Company Secretary
Infosys Launches ‘Return to Workplace’ Solutions to Help Enterprises Build Safe, Nurturing and Resilient Workplaces

Bengaluru, India – June 11, 2020: Infosys (NYSE: INFY), the global leader in next-generation digital services and consulting, today announced the launch of its enterprise-grade ‘Return to Workplace’ solutions to help clients ensure safety and wellness of their employees as they adapt to new ways of working amid the COVID-19 pandemic.

The cloud and edge-based solutions offer a comprehensive framework that enables enterprises to implement:

- **Elevated Body Temperature (EBT) screening** – Leverages automation and AI on Edge to help enterprises screen their workforce or visitors in real-time for possible infection to isolate them and prevent them from entering the establishment.

- **Contact Tracing** – Redefining the contact tracing category using proven technologies like GPS and BLE (Bluetooth Low Energy) to provide completely voluntary and Opt-In basis for building traceability.

- **Mask Compliance / Social Distancing Compliance** - Video analytics algorithms to provide alerts when masks are not detected, or the distance between people walking together or gathering at a place is not sufficient. Smart wearables can also be incorporated based on the specific situations.

- **COVID 19 Chatbot** – An AI-powered Digital Assistant solution to help answer employee queries related to return to work scenarios

- **Contactless biometrics** – Ensures employees and visitors enter workplaces in a safe manner

- **Occupancy and workspace analytics** – To help real estate teams track metrics on floor occupancy, density and automate sanitation routines in common areas. Contactless elevator workflows, HVAC refresh cycles and many more solutions towards ongoing workplace wellbeing.

These solutions do not collect any Personally Identifiable Information (PII) and use the power of AI, IOTVision Analytics, Edge Computing, 5G, RFID, Biometrics and Gesture controls to reduce the need for human intervention and enable data-driven decision making. The underlying platform ensures ease of maintenance and compliance reporting as required in various geographies.
Nitesh Bansal, SVP and Head- Engineering Services, Infosys, said, “The future of work will demand innovative solutions that enterprises can deploy rapidly, and at scale to ensure safety of their workforce while at the same time nurture collaboration and productivity. We are pleased to launch our ‘Return to Workplace’ offering that is aimed at positively impacting the re-opening of workspaces in a seamless, automated, and systematic manner. We are implementing some of these solutions, starting with EBT checks, across five million sq. ft. of our own office spaces as we prepare for 20,000 Infosys employees to return to their workplaces in a phased manner. We are confident that these solutions will reassure enterprises and employees that their workplaces are safe, collaborative, yet non-intrusive.”

These solutions adhere to data privacy standards and practices with FDA, FCC, ISO, and IEC compliance.

Mukesh Dialani, Program Director of Product Engineering and Operations Technology/Services, IDC, said, “Infosys’ scalable and flexible ‘Return to Workplace’ solution is timely and well thought out. Adhering to data privacy standards and built on a foundation of digital engineering elements including computer vision, edge and AI, it will provide customers with processes and solutions to restart their operations in a safe and resilient manner.”

Safe Harbor
Certain statements in this release concerning our future growth prospects, financial expectations and plans for navigating the COVID-19 impact on our employees, clients and stakeholders are forward-looking statements intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding COVID-19 and the effects of government and other measures seeking to contain its spread, risks related to an economic downturn or recession in India, the United States and other countries around the world, changes in political, business, and economic conditions, fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage
increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on
fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment
centration, our ability to manage our international operations, reduced demand for technology in our
key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully

complete and integrate potential acquisitions, liability for damages on our service contracts, the success of
the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental
fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring
companies outside India, unauthorized use of our intellectual property and general economic conditions
affecting our industry and the outcome of pending litigation and government investigation. Additional risks
that could affect our future operating results are more fully described in our United States Securities and
Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March
31, 2019. These filings are available at www.sec.gov. Infosys may, from time to time, make additional
written and oral forward-looking statements, including statements contained in the Company's filings with
the Securities and Exchange Commission and our reports to shareholders. The Company does not
undertake to update any forward-looking statements that may be made from time to time by or on behalf of
the Company unless it is required by law.
