We request you to kindly take the above on record and oblige.

Thanking you,

Yours faithfully,

for Vinthya Telelinks Ltd.

(Satyendra Pattnaik)
Company Secretary

Encl: As above.
Inheritance is the newest way to become a young Russian billionaire

ALEX SADNOV
Moscow, March 28

IT’S NOT EASY to become a young Russian billionaire, but at least one new path is available. In Moscow last November, 24-year-old Felix Fedun was announced as the richest 33-year-old in Russia. The son of steel magnate Yevgeny Fedun and owner of Russian football club Zenit St Petersburg, Felix has a stake in the club’s owner, Sistema Group, which is based in Moscow.

Felix is a member of the prosperous Fedun family, which has been involved in steelmaking and other industries since the 1990s.

The Feduns are among the most successful Russian business families, with many establishments opting to make technology a part of their operations. Launched 4 years ago, on July 1, 2015, by Prime Minister Narendra Modi, the Digital India mission aims to provide government services digitally, through improved online infrastructure and communication networks, thereby making the country digitally empowered in the field of technology. The campaign aims to give government services not only at an ATM but also in remote villages in a well-planned and defined manner and will be pushed across the achievements.

The campaign has transformed the entire ecosystem of public services; the entire public service delivery is now available online. This is a revolutionary move with the vision to transform India into a digitally empowered society and knowledge economy.

N.C. Aavin

Power to Empower

The Digital India mission is a flagship programme of the Government of India with a vision to transform India into a digitally empowered society and knowledge economy.

The Digital India mission has three core components:

- the development of secure and stable digital infrastructure, providing of government services digitally, and universal digital literacy
- the campaign is an enabling and beneficiary of other important government initiatives - Bharat Net, Saubhagya, Make in India, Startup India and Startup India, industrial corridors, Bharatmala, and Sagarmala
- the Government has launched the BharatNet, which is a project to connect the states in the country, covering electronic services, public services, technical, and digital opportunities. The project will also include the transition of the entire ecosystem of public services. This mission is making waves across the country, covering all fields of technology.

The campaign has transformed the entire ecosystem of public services; the entire public service delivery is now available online. This is a revolutionary move with the vision to transform India into a digitally empowered society and knowledge economy.
