Dear Sir / Madam,

Subject: Investor Presentation

In terms of Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (as amended), we submit herewith the Investors' Presentation of the Company, with respect to Business Overview of Gujarat Themis Biosyn Limited ('the Company').

Further, a copy of the same is also available on the website of the Company, viz., www.gtbl.in

Thanking you,
Yours faithfully,

For Gujarat Themis Biosyn Limited

Rahul Soni
Company Secretary and Compliance officer

Gujarat Themis Biosyn Limited
Investor Presentation

September 2021

Disclaimer

*This presentation has been prepared by **Gujarat Themis Biosyn Limited (the “Company” or “GTBL”)** solely for information purposes and does not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment what so ever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.*

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks. The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third party statements and projections.

Table of Contents

Company Overview

Among India's few Fermentation based Intermediate manufacturers

GTBL among one of India's few fermentation based manufacturers in pharmaceutical field

- Incorporated in 1981 as joint sector Company with GILC Ltd. and Chemosyn (P) Ltd.
- India's First Company to start commercial production of Antituberculosis drug Rifampicin

Product Portfolio – strong and growing

- Rifamycins – Treatment of Tuberculosis and digestive tract infections
- First to start commercial production of Rifampicin using Fermentation process

Focus on Research and Development

- Company is establishing state of art R&D facilities
- Focus now is to develop new products in line with business strategy

01

02

03

04

05

06

State of Art Manufacturing Facility

- Plant in Vapi (Gujarat)
- Over 200 Employees engaged at plant site

Strong Collaborations

- TML has been open to Technical and commercial collaborations so that GTBL can adopt best technologies and best processes

Strong Financial Performance

- 107% YoY growth in Revenues
- Conservative Balance sheet: Net Debt to Equity ratio - 0.06 in FY21
- Virtually debt free

Journey So Far

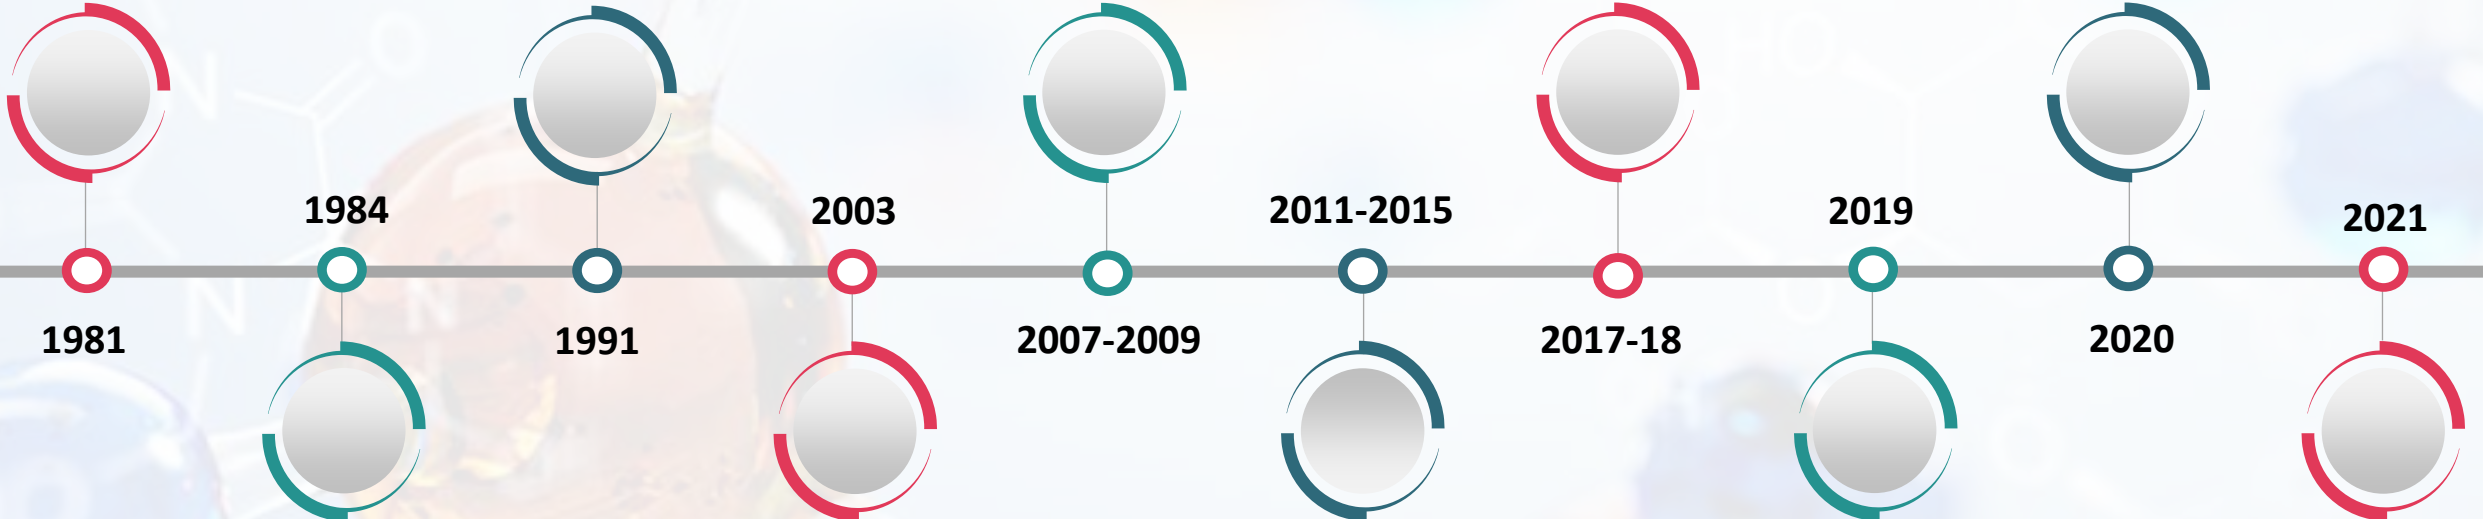

- Established as joint sector Company with Govt of Gujarat for fermentation business for manufacture of Erythromycin

- Entered into JV agreement with PBG Ltd & Yuhan Corporation, South Korea to manufacture Rifampicin

- BIFR declared GTBL as sick Company
- Dr. Dinesh Patel stepped in as Guarantor and Adviser
- Themis Medicare Ltd entered as promoter brought in technical and managerial and unique fermentation expertise

- Repaid total working capital loan
- Deregistration complete since the SICA, 1985 has been repealed

- Production continues despite COVID-19 pandemic

1981

- Listed on Bombay Stock Exchange

1984

1991

- Started manufacture of Lovastatin

2003

2007-2009

- Started manufacture of Rifamycin S an intermediate for Rifampicin, running at full installed capacity
- Rehabilitation scheme approved by BIFR
- Net worth becomes positive much earlier than envisaged

2011-2015

2017-18

- Changed its business model from Contract Manufacture to Manufacture and sales Model
- Started sale of Rifamycin O from September

2019

2020

- Mutually strategic decision to end technological partnership with Yuhan Group— currently in progress

2021

Expert and Experienced Management Team

Dr. Dinesh Patel
Chairman

- Doctorate in Medicinal Chemistry
- Member of Royal Society of Chemistry, London, U.K.
- Industrialist having working experience in the Pharma Industry since 1973
- Expertise in Pharmaceutical research, Biotechnology, Fermentation technology, Banking and Business management

Dr. Sachin Patel
Director

- Doctorate in Biological chemistry from Christ's College, University of Cambridge, UK.
- Industrialist having working experience in the Pharma Industry since 2000

Mr. Jagdish Kaujalgi
Chief Executive Officer

- Diploma Mechanical Engineer with experience of more than 30 years in chemical industry
- Working with GTBL since Feb-2017

Mr. Rajneesh Anand
Part of Themis Group

- Associated with Themis Group in various senior capacities
- Notable Contribution to GTBL from his vast technical and managerial experience
- Professional having working experiences with Themis since 1977

Key Strengths

Strong Product Portfolio

- Demand side remains strong for product manufactured by GTBL
- More than decade old products with no replacement for these
- Continued to be most accepted and preferred products with growing demand

Right mix of Strong Order Book with Buy and Sell model

- Secure, long-term contracts to ensure steady order book along with right mix of Buy & Sell orders leading to optimal profitability

Available land for expansion

- Company's plans for growth can proceed unhindered as existing land under ownership is available for capacity expansion initiatives

01

02

03

04

05

06

Investments in R&D

- New, state-of-the-art R&D centre under construction for new product development

Niche in fermentation-based production

- One of the very few players in India with technology and capacity/scale for fermentation-based product development

Debt Free Company

- Conservative Balance sheet – Net Debt to Equity ratio - 0.06 in FY21
- Virtually debt free

Business Overview

Strong & Niche Product Portfolio – Growing at pace

Current Product Portfolio

Rifamycin S

- An intermediate for manufacturing drug Rifampicin (Anti biotic used for treatment of several types of bacterial infections, including tuberculosis, Mycobacterium avium complex, leprosy, and Legionnaires' disease)
- Capacity of Rifamycin S is 10,000 Kgs/Month

Rifamycin O

- An intermediate for manufacturing drug Rifaximin (Antibiotic used for treatment of traveler's diarrhea, irritable bowel syndrome, and hepatic encephalopathy)
- Capacity of Rifamycin O is 6,000 Kgs/Month

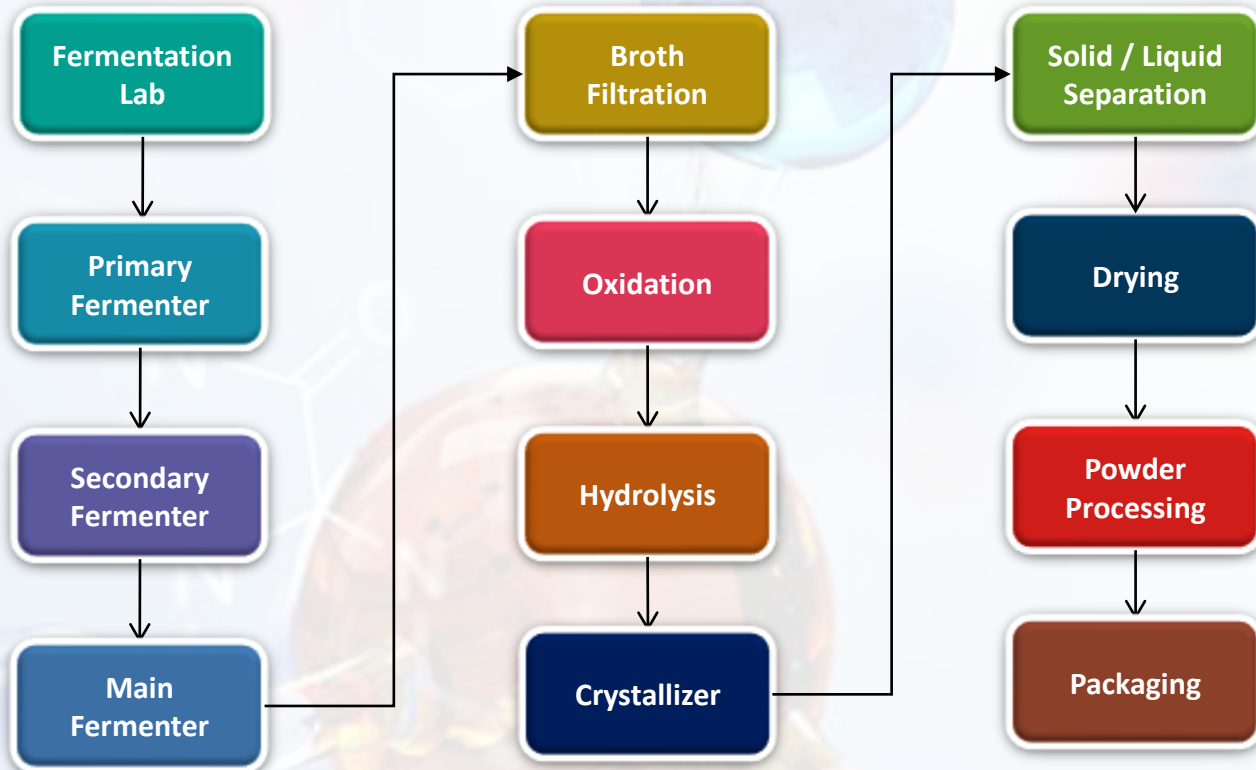

- Identified and working developing four New Products and adding to portfolio
- Developing them all by self
- All specialised products and add huge value to portfolio
- Demand side remains pretty strong for products manufactured by GTBL –more than decade old products – no replacement for these – continue to be most accepted and preferred product with growing demand

Advantages of using the Unique Fermentation Process

Fermentation Process

GTBL and Fermentation Technology - Strive to develop new fermentation culture:

- Fermentation is the core competency of Company
- GTBL became India's first Company to start commercial production of Rifampicin used as Anti-tuberculosis drug using Fermentation process
- Has evolved into an integrated biopharmaceutical Company that also includes a contract development and manufacturing business of intermediates based on fermentation technology

Advantages of Fermentation Process in Drug Manufacturing

- **Developing new and efficient processes** - Going down synthetic route not only requires significant development but is time consuming and entails higher costs than fermentation option
- **Further advancement in developing fermentation technology** - Semi-synthetic approach draws upon advantages of fermentation in generation of new drugs. Natural molecules are produced through fermentation then modified synthetically, reducing toxicity, increasing potency and selectivity, and overcoming bacterial resistance to traditional antibiotics

State of Art Manufacturing Facilities at Vapi

Among very few companies in India with fermentation capabilities

Environment Friendly & Sustainable Process Using Aerobic Bacteria for Fermentation

Industry Overview

Pharmaceutical Market- An Overview

Global Market

Active Pharmaceutical Ingredient Market valued at USD 172.69 Billion in 2018 and expected to reach USD 263.80 Billion by 2025 with CAGR of 6.24% over forecast period

North America-expected to dominate Active Pharmaceutical Ingredient market

U.S. holds 45% global market share for pharmaceutical companies including new drug discovery using Active Pharmaceutical Ingredient

Spending increased from USD 461.7 bn in 2016 to USD 645-675 bn in 2021, while European share of pharmaceutical drug development spending to grow from USD 151.8 bn to USD 170-200 bn from 2016 to 2021

Domestic Market

Leading Pharma Producer-

- Indian pharmaceutical industry supplies over 50 per cent of global demand for various vaccines, 40 per cent of generic demand in the US and 25 per cent of all medicine in UK1

Amongst leading exporters-

- India accounts for 20 per cent of global exports in generics
- India's pharmaceutical exports stood at US\$ 13.69 billion in FY20 (up to January 2020)

Among fastest growing industries-

- Indian pharma sector is expected to grow at CAGR of 22.4% & medical device market at US\$ 25 bn by 2025
- India is second largest contributor of global biotech and pharmaceutical workforce Pharmaceutical sector was valued at US\$ 33 billion in 2017

Rapidly growing healthcare sector-

- Indian healthcare sector, one of fastest growing sectors, expected to cross US\$ 372 billion by 2022

The Indian Pharma Advantage

Cost Efficiency

01

- Low cost of production & R&D boosts efficiency of Indian pharma companies, leading to competitive exports
- India's cost of production is approximately 33 per cent lower than that of the US
- India's ability to manufacture high-quality, low-priced medicines, leads to huge business opportunity

Increasing Investments

02

- Increasing private sector investments in R&D and acquisitions are driving sector's growth
- Between 2008-19, S&P BSE Healthcare Index has grown at 16.72%

Economic Drivers

03

- Economic prosperity to improve drug affordability
- Increasing penetration of health insurance to drive expenditure on medicine
- With increasing penetration of pharmacies, especially in rural India, OTC drugs will be readily available

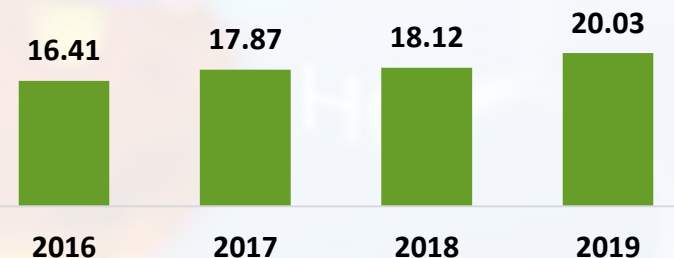

Policy Support

04

- Pharma Vision 2020' aimed at making India global leader in end-to-end drug manufacturing
- Under Budget 2020-21, allocation to Ministry of Health and Family Welfare is Rs 65,012 Cr (US\$ 9.30 billion)
- In this sector, 100 per cent FDI allowed under automatic route

- Indian pharmaceutical sector expected to cross to US\$ 372 billion
- In February 2020, Indian pharmaceutical sales grew by 12.1 % year-on-year

Annual Turnover of Indian Pharmaceutical Market (US\$ billion)

A hand wearing a blue nitrile glove holds a glass Erlenmeyer flask containing a yellowish-orange liquid. The flask has volume markings at 50, 75, and 100. The background is a laboratory with several other glass bottles on a tray, all under a blue light. A white arrow-shaped callout box with a yellow border is overlaid on the right side of the image.

Way Ahead

Our Way Ahead

New Product Development & Forward Integration

- In process of identifying new products which have good domestic and export potential
- Company working on strategy to move up the value chain by way of forward integration into API

New Infrastructure Development

- New infrastructure being planned would be compliant with strictest regulatory authorities
- Focusing on enhancing capacities - requisite Environmental Clearance already obtained

Focus on Establishing R&D Centre

- In process of establishing new R&D lab to take care of technology development for new products and for examining whether existing products can be used for more applications

Geographical Diversification

- Further expanding in geographically strategic locations in India
- Targeting at export opportunities

Enhance Capacity to meet future growth

- Requisite Environmental Clearance already obtained for capacity expansion at current location
- Open to both Organic and Inorganic opportunities for growth in Specialty Chemical space
