## Net worth (INR Crore)

Calculated as per IND-AS

## Debt/Equity (x)#

## CRAR (%)

## Annual household income limit raised to INR 3 Lakh

- Increased annual household limit from INR 1.25 Lakh to INR 3 Lakh will provide more headroom to NBFC-MFIs to lend to more customers.
- This will help microfinance lenders to service consumers from diverse segments.

## Maximum FOIR of 50% considering all outstanding loans of the household

- The regulator has capped the monthly loan repayment of borrowers, it should not exceed half the monthly household income.
- This will reduce the pressure of EMI repayments on the borrowers, as well as lead to lower delinquency and lower credit costs for the industry.

## Removal of Pricing Cap

- The RBI removal of the interest rate ceiling on loans offered by NBFC-MFIs has put all microfinance lenders including banks, small finance banks, NBFC and not-for-profit companies on a uniform regulatory platform.
- This has allowed lenders to go for risk-based pricing.

## Qualifying assets limit revised from 85% of net assets to 75% of the total assets

- Increasing the non-qualifying asset limit provide MFIs more flexibility to experiment and innovate new products and achieve more balanced lending portfolio, reduce the cyclicality and volatility impact on the balance sheet, and strengthen the ability of institutions to weather any external risks.
