Q4FY20 Performance Discussion

Management Commentary

- The financial performance for Q4 FY2020 has been less than satisfactory. Revenue from Operations for Q4FY20 stood at 32.94 crores compared to 57.21 crores in Q4FY19, registering a decline of 42.2%.
- The fall in Revenue from Operations for Q4FY20 and full-FY2020 is primarily due to lower volumes in the B2B Formulations business. There was extremely unhealthy, price-driven competition from China in the previous financial year, which the company decided to stay away from, leading to sub-par performance in the B2B Formulations business.
- On the profitability front, the company did well by recording an EBITDA margin of 7.6% in Q4FY20 compared to 5.1% in Q4FY19, prominently due to good business in the Technicals product segment. The rise in the EBITDA did not translate into Net-profitability due to higher a) Finance Costs and b) Depreciation and Amortization expenses.
- On the working capital front, the company reported record-inventories of 58.19 crores in Q4FY20 compared to 46.84 crores in Q4FY19, due to higher procurement of raw materials (imported) in January and February in anticipation of supply-chain disruption due to the growing spread of COVID-19 in China at the time. This also led to an increase in Trade Payables as the company availed extended payment terms from its suppliers. Disruption in operations due to the implementation of national lockdown on 24th March 2020, led to a deferral of significant payments expected to come in the last week of March, leading to an increase in Trade Receivables.

Outlook

After adapting to new realities and overcoming the operational challenges of COVID-19, the company is witnessing a favorable external environment for almost all its product segments. A sufficient buffer of raw materials and a limited stoppage in production is proving to be a big advantage to the company. Many Technical manufacturers are facing issues with respect to raw material supply. Additionally, there is also a shortage of finished Technicals in the markets, leading to a supply crunch for Formulators, this is proving to be a tailwind for the company's Domestic Branded Formulations business. The company is confident of recording a superior performance in the FY 2020-21.

Coping with Coronavirus

AIMCO
Pesticides
Limited

Investor
Presentation

Coping
with
Corona
Virus

General Operations

An immediate and unprompted lockdown led to disturbances in shipments and part of sales intended for March could not be booked in the same period, causing subdued performance in Q4FY20.

Production activities at Lote Parshuram remained completely halted between 24th March 2020 and 1st April 2020.

After resuming production, with 10% manpower in April, the company has been ramping-up production each day and is confident of attaining pre-COVID levels in July first week.

Initially faced a lot of logistical and operational challenges, prominently related to the movement of goods and managing workforce.

Completely adhering to safety guidelines issued by authorities.

Demand Scenario

Worldwide lockdowns and prevention of movement led to a lot of disturbances in the value chain.

This created a momentary demands-supply mismatch for the last few months, which created an opportunity for integrated players, like Aimco, who were able to maintain production and cater to the markets.

The company did well in the aforementioned period, especially in its B2C formulations business. The outlook for CY2020-21 remains untethered from this pandemic.

The company is also witnessing an increasing preference of Indian suppliers in the Agrochemical industry globally, over its Chinese competitors. The repercussions of recent events on China have led many countries to prefer us over our international competition.

Supply Scenario

Indian agrochemical industry's dependence on Chinese manufacturers for raw materials & intermediates led to some disturbances in the supply chain, in February-March.

The company did not face any severe effects from the same, as it maintains sufficient buffer for imported raw materials.

Financial Impact

Certain revenue was deferred in Q4FY20 due to disturbances in production and dispatch of goods.

Barring some extension in payments (prevalent across the industry), the company does not foresee any strain on its financial position due to this pandemic.

Industry
Developments

Draft Order on Ban of 27 Agrochemicals

Ministry of Agriculture has proposed to ban (import, manufacture, sale, transport, distribute and use) 27 Pesticides (12 Insecticides, 7 Herbicides, 8 Fungicides) via its draft notification dated 14th May 2020.

This draft order has taken the entire industry by surprise, especially given the poor timing of the order.

These 27 chemicals are a big part of the Indian Agrochemical industry's business. In fact, Indian manufacturers are globally competitive in the manufacturing of these products and a large of these products are also exported to many developed markets like the USA, European Union, Asian countries, etc.

One of our key products - Chlorpyrifos is on the list.

However, the company is confident on withdrawal of the said ban, given the unanimous protest received from the industry among other factors.

Growing Locust Attacks

Locusts attacks that erupted last year in the African continent have found their way into the Indian subcontinent, with prominent effects being recorded in Western and Northern parts of the country.

These attacks can prove detrimental to the farmers if not dealt with an immediate and full retaliation, using various pesticides and other means.

One of our key products i.e. Chlorpyrifos has been recommended by the Ministry of Agriculture for use against Locust attacks.

This has given a boost to our B2C formulations business, as we have a few highly-acclaimed brands in this category.

Also luckily for India, the Locust attacks have somewhat coincided with the early monsoon in the country. Monsoon prevents the growth of Locust and the effects are expected to wear off after this season.

One of our key products i.e. Chlorpyrifos has been recommended by the Ministry of Agriculture for use against Locust attacks

Introduction

Incorporated in 1987 by our founder **Mr. Pradeep P Dave**, Aimco Pesticides Limited (APL) is a key player in the Agro Chemicals space.

The company is into manufacturing, marketing & exporting of technical grade chemicals & formulations of Insecticides, Fungicides and Herbicides.

Strong Export Presence

Strong export presence in **~42 countries globally.**

Government Registered Export house

Recognised for it's acumen in **Technical grade chemicals**

In its vast history spanning over 4 decades, the company has been **credited with introducing & commercializing many Agro-chemicals in India.**

First Indian company to manufacture Chlorpyrifos & Triclopyr

First Indian company to manufacture Chlorpyrifos & Triclopyr Technical in India; right after Dow Chemicals (USA).

Second Indian company to manufacture Imidacloprid after Bayer India

History and Evolution

AIMCO
Pesticides
Limited

Investor
Presentation

History &
Evolution

01

Incorporation & early history

- Established in 1987
- Listed on BSE in 1993
- Setup a centralized manufacturing unit in Lote Parshuram in 1993
- 1st India company to manufacture & commercialize Chlorpyrifos technical in 1993
- Commenced exports in 1995
- Established R&D centre recognized by Department of Science & Technology, GOI since 1996
- 1st India company to manufacture & commercialize Triclopyr technical in 2001

02

Debt restructuring & operational turnaround

- RoCE depleted in existing investments due to entry of excessive competition in key products
- Chlorpyrifos turned unprofitable, with more than a dozen plants manufacturing it in the country
- Domestic formulations business under-stress due to severe and continuous droughts in '98-'00
- This all led to low profitability and an inability to service debt. Debt accumulated due to unapplied interest being converted into term loans.
- In between FY10-14, the company offered OTS to banks, completed debt restructuring and turned debt-free by the end of FY2014.

03

Turning profitable and building a foundation

- Post restructuring, the first objective of the company was to turn & stay profitable at all levels
- Company remained agile, utilizing every available business opportunity to turn profitable and rebuild reserves
- Undertook major maintenance & upgradation at Lote Parshuram Facility between FY16-19
- Established a strong footing
- Key focus on scaling manufacturing for technical grade chemicals
- Introduced Bifenthrin technical in 2017

Corporate Ethos

Mission

To **serve the farmer** at the very grass root level, by enhancing farm yields using our understanding and respect for the natural ecological processes

Vision

To be peerless among the stalwarts of the agrochemical industry, by offering the very best of agro-inputs to the farmer, through constant innovation and tailor-made solutions that provide the highest levels of customer satisfaction sustainably.

Environmentally Conscious

The company has recently pledged to attain **ZERO LIQUID EFFLUENT** discharge status in next 5 years.

CSR Activities

As part of its CSR Program, Aimco Pesticides Limited has funded the construction of a new school building with superior infrastructure and advanced facilities for a Primary & Secondary Ashram School – Village Ganjad, Taluka Dahanu, District Palghar.

Investor
Presentation

Aimco's
Value
Chain

1. Product & Process Identification

- First focus is on our area of competence and expertise in the given chemistry, the process of manufacturing, etcetera.
- For future product additions (technical), only products with at least 30%-40% GPM are considered.
- Second preference assigned to the acceptability and market-size of the given product in our key strongholds globally.
- Lastly, the product is shortlisted for further research and development.

2. Pilot Manufacturing & Data Collection

Data collection as per the requirements of the market in which the product is to be registered.

3. Product Registration

Registration either of the technical, formulation or both depending upon the requirement of the market. Product registration may take anywhere between 6 months to 5 years depending upon the country.

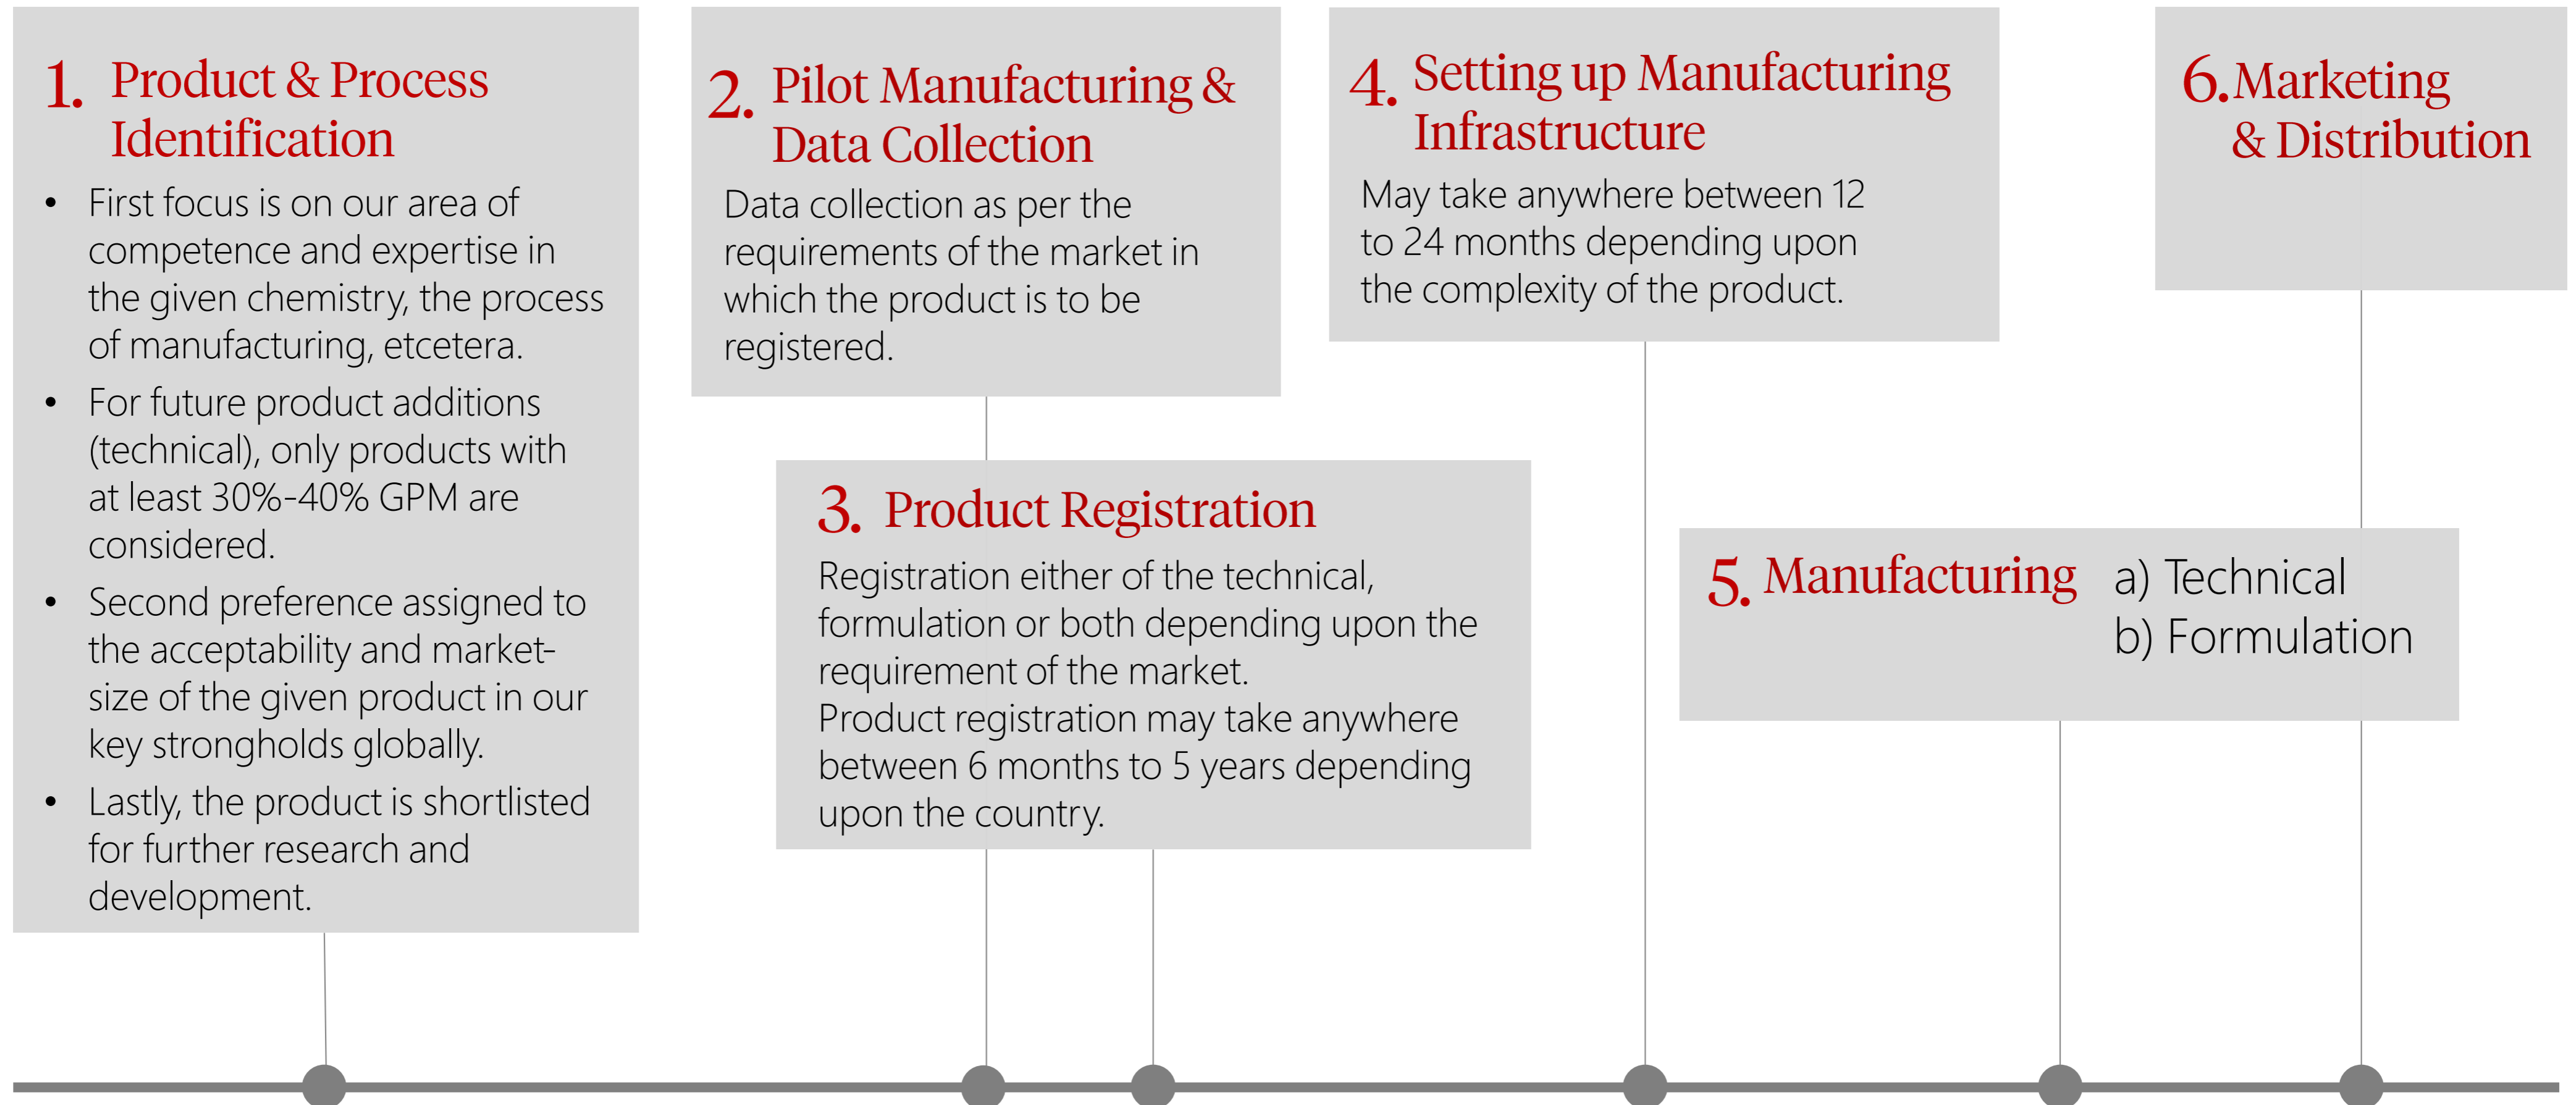

4. Setting up Manufacturing Infrastructure

May take anywhere between 12 to 24 months depending upon the complexity of the product.

5. Manufacturing

a) Technical
b) Formulation

6. Marketing & Distribution

Research & Development

Department Head

R&D department headed by Dr. Samir Dave

Certified R&D Centre

Department of Science & Technology, GOI certified R&D Centre at Lote Parshuram factory site, since 1996.

Team of 15 staff

A team of 15 chemists, scientists, and staff working in the R&D Department.

In-House R&D

Entirely in-house R&D developed products – Triclopyr Acid & Esters, Neo Nicotinoids Pesticides, among others.

Each of Aimco's current commercial product is developed & commercialized using in-house R&D.

Expanding Portfolio

Actively working towards adding molecules and expanding Aimco's technical grade chemicals portfolio.

Newer Formulations

Additionally, working on developing newer & innovative formulations.

R&D Focus

- Process development
- Technology to manufacture off patented products
- Process efficiency, higher productivity and cost reductions
- Product development
- Customized formulations

Management Team

Mr. Pradeep Dave
Founder & Executive Director

B.Sc. (Chemistry) from MU

Serves as the President of Pesticides Manufacturers & Formulators Association of India (PMFAI) for 23+ years

Chairman of the confederation of All India Small & Medium Pesticides Manufacturers Association (CAPMA)

Under his leadership APL became first Indian co. to mf. Chlorpyrifos & Triclopyr technical

Mr. Elizabeth Srivastav
Managing Director

Qualified in M.Sc. In Bio Chemistry from MU

Associated with the company from (year) and appointed as Managing Director in 2013

More than 30 years of experience in Agro Chemicals industry

Handles International Business at APL

Dr. Samir Dave
Executive Director

Qualified Ph.D. in Synthetic Organic Chemistry from MU

20+ years of extensive experience in organic synthesis, research and process development.

Founder & Director of Agrocare – a global Agrochemical Association registered in Belgium. Also a board member of "Agriculture Skill Council of India"

Instrumental in introducing new molecules over last decade.

Production, Product Development, Research & Development

Board of
Directors

Mr. Dushyant Patel Non-Executive Independent Director

Mr. Dushyant D. Patel, aged 60 years, holds a degree in Electrical Engineering and possesses more than 25 years of experience in the various areas of business including investment, finance and marketing.

Mr. Ram Gopal Kaja Non-Executive and Independent Director

Mr. Kaja is a Chartered Accountant with wide experience in Finance and Corporate Legal matters.

Mr. Mayoer Amin Non-Executive and Independent Director

Mr. Amin has diversified work experience of more than 45 years in various areas like manufacturing and marketing of electronics, medical equipment, defence instruments, textiles in India as well as abroad. Mr. Amin had been a president of Bombay Industries Association in the year(s) 1995-96 and Rotary Club of Bombay Airport in the year(s) 2013-14. Mr. Amin was an honorary faculty of Bio-Medical Engineering at Bhagubhai Polytechnic, for a decade.

Mr. Suresh Bhatt Non-Executive and Independent Director

Mr. Bhatt has work experience of more than 50 years in the Agrochemical Industry. He is the Managing Director of Dinkal Agro Products Private Limited, a company that specializes in crop organic nutrition technologies and veterinary supplements. Mr. Bhatt is an esteemed executive leader who has been awarded the Udyog Rattan (1984) and Udyog Shree (1986) by the Government of India for his contributions to the industry. Mr. Bhatt has also served in various capacities on the Pesticides Manufacturer's Association of India (PMFAI), one of India's premier agrochemical associations.

Aimco Going Forward

Identifying products for commercial development

In the last few years, since our operational turnaround, the company has been constantly focusing on adding newer molecules to its product portfolio.

Investing in product development, data collection and registration

After the initial development phase, the company is investing in data collection and product registration globally, which is a very time and capital intensive procedure.

Expanding technical portfolio

The company has a principal focus on expanding its competencies in its technical grade portfolio. That is the area in which its strength lies.

Aimco is making continuous efforts to add

- a) Chemicals which would prove to be profitability **margin assertive** and
- b) Have an **opportunity size bigger** than our current products

Long Term Decisions

Outlook

AIMCO
Pesticides
Limited

Investor
Presentation

Outlook

Existing technical products	Additions in technical portfolio	CAPEX	Branded Domestic Formulations	Profitability
<p>We will be focusing on ramping up production, and if necessary capacity, for remunerative products like Bifenthrin in the FY2020-21.</p> <p>The idea is to invest incremental capital only towards margin assertive products, even in our existing portfolio.</p>	<p>There are a few products under development in various categories such as Herbicides, Insecticides, and Plant Growth Regulators (PGR). The company is certain of commercializing at least one key product in FY2021-22.</p>	<p>The company has certain planned capital expenditure for FY2020-21 towards a) Effluent Treatment Plant facility and b) upgradation, automation, and replacement of equipment.</p>	<p>The company is undertaking a steady but very cautious growth in this segment. However, external tailwinds that are expected to last this year will give a boost to this business in FY2020-21. At present, we are receiving good response in this business segment.</p>	<p>Due to reasons communicated, earlier in this presentation, among other factors, we are expecting a healthy improvement in the profitability margins of FY2020-21.</p>
