Mr. Subodh Kumar Sharma
Director & Chief Operating Officer

ABOUT

Tinna Rubber and Infrastructure Ltd. (Tinna) was founded in 1977 and has grown to become the largest integrated waste tyre material recycler not only in India but also Asia. It is amongst the global leaders in the manufacturing of recycled rubber materials, like Crumb rubber and Crumb Rubber modifiers for bitumen. It is also one of the very few companies in the world to manufacture 80-140 mesh micronized rubber powder. The company caters to the entire range of recycled rubber applications including crumb rubber for the purpose of road construction and also non-road applications like new tyres, rubber mats, conveyer belts, and many more.

The company has built strong world class infrastructure through sustainable and fully integrated manufacturing facilities with completely environmentally friendly processes and zero liquid discharge processes. The manufacturing facilities spread across India at Panipat (Haryana), Kalamb (Himachal Pradesh), Haldia (West Bengal), Gumudipoondi (Tamil Nadu) and Wada (Maharashtra). Over the years, Tinna has constantly focused on innovation, backward integration and quality improvements.

With the increasing awareness about the benefits of recycling waste tyres not only by the government but also by the community at large, the company has built a strong demand and order book pipeline from the revival of the road sector post change in the Government guidelines as well non road segment. With ample capacities in place to cater to this rising demand, the bright future envisioned for the company is now becoming a reality. In Q2-FY22 revenues grew by 76% year on year, while EBITDA and PAT grew by over 100% year on year, and the company has also reduced debt considerably as compared to a year ago.
