, such as forward contracts to hedge its foreign currency risks and interest rate risks and non-derivative financial liabilities to hedge its foreign currency risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Foreign currency risk of non-derivative financial liabilities used for hedging is measured using spot rates.

Any gains or losses arising from changes in the fair value of derivatives and change in foreign currency risk component of non-derivative financial liabilities are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in Other Comprehensive Income (OCI) and later reclassified to Statement of Profit and Loss when the hedged item affects profit or loss. For the purpose of hedge accounting, hedges are classified as cash flow hedges where group hedges its exposure to variability in cash flows that is attributable to foreign currency risk and interest rate risk associated with recognised liabilities in the financial statements.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the group’s risk management objective and strategy for undertaking hedge, the hedging economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in cash flows and are assessed on an ongoing basis to determine that they continue to be highly effective throughout the financial reporting periods for which they are designated.

When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in equity at that time remains in equity until the forecast transaction occurs. When the forecast transaction is no longer expected to occur, the cumulative gain or loss and deferred costs of hedging that were reported in equity are immediately reclassified to profit or loss within other gains/(losses).

Defined Contribution plan

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service.

Defined benefit plans

The Group operates a defined benefit gratuity plan in India. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Other employee benefits

Compensated absences

Liability in respect of compensated absences becoming due or expected to be availed within one year from the balance sheet date is recognised on the basis of undiscounted value of estimated amount required to be paid or estimated value of benefit expected to be availed by the employees. Liability in respect of compensated absences becoming due or expected to be availed more than one year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Other short term benefits

Expense in respect of other short-term benefits is recognised on the basis of amount paid or payable for the period during which services are rendered by the employees.

Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

Provisions are measured at the present value of management’s best estimate of the expenditure required to settle the provision at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

Potential ordinary shares shall be treated as dilutive where and only when, their conversion to ordinary shares would decrease earnings per share or increase loss per share from continuing operations.
p) Leases

The Group has adopted Ind AS 116-Leases effective from 1st April 2019, using the modified retrospective method. The Group has applied the standard to its leases with the cumulative impact recognised on the date of initial application (1st April 2019). Accordingly, previous period information has not been restated.

The Group’s lease asset classes primarily consist of leases for plant and machinery. The Group assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identifiable asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

(i) the contract involves the use of an identified asset;
(ii) the Group has substantially all of the economic benefits from use of the asset through the period of the lease;
(iii) the Group has the right to direct the use of the asset. At the date of commencement of the lease, the Group recognises a right-of-use asset (“ROU”) and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short term leases) and leases of low value assets. For these short term and leases of low value assets, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

(iv) The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made.

(v) A lease liability is remeasured upon the occurrence of certain events such as a change in the lease term or a change in an index or rate used to determine lease payments. The remeasurement normally also adjusts the leased assets. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

q) Business combinations

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

• fair values of the assets transferred;
• liabilities incurred to the former owners of the acquired business;
• equity interests issued by the group; and
• fair value of any asset or liability resulting from a contingent consideration arrangement.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest’s proportionate share of the acquired entity’s net identifiable assets.

Acquisition-related costs are expensed as incurred.

The excess of the:

• consideration transferred;
• amount of any non-controlling interest in the acquired entity; and
• acquisition-date fair value of any previous equity interest in the acquired entity over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised in other comprehensive income and accumulated in equity as capital reserve provided there is clear evidence of the underlying reasons for classifying the business combination as a bargain purchase. In other cases, the bargain purchase gain is recognised directly in equity as capital reserve.

If the business combination is achieved in stages, the acquisition date carrying value of the acquiree’s previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss or other comprehensive income, as appropriate.

r) Taxes

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and unused tax losses can be utilised. Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits (Minimum alternate tax credit entitlement) and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be realised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to offset current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.
Summary of significant accounting policies
for the year ended March 31, 2020

Minimum alternate tax
Ind AS 12 defines deferred tax to include carry forward of unused tax credits. MAT credits are in the form of unused tax credits that are carried forward by the entity for a specified period of time. Accordingly, MAT credit entitlement should be grouped with deferred tax asset (net) in the Balance Sheet, and a separate note should be provided specifying the nature and amount of MAT credit included as part of deferred tax assets.

Government grants and subsidies
Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Group receives grants of non-monetary assets, the asset and the grant are recorded at fair value amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset i.e. by equal annual installments.

Share-based payments
The Group operates equity-settled share-based remuneration plans for its employees. None of the Group’s plans are cash-settled.

Where employees are rewarded using share-based payments, the fair value of employee services is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example profitability and sales growth targets and performance conditions).

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to equity. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest.

Upon exercise of share options, the proceeds received, net of any directly attributable transaction costs, are allocated to share capital up to the nominal (or par) value of the shares issued with any excess being recorded as share premium.

For transactions between group entities, where the options are granted to employees of any of the group companies, the group shall measure the services received from its employees in accordance with the requirements applicable to equity-settled share-based payment transactions, and recognise a corresponding increase in equity as a contribution from the parent.

Segment reporting
Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

Identification of segments:
In accordance with Ind AS 108 – Operating Segment, the operating segments used to present segment information are identified on the basis of information reviewed by the Group’s management to allocate resources to the segments and assess their performance. An operating segment is a component of the Group that engages in business activities from which it earns revenues and incurs expenses, including revenues and expenses that relate to transactions with any of the Group’s other components. Results of the operating segments are reviewed regularly by the management team (chairman and chief financial officer) which has been identified as the chief operating decision maker (CODM), to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available.

Allocation of common costs:
Common allocable costs are allocated to each segment accordingly to the relative contribution of each segment to the total common costs.

Unallocated items:
Unallocated items include general corporate income and expense items which are not allocated to any business segment.

Segment accounting policies
The Group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Group as a whole.

Cash and cash equivalents
Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

Cash dividend distribution to equity holders
The Group recognises a liability to make cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Group. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

Significant management judgements
The following are significant management judgements in applying the accounting policies of the Group that have the most significant effect on the financial statements.

Recognition of deferred tax assets
The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilised.

Recognition of deferred tax liability on undistributed profits
The extent to which the Holding Group can control the timing of reversal of deferred tax liability on undistributed profits of its subsidiaries requires judgement.

Evaluation of indicators for impairment of assets
The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

Defined benefit obligation (DBO)
Management’s estimate of the DBO is based on a number of critical underlying assumptions such as standard rates and effects on inflation, medical cost trends, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expense.

Significant estimates
Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be different.

Fair value measurements
Management applies valuation techniques to determine the fair value of financial assets and liabilities.
Notes forming part of the Consolidated Financial Statements

** The Group’s investment property situated at South Ridge, Dubai, United Arab Emirates held for the purpose of capital appreciation was under the cancellable operating lease. During the previous year, the Group started operating the said investment property for the purpose of its business. Consequently, such investment property has been reclassified as building in the schedule of property, plant and equipment.

A Contractual obligations

Refer note 47(B) for disclosure of contractual commitments for the acquisition of property, plant and equipment.

B Property, plant and equipment pledged as security

Refer note 56 for information on property, plant and equipment pledged as security by the Group.
Notes forming part of the Consolidated Financial Statements
for the year ended 31st March (All amounts are in ` lakhs unless otherwise stated)

C Leased assets

Leasehold land includes the following amount where Group is a lessee under a finance lease.

Capitalised borrowings cost on property, plant and equipment (including Capital work-in-progress)

The borrowing costs capitalised during the year ended 31st March 2020 was ` 73.64 (31st March 2019: ` 173.94).

3 Adoption of Ind AS 116 “Leases”

The Group has taken lease for laboratory equipment, warehouses and land. With effect from 1st April 2019, the Group has adopted Ind AS 116, ‘Leases’ retrospectively with the cumulative effect of initially applying the standard, recognised as an adjustment to the opening balance of retained earnings as on the date of initial application (1st April 2019). Accordingly, the Group is not required to restate the comparative information for the year ended 31st March 2019.

‘As a result of initially applying Ind AS 116, in relation to the leases that were previously classified as operating leases, on 1st April 2019, the Group has recognised, a lease liability amounting to ` 17,024.34 measured at the present value of the remaining lease payments. Correspondingly the Group has also recognised right-of-Use (RoU) asset amounting to ` 11,589.08 at its carrying amount as if the standard had been applied since the lease commencement date but discounted using the lessee’s incremental borrowing rate as at 1st April 2019, adjusted for the prepaid or accrued lease payment amounting to ` 52.61 that existed at the date of transition. This has resulted in an adjustment to the opening balance of retained earnings amounting to ` 487.88. As at 31st March 2020 ` 26,942.30 of Right-of-use assets and ` 27,807.75 of lease liabilities is recognised. Also, in relation to those leases under Ind AS 116, the Group has recognised depreciation and finance cost, instead of operating lease expense. During the year ended 31st March 2020, the Group recognised ` 1,962.32 of depreciation charges and ` 824.00 of finance costs from these leases.

Notes forming part of the Consolidated Financial Statements
for the year ended 31st March 2020 (All amounts are in ` lakhs unless otherwise stated)

The following is the summary of practical expedients elected on initial application:

a) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date
b) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application
c) Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application

Following are the changes in the carrying value of right of use assets for the year ended 31st March 2020

The Group has leases for laboratory equipment, warehouses and land. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. The Group has considered automatic extension option available for property leases in lease period assessment since the Group can enforce its right to extend the lease beyond the initial lease period.

ii) Nature of the Group leasing activities by type of right-of-use asset recognised on balance sheet:

</tr>
</tbody>
</table>

vi) Total cash outflow for leases for the year ended 31st March 2020 was ₹ 2,003.10

vii) Lease payments not recognised as a liability

The Group has elected not to recognise a lease liability for short term leases (leases with an expected term of 12 months or less) or for leases of low value assets. Payments made under such leases are expensed on a straight-line basis. The expense relating to payments not included in the measurement of the lease liability for short term leases is ₹ 2,544.59.

viii) Diclosures under Ind AS 17 for the year ended 31st March 2019:

4 Intangible assets (Contd.)

Impairment testing of goodwill

The Group tests whether goodwill has suffered any impairment on an annual basis. The recoverable amount of a cash generating unit (CGU) is determined based on value-in-use calculations which require the use of assumptions. For the purpose of annual impairment testing, goodwill is allocated to the operating segments expected to benefit from the synergies of the business combinations in which the goodwill arises, as follows:

-Milling, processing and marketing of branded and non-branded basmati rice CGU

The recoverable amount of each segment was determined based on value-in-use calculations, covering a detailed three-year forecast, followed by an extrapolation of expected cash flows for the remaining useful lives using a declining growth rate determined by management.

The present value of the expected cash flows of each segment is determined by applying a suitable discount rate reflecting current market assessments of the time value of money and risks specific to the segment.

Cash flow assumptions

Management’s key assumptions include discount rate and change in profit margins, based on past experience in this market.

For the year 31st March 2019 and 31st March 2020, the Group estimated the recoverable amount for aforesaid operating segment. Such recoverable amount was higher than the carrying value and hence, no impairment was recognised. Apart from the considerations in determining the value-in-use of the segments described above, management is not currently aware of any other probable changes that would necessitate changes in its key estimates.

Impairment loss

As a result of the analysis above, management has concluded that there is no impairment in the carrying value of goodwill.

- Raghuvesh Infrastructure Private Limited
- Daawat Kameda India Private Limited
- LT F Food Trading LLC

**Transferred receivables**

The carrying amounts of trade receivables include receivables which are subject to a factoring arrangement. Under this arrangement, the Group has transferred the relevant receivables to the factor in exchange for cash and its prevented from selling or pledging the receivables. However, the Group has retained late payment and credit risk. The Group therefore continues to recognise the transferred assets in their entirety in its balance sheet. The amount repayable under the factoring agreement is presented as secured borrowing. The Group considers the held to collect business model to remain appropriate for these receivables and hence continues measuring them at amortised cost.

The relevant carrying amounts are as follows:

Nature and purpose of other reserves

General reserve:
The Group has transferred a portion of the net profit before declaring dividend to general reserve pursuant to the earlier provision of Companies Act, 1956. Mandatory transfer to general reserve is not required under the Companies Act 2013.

Share options outstanding amount:
During the previous year ended 31st March 2019, no share option were outstanding, there by the amount earlier recognised was transferred to general reserve.

Foreign currency translation reserve
Exchange differences arising on translation of the foreign operations are recognised in other comprehensive income as described in accounting policy and accumulated in a separate reserve within equity. The cumulative amount is reclassified to Statement of Profit and Loss when the net investment is disposed-off.

Cash flow hedge reserve
The cash flow hedge reserve is used to recognise the effective portion of gains or losses on derivatives that are designated and qualify as cash flow hedges.

1 Notes

a) In one of the subsidiary, Daawat Foods Limited (DFL) which had filed appeals in previous years against the order of Assessing Officer (AO) before Commissioner of Income tax (CIT (Appeals)) for the Assessment Year 2007-08 and Assessment Year 2009-10. The CIT (Appeals) has allowed substantial relief to the DFL and after allowing appeal effect of the order of CIT (Appeals) by the AO, the demand has been reduced to ₹59.57 (31st March 2019: ₹ 59.57 ). The DFL has filed appeals against the order of CIT (Appeals) for the above said assessment year before the Income Tax Appellate Tribunal (ITAT), on issues for which relief has not been given by CIT (Appeals). The matter is still pending with ITAT.

During the financial year 2017-18, the DFL had filed appeals in previous years against the order of Assessing Officer (AO) before Commissioner of Income tax (CIT (Appeals)) for the Assessment Year 2012-13 to Assessment Year 2014-15 w.r.t the total demand of ₹ 746 against which ₹133.04 has been deposited under protest. The CIT (Appeals) has allowed substantial relief to the Company thus reducing the demand to ₹1.20 for which the company has made provision.

During the financial year 2017-18, the DFL had filed appeals in previous years against the order of Assessing Officer (AO) before Commissioner of Income tax (CIT (Appeals)) for the Assessment Year 2015-16 w.r.t the total demand of ₹ 298.74. The CIT (Appeals) has allowed substantial relief to the Company thus reducing the demand to ₹ 2.70 for which the company has made provision.

During the financial year 2017-18, the DFL has received demands under section 271(1)(c) for the Assessment Year 2010-11 for ₹ 188.96. The said demand suffers from mistakes apHolding from record and accordingly company had filed an application for rectification of mistake u/s 154 after which the demand will get reduced to ₹ 93.88 . Against this demand of ₹ 93.88 , the DFL has made provision of ₹ 22.98 and for the balance demand of ₹ 70.89 the Company has filed an appeal before the CIT (Appeals). The CIT (Appeals) has allowed the appeal of the company and delete the demand.

During the financial year 2018-19, the DFL has received demands under section 143(3) for the Assessment Year 2016-17 for ₹ 188.96. The said demand suffers from mistakes apHolding from record and accordingly company had filed an application for rectification of mistake u/s 154 after which the demand will get reduced to ₹ 93.88 . Against this demand of ₹ 93.88 , the DFL has made provision of ₹ 22.98 and for the balance demand of ₹ 70.89 the Company has filed an appeal before the CIT (Appeals) for which relief has been allowed to the Company.

b) In case of LT Foods Limited (Holding company) has pending appeals at Income Tax Appellate Tribunal (ITAT) for the Assessment Year 2007-08 to AY 2014-15 and AY 2016-17 on the matters over which no relief was provided by CIT (Appeals) amounting to ₹1,380.69 (previous year ₹ 2,079.36 ). The Holding company’s appeal for AY 1990-00 and AY 2010-11 against the demand under section 271(1)(c) amounting to ₹ 213.69 (previous year ₹ 213.69) are pending at various level of appeals.

During the financial year 2019-20, the Holding company has received demands under section 147 for the Assessment Year 2015-16 for ₹ 466.81 . The Holding company has already filed an appeal before the CIT (Appeals). The matter is still pending with CIT (Appeals).
Notes forming part of the Consolidated Financial Statements

for the year ended 31st March (All amounts are in ₹ lakhs unless otherwise stated)

The Holding company has paid ₹ 1,651.26 (previous year ₹ 1,551.26 ) as per the directions of Income Tax Department against the outstanding demands of various assessment years and the same will be adjusted/refunded, once the appeals are final.

c) In case of Nature Bio Foods Limited (NBFL), during the assessment year 2010-11 the Income tax department (Department) has added back ₹ 24.43 on account of various reasons to the total income of the NBFL. The department has issued notice of demand u/s 156 of the Income Tax Act, 1961 on 28th March 2013 demanding ₹ 5.15. The NBFL had contested the above before CIT(Appeals) and the Ld. CIT(Appeals) has dismissed the appeal vide order dates 19th May 2016. The NBFL had contested the above order before Hon’ble ITAT. Aforesaid demand is including interest upto 28th March 2013 but excluding interest from 1st April 2013 onwards and penalty.

During the assessment year 2013-14 the department has issued notice of Penalty u/s 271 (1) (c) of the Income Tax Act, 1961 demanding ₹ 1.00. The Company had contested the above before CIT(Appeals).

During the assessment year 2014-15 the department has issued notice of Penalty u/s 271 (1) (c) of the Income Tax Act, 1961 demanding ₹ 0.08. The Company had contested the above before CIT(Appeals).

The management is confident that its position is likely to be upheld in the appeals pending before the various appellate authorities and no liability could arise on the Group on account of these proceedings. Accordingly no adjustment has been made in these financial statements (other than provision considered as mentioned above).

(B) Commitments

Capital commitments remaining to be executed and not provided for, net of capital advances ₹ 1,015.10 (31st March 2019: ₹ 733.47)

48 Employee benefit obligations

A Gratuity

The Group provides for gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination/ other decrements (if any) on account of any accident or disease is the employee’s last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service. For the funded plan the Group makes contributions to recognised funds in India. The Group does not fully fund the liability and maintains a target level of funding to be maintained over a period of time based on estimations of expected gratuity payments.

<td>522.88</td>
</tr>
</tbody>
</table>

(vii) Sensitivity analysis for gratuity liability

<table>
<thead>
<tr>
<th>Description</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Impact of the change in discount rate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Present value of obligation at the end of the year</td>
<td>1,206.69</td>
<td>889.28</td>
</tr>
<tr>
<td>- Impact due to increase of 1%</td>
<td>(46.39)</td>
<td>(45.15)</td>
</tr>
<tr>
<td>- Impact due to decrease of 1%</td>
<td>52.53</td>
<td>50.64</td>
</tr>
<tr>
<td>Impact of the change in salary increase</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Present value of obligation at the end of the year</td>
<td>1,206.69</td>
<td>889.28</td>
</tr>
<tr>
<td>- Impact due to increase of 1%</td>
<td>48.54</td>
<td>45.35</td>
</tr>
<tr>
<td>- Impact due to decrease of 1%</td>
<td>(45.43)</td>
<td>(41.54)</td>
</tr>
</tbody>
</table>

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to prior period.

(viii) Maturity profile of defined benefit obligation (undiscounted)

<table>
<thead>
<tr>
<th>Description</th>
<th>31st March 2020</th>

</tbody>
</table>

(ix) Composition of plan assets

<table>
<thead>
<tr>
<th>Description</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>The scheme is funded through an ‘Approved Trust’. The Trust has taken a Policy from the Life Insurance Corporation of India (LIC) and Canara HSBC Oriental Bank of Commerce Life Insurance Company Limited. The management of the fund is undertaken by the LIC.</td>
<td>533.56</td>
<td>366.40</td>
</tr>
</tbody>
</table>

Notes:

1. The discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of obligations.
2. The estimates of future salary increases considered takes into account the inflation, seniority, promotion and other relevant factors on long term basis.

B Compenated absences

The earned leave liability arises on retirement, withdrawal, resignation and death-in-service of an employee. The actuary has used projected unit cost (PUC) actuarial method to assess the plan’s liabilities of employees.

(i) Actuarial assumptions

*Investment in equity instrument of joint venture and associates have been accounted using equity method of accounting and hence, not presented here.

Fair value disclosures:

ii) Fair values hierarchy

Financial assets and financial liabilities measured at fair value in the balance sheet are categorised into three levels of fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

Level 1: quoted prices (unadjusted) in active markets for financial instruments.

Level 2: The fair value of instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data rely as little as possible on entity specific estimates.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Valuation process and technique used to determine fair value

(i) The fair value of investments in government securities and quoted equity shares is based on the current bid price of respective investment as at the balance sheet date.

(ii) In order to arrive at the fair value of unquoted investments, the Group obtains independent valuations. The techniques used by the valuer are as follows:

a) Asset approach - Net assets value method
b) Income approach - Discounted cash flows (“DCF”) method
c) Market approach - Enterprise value/Sales multiple method

(iii) Key man insurance policy fair value is based on surrender value stated by Life Insurance Corporation of India, Max New York Life Insurance Company Limited, SBI Life Insurance Company Limited, Star Union Dai-Ichi Life Insurance and Canara HSBC OBC Life Insurance which represents surrender value for the investors.

Derivative financial assets/liabilities:

The Group enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Foreign exchange forward contracts are valued using valuation techniques which employ the use of market observable inputs. The most frequently applied valuation techniques include forward pricing models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates etc.

(iii) Fair value of instruments measured at amortised cost

Fair value of instruments measured at amortised cost for which fair value is disclosed is as follows:

Notes forming part of the Consolidated Financial Statements
for the year ended 31st March (All amounts are in ₹ lakhs unless otherwise stated)

The management assessed that security deposits, other financial assets and other financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

(i) Long-term fixed-rate and variable-rate receivables are evaluated by the Group based on parameters such as interest rates, individual creditworthiness of the customer and other market risk factors. Based on this evaluation, allowances are taken into account for the expected credit losses of these receivables.

(ii) All the other long term borrowing facilities availed by the Group are variable rate facilities which are subject to changes in underlying interest rate indices. Further, the credit spread on these facilities are subject to change with changes in Group’s creditworthiness. The management believes that the current rate of interest on these loans are in close approximation from market rates applicable to the Group. Therefore, the management estimates that the fair value of these borrowings are approximate to their respective carrying values.

50 Financial risk management

i) Risk management framework

The Group’s activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the related impact in the financial statements.

The Group’s risk management is carried out by a central treasury department (of the Group) under policies approved by the board of directors. The board of directors provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

A) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group’s receivables from customers and investments in debt securities. The carrying amount of financial assets represents the maximum credit exposure.

- cash and cash equivalents,
- trade receivables,

The Group assesses and manages credit risk based on internal credit rating system, continuously monitoring defaults of customers and other counterparties, identified either individually or by the Group, and incorporates this information into its credit risk controls. Internal credit rating is performed for each class of financial instruments with different characteristics. The Group assigns the following credit ratings to each class of financial assets based on the assumptions, inputs and factors specific to the class of financial assets.

A: Low
B: Medium
C: High

</tr>
</tbody>
</table>

Cash and cash equivalents and bank deposits

Credit risk related to cash and cash equivalents and bank deposits is managed by only accepting highly rated banks and diversifying bank deposits and accounts in different banks.

Trade receivables

The Group closely monitors the credit-worthiness of the debtors through internal systems that are configured to define credit limits of customers, thereby, limiting the credit risk to pre-calculated amounts. The Group assesses increase in credit risk on an ongoing basis for amounts receivable that become past due and default is considered to have occurred when amounts receivable become past due one year.

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost includes loans and advances to employees, security deposits and others. Credit risk related to these other financial assets is managed by monitoring the recoverability of such amounts continuously, while at the same time internal control system in place ensure the amounts are within defined limits.

b) Expected credit losses for financial assets other than trade receivables

The Group provides for expected credit losses on loans and advances other than trade receivables by assessing individual financial instruments for expectation of any credit losses. Since, the Group deals with only high-rated banks and financial institutions, credit risk in respect of cash and cash equivalents, other bank balances and bank deposits is evaluated as very low. In respect of other financial assets, credit risk is evaluated based on knowledge of the credit worthiness of those parties and loss allowance is measured as lifetime expected credit losses. The Group does not have any expected loss based on sensitivity analysis.

Expected credit loss for trade receivables under simplified approach

The Group recognises lifetime expected credit losses on trade receivables using a simplified approach, wherein Group has defined percentage of provision by analysing historical trend of default relevant to each business segment based on the criteria defined above and such provision percentage determined have been considered to recognise lifetime expected credit losses on trade receivables (other than those where default criteria are met). Trade receivables are subject to credit limits, controls and approvals processes. Based on the historical experience, the risk of default in case of trade receivables is low.

| Add (Less): Changes in loss allowances | 691.93 |
| Loss allowance on 31st March 2020 | 728.37 |

B) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Group maintains flexibility in funding by maintaining availability under committed facilities.

Management monitors rolling forecasts of the Group’s liquidity position and cash and cash equivalents on the basis of expected cash flows. The Group takes into account the liquidity of the market in which the entity operates.

a) Financing arrangements

The Group had access to the following undrawn borrowing facilities at the end of the reporting period:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>

C) Market risk

Market risk is the risk that changes in market prices - such as foreign exchange rates, interest rates and equity prices - will affect the Group’s income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

a) Foreign currency risk

The Group is exposed to foreign exchange risk arising from foreign currency transactions, primarily with respect to the US Dollar, GBP and Euro. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the Group’s functional currency (INR). The risk is measured through a forecast of highly probable foreign currency cash flows. The objective of the hedges is to minimise the volatility of the INR cash flows of highly probable forecast transactions.

The Group’s policy is to hedge all material foreign exchange risk associated with highly probable forecast sales transactions denominated in foreign currencies. The Group’s policy is to hedge the risk of changes in foreign currency. The Group uses combination of pre-shipment credit in foreign currency (PCFC) and forward contracts (derivative instruments) to hedge its exposure in foreign currency risk. The Group designate both change in spot and forward element of forward contracts and change in spot of PCFCs to hedge exposure in foreign currency risk on highly probable forecast sales.

Notes forming part of the Consolidated Financial Statements
for the year ended 31st March 2020 (All amounts are in ₹ lakhs unless otherwise stated)

The Group hedging policy only allows for effective hedge relationships to be established. Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessment to ensure that an economic relationship exists between the hedged item and hedging instrument.

For forward contracts, hedge effectiveness is measured using hypothetical derivative method. Ineffectiveness is measured by comparing the change in the fair value of the actual derivative i.e. forward contracts designated as the hedging instrument and the change in the fair value of a hypothetical derivative representing the hedged item i.e. highly probable forecast sales. Hypothetical derivative matches the critical terms i.e. maturity date, currency and amount of highly probable forecast sales.

For PCFCs, hedge effectiveness is measured by comparing change in the discounted spot restatement of hypothetical derivative with change in the value of actual hedging instrument i.e. PCFC.

In hedges of foreign currency forecast sales, ineffectiveness mainly arises because of Change in timing of hedged item from that of the hedging instrument and cost of hedging. The ineffectiveness arising in the hedges have been disclosed in above table.

<tr>
<td>Total</td>
<td>64,694.12</td>
<td>42,491.60</td>
</tr>
</tbody>
</table>

Sensitivity

A reasonably possible strengthening (weakening) of the Euro, US dollar, GBP against all other currencies at 31st March 2020 and 31st March 2019 would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below.

Further, the sensitivity of profit or loss to changes in the exchange rates arises mainly from foreign currency denominated financial instruments and the impact on other components of equity arises from foreign forward exchange contracts and pre-shipment credit in foreign currency (PCFC) designated as cash flow hedges.

This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

i) Liabilities

The Group’s policy is to minimise interest rate cash flow risk exposures on long-term financing. At 31st March 2020, the Group is exposed to changes in market interest rates through bank borrowings at variable interest rates. The Group’s investments in fixed deposits all pay fixed interest rates.

Interest rate risk exposure

Below is the overall exposure of the Group to interest rate risk:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Variable rate borrowing</td>
<td>86,035.35</td>
<td>1,04,028.19</td>
</tr>
<tr>
<td>Fixed rate borrowing</td>
<td>62,829.69</td>
<td>65,125.21</td>
</tr>
<tr>
<td>Total borrowings</td>
<td>1,48,865.04</td>
<td>1,69,153.40</td>
</tr>
</tbody>
</table>

Sensitivity

Profit or loss is sensitive to higher/lower interest expense from borrowings as a result of changes in interest rates. In case of fixed rate borrowings a change in interest rates at the reporting date would not affect profit or loss.

<table>
<thead>
<tr>
<th>Particulars</th>
<th>Effect on profit after tax</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>31st March 2020</td>
</tr>
<tr>
<td>Total borrowings</td>

<td>(321.91)</td>
</tr>
<tr>
<td>-Impact due to decrease of 50 basis points*</td>
<td>321.91</td>
</tr>
</tbody>
</table>

*Holding all other variable constant
Notes forming part of the Consolidated Financial Statements
for the year ended 31st March (All amounts are in ₹ lakhs unless otherwise stated)

ii) Assets

The Group’s fixed deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

c) Price risk exposure

The Group’s exposure price risk arises from investments held and classified in the balance sheet as fair value through profit or loss. To manage the price risk arising from investments, the Group diversifies its portfolio of assets.

Sensitivity

The table below summarises the impact of increases/decreases of the index on the Group’s equity and profit for the period:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>Year ended 31st March 2020</th>
<th>Year ended 31st March 2019</th>
</tr>
</thead>

</tbody>
</table>

51 Capital management

The Group’s capital management objectives are

- to ensure the Group’s ability to continue as a going concern
- to provide an adequate return to shareholders

The Group monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of balance sheet.

Management assesses the Group’s capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Group’s various classes of debt. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

The Group’s adjusted net debt to equity ratio is as follows:

<table>
<thead>
<tr>
<th>Particulars</th>
<th>31st March 2020</th>
<th>31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total borrowings</td>
<td>1,48,865.04</td>
<td>1,69,153.40</td>

55 There are numerous interpretive issues relating to the Hon'ble Supreme Court (SC) judgement dated 28th February 2019 on provident fund on which the Group has obtained legal advice specifically on the retrospective applicability of the same. The Group has started recognising such expenditure/liability on account of enhanced provident fund contributions prospectively. Pending further clarification on the applicability of such ruling and on basis of the legal opinion so obtained, the management is of the view that such ruling is applicable prospectively.

Note: During the current year the Company has sold its share in the Joint Venture (JV) Geno Rice Mills Private Limited in September 2019 however the agreement to terminate the JV was entered in the previous year 2018-19. Hence no figures related to the financial figures of the said JV are reportable.

Summarised financial information for associates and joint ventures

The tables below provide summarised financial information for those joint ventures and associates that are material to the Group. The information disclosed reflects the amounts presented in the financial statements of the relevant associates and joint ventures and not LT Foods Limited’s share of those amounts. They have been amended to reflect adjustments made by the entity when using the equity method, including fair value adjustments made at the time of acquisition and modifications for differences in accounting policies.

- The Group's share of profits from associates and joint ventures is presented net of tax.
Notes forming part of the Consolidated Financial Statements
for the year ended 31st March (All amounts are in ` lakhs unless otherwise stated)

58 Revenue from Contracts with Customers

Indian Accounting Standard 115 Revenue from Contracts with Customers ("Ind AS 115"), establishes a framework for determining whether, how much and when revenue is recognised and requires disclosures about the nature, amount, timing and uncertainty of revenues and cash flows arising from customer contracts. Under Ind AS 115, revenue is recognised through a 5-step approach:

(i) Identify the contract(s) with customer;
(ii) Identify separate performance obligations in the contract;
(iii) Determine the transaction price;
(iv) Allocate the transaction price to the performance obligations; and
(v) Recognise revenue when a performance obligation is satisfied.

Significant changes in contract assets and liabilities

There has been no significant changes in contract assets/contract liabilities during the year.

Revenue recognised in relation to contract liabilities

Ind AS 115 also requires disclosure of revenue recognised in the reporting period that was included in the contract liability balance at the beginning of the period and revenue recognised in the reporting period from performance obligations satisfied (or partially satisfied) in previous periods. Same has been disclosed as below:

Disaggregation of revenue

The Group has performed a disaggregated analysis of revenues considering the nature, amount, timing and uncertainty of revenues. This includes disclosure of revenues by segment and type.

Revenue by segment

<table>
<thead>
<tr>
<th>Description</th>
<th>Year ended 31st March 2020</th>
<th>Year ended 31st March 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revenue from contract with customer</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Revenue from sale of products</td>

<td>3,87,243.98</td>
</tr>
<tr>
<td>Processing fees</td>
<td>1,163.48</td>
<td>1,696.50</td>
</tr>
</tbody>
</table>

The Group has applied the practical expedient and has not disclosed the transaction price allocated to the remaining performance obligations as the Group does not have any open contract for which the expected duration is more than one year as at the reporting period.

Notes forming part of the Consolidated Financial Statements
for the year ended 31st March (All amounts are in ₹ lakhs unless otherwise stated)

The outbreak of Coronavirus (Covid 19) has disrupted economic activities across the world. However, the Group continued to operate its manufacturing facilities and distribute its products which are covered under the essential commodities category. Though, there have been some operational difficulties due to lock down imposed in various regions, the impact on overall operations have not been significant. As the economic environment continues to remain highly uncertain, the management is regularly monitoring the development in countries where it operate or supplies goods and take necessary action to adapt to changing environment.

Subsequent Events
Saudi Agricultural & Livestock Investment Company has acquired stake in the Daawat Foods Limited (‘the Company’) through its subsidiary company, United Farmers Investment Company for an amount of USD 172.3 Lakhs. The transaction entailed acquisition of 29.81% holding of India Agri Business Fund, sponsored by Rabobank and 0.1% holding of Real Trust. There has been no impact on the shareholding of LT Foods Limited (the Holding Company) that continues to hold the balance stake of 70.09%.

Previous year figures
Previous year’s figures have been regrouped/ reclassified wherever necessary, to confirm to current year’s classification.
