**INDEPENDENT AUDITOR'S REPORT**

To
The Members of
GROVY INDIA LIMITED

Report on the audit of the Financial Statements**Opinion**

I have audited the accompanying Ind AS financial statements of Grovy India Limited which comprise the Balance sheet as at March 31, 2020, the Statement of Profit and Loss Including the statement of other Comprehensive Income, the cash flow statement and the statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In my opinion and to the best of my information and according to the explanations given to me, the aforesaid financial statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards under section 133 of the Companies Act, 2013 read with the companies (Indian Accounting Standard) Rules, 2015, as amended and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and its Loss for the year ended on that date.

Basis for opinion

I have conducted audit in accordance with the standards on auditing specified under section 143 (10) of the Companies Act, 2013. My responsibilities under those Standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of my report. I am independent of the Company in accordance with the Code Of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to my audit of the financial statements under the provisions of the Act and the rules there under, and I have fulfilled my other ethical responsibilities in accordance with these requirements and the code of ethics. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexure to Board's Report, Business Responsibility Report but does not include the financial statements and my auditor's report thereon.

My opinion on the financial statements does not cover the other information and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of my audit or otherwise appears to be materially misstated.

Management's Responsibility for the Financial Statements

The Company's board of directors are responsible for the matters stated in section 134 (5) of the Companies Act, 2013 with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The boards of directors are also responsible for overseeing the Company's financial reporting process.

**Auditor's Responsibilities for the audit of the financial statements**

My objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, I exercise professional judgment and maintain professional skepticism throughout the audit I also:

- 1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Clause (i) of section 143(3) of the Companies Act, 2013, requiring reporting on the adequacy of the Internal Financial Controls with reference to financial statements in place and the operating effectiveness of such control, is not applicable to the company.
- 3) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 4) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

I also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements:-

As required by the Companies (Auditor's Report) Order, 2016 issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, we enclose in the **Annexure A**, a statement on the matters specified in paragraph 3 and 4 of the said Order, to the extent applicable to the Company during the year under review.

As required by Section 143(3) of the Act, we report that:

- (a) I have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
- (c) The balance sheet, the statement of profit and loss, and the cash flow statement dealt with by this report are in agreement with the books of account;
- (d) In my opinion, the aforesaid financial statements comply with the accounting standards specified under section 133 of the Companies Act, 2013 read with the companies (Indian Accounting Standard) Rules, 2015, as amended and other accounting principles generally accepted in India
- (e) On the basis of the written representations received from the directors as on March 31, 2020 taken on record by the board of directors, none of the directors is disqualified as on March 31, 2020 from being appointed as a director in terms of Section 164 (2) of the Act;
- (f) Since the Company's turnover as per last audited financial statements is less than Rs.50 Crores and its borrowings from banks and financial institutions at any time during the year is less than Rs.25 Crores, the Company is exempted from

- getting an audit opinion with respect to the adequacy of the internal financial controls over financial reporting of the company and the operating effectiveness of such controls vide notification dated June 13, 2017; and
- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules 2014, in our opinion and to the best of our information and according to the explanations given to us:
- a. The Company does not have any pending litigations which would impact its financial position;
 - b. The Company did not have any long-term contracts including derivate contracts for which there were any material foreseeable losses.

Note 2.20:- Scheme of Amalgamation

The National Company Law Tribunal vide its order dated september,19 2019 approved the Scheme of Amalgamation ('the Scheme') amongst the Company, Ankur Buildtech Private Limited(ABPL), Ganesh Contactors And Colonisers Private Limited(GCCPL), Ganesh Promoters Private Limited(GPPL) and to make the Scheme effective, the Company was required to file the same with Registrar of Companies (ROC). Accordingly, the Company filed the Scheme on September 10, 2019 with the ROC. The financial results of the Company for the years ended March 31, 2020 and March 31, 2019 also includes the results of erstwhile entities, i.e.ABPL,GCCPL&GPPL.

In accordance with the accounting treatment as prescribed by the aforementioned order, the Company accounted for the business combination as per requirement of Appendix C of Ind AS103 Business Combination which lays down the principles in respect of accounting for business combination of entities or businesses under common control. As required by the standard, pooling of interest method has been considered for common control business combination and accordingly, the assets and liabilities are reflected in the books of the Company at their respective carrying amounts. The surplus of the value of the net assets acquired over the face value of the equity shares issued by the Company pursuant to the amalgamation has been transferred to 'capital reserve account' in the financial statements of the Company.

In accordance with the requirement of Appendix C of Ind AS 103 Business Combination, the financial information in the financial statements in respect of prior periods has been restated as if the business combination had occurred from the beginning of the preceding period in the financial statements i.e., April 1, 2018 and consequently, the amounts for the preceding periods include the results of the aforementioned business acquired. Details of the summarized values of assets and liabilities of Ankur Buildtech Private Limited (ABPL), Ganesh Contactors And Colonisers Private Limited(GCCPL), Ganesh Promoters Private Limited(GPPL) as acquired and the treatment of the difference between the net assets acquired over face value of equity shares issued is as under:

**GROVY INDIA LIMITED****Notes to the financial statements for the year ended 31st March 2020****1. Corporate information**

Grovvy India Ltd. ('The Company') is a Public Limited Company incorporated in India. The address of its Corporate office and principal place of business is at 122,1st Floor, Vinobapuri, Lajpat Nagar-II, New Delhi - 110024, India. The main business of the Company is Real Estate and financial market. The Company is listed on BSE Limited.

2. Significant accounting policies

The significant accounting policies applied by The Company in the preparation of its financial statements are listed below. Such accounting policies have been applied consistently to all the periods presented in these financial statements.

2.1 Basis of preparation**a) Statement of compliance with Ind AS:**

These financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to section 133 of the Companies Act, 2013 and the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Act.

b) Basis of measurement:

These financial statements are prepared under the historical cost convention except for the following material items that have been measured at fair value as required by relevant Ind AS :

- certain financial assets (including derivative financial instruments) that are measured at fair value;
- share based payments;
- defined benefit plans - plan assets measured at fair value;
- certain property, plant and equipment measured at fair value (viz leasehold land and freehold land) which has been considered as deemed cost.

The fair values of financial instruments measured at amortized cost are required to be disclosed in the said financial statements. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value measurement:

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (that is, an exit price). It is a market-based measurement, not an entity-specific measurement. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

Where required/appropriate, external valuers are involved

All financial assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy established by Ind As 113, that categories into three levels, the inputs to valuation techniques used to measure fair value. These are based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly(i.e. as prices) or indirectly(i.e. derived from prices).

Level 3 inputs are unobservable inputs for the asset or liability.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

For financial assets and liabilities maturing within one year from the Balance Sheet date and which are not carried at fair value, the carrying amount approximates fair value due to the short maturity of these instruments.

The Company recognizes transfers between levels of fair value hierarchy at the end of reporting period during which change has occurred.

**c) Current non-current classification:**

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents. Based on the nature of products / services and time between acquisition of assets for processing / rendering of services and their realization in cash and cash equivalents, operating cycle is less than 12 months. However, for the purpose of current/non-current classification of assets & liabilities period of 12 months has been considered as normal operating cycle.

d) Functional and presentation currency :

Items included in the financial statements of The Company are measured using the currency of the primary economic environment in which The Company operates (i.e. the "functional currency"). The financial statements are presented in Indian Rupee, the national currency of India, which is the functional currency of The Company.

e) Rounding of amounts:

All amounts disclosed in the financial statements and notes are in Indian Rupees rounded off to zero decimal places as permitted by Schedule III to the Companies Act, 2013, unless otherwise stated.

2.2 Use of estimates

The preparation of financial statements in conformity with the recognition and measurement principles of the Ind AS requires management to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities on the date of the financial statements, and the reported amounts of revenues, expenses and the results of operations during the reporting period. Actual results could differ from those estimates. The estimates and underlying assumptions are reviewed on an "ongoing basis". Such estimates & assumptions are based on management evaluation of relevant facts & circumstances as on date of financial statements. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period; they are recognized in the period of the revision and future periods if the revision affects both current and future periods.

2.3 Revenue recognition**Sale of goods**

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract, which is mainly upon delivery and the amount of revenue can be measured reliably. The Company retains no effective control of the goods transferred to a degree usually associated with ownership and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. Revenue is measured at fair value of the consideration received or receivable, after deduction of any trade discounts, volume rebates and any taxes or duties collected on behalf of the government which are levied on sales such as goods and services tax, value added tax, etc.

Revenue (other than sale)

Revenue (other than sale) is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Claim on insurance company and others, where quantum of accrual cannot be ascertained with reasonable certainty, are accounted for on "acceptance basis".

Export benefits/incentives constituting Duty Draw back, incentives under FPS/FMS/MEIS and duty free advance license scheme are accounted for on accrual basis where there is reasonable assurance that The Company will comply with the conditions attached to them and the export benefits will be received.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of a financial liability or a financial asset to their gross carrying amount.

**Dividend**

Dividend income is recognized when The Company's right to receive dividend is established by the reporting date, which is generally when shareholders approve the dividend.

2.4 Property, plant and equipment (PPE)

Property, plant and equipment is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to The Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Profit and Loss during the period in which they are incurred.

Cost of an item of property, plant and equipment comprises –

- i. its purchase price, including import duties and non –refundable purchase taxes (net of duty/ tax credit availed), after deducting trade discounts and rebates.
- ii. any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
- iii. borrowing cost directly attributable to the qualifying asset in accordance with accounting policy on borrowing cost.
- iv. the costs of dismantling, removing the item and restoring the site on which it is located.

PPE in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes direct costs, related pre-operational expenses and for qualifying assets applicable borrowing costs to be capitalized in accordance with The Company's accounting policy. Administrative, general overheads and other indirect expenditure (including borrowing costs) incurred during the project period which are not directly related to the project nor are incidental thereto, are expensed.

Property, plant and equipment which are not ready for intended use as on the date of Balance Sheet are disclosed as "Capital work-in-progress". They are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other items of PPE, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss.

The Company identifies and determines cost of each component/part of the plant and equipment separately, if the component/part has a cost which is significant to the total cost of the plant and equipment and has useful life that is materially different from that of the remaining plant and equipment.

Machinery spares which meets the criteria of PPE is capitalized and depreciated over the useful life of the respective asset.

Depreciation:

Depreciation on Property, Plant & Equipment (other than freehold land and capital work in progress) is provided on the straight line method, based on their respective estimate of useful lives, as given below. Estimated useful lives of assets are determined based on internal assessment estimated by the management of The Company and supported by technical advice wherever so required. The management believes that useful lives currently used, which is as prescribed under Schedule II to the Companies Act, 2013, fairly reflect its estimate of the useful lives and residual values of Property, Plant & Equipment (considered at 5% of the original cost), though these lives in certain cases are different from lives prescribed under Schedule II.

Type of assets	Useful life in years
Leasehold Land	Over Lease Period i.e. 198 years
Buildings	
Factory Building	No Depreciation Charged
Non Factory Buildings	No Depreciation Charged
Plant and Machinery *	5 – 25 years
Furniture and Fixtures	10 years
Office Equipment	5 years
Vehicles	8 - 10 years
Computers	3 years

*Based on internal technical evaluation and external advise received, the management believes that the useful lives as considered for arriving at the depreciation rates, best represent the period over which management expect to use these assets. Hence, the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II of the Companies Act, 2013.

Assets individually costing Rs. 5,000 or less are fully depreciated in the year of acquisition.

Depreciation of an asset begins when it is available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation of an asset ceases at the earlier of the date that the asset is retired from active use and is held for disposal and the date that the asset is derecognized.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Depreciation methods, useful lives and residual values are reviewed periodically including at the end of each financial year. Any changes in depreciation method, useful lives and residual values are treated as a change in accounting estimate and applied/adjusted prospectively, if appropriate.

2.5 Intangible assets

Identifiable intangible assets are recognized when The Company controls the asset, it is probable that future economic benefits attributed to the asset will flow to The Company and the cost of the asset can be reliably measured.

At initial recognition, the separately acquired intangible assets with finite useful lives are recognized at cost of acquisition. Following initial recognition, the intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any.

Intangible assets not ready for the intended use on the date of the balance sheet are disclosed as 'intangible assets under development. This comprises expenditure on ERP software license fee and its configuration and customization.

Intangible assets are derecognized (eliminated from the balance sheet) on disposal or when no future economic benefits are expected from its use and subsequent disposal.

Gains or losses arising from the retirement or disposal of intangible assets are determined as the difference between the net disposal proceeds and the carrying amount of the asset are recognized as income or expense in the statement of profit and loss.

2.6 Financial instruments

Financial Assets:

Initial recognition and measurement:

Financial assets are recognized when The Company becomes a party to the contractual provisions of the instrument.

On initial recognition, a financial asset is recognized at fair value, except for trade receivables which are initially measured at transaction price. In case of financial assets which are recognized at fair value through profit and loss (FVTPL), its transaction costs are recognized in the statement of profit and loss. In other cases, the transaction costs are added to or deducted from the fair value of the financial assets.

Financial assets are subsequently classified and measured at

- amortized cost (if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding)
- fair value through profit and loss (FVTPL)
- fair value through other comprehensive income (FVOCI).

Equity Instruments:

Investment in subsidiaries is measured at cost less impairment losses, if any.

All investments in equity instruments in scope of Ind AS 109 classified under financial assets are initially measured at fair value.

If the equity investment is not held for trading, The Company may, on initial recognition, irrevocably elect to measure the same either at FVOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis. Equity Instruments which are held for trading are classified as measured at FVTPL.

Fair value changes on an equity instrument is recognized as other income in the Statement of Profit and Loss unless The Company has elected to measure such instrument at FVOCI. Fair value changes excluding dividends, on an equity instrument measured at FVOCI are recognized in OCI. Amounts recognized in OCI are not subsequently reclassified to the Statement of Profit and Loss. Dividend income on the investments in equity instruments are recognized as 'other income' in the Statement of Profit and Loss.

The Company does not have any equity investments designated at FVOCI.

Derivative financial instruments:

The Company uses derivative financial instruments, such as forward currency contracts to mitigate its foreign currency risks and interest rate risks. Such derivative financial instruments are recorded at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

The purchase contracts that meet the definition of a derivative under Ind AS 109 are recognized in the statement of profit and loss.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit or loss.

**Derecognition:**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the cash flows from the asset.

Impairment of Financial Asset:

In accordance with Ind AS 109, The Company applies the expected credit loss ("ECL") model for measurement and recognition of impairment loss on financial assets and credit risk exposures. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables or contract revenue receivables. Simplified approach does not require The Company to track changes in credit risk. Rather, it recognizes impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition. This involves use of provision matrix constructed on the basis of historical credit loss experience and adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and the rates used in the provision matrix.

For recognition of impairment loss on other financial assets and risk exposure, The Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL.

ECL is the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

The Company measures the expected credit loss associated with its assets based on historical trend, industry practices and the business environment in which the entity operates or any other appropriate basis. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss.

Financial Liabilities and equity instruments:**Classification as debt or equity**

Debt and equity instruments issued by The Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a company entity are recognized at the proceeds received, net of direct issue costs.

Financial liabilities**Initial recognition and measurement:**

Financial liabilities are recognized when The Company becomes a party to the contractual provisions of the instrument. Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The fair value of a financial instrument at initial recognition is normally the transaction price. If The Company determines that the fair value at initial recognition differs from the transaction price, difference between the fair value at initial recognition and the transaction price shall be recognized as gain or loss unless it qualifies for recognition as an asset or liability. This normally depends on the relationship between the lender and borrower or the reason for providing the loan. Accordingly in case of interest-free loan from promoters to The Company, the difference between the loan amount and its fair value is treated as an equity contribution to the Company.

In accordance with Ind AS 113, the fair value of a financial liability with a demand feature is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

The Company's financial liabilities include trade and other payables and loans and borrowings including bank overdrafts.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss, unless and to the extent capitalized as part of costs of an asset.

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Trade and other payables

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the Derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is currently enforceable legal right to offset the recognized amount and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

2.7 Impairment of Non-financial assets

The carrying amounts of non-financial assets other than inventories are assessed at each reporting date to ascertain whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. An impairment loss is recognised, as an expense in the Statement of Profit and Loss, for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. Value in use is ascertained through discounting of the estimated future cash flows using a discount rate that reflects the current market assessments of the time value of money and the risk specific to the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels into cash generating units for which there are separately identifiable cash flows.

Impairment losses recognised in prior years are reversed when there is an indication that the impairment losses recognised no longer exist or have decreased. Such reversals are recognised as an increase in carrying amounts of assets to the extent that it does not exceed the carrying amounts that would have been determined (net of amortization or depreciation) had no impairment loss been recognized in previous years.

2.8 Borrowing costs

Borrowing costs comprises interest expense on borrowings calculated using the effective interest method and exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period.

The effective interest rate (EIR) is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. EIR calculation does not include exchange differences.

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are included in the cost of those assets. Such borrowing costs are capitalised as part of the cost of the asset when it is probable that they will result in future economic benefits to the entity and the costs can be measured reliably. Other borrowing costs are recognised as an expense in the period in which they are incurred.

The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress.

Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are interrupted or completed.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

2.9 Foreign currency transactions

The financial statements are presented in Indian Rupees (INR), the functional currency of The Company. Items included in the financial statements of The Company are recorded using the currency of the primary economic environment in which The Company operates (the 'functional currency').

Foreign currency transactions are translated into the functional currency using exchange rates at the date of the transaction. Foreign exchange gains and losses from settlement of these transactions, and from translation of monetary assets and liabilities at the reporting date exchange rates are recognised in the Statement of Profit and Loss.

Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

Under Previous GAAP, The Company had opted for paragraph 46A of Accounting Standard for 'Effect of Changes in Foreign Exchange Rates' (AS 11) which provided an alternative accounting treatment whereby exchange differences arising on long term foreign currency monetary items relating to depreciable capital asset can be added to or deducted from the cost of the asset and should be depreciated over the balance life of the asset.

Ind AS 101 includes an optional exemption that allows a first-time adopter to continue the above accounting treatment in respect of the long-term foreign currency monetary items recognised in the financial statements for the period ending immediately before the beginning of the first Ind AS financial reporting period as per the previous GAAP. The Company has elected to avail this optional exemption. However, the capitalization of exchange differences is not allowed on any new long term foreign currency monetary item recognized from the first Ind AS financial reporting period.

2.10 Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Company as a lessee

A lease is classified at the inception date as a finance lease or an operating lease.

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Finance lease:

Assets held under finance leases are initially recognised as assets of The Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with The Company's policy on borrowing cost. Contingent rentals are recognised as expenses in the periods in which they are incurred.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that The Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease:

In respect of assets taken on operating lease, lease rentals are recognized as an expense in the Statement of Profit and Loss on straight line basis over the lease term unless another systematic basis is more representative of the time pattern in which the benefit is derived from the leased asset or the payments to the lessor are structured to increase in the line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

2.11 Inventories

Inventories are valued at the lower of cost and net realisable value.

Costs incurred in bringing each product to its present location and condition, are accounted for as follows:

- Raw materials, stores and spares: cost includes cost of purchase (viz. the purchase price, import duties and other taxes (other than those subsequently recoverable by the entity from the taxing authorities), and transport, handling and other costs directly attributable to the acquisition and is net of trade discounts, rebates and other similar items) and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on Moving Weighted Average Method.

- Materials and other supplies held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

- Spare parts, which do not meet the definition of property, plant and equipment are classified as inventory.

- Finished goods and work in progress: cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs.

- Traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on first in, first out basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Obsolete, slow moving and defective inventories are identified from time to time and, where necessary, a provision is made for such inventories.

2.12 Employee benefits

Short- term employee benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, social security contributions, short term compensated absences (paid annual leaves) etc. are measured on an undiscounted basis at the amounts expected to be paid when the liabilities are settled and are expensed in the period in which the employee renders the related service.

**Post-employment benefits :****i) Defined contribution plan**

The defined contribution plan is post employment benefit plan under which The Company contributes fixed contribution to a government administered fund and will have no obligation to pay further contribution. The Company's defined contribution plan comprises of Provident Fund, Employee State Insurance Scheme and Labour Welfare Fund. The Company's contribution to defined contribution plans are recognized in the Statement of Profit and Loss in the period in which employee renders the related service.

ii) Defined benefit plan

The Company's obligation towards gratuity liability is a "defined benefit" obligation. The present value of the defined benefit obligations is determined on the basis of actuarial valuation using the projected unit credit method. The rate used to discount "defined benefit obligation" is determined by reference to market yields at the Balance Sheet date on Indian Government Bonds for the estimated term of obligations.

The amount recognised as 'Employee benefit expenses' in the Statement of Profit and Loss is the cost of accruing employee benefits promised to employees over the current year and the costs of individual events such as past/future service benefit changes and settlements (such events are recognised immediately in the Statement of Profit and Loss).

The amount of net interest expense, calculated by applying the liability discount rate to the net defined benefit liability or asset, is charged or credited to 'Finance costs' in the Statement of Profit and Loss.

Re-measurement of net defined benefit liability/ asset pertaining to gratuity comprise of actuarial gains/ losses (i.e. changes in the present value of the defined benefit obligation resulting from experience adjustments and effects of changes in actuarial assumptions), the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest) and is recognised immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss account in subsequent periods.

Other long-term employee benefit obligations:

The liabilities for earned leave that are not expected to be settled wholly within 12 months are measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in the Statement of Profit and Loss. Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short term employee benefit.

2.13 Share-Based Payments:

None of the employees of the Company received remuneration in the form of share based payments in consideration of the services rendered (equity settled transactions).

Under the equity settled share based payment, the fair value on the grant date of the awards given to employees is recognised as 'employee benefit expense' with a corresponding increase in equity over the vesting period. The fair value of the options on the grant date is calculated by an independent valuer on the basis of Black Scholes model.

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share. When the options are exercised, The Company issues fresh equity shares.

2.14 Government Grant:

The company has not received any government grants.

Government grants are recognised only when there is reasonable assurance that The Company will comply with the conditions attaching to them and the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which The Company recognises as expenses the related costs for which the grants are intended to compensate.

Accordingly, government grants :

a) related to or used for assets are included in the Balance Sheet as deferred income and recognised as income in profit or loss on a systematic basis over the useful life of the assets.

b) related to an expense item is recognised in the statement of profit and loss on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed and presented as deduction from the related/relevant expense.

In the unlikely event that a grant previously recognised is ultimately not received, it is treated as a change in estimate and the amount cumulatively recognised is expensed in the Statement of Profit and Loss.

Export benefits available under prevalent schemes are accrued in the year in which the goods are exported and there is no uncertainty in receiving the same.

2.15 Non-current assets held for sale and discontinued operations

The company does not have discontinued operations

Non-current assets (or disposal group) are classified as "held for sale" if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. The criteria for "held for sale" is regarded as met only when the assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sale of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned.

Non-current assets held for sale are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

If the criteria for held for sale is no longer met, the asset ceases to be classified as held for sale and the asset shall be measured at the lower of :

- (a) its carrying amount before the asset was classified as held for sale, adjusted for any depreciation, amortisation or revaluations that would have been recognised had the asset not been classified as held for sale, and
- (b) its recoverable amount at the date of the subsequent decision not to sell.

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increase in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Property, plant and equipment and intangible assets once classified as "held for sale" are not depreciated or amortised.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations,
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

Discontinued operations are excluded from the results of continuing operations and are presented as profit or loss before / after tax from discontinued operations in the statement of profit and loss.

2.16 Taxation

Tax expense comprises of current and deferred tax and includes any adjustments related to past periods in current and/or deferred tax adjustments that may become necessary due to certain developments or reviews during the relevant period.

Current income tax:

Tax on income for the current period is determined on the basis of taxable income (or on the basis of book profits wherever minimum alternate tax is applicable) and tax credits computed in accordance with the provisions of the Income Tax Act 1961, and based on the expected outcome of assessments/appeals.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised, either in other comprehensive income or directly in equity, is also recognized in other comprehensive income or in equity, as appropriate and not in the Statement of Profit and Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax:

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses unabsorbed tax depreciation. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred Tax Assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax assets in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realised.

2.17 Provisions and contingencies

Provisions:

Provisions are recognised when The Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date.

If the effect of the time value of money is material, provisions are discounted to reflect its present value using a current pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Where The Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement.

Contingencies:

Contingent liabilities

A contingent liability is:

- a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of The Company, or
- a present obligation that arises from past events but is not recognised because :
 - it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or"
 - the amount of the obligation cannot be measured with sufficient reliability.

Contingent liabilities are not recognized but disclosed unless the contingency is remote.

Contingent assets

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of The Company.

Contingent assets are not recognised but are disclosed when the inflow of economic benefits is probable. When inflow is virtually certain, an asset is recognized.

**2.19 Related party**

A related party is a person or entity that is related to the reporting entity and it includes:

- (a) A person or a close member of that person's family if that person:
- I. has control or joint control over the reporting entity;
 - II. has significant influence over the reporting entity; or
 - III. is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.
- (b) An entity is related to the reporting entity if any of the following conditions apply:
- I. The entity and the reporting entity are members of the same Group.
 - II. One entity is an associate or joint venture of the other entity.
 - III. Both entities are joint ventures of the same third party.
 - IV. One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - V. The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity.
 - VI. The entity is controlled or jointly controlled by a person identified in (a).
 - VII. A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
 - VIII. The entity, or any member of a Group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity including:

- (a) that person's children, spouse or domestic partner, brother, sister, father and mother;
- (b) children of that person's spouse or domestic partner; and
- (c) dependents of that person or that person's spouse or domestic partner.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity.

Related party transactions and outstanding balances disclosed in the financial statements are in accordance with the above definition as per Ind As 24.

2.20 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short term deposits/investments with an original maturity of three months or less from the date of acquisition, which are subject to an insignificant risk of changes in value. These exclude bank balances (including deposits) held as margin money or security against borrowings, guarantees etc. being not readily available for use by The Company.

For the purpose of the Statement of cash flows, cash and cash equivalents consist of cash and short term deposits and exclude items which are not available for general use as on the date of Balance Sheet, as defined above, net of bank overdrafts which are repayable on demand where they form an integral part of an entity's cash management.

**2.21 Cash Flow Statement**

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method as set out in Ind AS 7 'Statement of Cash Flows', adjusting the net profit for the effects of:

- i. changes during the period in inventories and operating receivables and payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealized foreign currency gains and losses, and"
- iii. all other items for which the cash effects are investing or financing cash flows.

2.22 Earnings per share

The Basic Earnings per equity share ('EPS') is computed by dividing the net profit or loss after tax before other comprehensive income for the year attributable to the equity shareholders of The Company by weighted average number of equity shares outstanding during the year. Ordinary shares that will be issued upon the conversion of a mandatorily convertible instrument are included in the calculation of basic earnings per share from the date the contract is entered into. Contingently issuable shares are treated as outstanding and are included in the calculation of basic earnings per share only from the date when all necessary conditions are satisfied (i.e the events have occurred).

Diluted earnings per equity share are computed by dividing the net profit or loss before OCI attributable to equity holders of The Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares (including options and warrants). The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value. Dilutive potential equity shares are deemed converted as of the beginning of the period unless issued at a later date. Anti-dilutive effects are ignored.

2.23 Merger with Other Companies

The National Company Law Tribunal vide its order dated september,19 2019 approved the Scheme of Amalgamation ('the Scheme') amongst the Company, Ankur Buildtech Private Limited(ABPL), Ganesh Contactors And Colonisers Private Limited(GCCPL), Ganesh Promoters Private Limited(GPPL) and to make the Scheme effective, the Company was required to file the same with Registrar of Companies (ROC). Accordingly, the Company filed the Scheme on September 10, 2019 with the ROC. The financial results of the Company for the years ended March 31, 2020 and March 31, 2019 also includes the results of erstwhile entities, i.e. ABPL,GCCPL&GPPL.

In accordance with the accounting treatment as prescribed by the aforementioned order, the Company accounted for the business combination as per requirement of Appendix C of Ind AS103 Business Combination which lays down the principles in respect of accounting for business combination of entities or businesses under common control. As required by the standard, pooling of interest method has been considered for common control business combination and accordingly, the assets and liabilities are reflected in the books of the Company at their respective carrying amounts. The surplus of the value of the net assets acquired over the face value of the equity shares issued by the Company pursuant to the amalgamation has been transferred to 'capital reserve account' in the financial statements of the Company.

In accordance with the requirement of Appendix C of Ind AS 103 Business Combination, the financial information in the financial statements in respect of prior periods has been restated as if the business combination had occurred from the beginning of the preceding period in the financial statements i.e., April 1, 2018 and consequently, the amounts for the preceding periods include the results of the aforementioned business acquired. Details of the summarized values of assets and liabilities of Ankur Buildtech Private Limited(ABPL), Ganesh Contactors And Colonisers Private Limited(GCCPL), Ganesh Promoters Private Limited(GPPL) as acquired and the treatment of the difference between the net assets acquired over face value of equity shares issued is as under:
