Dear Sir/ Madam,

Sub: Press release

Please find enclosed the press release titled “**Infosys to Digitize and Automate Processes at Envision AESC’s EV Battery Manufacturing Plants**”

This information will also be hosted on the Company’s website, at www.infosys.com.

This is for your information and records.

Yours Sincerely,
For **Infosys Limited**

A.G.S. Manikantha
Company Secretary

Infosys to Digitize and Automate Processes at Envision AESC's EV Battery Manufacturing Plants

The leading electric vehicle battery innovator and Infosys to co-develop a cloud-based, modular platform powered by Infosys Cobalt

Bengaluru, India – November 22, 2022: [Infosys](#) (NSE, BSE, NYSE: INFY), a global leader in next-generation digital services and consulting, today announced a strategic collaboration with [Envision AESC](#), a world-leading battery technology company. Through this collaboration, Infosys will help develop a cloud-based platform to digitize and automate manual processes at Envision AESC's Electric Vehicle (EV) battery manufacturing plants.

Initially, the cloud-based platform seeks to digitize key processes that require a high level of human intervention. In the long-term, the cloud-based platform aims to improve productivity, enhance end-to-end visibility, and simplify quality monitoring through data-driven reporting and analytics tools. Further, the modular and extensible cloud-based platform will not only offer rich user experience but also bring about scalable, resilient, and predictable performance of business applications across geographies. This new cloud-based platform, co-developed by Infosys and Envision AESC, leverages AWS Cloud components of [Infosys Cobalt](#), a set of services, solutions and platforms for enterprises to accelerate their cloud journey.

“At Envision AESC, we believe that advancements in battery technology will propel the EV revolution to newer heights. The manufacturing processes of our breakthrough batteries need a robust digital foundation to accelerate the speed and scale of innovation. We are confident that Infosys, with their trusted cloud technologies and deep expertise in the automotive industry, will help us continue on our journey towards achieving our transformation goals,” said, **Brian Sullivan, Executive Vice President of Global Manufacturing and Supply Chain at Envision AESC.**

Jasmeet Singh, Executive Vice President and Global Head of Manufacturing at Infosys, said, “As e-Mobility continues to transform the automotive landscape, building a strong digital core in cloud is a business imperative. We are delighted that in collaboration with Infosys, Envision AESC will be taking a cloud-first approach to digitize operations in its EV battery manufacturing plants. We believe that our co-innovation efforts will catalyze the development of next-generation EV batteries from a sustainability and circularity standpoint.”

About Envision AESC

Envision AESC is a world-leading battery technology company committed to research, development, design, manufacture and sale of high-power batteries and energy storage batteries. Headquartered in Japan, Envision AESC has produced high-performance, extended range batteries for more than 650,000 electric vehicles in 44 countries, achieving a record of 'zero critical battery malfunction.' Safe Harbor

Certain statements in this release concerning our future growth prospects, financial expectations and plans for navigating the COVID-19 impact on our employees, clients and stakeholders are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding COVID-19 and the effects of government and other measures seeking to contain its spread, risks related to an economic downturn or recession in India, the United States and other countries around the world, changes in political, business, and economic conditions, fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India and the US, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry and the outcome of pending litigation and government investigation. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2022. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission and our reports to shareholders. The Company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the Company unless it is required by law.
