Overview

The unprecedented pandemic last year triggered grave challenges across the globe, related to both health and Finance, pushing organization to adopt and adapt newer processes and technologies to survive and grow. Likewise, your company too identified newer ways to continue its onward Journey.

The company aspires to be India's leading manufacturer providing the range of products under the homeware products including but not limited to furniture, housewares and Matts.

The Company faced a challenging business environment in FY2020-21 and the COVID-19 pandemic has caused a disruption to the global economic condition as well as volatile currency movements.

The gross turnover decreased to Rs. 87. 64 Crore from Rs. 131.61 Crore for the financial year ended 31st March, 2021. The decrease in Gross Turnover was mainly due to the closure of malls and offices due to Lockdown for uncertain periods, where Company sold most of its products. The Export was also dip to 15.07 Crore from 22.14 Crore last year.

The net profit after tax was Rs.2.38 Crore as compared to Rs. 2.11 Crore in previous year. The reason for higher profit was selling the products at good margin.

However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW:

The Indian government announced a complete lockdown in public movement and economic activity from the fourth week of March 2020. The lockdown staggered an already slowing economy as 1.38 billion Indians stayed indoors - one of the most stringent lockdowns anywhere.

The outbreak of the novel corona virus impacted the Indian economy during the first quarter of the year under review. The Indian economy de-grew 23.9 per cent in the first quarter of 2020-21, the sharpest de-growth experienced by the country since the index was prepared.

The Indian and state governments selectively lifted controls on movement, public gatherings and events from June 2020 onwards. The result is that India's relief consumption, following the lifting of social distancing controls, translated into a full-blown economic recovery.

India de-grew at a relatively improved 7.5 per cent in the July-September quarter and reported 0.4 per cent growth in the October-December quarter.

India's GDP contracted initially and then recovered in 2020-21. This recovery – one of the most decisive among major economies – validated India's long-term consumption potential.

INDIAN PLASTICS INDUSTRY STRUCTURE AND DEVELOPMENTS:

The Plastic industry is one of the most evolving businesses in recent times. The application of plastics can be found in almost every sector such as medical, aerospace, automotive, packaging, household appliances, construction and many more.

Plastic material is gaining notable importance in different spheres of activity and the per capita consumption is increasing at a fast pace. Continuous advancements and developments in Plastic technology, processing machineries, expertise, and cost effective manufacturing is fast replacing the typical materials. The export of plastic products also yields about 1% of the country's exports. The sector has a large presence of small scale companies in the industry, which account for more than 50% turnover of the industry. Approximately Rs.100 billion is invested in the form of fixed assets in the plastic processing industry.

During April 2020-January 2021, Cumulative value of plastics export was USD 9,855 Million as against USD 10,000 million during the same period last year, registering a negative growth of 1.4%.

India's plastics sector plays a catalytic role in the economic development of the country. Unsurprisingly, the country currently ranks among the top five consumers of polymers in the world, has over 30,000 plastics processing units, employing over four million people across the country. India's plastics goods are exported to over 200 countries.

The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and skilled manpower. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.

Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene and PVC, are manufactured domestically.

The Company's Board of Directors is responsible for the matters stated in section 134(5) of The Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control! relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of The Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has an adequate internal financial controls system in place and the operating effectiveness of such controls.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- ▶ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

A description of methods used for sensitivity analysis and its Limitations:

Sensitivity analysis is performed by varying a single parameter while keeping all the other parameters unchanged Sensivity analysis fails to focus on the interrelationship between underlying parameters.

Hence , the results may vary if two or more variables are changed simultaneously. The method used does not indicate anything about the likelihood of change in any parameter and the extent of the change if any.

Note No 34 : FINANCIAL INSTRUMENTS - FAIR VALUES AND RISK MANAGEMENT
A. Accounting Classifications and Fair Values

Carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy, are presented below. It does not include the fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

31st March, 2021	Carrying Amount				Fair Value			
	FVTPL	FVTOCI	Amortised	Total	Level 1	Level 2	Level 3	Total

* In case of long term borrowings the carrying value in the books have considered to be the fair value as the measurement carried out by applying the Effective Interest Rate method resulted in a very marginal difference

* Trade Deposits are the deposits collected from customers and would be held in by the Company till the time the customer is associated as a measure of security towards possible non payment (if any). Since the tenure of holding cannot be ascertained the carrying value in the books have been considered to be the fair value.

B. Measurement at Fair Values

Valuation techniques and significant unobservable inputs

The following tables show the valuation techniques used in measuring Level 2 and Level 3 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation Technique
Security Deposits	The valuation model considers present value of expected payments discounted using an appropriate discounting rate
Investment Property	Ready Recokner rates as notified by the Government of Maharashtra

The Fair Value of the Investment Property situated at Kashimira approximates to Rs.12 Cr as at 31/03/2021

C. Financial risk management

The Company has exposure to the following risks arising from financial instruments

- (1) Credit Risk
- (2) Liquidity Risk
- (3) Market Risk

(1) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and loans and advances.

The carrying amount of following financial assets represents the maximum credit exposure:

Trade receivables and loans and advances.

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer in which it operates. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

The Company has established a credit policy under which each new customer is analysed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. Further for domestic sales, the company segments the customers into Distributors and Others for credit monitoring.

The Company maintains security deposits for sales made to its distributors. For other trade receivables, the company individually monitors the sanctioned credit limits as against the outstanding balances.

Accordingly, the Company makes specific provisions against such trade receivables wherever required and monitors the same at periodic intervals.

As at 31st March, 2021, the ageing of Trade Receivables was as follows;

	Carrying Amount	
	31st March, 2021	31st March, 2020
Neither Past Due nor Impaired		
Due 0- 180 days	20,38,92,492	27,92,13,270
Due 180- 365 days	2,07,94,433	2,07,94,433
	22,46,86,925	30,00,07,703

Cash and cash equivalents and other Bank balances

The Company held cash and cash equivalents and other bank balances of Rs 300.19 lakhs as on 31st March 2021 (Previous year Rs 86.29 lakhs). The cash and cash equivalents are held with bank counter parties with good credit ratings.

(2) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation

As of 31st March, 2021 and 31st March, 2020 the Company had unutilized credit limits from banks of Rs 3.18 Cr and Rs 18 Cr respectively.

Maturity profile of financial liabilities

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted, and include estimated interest payments and exclude the impact of netting agreements.

31st March, 2021	Carrying Amount	Contractual Cash Flows				
		Total	Less than 6 months	6-12 months	1-2 years	More than 5 years

Other Financial Liabilities	1,91,32,130	1,91,32,130	1,91,32,130			

The gross inflows/(outflows) disclosed in the above table represent the contractual undiscounted cash flows relating to the financial liabilities which are not usually closed out before contractual maturity.

(3) Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long term debt. We are exposed to market risk primarily related to foreign exchange rate

risk, interest rate risk and the market value of our investments. Thus, our exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currency. The objective of market risk management is to avoid excessive exposure in our foreign currency revenues and costs.

Currency risk

The Company is exposed to currency risk on account of its borrowings and other payables in foreign currency. The functional currency of the Company is Indian Rupee.

Exposure to currency risk (Exposure in different currencies converted to functional currency i.e. INR)

The currency profile of financial assets and financial liabilities as at 31st March, 2021 and 31st March, 2020 are as below:

USD 1	73.23	79.19

Sensitivity analysis

A reasonably possible strengthening (weakening) of the foreign Currency against the Indian Rupee at 31st March would have affected the measurement of financial instruments denominated in foreign currencies and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

	31st March, 2021		31st March, 2020	
	Effect in Profit & Loss		Effect in Profit & Loss	
Effect in INR	Strengthening	Weakening	Strengthening	Weakening
USD 3% movement	81,562.68	-81,562.68	2,83,174	-2,83,174

Interest rate risk

Interest rate risk can be either fair value interest rate risk or cash flow interest rate risk. Fair value interest rate risk is the risk of changes in fair values of fixed interest bearing investments because of fluctuations in the interest rates. Cash flow interest rate risk is the risk that the future cash flows of floating interest bearing investments will fluctuate because of fluctuations in the interest rates.

Exposure to interest rate risk

Company's interest rate risk arises from borrowings. The interest rate profile of the Company's interestbearing financial instruments as reported to the management of the Company is as follows.

	31st March, 2021	31st March, 2020
Variable rate Borrowings	8,37,14,800	9,17,13,191

Cash flow sensitivity analysis for variable-rate instruments

A reasonably possible change of 25% in interest rates (MCLR) at the reporting date would have increased (decreased) profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

Particulars	Profit / (Loss)	
	25% Increase	25% Decrease
March 31, 2021		
Variable Rate Instruments	-18,08,240	18,08,240
Cash Flow Sensitivity (Net)	-18,08,240	18,08,240
March 31, 2020		
Variable Rate Instruments	-19,81,005	19,81,005
Cash Flow Sensitivity (Net)	-19,81,005	19,81,005

The risk estimates provided assume a parallel shift of 25% interest rate across all yield curves. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The period end balances are not necessarily representative of the average debt outstanding during the period.

Capital Management

For the purpose of the Company's capital management, capital includes issued capital and other equity reserves. The primary objective of the Company's Capital Management is to maximise shareholders value. The Company manages its capital structure and makes adjustments in the light of changes in economic environment and the requirements of the financial covenants. The Company monitors capital using debt to equity ratio.

Particulars	31st March, 2021	31st March, 2020

NOTE 35 NOTES TO THE STANDALONE FINANCIAL STATEMENTS

A. CORPORATE INFORMATION

National Plastic Industries Limited ("the Company") is a listed entity incorporated in India. The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report.

B. SIGNIFICANT ACCOUNTING POLICIES

B.1 BASIS OF PREPARATION AND PRESENTATION

The financial statements have been prepared on the historical cost basis except for Defined Benefit Plan - Plan Assets which has been measured at fair value amount.

The financial statements of the Company have been prepared to comply with the Indian Accounting standards ('Ind AS'), including the rules notified under the relevant provisions of the Companies Act, 2013.

Company's financial statements are presented in Indian Rupees (RS), which is also its functional currency.

The financial statements of the Company have been prepared to comply with the Indian Accounting standards ('Ind AS'), including the rules notified under the relevant provisions of the Companies Act, 2013.

B.2 USE OF ESTIMATES AND JUDGEMENTS

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures of contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

Key sources of estimation of uncertainty at the date of the financial statement, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are in respect of impairment of investments , useful lives of property , plant and equipment , valuation of deferred tax assets and fair value measurement of financial instruments , these are discussed below. Key sources of estimation of uncertainty in respect of revenue recognition , employee benefits and provisions and contingent liabilities have been discussed in their respective policies.

Useful lives of property , plant and equipment

The company reviews the useful life of property , plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

Valuation of deferred tax assets

The Company reviews the carrying amount of deferred tax assets at the end of each reporting period. The policy has been explained under note 2(i).

Fair value measurement of financial instruments

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow model. The

inputs to these models are taken from observable markets where possible , but where this is not feasible , a degree of judgement is required in establishing fair values. Judgements include consideration of inputs such as liquidity risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

B.3 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Property, plant and equipment

Property, plant and equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Expenses incurred relating to construction of factory extension at Silvasa , Patna and Nellore during the construction stage prior to its intended use are disclosed under Capital Work - in - Progress.

Depreciation on property, plant and equipment is provided using straight line method Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013

Sr No.	Particular	Useful Life (in Years)
1	Land	30
2	Buildings	30
3	Plant & Machinery	15
4	Dies & Moulds	15
5	Furniture & Fixtures	10
6	Vehicles	8
7	Office Equipment	8
8	Electrical Installation	10
9	Others	5

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Gains or losses arising from derecognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

(b) Leases

Effective from 1 April 2019, the Company has applied Ind AS 116, which replaces the existing lease standard, Ind AS 17 Leases and other interpretations. The Company has applied Ind AS 116 using the modified retrospective approach and has accordingly not restated the comparative information. The Company at the inception of a contract,

assesses whether a contract, is or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Ind AS 116 introduces a single balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. The Company has elected not to recognise right-of-use of assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low value assets. The Company recognises the lease payments associated with these leases as an expense on a straight line basis over the lease term. Lessor accounting remains similar to the accounting under the previous standard i.e. lessor continues to classify leases as finance or operating lease. This policy is applied to contracts entered into, or changed, on or after 1 April 2019. For contracts entered into before 1 April 2019, the determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct cost incurred and an estimate of cost to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight line method from the commencement date to the earlier of the end of the useful life or the end of the lease term. The estimated useful life of the right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payment of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero. On the Balance Sheet, right-of-use assets have been included in property, plant and equipment and lease liabilities have been included in borrowings and other financial liabilities.

In the comparative period, leases of property, plant and equipment where the Company, as lessee, had substantially all the risks and rewards of ownership was classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or

other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Leases in which a significant portion of the risks and rewards of ownership was not transferred to the Company as lessee was classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) was charged to profit or loss on a straightline basis over the period of the lease unless the payments was structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

As a lessor

Lease income from operating leases, where the Company is a lessor, is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflation.

(c) Inventory

Items of Inventories are measured at lower of cost and net realisable value after providing for obsolescence, if any, except in case of by-products which are valued at net realisable value. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overheads net of recoverable taxes incurred in bringing them to their respective present location and condition.

(d) Impairment of non-financial assets - property, plant and equipment and intangible assets

INDAS 36 on Impairment of Assets requires every company to test for the impairment of its PPE annually. Due to the nature of business and products of the Company, the moulding process of production, the assets do not have a very high risk of impairment. Further Management has view that Moulding machines do not get impaired on their own as they host the moulds through which the moulding of plastic and other products happen. Moulds have a useful life in terms capacity of no of items to be produced. However, the Company maintains the moulds very well as a result; the moulds outlive their useful life.

(e) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(f) Employee Benefits Expense

Short Term Employee Benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

Defined Benefit Plans

The Company pays gratuity to the employees whoever has completed five years of service with the Company at the time of resignation/superannuation. The gratuity is paid @15 days

salary for every completed year of service as per the Payment of Gratuity Act 1972.

The liability in respect of gratuity and other post-employment benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services.

Re-measurement of defined benefit plans in respect of post-employment are charged to the Other Comprehensive Income.

(g) Tax Expenses

The tax expense for the period comprises current and deferred tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the comprehensive income or in equity. In which case, the tax is also recognised in other comprehensive income or equity.

Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the reporting period.

Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

(h) Foreign currencies transactions and translation

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency closing rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss.

(i) Revenue recognition

Effective from April 1, 2018, the Company has applied IND AS 115 which establishes a comprehensive framework for determining whether, how much and when the revenue is to be recognised. IND AS 115 replaces IND AS 18 Revenue and IND AS 11 Construction Contracts. Para D35 of IND AS 101 First Time Adoption of IND AS states that a first time adopter is not required to restate contracts that were completed before the earliest reporting period. Since Company does not have any kind of continuing contracts, the Company has adopted IND AS 115 using the prospective method.

IND AS 115 prescribes a five step model for revenue recognition;

- 1) Identifying the Contract with the Customer
- 2) Identifying the Performance Obligation
- 3) Determining the Transaction Price
- 4) Allocating the Transaction Price to the Performance Obligation
- 5) Recognising the Revenue proportionately.

The Company earns revenue primarily from sale of household furnitures.

Accordingly revenue from domestic sale of goods is recognised when the performance obligations (i.e. delivery of the goods) are completed to the buyer.

Company follows industry practice of providing a right to return the defective products / parts and replaces the same. As required under the para 55 of IND AS 115, return liability has been recognised on the basis of expected returns which in turn have been computed on the basis of average returns of the Company over the past three years.

Revenue from export sale of goods is recognised when the performance obligations (i.e. loading of the goods on the vessel) are completed in case of Free on Board (FOB) contracts. In cases of Export sales under Cost including Freight contracts (CIF) Company recognises the revenue as per the general industry practise (i.e loading the goods on the vessel date). However Company has ensured that the delivery of all the revenue recognised as at the reporting date have actually reached the desired destination before finalisation of the accounts thereby ensuring the completeness of performance obligation.

Revenue from rendering of services is recognised when the performance of agreed contractual task has been completed.

Revenue from sale of goods is measured at the transaction price mutually decided at the time of execution of the contracts / Purchase Orders with the customers. The rates for the goods or services differ from customer to customer.

Revenue from operations includes sale of goods, services, goods and service tax (GST) and adjusted for discounts (net).

Interest income

Interest income from a financial asset is recognised using effective interest rate method.

Significant Judgements in applying IND AS 115

Timing of satisfaction of performance obligation	Since the Company is purely in the business of sale of furniture the timing of satisfaction of the performance obligation is clearly the date on which the intended goods are delivered to the customer
Timing of satisfaction of performance obligation (Export Sales)	In case of FOB sales, the timing of satisfaction of performance obligation would be date of loading of the goods on the vessel.
Timing of satisfaction of performance obligation (Export Sales)	In case of CIF sales, Company has taken a judgement based on current industry practice to consider these transaction in same line as that of FOB sales.
Transaction price & the amounts allocated to the performance obligations	Individual contracts / purchase orders are executed with each customer categorically specifying the individual unit rate decided after mutual negotiations.
Method of recognising revenue	Output Method
Reason for selection of Output method	As stipulated in Para B15, since the measurement of performance obligation can be directly evidenced, output method of revenue recognition is adopted.

(j) Government Grants

Grants received towards depreciable assets has been recognised as income over the period of useful life of the assets through which it is depreciated.

Grants received towards non depreciable assets has been recognised as income over the period in which expenses have been incurred to realise income from those assets.

(k) Financial instruments

i) Financial Assets

A. Initial recognition and measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

B. Subsequent measurement

a) Financial assets carried at amortised cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

* The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

* Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument)

For trade receivables Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company has its own adopted policy to determine impairment loss on the portfolio of trade receivables. At every reporting date this policy is reviewed and changes in the forward looking estimates are analysed.

ii) Financial liabilities

A. Initial recognition and measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

B. Subsequent measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the

short maturity of these instruments.

iii) Derecognition of financial instruments

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

C. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The preparation of the Company's financial statements requires management to make judgement, estimates and assumptions that affect the reported amount of revenue, expenses, assets and liabilities and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities

a) Depreciation / amortisation and useful lives of property plant and equipment / intangible assets

Property, plant and equipment / intangible assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

b) Recoverability of trade receivable

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

c) Provisions

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability requires the application of judgement to existing facts and circumstances, which can be subject to change. The carrying amounts of provisions and liabilities are reviewed regularly and revised to take account of changing facts and circumstances.

d) Impairment of non-financial assets

Due to the nature of business and products of the Company, the moulding process of production, the assets do not have a very high risk of impairment. Further Management has view that Moulds do not get impaired on their own as they host the moulds through which the moulding of plastic and other products happen. Moulds have a useful life in terms capacity of no of items to be produced. However, the Company maintains the

moulds very well as a result; the moulds outlive their useful life.
